STOP DESTROYING OUR EARTH, AIR, CLIMATE!! TAKE SOME SCIENCE CLASSES, NOT BAKING AND HOME-ECONOMICS AND WOOD-WORKING....DOESN'T MAKE FOR VERY INTELLIGENT PEOPLE!!

I, along with nearly 3,000 other Indiana Michigan Power (I&M) customers since 2014, have been asking I&M to plan a retirement of the AEP-Rockport coal plant. I ask you to oppose I&M's request in Cause No. 44871 and ask the Indiana Utility Regulatory Commission to force the wealthy corporate owners of Rockport Unit 2- not Hoosier families - to pay for these costly pollution controls.

Rockport Unit 2 is owned by five wealthy out-of-state corporations and Wall Street banks: General Electric, Verizon, JP Morgan, Citigroup and tobacco giant Philip Morris. I&M customers are being asked to pay $260 million over the next 10 years so these rich companies can get even richer.

I support reducing air pollution, but I&M customers should not be required to pay for pollution controls, when they will only be useful for three short years before I&M's lease expires. I ask you to oppose this plan and protect Indiana families from this outrageous corporate greed and a system that seems to benefit corporations at the expense of working people.

Solar is where our energy future is; it doesn't pollute, it is FREE energy we are missing out on by not collecting more of it every day. Rockport is the past; stop investing in something that hurts everyone by polluting. Coal is the horse-drawn carriage of energy. Don't be Scrooge McDuck! There are billions to be made in the renewable energy sector.

I, along with nearly 3,000 other Indiana Michigan Power (I&M) customers since 2014, have been asking I&M to plan a retirement of the AEP-Rockport coal plant. Save Maumee Grassroots Organization works on water quality issues. The Rockport Unit 2 works against water quality in our region and continues to harm with its emissions. It is in the best interest of Hoosiers to shut this facility down and protect the people you serve. Thank you for considering our plea.
Respectfully Submitted

I ask you to oppose I&M's request in Cause No. 44871 and ask the Indiana Utility Regulatory Commission to force the wealthy corporate owners of Rockport Unit 2- not Hoosier families - to pay for these costly pollution controls.

Rockport Unit 2 is owned by five wealthy out-of-state corporations and Wall Street banks: General Electric, Verizon, JP Morgan, Citigroup and tobacco giant Philip Morris. I&M customers are being asked to pay $260 million over the next 10 years so these rich companies can get even richer.

I support reducing air pollution, but I&M customers should not be required to pay for pollution controls, when they will only be useful for three short years before I&M's lease expires. I ask you to oppose this plan and protect Indiana families from this outrageous corporate greed and a system that seems to benefit corporations at the expense of working people.

It seems to me that I&M would be more inclined to invest in renewable, sustainable enregy for its customers. Instead you are choosing to invest in coal that is going the way of the dinosaur. It's all about the "quick" fix that makes the company more money. You are more interested in your investors than you are in your customers. More corporate greed. Where does it end?

I, along with nearly 3,000 other Indiana Michigan Power (I&M) customers since 2014, have been asking I&M to plan a retirement of the AEP-Rockport coal plant. If we stay to this course we will never be able to switch to a cleaner way and more efficient way to receive energy, did you know that if we used wave movement to harness energy we could power more than 50% of the earth. It's ridiculous that the environment is not a top priority to the American people and these top corporations, as time progresses what will money buy when there is nothing left from our planet, 50 years from now Florida will be below water, it's our time now to stop this old way of getting energy and start looking for cleaner solutions.

I, along with nearly 3,000 other Indiana Michigan Power (I&M) customers since 2014, have been asking I&M to plan a retirement of the AEP-Rockport coal plant. I ask you to oppose I&M's request in Cause No. 44871 and ask the Indiana Utility Regulatory Commission to force the wealthy corporate owners of Rockport Unit 2- not Hoosier families - to pay for these costly pollution controls.

Rockport Unit 2 is owned by five wealthy out-of-state corporations and Wall Street banks: General Electric, Verizon, JP Morgan, Citigroup and tobacco giant Philip Morris. I&M customers are being asked to pay $260 million over the next 10 years so these rich companies can get even richer.

I support reducing air pollution, but I&M customers should not be required to pay for pollution controls, when they will only be useful for three short years before I&M's lease expires. I ask you to oppose this plan and protect Indiana families from this outrageous corporate greed and a system that seems to benefit corporations at the expense of working people.

I keep a list of why I should NOT live in Indiana. It grows on at least an every other month basis. Relying on coal and having a coal plant that is the sixth largest carbon polluter in the U.S. has been a reason for me to leave Indiana for a long, long time. It's time for Indiana to get with it. States around us are doing more to make sure their communities are sustainable and healthy places for their citizens to live. I'm also embarrassed that Indiana is not a better neighbor. (Remember when we were sued or threatened with a lawsuit by neighboring states for dumping toxins in Lake Michigan? This was when Mitch Daniels was governor.) Please vote to close this plant down now. Let's not have to deal with lawsuits to stop Indiana's negligent actions. Sheryl Swingley, 3908 N. Vienna Woods Drive, Muncie, IN 47304.

Enough with the privatizing of our States.

I, along with nearly 3,000 other Indiana Michigan Power (I&M) customers since 2014, have been asking I&M to plan a retirement of the AEP-Rockport coal plant. I ask you to oppose I&M's request in Cause No. 44871 and ask the Indiana Utility Regulatory Commission to force the wealthy corporate owners of Rockport Unit 2- not Hoosier families - to pay for these costly pollution controls.

Rockport Unit 2 is owned by five wealthy out-of-state corporations and Wall Street banks: General Electric, Verizon, JP Morgan, Citigroup and tobacco giant Philip Morris. I&M customers are being asked to pay $260 million over the next 10 years so these rich companies can get even richer.

I support reducing air pollution, but I&M customers should not be required to pay for pollution controls, when they will only be useful for three short years before I&M's lease expires. I ask you to oppose this plan and protect Indiana families from this outrageous corporate greed and a system that seems to benefit corporations at the expense of working people.

Dear Members of the IURC - The need for better pollution control in the Rockport Unit 2 is long overdue. I&M and the state should be moving away from coal-based power in this day and age to more renewable options. However, if the project continues I do not think it fair for the costs to be borne by citizens. Company CEOs and shareholders (of which I am one in related utilities) have an ethical responsibility to reinvest some profits into improving and sustaining the corporation and I&M should be no different.

I, along with nearly 3,000 other Indiana Michigan Power (I&M) customers since 2014, have been asking I&M to plan a retirement of the AEP-Rockport coal plant. C'mon, guys. Didn't you hear the NPR article on Black lung disease? It is killing thousands of miners. Haven't you heard how cheap wind energy is nowadays? Don't you care about the children with asthma, or the dirt and pollution? Why invest in a literally dead end resource that rapes the land and kills people. Invest in people and your profits will soar. Become a leader in innovation, not stuck in a rut.

At some point, a 30-year old car with 200k miles that's being held together with duct tape and baling wire isn't worth spending money to fix anymore - especially if it's my money I&M wants to spend. When it's cheaper and cleaner in the long run to buy a new car (and when it keeps jobs and money in Indiana), then it's time to do it. Please say no.

I, along with nearly 3,000 other Indiana Michigan Power (I&M) customers since 2014, have been asking I&M to plan a retirement of the AEP-Rockport coal plant. As Conservation Chair of the South Bend-Elkhart Audubon Society, an organization of some 800 members in St. Joseph and Elkhart Counties, I urge the Commission to refuse to authorize I & M to pass on the cost of pollution controls for its Rockport Unit 2 onto us northern Indiana rate-payers. It's unfair to us to pay for these controls while the profits go to the unit's wealthy corporate owners. It's high time to retire this highly polluting, outdated, nineteenth-century technology and replace the unit's capacity with clean energy sources such as wind and solar. In Ohio, our neighbor to the east, AEP is investing in 400 megawatts of solar power; in Indiana I & M is developing just fifteen megawatts of solar power. If I & M's parent company can create renewable energy in Ohio, why not in Indiana?

To: Mr. William Fine
Indiana Utility Consumer Counselor
Consumer Services Staff

I, along with nearly 3,000 other Indiana Michigan Power (I&M) customers since 2014, have been asking I&M to plan a retirement of the AEP-Rockport coal plant. I ask you to oppose I&M's request in Cause No. 44871 and not require Hoosier families to pay for this expensive, outdated plant.

Our community needs I&M to generate local clean energy jobs and investment. I&M must start planning now to phase out Rockport 2 when the lease expires in 2022, and transition to less expensive, cleaner energy in I&M communities like mine. I&M's own 20-year energy plan showed that it would cost less to end the Rockport lease and invest in cleaner energy than to pursue I&M's plan to keep burning coal at AEP-Rockport.

I support reducing air pollution, but I&M customers should not be required to pay for pollution controls, when they will only be useful for three short years before I&M's lease expires. I ask you to oppose this plan and protect Indiana families from higher bills to keep an outdated, expensive and unnecessary power plant alive.

I&M must start planning now to phase out Rockport 2 when the lease expires in 2022, and transition to less expensive, cleaner energy in I&M communities like mine. I&M's own 20-year energy plan showed that it would cost less to end the Rockport lease and invest in cleaner energy than to pursue I&M's plan to keep burning coal at AEP-Rockport.

I support reducing air pollution, but I&M customers should not be required to pay for pollution controls, when they will only be useful for three short years before I&M's lease expires. I ask you to oppose this plan and protect Indiana families from higher bills to keep an outdated, expensive and unnecessary power plant alive.

I, along with nearly 3,000 other Indiana Michigan Power (I&M) customers since 2014, have been asking I&M to plan a retirement of the AEP-Rockport coal plant. I ask you to oppose I&M's request in Cause No. 44871 and not require Hoosier families to pay for this expensive, outdated plant.

Our community needs I&M to generate local clean energy jobs and investment. I&M must start planning now to phase out Rockport 2 when the lease expires in 2022, and transition to less expensive, cleaner energy in I&M communities like mine. I&M's own 20-year energy plan showed that it would cost less to end the Rockport lease and invest in cleaner energy than to pursue I&M's plan to keep burning coal at AEP-Rockport.

I OPPOSE INDIANA MICHIGAN POWER'S PROPOSED BILL INCREASE

RE: CAUSE NO 44871

Dear Commissioners and Mr.David Stippler, Utility Consumer Counselor,

As an Indiana Michigan Power customer, I ask you to oppose Indiana Michigan Power's request in Cause No. 44871 and ask the Indiana Utility Regulatory Commission to force the wealthy corporate owners of Rockport Unit 2- not Hoosier families - to pay for these costly pollution controls.

Rockport Unit 2 is owned by five wealthy out-of-state corporations and Wall Street banks: General Electric, Verizon, JP Morgan, Citigroup and tobacco giant Philip Morris. I&M customers are being asked to pay $260 million over the next 10 years so these rich companies can get even richer.

I support reducing air pollution, but I&M customers should not be required to pay for pollution controls, when they will only be useful for three short years before I&M's lease expires. I ask you to oppose this plan and protect Indiana families from this outrageous corporate greed and a system that seems to benefit corporations at the expense of working people.

Sincerely,

Dear Commissioners and Mr. David Stippler, Utility Consumer Counselor.

As an Indiana Michigan Power customer. I ask you to oppose Indiana Michigan Power's request in Cause No. 44871 and ask the Indiana Utility Regulatory Commission to force the wealthy corporate owners of Rockport Unit 2- not Hoosier families - to pay for these costly pollution controls.

Rockport Unit 2 is owned by five wealthy out-of-state corporations and Wall Street banks: General Electric. Verizon. JP Morgan, Citigroup and tobacco giant Philip Morris. I&M customers are being asked to pay $260 million over the next 10 years so these rich companies can get even richer.

I support reducing air pollution. but I&M customers should not be required to pay for pollution controls, when they will only be useful for three short years before I&M's lease expires. I ask you to oppose this plan and protect Indiana families from this outrageous corporate greed and a system that seems to benefit corporations at the expense of working people.

Sincerely.

Pollution Controls are necessary to preserve the air quality of our communities. The Corporations have a responsibility to be community partners and paying for these costs should be part of their stewardship to the communities they serve and ~~from~~ part their profits from. Do not pass these costs on to taxpayers already burdened.

Sincerely,

Terry Springer

As a member of an Earthwise church I'm very concerned about the health of citizens as well as ~~the~~ Earth itself. We need to put money into renewable sources of energy rather than continuing the use of coal and its destructiveness.

Sincerely,

Sandra Molice — Sandra Molice

I OPPOSE INDIANA MICHIGAN POWER'S PROPOSED BILL INCREASE

RE: CAUSE NO 44871

Dear Commissioners and Mr.David Stippler, Utility Consumer Counselor,

As an Indiana Michigan Power customer, I ask you to oppose Indiana Michigan Power's request in Cause No. 44871 and ask the Indiana Utility Regulatory Commission to force the wealthy corporate owners of Rockport Unit 2- not Hoosier families - to pay for these costly pollution controls.

Rockport Unit 2 is owned by five wealthy out-of-state corporations and Wall Street banks: General Electric, Verizon, JP Morgan, Citigroup and tobacco giant Philip Morris. I&M customers are being asked to pay $260 million over the next 10 years so these rich companies can get even richer.

I support reducing air pollution, but I&M customers should not be required to pay for pollution controls, when they will only be useful for three short years before I&M's lease expires. I ask you to oppose this plan and protect Indiana families from this outrageous corporate greed and a system that seems to benefit corporations at the expense of working people.

Sincerely,

Vicki Bandor Braun — Vicki Bandor Braun

I OPPOSE INDIANA MICHIGAN POWER'S PROPOSED BILL INCREASE

RE: CAUSE NO 44871

Dear Commissioners and Mr.David Stippler, Utility Consumer Counselor,

As an Indiana Michigan Power customer, I ask you to oppose Indiana Michigan Power's request in Cause No. 44871 and ask the Indiana Utility Regulatory Commission to force the wealthy corporate owners of Rockport Unit 2- not Hoosier families - to pay for these costly pollution controls.

Rockport Unit 2 is owned by five wealthy out-of-state corporations and Wall Street banks: General Electric, Verizon, JP Morgan, Citigroup and tobacco giant Philip Morris. I&M customers are being asked to pay $260 million over the next 10 years so these rich companies can get even richer.

I support reducing air pollution, but I&M customers should not be required to pay for pollution controls, when they will only be useful for three short years before I&M's lease expires. I ask you to oppose this plan and protect Indiana families from this outrageous corporate greed and a system that seems to benefit corporations at the expense of working people.

Sincerely,

Dean Mattson — DEAN P. MATTSON
