Thanks Brooke,

Right now I'm finishing up the COSS schedules, so I'll see what holes I still have if any. Because of a lack of data from both Seymour and the District (such as peak usage data, pollutant strengths, length and size of mains, etc.), it's becoming somewhat of an unconventional ad hoc COSS methodology. So I'm having to modify the traditional COSS methodology as I go to make the methodology fit the data I have. I'll let you know if I find anything else I need. Thanks for all your help.

Kerry A. Heid, P.E.

Subject: Seymour Wastewater

Good afternoon Kerry,

I just wanted to check in and see if there is any outstanding information that you need either from myself or the City? I am more than willing to call or reach out to whoever we need to attempt to get as much answered as possible.

I did call Jarin and ask if he knew any allocations with the Utility clerks in City Hall and unfortunately, he was not sure. Barb is one of the utility clerks that we discussed, and she is 100% of the time working on customer billing.

If there is anything else our office can do, please let me know.

Thanks Kerry!
