DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

**DIRECT TESTIMONY OF SHANNON A. CALDWELL
DIRECTOR, COMPENSATION
DUKE ENERGY BUSINESS SERVICES LLC
ON BEHALF OF DUKE ENERGY INDIANA, LLC
BEFORE THE INDIANA UTILITY REGULATORY COMMISSION**

1

I. INTRODUCTION

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

3 A. My name is Shannon A. Caldwell, and my business address is 525 South Tryon,
4 Charlotte, North Carolina.

5 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

6 A. I am employed as Director, Compensation by Duke Energy Business Services
7 LLC, a service company subsidiary of Duke Energy Corporation (“Duke
8 Energy”), and a non-utility affiliate of Duke Energy Indiana, LLC (“Duke Energy
9 Indiana” or “Company”).

10 **Q. PLEASE DESCRIBE YOUR DUTIES AS DIRECTOR, COMPENSATION.**

11 A. I am responsible for all broad-based compensation, including compensation
12 design and strategy, management of key vendor relationships, and compensation
13 administration for Duke Energy, including all of Duke Energy’s affiliated
14 regulated and non-regulated companies, including Duke Energy Indiana
15 (collectively the “Companies”).

16 **Q. PLEASE DESCRIBE YOUR EDUCATIONAL AND PROFESSIONAL
17 BACKGROUND.**

18 A. I graduated from the University of North Carolina with a Bachelor of Science
19 degree in Business Administration and the University of South Carolina with a

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 Master's Degree in Human Resources. I also hold various certifications including
2 a Certified Compensation Professional designation.

3 I have 11 years of human resource experience, primarily working with
4 compensation programs. I joined Duke Energy in 2013 and have held various
5 positions in human resources. In addition, I have served in key roles on several
6 projects, including the integration of Progress Energy and Piedmont Natural Gas
7 employees into Duke Energy compensation programs.

8 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS**
9 **PROCEEDING?**

10 A. The purpose of my testimony is to demonstrate that the compensation and benefits
11 programs provided to the Companies' employees, including Duke Energy Indiana
12 employees, are necessary to attract, engage, and retain the skilled and experienced
13 workforce the Company needs to provide reliable electric service to its customers.
14 I explain how these programs are market competitive and comparable to programs
15 offered by other utilities, as well as other companies outside of the utility
16 industry. My testimony discusses why being market competitive is critical,
17 namely because Duke Energy competes with other utilities and companies in the
18 labor market for talent.

19 I also outline the design and function of our compensation programs and
20 explain how they are in line with the industry, are market competitive and how
21 the performance metrics directly benefit Duke Energy Indiana customers through
22 safe and reliable service, customer service quality, and low energy costs. As

PETITIONER'S EXHIBIT 16 (PUBLIC)

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 described in greater detail in my testimony, incentive pay is a key component of
2 Duke Energy's compensation program. In the competitive market for talent,
3 employees consider the total rewards package, including base pay, incentive pay,
4 and benefits as a key determinant in deciding whether to work for a particular
5 employer. Accordingly, whether it is through base pay or a combination of base
6 pay and incentives, Duke Energy must keep its overall compensation package
7 competitive to attract and retain a competent workforce. Incentive pay is therefore
8 similar to other costs necessary to provide customers safe and reliable service. As
9 such, in my opinion, the program expenditures by the Company in connection
10 with these programs are reasonable and prudently incurred costs of service to our
11 customers.

12 The factors that underpin the importance of full cost recovery have not
13 diminished since the last rate case filed in 2019 – to the contrary, many employers
14 and industries have experienced greater workforce turnover as a result of the
15 “Great Resignation,” and the electric utility industry is no exception. Employee
16 turnover is expensive, particularly in specialized industries – such as ours – which
17 utilize a highly skilled labor force that requires lengthy and intensive periods of
18 apprenticeship and training. Accordingly, as my testimony demonstrates, the
19 Company's allocated compensation expense, including incentive compensation, is
20 reasonable and prudent, and should be recovered in rates in the manner approved
21 by the Commission in the Company's previous rate case.

**DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL**

1 The benefits and compensation programs provided to Duke Energy
2 employees, as described in my testimony, were used in developing the 2025
3 forecast. I will also discuss the actuarial study conducted by WTW (Confidential
4 Attachment 16-C (SAC)).

5 **II. WORKFORCE OVERVIEW**

6 **Q. WHAT TYPE OF SPECIAL SKILLS OR KNOWLEDGE IS REQUIRED**
7 **IN ORDER TO OPERATE A UTILITY SUCH AS DUKE ENERGY**
8 **INDIANA?**

9 A. Generation, transmission, and distribution of electric power are complex
10 undertakings requiring a highly skilled workforce. A few examples serve to
11 illustrate this point:

- 12 • Engineering professionals help to design, build, operate, and maintain our
- 13 generation plants and the transmission and distribution systems that
- 14 provide power to our customers.
- 15 • Plant operators are responsible for generating the electricity that powers
- 16 our customers’ homes and businesses.
- 17 • Lineworkers must work quickly and efficiently, especially under adverse
- 18 weather conditions, to maintain, improve, and if necessary, restore our
- 19 transmission and delivery infrastructure to keep electricity flowing to our
- 20 customers.

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

- 1 • Field service and call center employees must understand the services
2 provided by the Company, including the metering, billing, and collection
3 processes, plus various other customer service matters.
- 4 • At the corporate level, highly skilled managers, engineers, accountants,
5 cyber security analysts, and other professionals are needed to support the
6 employees who are directly responsible for generating, procuring, and
7 delivering electricity to the Company's customers.

8 **Q. HOW IMPORTANT IS THE RECRUITMENT AND RETENTION OF**
9 **SUCH EMPLOYEES TO THE COMPANY'S ABILITY TO PROVIDE**
10 **SERVICE TO ITS CUSTOMERS?**

11 A. The ability to attract and retain employees with the required technical skills is
12 critical to the success of the Company, and very important to our ability to
13 provide safe, reliable, and high-quality electric utility service to our customers. A
14 fundamental factor with respect to the ability of any employer to attract and
15 recruit skilled and qualified employees is the employer's compensation and
16 benefits programs – potential employees will simply look elsewhere if the
17 employer's total rewards package fails to achieve market competitiveness.

18 As such, compensation and benefits are highly important to the
19 Company's ability to attract, engage, and retain a diverse, qualified workforce.
20 One of the keys to providing a desirable workplace where employees want to
21 continue working is to ensure that employees have the opportunity to participate
22 in competitive pay and benefits programs.

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 Q. IN RECENT YEARS HAS DUKE ENERGY EXPERIENCED
2 CHALLENGES ATTRACTING AND RETAINING A HIGHLY TRAINED
3 AND SKILLED WORKFORCE?

4 A. Yes, Duke Energy has experienced challenges in retaining a highly trained and
5 technical workforce across its enterprise. Duke Energy strives to provide a
6 competitive compensation and benefits package and has a robust training
7 program; however, we face competition from local and national electric
8 companies and contractors that target their recruiting efforts at employees trained
9 by Duke Energy. It would be imprudent for Duke Energy to not take measures to
10 prevent potential losses of employees in all of its service territories.

11 Q. WHAT ARE THE IMPLICATIONS OF THE CHALLENGES THAT
12 DUKE ENERGY HAS EXPERIENCED IN ATTRACTING AND
13 RETAINING EMPLOYEES?

14 A. Our employees deliver critical services to our customers every day, and the
15 energy industry is a knowledge and experience-intensive industry where the
16 tenure of employees matters. Maintaining a competitive compensation and
17 benefits package is instrumental in meeting Duke Energy and Duke Energy
18 Indiana's shared goals of providing safe, adequate, reliable, and reasonably priced
19 utility service to customers.

20 **III. COMPENSATION OVERVIEW: PHILOSOPHY, COMPONENTS, AND**
21 **CUSTOMER BENEFIT**

22 Q. WHAT IS DUKE ENERGY'S COMPENSATION PHILOSOPHY?

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 A. Duke Energy's overall compensation philosophy is to target total compensation of
2 base pay and incentives, including both short- and long-term, at the median of the
3 market when compared to peer companies, with the opportunity to earn more or
4 less relative to the market median based on actual performance. We have an
5 obligation to be responsive to the market for talent and assure the competitiveness
6 of the total compensation package, consisting of base salary, cash-based
7 incentives, and, for some employees, long-term incentive compensation. Duke
8 Energy's compensation philosophy has three major parts:

9 First, Duke Energy wants its compensation to be market-based, meaning it
10 is competitive with the external labor market, allowing it to remain attractive
11 against competition in order to attract and retain qualified and diverse employees.
12 Duke Energy employs a compensation strategy that combines base pay and
13 variable incentive opportunities for all levels of positions. This approach fosters
14 efficiency, safety, and a focus on the customer by aligning our employees' pay to
15 quality service for customers.

16 Second, Duke Energy is performance oriented. It believes that linking
17 compensation to performance is one way it can engage employees, set high
18 expectations for employees, and reward results that benefit customers. Duke
19 Energy's compensation program is designed to provide total compensation that is
20 consistent with performance.

21 Third, Duke Energy is fair and flexible. Its well-managed policies and pay
22 administration guidelines ensure that it pays employees consistently and fairly

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 across departments, but it is also flexible when it needs to align its policies with
2 business needs as they grow and change.

3 **Q. IS DUKE ENERGY'S COMPENSATION PHILOSOPHY FOR**
4 **EXECUTIVES SIMILAR TO THE PHILOSOPHY APPLICABLE TO**
5 **NON-EXECUTIVE EMPLOYEES?**

6 A. Yes. The compensation philosophy is similar for both executive employees and
7 for employees below the executive level. The compensation package for
8 executives consists of a combination of fixed and variable pay using base salary,
9 short-term incentives, and long-term incentives. These components, taken together,
10 are targeted to deliver total compensation that is competitive with Duke Energy's
11 peers and consistent with performance. Duke Energy adopted this executive
12 compensation strategy in order to attract and retain the executive talent required to
13 deliver superior service. The strategy emphasizes performance-based
14 compensation that balances rewards for both short-term and long-term results and
15 that aligns the executives' interests with the long-term success of Duke Energy,
16 including Duke Energy Indiana, and its customers.

17 **Q. PLEASE PROVIDE AN OVERVIEW OF THE COMPENSATION**
18 **PROGRAMS PROVIDED BY DUKE ENERGY.**

19 A. Duke Energy's compensation programs consist of a base pay component and
20 incentive pay components that together provide a market-competitive, total
21 compensation package for all employees. The base pay component is a set
22 amount, reviewed by management at least annually, and established at a level

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 that: (1) provides compensation based on the nature and responsibilities of the
2 employee's position; (2) is fair relative to the pay for other similarly situated
3 positions in the organization; and (3) when combined with incentive pay
4 opportunities, is market competitive.

5 The short-term incentive ("STI") pay component is variable based on
6 performance and is "at risk" pay - that is, employees are "at risk" of not receiving
7 this component of their compensation package. All employees are eligible for the
8 STI as a component of their total pay. Carving out a portion of employees' total
9 compensation and delivering it through variable incentive pay serves the
10 following multiple purposes: (1) encourages employees to accomplish specific
11 objectives intended to ensure safe, reliable, and economical utility service for our
12 customers; (2) fosters the success of business units and Duke Energy's overall
13 success; and (3) aligns with competitors' pay structures.

14 The long-term incentive ("LTI") plans round out a competitive total
15 compensation package for certain employees in leadership positions. Including
16 LTI programs as a portion of total compensation for leadership positions is market
17 competitive and necessary to attract and retain the high-caliber leaders needed to
18 serve our customers and communities, lead the way to a safe, secure, and
19 responsible energy future, while providing reasonably priced utility service for
20 our customers. Simply put, competent management benefits customers.

21 For illustrative purposes, Duke Energy's total compensation concept is
22 depicted below in Figures 1 and 2.

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 As Figures 1 and 2 make clear, base pay alone does *not* equate to market-
 2 competitive total compensation – rather, base pay *in combination with* incentive
 3 pay equates to market-competitive total compensation.

4 **Q. HOW DOES DUKE ENERGY KNOW ITS COMPENSATION IS**
 5 **MARKET COMPETITIVE?**

6 A. Duke Energy refers to numerous published surveys to assess whether its
 7 compensation is market competitive. As compared to these surveys, the
 8 Company's pay levels are competitive with market 50th percentile for base salary
 9 and total compensation (base pay plus incentives). As just one example, the salary
 10 range for a Senior Engineering Technologist at Duke Energy is \$86,400 to
 11 \$129,600, with a midpoint of \$108,000 and total cash compensation of \$118,800.
 12 These figures are in line with the market median from the WTW Energy Services
 13 Mid-Management & Professional 2023 survey which reflects \$107,983 for base
 14 pay and \$118,142 for total cash compensation for the same position. Further, we
 15 routinely benchmark total compensation (base pay plus incentives) against other

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 similarly sized companies, both within and outside of the utility industry, and
2 participate in a variety of third-party salary surveys on an annual basis. These
3 surveys contain aggregated compensation data, including base pay and incentive
4 targets, from multiple employers for various job functions and career levels. Duke
5 Energy analyzes this data to determine overall competitiveness of pay for jobs
6 throughout the enterprise. A complete list of the salary surveys Duke Energy
7 currently participates in is reflected in Attachment 16-A (SAC).

8 **Q. DOES A COMPETITIVE TOTAL COMPENSATION PACKAGE FOR**
9 **EMPLOYEES BENEFIT THE COMPANY'S RETAIL CUSTOMERS?**

10 A. Yes. Our employees deliver critical services to our customers every day. We need
11 to attract, develop, and retain – over the long term – the employees that design,
12 build, and operate our plants and the employees that maintain and improve the
13 infrastructure necessary to keep the lights on. Many craft positions require lengthy
14 apprenticeships to learn the skills needed to perform work independently and
15 safely. The competencies needed for employees in highly skilled positions – such
16 as Line Technicians and engineers – take many years to develop. If we were to
17 lose such employees, we would incur additional costs to train replacements for
18 these positions, while experiencing additional risk with regard to reliability issues.
19 The expense incurred to hire and train new employees, and the loss of
20 productivity realized through high turnover rates, would negatively affect the
21 Company's ability to provide safe and reliable service at a reasonable cost.

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 This is also true for leadership positions. Duke Energy invests in
2 developing highly effective leaders who develop and carry out the organization's
3 strategy and inspire employees to work together to achieve results the right way.
4 Many of our leaders possess extensive industry experience, advanced degrees, and
5 demonstrated examples of excellent leadership, making recruitment and retention
6 of such leaders critical to the success of the Company, particularly in this
7 changing energy landscape.

8 **Q. WHY ARE LTI PLANS A NECESSARY COMPONENT OF EXECUTIVE**
9 **COMPENSATION?**

10 **A.** LTI pay as a component of overall compensation for our executive ranks is
11 market-competitive and provides Duke Energy with an effective retention tool.
12 Offering less than competitive levels of compensation would put Duke Energy at
13 risk of losing these valuable leaders to other companies and potentially having to
14 pay more to attract the same level of leadership talent externally. In addition, the
15 inclusion of LTI pay ensures that our leadership is focused on the long-term, and
16 not overly focused on the short-term. Finally, incenting a focus on long-term
17 sustainable company performance provides a benefit to customers, as a financially
18 strong company will have greater access to capital at a lower cost, which in turn
19 benefits customers through a lower cost structure.

20 **IV. DETAILED REVIEW OF DUKE ENERGY'S COMPENSATION**
21 **COMPONENTS**

22 **Q. PLEASE DESCRIBE DUKE ENERGY'S BASE PAY PROGRAMS.**

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 A. For most non-union positions, Duke Energy utilizes base salary ranges consisting
2 of a minimum and maximum base salary for each job grade. We perform an
3 annual review of market data for both general industry positions and energy
4 services positions and compare that data to our total compensation package (base
5 pay plus incentives). Using this market data, salary ranges are reviewed annually
6 to remain competitive. Market data is also reviewed and used to determine annual
7 wage increase recommendations.

8 To determine the compensation for executive officers, on an annual basis,
9 the Compensation and People Development Committee of the Board of Directors
10 of Duke Energy (“the Committee”) reviews data from nationally recognized,
11 independent executive compensation consulting firms (Frederick W. Cook and
12 WTW). The peer group of companies used for these analyses consists of
13 companies that represent the talent markets from which Duke Energy competes to
14 attract and retain executive employees.

15 Hourly represented employees, such as mechanics and line technicians,
16 are provided general wage increases negotiated with the labor unions that
17 represent the employees. Duke Energy Indiana has a five-year collective
18 bargaining agreement with the International Brotherhood of Electrical Workers
19 (IBEW) Local Union No. 1393. The agreement began on May 1, 2021, and
20 expires on April 30, 2025.

21 Wage increases are just one component of union negotiations and must be
22 negotiated in the larger context of work-related topics, such as benefits, work

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 rules and overtime. These general wage increases are expressed as percentages of
2 current base pay rates and are consistent with market trends. Duke Energy bases
3 its positions in these negotiations on survey projections for market increases and
4 also utilizes survey market data to ensure pay is competitive to market.

5 **Q. YOU MENTIONED EARLIER THAT THE INCENTIVE PAY**
6 **COMPONENT OF DUKE ENERGY'S COMPENSATION PROGRAM**
7 **HAS TWO COMPONENTS, STI AND LTI. PLEASE DESCRIBE THE STI**
8 **COMPONENT.**

9 A. All employees are eligible for the STI component of incentive pay; however,
10 some represented employees, including those in Duke Energy Indiana, participate
11 in the Union Employee Incentive Plan ("UEIP") sub plan per their union
12 agreement, which will be described in later testimony. Incentive pay, as I testified
13 previously, puts "at risk" a portion of each employee's compensation. The STI
14 program is designed to promote a workforce culture that responds to pre-
15 determined performance goals set both at the corporate level and at a team (for
16 non-leadership employees) or individual (for leadership employees) level. How
17 much of the STI component is actually paid out to an individual employee
18 depends on the degree to which the performance goals are met.

19 The process of determining an employee's STI compensation begins with
20 the setting of goals at the commencement of each year. The Committee approves
21 the corporate level performance goals for the upcoming year, as well as individual

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 goals for leadership employees, and executive leadership for each business unit
2 sets the team goals for non-leadership employees.

3 The corporate goals are reflected in a scorecard. Each goal reflects the
4 specific metrics required to meet the goal at three different levels – the Minimum,
5 Target, and Maximum level. The payout associated with achievement of each
6 goal is based upon where along the Minimum to Maximum continuum the
7 corporate performance falls. A thorough review is performed at the end of the
8 year to determine the achievement level for each performance goal.

9 The scorecard reproduced in Confidential Attachment 16-B (SAC) is the
10 2023 scorecard for non-leadership employees. It indicates that team goals are to
11 be set and performance measured against achievement. For leadership employees,
12 individual goals replace the team component, with performance also measured
13 against achievement. Confidential Attachment 16-B (SAC) also details the weight
14 given to achievement of each goal. An overview of the STI metrics, weights, and
15 payout opportunities is set forth in the table below:

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL**TABLE 1: SUMMARY 2023 STI PLAN**

Goals	Senior Management Committee (SMC) Weight	Leadership (Other than SMC) Weight	Non-Leadership Weight	Payout range
EPS	50%	50%	50%	0-200%
O&M Expense	12.5%	10%	5%	0-175%
Operational Excellence	12.5%	10%	10%	0-175%
CSAT	12.5%	10%	10%	0-175%
Climate	12.5%	N/A	N/A	0-175%
Team	N/A	N/A	25%	0-175%
Individual	N/A	20%	N/A	0-175%

1 Members of the Senior Management Committee (“SMC”) are subject to
2 an Individual Performance Modifier pursuant to which the Committee may
3 exercise discretion to increase or decrease the aggregate incentive payment of
4 each SMC member. The calculation of the incentive payments is based on the
5 goals and weightings set forth above by up to 25%, with reference to the SMC
6 member’s achievement of their performance objectives during the year.

7 **Q. PLEASE DESCRIBE THE UEIP.**

8 A. The UEIP is available to union employees of Duke Energy Indiana and certain
9 employees of its affiliated companies. Employees participating in the UEIP may
10 not also participate in the STI program offered to the general employee population
11 described in the previous question. The purpose of the UEIP is to attract, retain
12 and motivate employees, enhance teamwork and high levels of achievement, and
13 to facilitate the accomplishment of specific corporate and business unit goals.

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 These goals benefit the customer similar to the annual STI – by motivating
2 employees to excel at such goals as customer satisfaction, safety, reliability, and
3 financial stewardship, high performance becomes part of the culture and
4 employees are motivated to exhibit the behaviors required to meet the goals and
5 deliver the highest value to customers at a reasonable cost. In addition, the UEIP
6 is a necessary component of the total compensation package for union employees
7 that attracts and retains the critical skills necessary to provide safe, efficient and
8 reliable service to customers. These union employees include many of our
9 personnel working in our generation plants and employees who construct and
10 maintain the Company's electric system. All are functions that are critical to
11 reliable customer service.

12 The UEIP is a short-term incentive opportunity that allows union
13 employees to receive cash payments if Duke Energy attains certain corporate
14 performance goals and/or if their group attains certain operational performance
15 goals during a calendar year. The UEIP award levels consist of a percentage of
16 the employee's base and overtime earnings and is based upon the achievement of
17 corporate and business unit goals, such as financial results, safety, and customer
18 satisfaction.

19 **Q. PLEASE PROVIDE ADDITIONAL DETAIL REGARDING THE**
20 **METRICS INCLUDED IN THE STI PROGRAM FOR 2023, AND, IN**
21 **PARTICULAR, DESCRIBE HOW THESE METRICS BENEFIT**
22 **CUSTOMERS.**

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 A. As the scorecard in Confidential Attachment 16-B (SAC) reflects, corporate STI
2 metrics are grouped into the categories of Financial Performance & Growth,
3 Operational Excellence, and Customer Satisfaction. A detailed description of
4 these categories is as follows:

5 Financial Performance & Growth: The Financial Performance & Growth
6 measure consists of Earnings per Share and Operations and Maintenance
7 (“O&M”) expense measures, each of which motivates employees to focus on
8 financial discipline, efficient operations, and prudent use of resources, all of
9 which are vital to the health and stability of the organization.

10 (1) Earnings per Share (“EPS”): EPS is an important metric to
11 evaluate the success of our performance, and it is a very common practice,
12 both within and outside of the utility industry, to use EPS as a primary
13 goal in incentive programs. Employees directly impact EPS by finding
14 efficiencies and cost cutting measures which ultimately are passed on to
15 customers when new rates reflecting those savings are implemented.

16 (2) O&M Expense Control: O&M expenses include those costs
17 necessary to support daily operations, as well as operate and maintain the
18 operating efficiency and productive life of assets. Cost control is an
19 integral part of any company’s success. The intent of this goal is for
20 employees to focus on cost control on a day-to-day basis, which will allow
21 Duke Energy to incorporate these savings into programs that will benefit
22 customers.

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 Operational Excellence: This metric motivates employees to provide
2 reliable and safe products and services to customers and consists of two equally
3 weighted measures: Reliability and Safety/Environmental. This objective
4 emphasizes service reliability and the mitigation of environmental risks associated
5 with our operations.

6 (1) Reliability: The intent of this metric is to ensure that cost
7 focus does not sacrifice Duke Energy Indiana's ability to provide reliable
8 service, which is expected by all customers. By including reliability in its
9 annual incentive metrics, employees are financially motivated to ensure
10 that the Company provides reliable service to its customers.

11 (2) Safety/Environmental: This metric incorporates safety and
12 environmental stewardship into day-to-day activities, thus making the
13 safety of employees, customers, and communities a priority. The safety
14 and environmental goal payout will be determined by averaging the year-
15 end accomplishment of two goals: (i) Total Incident Case Rate ("TICR"),
16 which measures the number of occupational injuries and illnesses per 100
17 employees, including staff-augmented contractors; and (ii) Reportable
18 Environmental Events, which are environmental events resulting from
19 operations that have an impact on the environment, require notification
20 (verbal/written/electronic) to a regulatory agency, or result in a regulatory
21 citation or other enforcement action by a regulatory agency.

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 Customer Satisfaction: Duke Energy's incentive program also includes a
2 Customer Satisfaction goal, or CSAT, which measures the degree to which
3 customers have a favorable perception of an interaction, product, service, or of
4 Duke Energy overall. Achievement is based on Duke Energy's Net Promoter
5 Score, which is captured through its proprietary survey.

6 Team/Individual: In addition to these corporate metrics, and as I
7 previously mentioned, the performance of non-leadership employees is assessed
8 against pre-determined "team" goals set by their business units. The team goals
9 directly benefit customers by tying employee compensation to reliability, outage
10 frequency, time required to restore service, lost-time accidents, customer
11 satisfaction scores, O&M expense levels, and capital expenditures. These goals
12 are typically tactical and operational goals that align the work of each team to
13 Duke Energy's overall priorities. Team goal results establish a pool of dollars
14 allocated at the discretion of managers among employees based on their
15 individual performance and contributions to the team.

16 Executive and leadership-level employees are assigned individual goals.
17 The individual goals are intended to motivate the executive leadership members
18 to advance strategic and operational objectives and are generally aligned to the
19 business in which they operate. Superior performance relating to these team and
20 individual goals directly benefits Duke Energy Indiana customers through safe
21 and reliable service, customer service quality, and low energy costs.

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 Q. DO YOU CURRENTLY ANTICIPATE THE FINAL 2025 STI PLAN
2 DESIGN TO BE MATERIALLY DIFFERENT?

3 A. No. Understanding that some changes could materialize before plan finalization,
4 I anticipate the 2025 STI plan to be similar to the current design.

5 Q. PLEASE DESCRIBE THE LTI COMPONENT OF INCENTIVE PAY.

6 A. At a high level, Duke Energy's LTI programs provide equity-based compensation
7 (i.e., stock awards) to executive and leadership-level employees. Stock awards are
8 an important component of a compensation package that is reviewed annually to
9 ensure ongoing competitiveness. Compensation including stock awards aligns
10 these employees' interests with the long-term interests of Duke Energy and its
11 customers. The goal of the LTI programs is to attract and retain high-caliber
12 leaders by providing a competitive compensation package and to encourage
13 leaders to make sound business decisions from a long-term perspective. Duke
14 Energy's LTI opportunities generally vest over a period of three years, thus
15 focusing executives on long-term performance and enhancing retention.

16 Q. WHAT SPECIFIC LTI PROGRAMS ARE OFFERED BY DUKE
17 ENERGY?

18 A. Duke Energy has two LTI programs. The Executive LTI Plan is reserved for the
19 most senior executives, including the SMC, and members of the Enterprise
20 Leadership Team ("ELT"), which includes approximately 100 of the top leaders
21 within Duke Energy below the level of the SMC. The second LTI program, the
22 Restricted Stock Unit ("RSU") Program, is available to other strategic leaders

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 below the ELT level who are responsible for the most critical roles in each
2 business group (population generally ranges between 2-3% of the total Duke
3 Energy employee population).

4 **Q. PLEASE DESCRIBE THE EXECUTIVE LTI PLAN.**

5 A. The Executive LTI Plan is designed to drive an ownership mindset for
6 participants and ensure accountability for making short- and long-term strategic
7 decisions. For 2023, participants in this program have 70% of their target LTI
8 opportunity awarded as performance shares, and 30% of their target LTI
9 opportunity awarded as restricted stock units (“RSUs”).

10 Duke Energy Indiana participants starting with 2022 grants:

11 *Performance Shares:* The performance shares granted to Duke Energy
12 Indiana participants incorporate four Duke Energy Indiana performance
13 goals based on (1) meeting annual budget targets, (2) timely filing of
14 regulatory proceedings per the applicable regulatory business plan, (3)
15 composite net promoter scores for residential, small/medium business, and
16 large business, and (4) Net Promoter Score Community Leaders Study
17 Goals. These goals are measured over a three-year performance period
18 and participants must generally continue their employment with Duke
19 Energy for the full three-year period to be eligible for a full payout, based
20 on achievement of metrics.

21 *RSUs:* The RSUs granted to Duke Energy Indiana participants are 100%
22 performance based RSUs based on Duke Energy Indiana performance.

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 RSUs vest in equal installments on the first three anniversaries of the grant
2 date to the extent the RSU performance goals established by the
3 Compensation Working Group of the Board of Directors (“Compensation
4 Group”) of Duke Energy Indiana Holdco for the applicable vesting date
5 are achieved. Shares issued on any vesting date can be increased or
6 decreased by 25% by the Compensation Group, based on how
7 performance related to the goals has been achieved. Participants who
8 remain employed with Duke Energy through a vesting date receive a share
9 of Duke Energy common stock for each vesting RSU.

10 Pre-2022 grants to Duke Energy Indiana participants and grants to other Duke

11 Energy participants:

12 *Performance Shares:* The performance shares granted in 2023 incorporate
13 three performance goals: (1) cumulative adjusted EPS, (2) Total
14 Shareholder Return (“TSR”) compared to companies in the Philadelphia
15 Utility Index, and (3) Total Incident Case Rate (“TICR”), which (as
16 indicated above in my discussion of STI metrics) is a measure of
17 operational safety – a factor of great importance to Duke Energy and its
18 customers. Similar to the payout associated with meeting STI goals,
19 payout of performance shares occurs only if pre-defined performance
20 metrics related to the goals are met, but in the case of the performance
21 share awards, the goals must be met over a three-year vesting period. The
22 multiyear vesting period ties the number of performance shares

PETITIONER'S EXHIBIT 16 (PUBLIC)

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 participants ultimately earn to Duke Energy's long-term performance, and
2 this correlates to long-term value. Executive LTI Plan participants must
3 generally continue their employment with Duke Energy for a three-year
4 period to earn a payout.

5 RSUs: The other 30% of Executive LTI Plan participants' target LTI
6 opportunity is awarded as RSUs. Vesting of RSUs is solely tied to
7 participants' continued employment through vesting dates over a three-year
8 vesting period and is not dependent upon Duke Energy's financial
9 performance. Participants who remain employed with Duke Energy
10 through a vesting date receive a share of Duke Energy common stock for
11 each vesting RSU.

12 Below is a summary table of the metrics for the 2023 Executive LTI Plan:

**DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL**

TABLE 2: SUMMARY EXECUTIVE INCENTIVE PLAN

Incentive Plan	Incentive Plan Components	Weighting
Executive LTI	Restricted stock units	30%
	Performance shares (70%)	
	• Total Shareholder Return (TSR) relative to that of the companies in the Philadelphia Utility Index	17.5%
	• Cumulative adjusted Earnings Per Share (EPS)	35%
	• Absolute Total Incident Case Rate (TICR)	17.5%
Duke Energy Indiana Executive LTI	Performance Based Restricted stock units (30%)	
	• Regulatory Business Plan	15%
	• Funds from Operations	3%
	• O&M	3%
	• Capital Expenditures	4.5%
	• TICR	4.5%
	Performance shares (70%)	
	• Annual Budget Targets	17.5%
	• Regulatory Filings	31.5%
	• Net Promoter Score	7%
• Composite Net Promoter Score	14%	

1 **Q. PLEASE DESCRIBE THE LTI PROGRAM AVAILABLE TO LEADERS**
2 **BELOW THE ELT LEVEL.**

3 A. Leaders below the ELT level participate in the RSU program and receive their
4 LTI value in the form of RSUs that vest equally over three years, thereby
5 encouraging retention of high-quality employees. Participation in the RSU plan is
6 reserved for positions that meet at least one of the following criteria:

- 7 • Position has significant responsibility for a broad area or function or
8 geographic region;
- 9 • The employee leads major projects or groups with substantial enterprise or
10 business unit strategic or financial impact;

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

- 1 • The employee is in a role that has decision-making authority that impacts
2 company performance; and/or
3 • Position requires specialized expertise that is critical to business
4 operations or strategy development.

5 The RSU plan is an equally important component within the total
6 compensation package for eligible leadership positions (below executive level)
7 and is critical to maintaining market competitiveness and retaining key leadership
8 talent. The base salary for these employees is set at such a level that, when
9 factoring in the RSUs, the total package results in market-competitive
10 compensation designed to retain qualified employees.

11 For pre-2022 grants to Duke Energy Indiana participants and grants for
12 other Duke Energy participants, the reward of these RSUs is purely aimed at
13 continuing employment and is in no way tied to performance metrics or financial
14 performance.

15 For Duke Energy Indiana participants starting with 2022 grants, the RSUs
16 granted are still aimed at continuing employment but are also 100% performance
17 based RSUs based on Duke Energy Indiana performance. RSUs vest in equal
18 installments on the first three anniversaries of the grant date to the extent the RSU
19 performance goals established by the Compensation Group for the applicable
20 vesting date are achieved. Shares issued on any vesting date can be increased or
21 decreased by 25% by the Compensation Group, based on how performance
22 related to the goals has been achieved. Participants who remain employed with

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 Duke Energy through a vesting date receive a share of Duke Energy common
2 stock for each vesting RSU.

3 Below is a summary table of the metrics for the 2023 RSU Plan:

TABLE 3: SUMMARY RSU PLAN

Incentive Plan	Incentive Plan Components	Weighting
Other Duke Energy non-executive LTI	Restricted stock units	100%
Duke Energy Indiana non-executive LTI	Performance Based Restricted stock units (100%) <ul style="list-style-type: none"> • Regulatory Business Plan • Funds from Operations • O&M • Capital Expenditures • TICR 	50% 10% 10% 15% 15%

4 **Q. DO YOU CURRENTLY ANTICIPATE THE 2025 LTI PLAN DESIGN TO**
5 **REMAIN SIMILAR?**

6 A. Yes. Understanding that some changes can materialize during the budgeting
7 process, I anticipate the 2025 LTI plan to be similar to the current design.

8 **Q. WHY IS IT IMPORTANT TO PROVIDE INCENTIVE OPPORTUNITIES**
9 **AS A PART OF EMPLOYEES' TOTAL COMPENSATION?**

10 A. STI opportunities are components of market-competitive total compensation that
11 are necessary to attract and retain qualified employees. It is important to stress the
12 fact that if Duke Energy did not provide incentive opportunities to employees, the
13 same target value of incentive compensation would need to be added to base pay
14 – which is paid regardless of Duke Energy's performance – in order to maintain
15 market-competitive compensation.

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 Similarly, Duke Energy's LTI programs are a necessary component of
2 compensation packages for leaders. They allow Duke Energy to attract and retain
3 high-performing leaders who are capable of leading the way to cleaner, smarter
4 energy solutions that are valued by customers. If Duke Energy and its
5 subsidiaries, including Duke Energy Indiana, did not incorporate LTI as a part of
6 the total compensation for these leadership positions, the positions would require
7 higher base salaries in order to provide the same level of market-based total
8 compensation. If an increase to base pay was not made in place of the LTI
9 component, and the overall level of total compensation was reduced, Duke
10 Energy would not be able to effectively attract or retain the experienced leaders
11 necessary to direct the efforts of its employees and make the best strategic
12 decisions on behalf of the enterprise and allow Duke Energy Indiana to provide
13 reliable service to its customers.

14 Put another way, whether it is through base pay, or a combination of base
15 pay and incentives, Duke Energy must keep its overall compensation package
16 competitive in order to attract and retain a competent workforce. Incentive pay is
17 similar to the other costs related to providing electric service – it is a necessary
18 cost to provide customers safe and reliable service. In the competitive market for
19 talent, employees consider the total rewards package, including base pay,
20 incentive pay and benefits, as a key determinant in deciding whether to work for a
21 particular employer.

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 Q. HOW DO GOALS BASED ON MEETING EPS OR TSR BENEFIT
2 CUSTOMERS?

3 A. In order to achieve EPS goals, Duke Energy must have strong cost management,
4 prudent investments, and operational excellence, all of which benefit customers.
5 Achieving financial success benefits customers by reducing the cost of capital as
6 Duke Energy continues to conduct necessary maintenance of the system, invest in
7 modernization of the electric grid, and transform the customer experience by
8 providing customers with more billing options, additional energy usage
9 information, and new tools to help manage and reduce energy costs.

10 V. COST RECOVERY OF INCENTIVE PAY EXPENSE

11 Q. WHAT INCENTIVE PAY EXPENSE DOES DUKE ENERGY INDIANA
12 PROPOSE TO RECOVER IN THIS PROCEEDING?

13 A. Duke Energy Indiana proposes to recover the incentive pay expenses at target
14 levels that are directly assigned or allocated to Duke Energy Indiana. These
15 expenses are prudent, benefit customers, and are a component of market-
16 competitive pay.

17 Q. DO DUKE ENERGY'S STI AND LTI PLANS MEET THE
18 COMMISSION'S REQUIREMENTS FOR COST RECOVERY?

19 A. Yes. The Commission's requirements for incentive plan costs to be recoverable in
20 rates state that: "(1) the incentive compensation plan is not a pure profit-sharing
21 plan, but rather incorporates operational as well as financial performance goals;
22 (2) the incentive compensation plan does not result in excessive pay levels beyond

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 what is reasonably necessary to attract a talented workforce; and (3) customers
2 and shareholders are allocated part of the cost of the incentive compensation
3 programs”.¹

4 First, the evidence establishes the Company’s incentive compensation
5 plans are not pure profit-sharing plans. They include many other metrics, such as
6 safety, operational excellence, customer satisfaction, and reliable and efficient
7 operations. Second, the Company’s incentive compensation plans do not result in
8 excessive pay levels beyond what is reasonably necessary for the Company to
9 attract a talented workforce. Rather, Duke Energy’s overall compensation
10 philosophy is to target total compensation consisting of base pay and short- and
11 long-term incentives, at the median of the market when compared to peer
12 companies. Third, the costs of the incentive plan are allocated to both customers
13 and shareholders, as shareholders would cover any amounts above the target
14 levels proposed to be included in rates.

15 **Q. WHY DOES THE COMPANY’S PROPOSAL FOR INCENTIVE**
16 **COMPENSATION ASSUME REACHING 100% OF TARGET**
17 **ACHIEVEMENT LEVELS?**

18 A. These are the accrued and budgeted achievement levels for the performance goals
19 for the STI, UEIP, and the LTI. The 100% target achievement level is used for
20 the accruals and budget because this is what the Company expects to achieve on
21 average.

¹ SIGECO, Cause No. 43839 (IURC 4/27/11), at 50-51.

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 Q. WHY DOES THE COMPANY BELIEVE SHORT-TERM AND LONG-
2 TERM INCENTIVE SHOULD BE RECOVERABLE?

3 A. As I stated previously, incentive pay is similar to the other costs related to
4 providing electric service. It is a necessary cost to provide customers safe and
5 reliable service. In the competitive market for talent, employees consider the total
6 rewards package, including base pay, incentive pay and benefits, as a key
7 determinant in deciding whether to join or continue working for a particular
8 employer.

9 Incentive pay is one element of Duke Energy's compensation programs,
10 which consist of a base pay component and incentive pay component, that
11 together provide a market-competitive compensation package for all employees.
12 Competitive compensation packages are necessary for the Company to attract and
13 retain the skilled workforce needed to provide clean and reliable energy to our
14 customers. The annual STI pay opportunity is an important component of overall
15 total compensation that promotes a corporate culture that is performance-oriented
16 in order to provide the greatest benefit to customers.

17 The LTI opportunities provided to the Company's leaders are a necessary
18 component of market-competitive target level of total compensation for these
19 particular positions. This total compensation package allows the Company to
20 attract and retain the experienced leaders necessary to direct the efforts of its
21 employees and make the best strategic decisions on behalf of the Company and

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 align their interest with the long-term strategy of Duke Energy, including Duke
2 Energy Indiana, and its customers.

3 Further, as previously mentioned, the STI, UEIP and LTI plans meet the
4 commissions requirements for incentive plan costs to be recoverable in rates.

5 **VI. BENEFIT PLAN DESIGN**

6 **Q. WHAT IS DUKE ENERGY'S BENEFITS PHILOSOPHY AND HOW**
7 **DOES IT TIE INTO THE COMPANIES' OVERALL COMPENSATION**
8 **PHILOSOPHY?**

9 A. At Duke Energy, we place a priority on attracting and retaining a diverse, high-
10 performing workforce. An important way we do this is by providing a
11 comprehensive, competitive total rewards package of pay and benefits that
12 includes base pay, incentive pay opportunities, and benefits. Benefits are the non-
13 pay portion of an employee's total rewards. Our benefit programs are designed so
14 that Duke Energy can maintain a highly trained, experienced workforce that can
15 render excellent utility service. Retaining employees is important for us because
16 our business involves complex processes such that employees must receive long-
17 term training to perform their jobs safely and effectively. Generally, benefits are
18 provided through two vehicles: health and welfare benefit plans and retirement
19 plans. Health and welfare benefit plans include medical, dental, vision, life
20 insurance, and disability plans. Retirement plans include pension (limited to a
21 grandfathered population) and 401(k) plans. Our retirement plans are designed to
22 enable employees, through shared responsibility, to accumulate sufficient

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 resources to be able to transition into retirement at the appropriate time. An
2 employee's ability to retire at the right time increases opportunities for the
3 workforce as a whole and also helps the utility manage costs.

4 **Q. PLEASE DESCRIBE THE EMPLOYEE BENEFIT PROGRAMS**
5 **PROVIDED TO EMPLOYEES.**

6 A. The benefit programs in which all eligible employees may participate include
7 medical, health savings account, dental, vision, flexible spending accounts,
8 employee assistance program, wellness, sick pay, short-term disability, long-term
9 disability, life insurance, accidental death and dismemberment, and business
10 travel accident insurance. Retirement benefits include company contributions and
11 company matching contributions to employees' 401(k) plans to promote the
12 shared responsibility between the company and employees for accumulating
13 retirement resources.

14 **Q. PLEASE DESCRIBE DUKE ENERGY'S POST RETIREMENT**
15 **HEALTHCARE BENEFITS PROVIDED TO EMPLOYEES.**

16 A. Duke Energy is the result of a series of many acquisitions and mergers and has
17 worked hard at integration to minimize differences among legacy company
18 employee groups. This includes the post-employment benefits available to
19 employees when they retire. Newly hired employees will be eligible to enroll in
20 company sponsored pre-65 retiree medical, dental and vision benefits at
21 retirement on an unsubsidized basis by paying the full cost of coverage.
22 Additionally, Duke Energy provides retirees access to a retiree exchange program

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 for assistance with exploring options for coverage available on the individual
2 market as an alternative to Duke Energy-sponsored retiree coverage. They will
3 also have the option to convert or port their active life insurance to an individual
4 policy at retirement by paying the required premiums. Active employees who
5 were part of a closed group and eligible for a retiree healthcare subsidy towards
6 the cost of Duke Energy-sponsored retiree health care coverage were generally
7 transitioned to a common approach in the form of a pre-65 Health Reimbursement
8 Account benefit.

9 **Q. IS IT COMMON PRACTICE, IN THE INDUSTRY, TO PROVIDE POST**
10 **RETIREMENT BENEFITS?**

11 A. As Duke Energy periodically reviews healthcare trends, we see that 28 percent of
12 general industry and 44 percent of utility industry companies provide financial
13 support for pre-65 coverage for current and future retirees. We also see that 21
14 percent of general industry and 38 percent of utility industry companies provide
15 financial support for post-65 coverage for future retirees. As Duke Energy's
16 financial support of retiree healthcare has lessened over the years, we have
17 recognized that this is an area of concern for many employees. To address this,
18 we encourage employees who are enrolled in a High Deductible Health Plan to
19 contribute to a Health Savings Account and receive company matching
20 contributions to save for their future retiree healthcare costs.

21 **Q. WHAT IS THE GRANTOR TRUST?**

22 A. The Grantor Trust is a trust established pursuant to Indiana Utility Regulatory

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 Commission (“IURC”) order dated October 21, 1998, in Cause No. 40388 to hold
2 amounts collected in Indiana retail rates that are to be used to pay post-retirement
3 benefits other than pensions (generally, post-retirement medical coverage) for
4 employees of Duke Energy Indiana and Duke Energy Business Services. The
5 trust and Cinergy Corp, as the grantor of the trust, are taxed under the grantor
6 trust rules of the Internal Revenue Code.

7 **Q. WHY DOES THE GRANTOR TRUST EXIST?**

8 A. As a condition of moving from “pay as you go” to accrual accounting of post-
9 retirement benefits other than pensions, the IURC by order in Cause No. 40388
10 required external funding of the post-retirement benefits other than pensions
11 through the Grantor Trust.

12 **Q. IN YOUR OPINION IS THE GRANTOR TRUST SUFFICIENTLY**
13 **FUNDED?**

14 A. Yes, the Grantor Trust is adequately funded to pay for the future obligations of
15 Other Post-Retirement Benefits (“OPRB”) plan participants and not collect
16 additional funds from customers. In addition, annual benefit payments are
17 expected to decline over time because the OPRB plan is closed to newly hired
18 employees. To determine sufficiency, the company compared the estimated future
19 benefit obligation for Duke Energy Indiana OPRB plan participants, plus a
20 proportionate share of Duke Energy Business Services’ OPRB obligations, to the
21 current Grantor Trust balance and added a reasonable annual rate of return on the
22 Grantor Trust assets, net of tax. Based on the most recent sufficiency study, the

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 balance of the Grantor Trust is expected to exceed future benefit payments, due to
2 high rates of return on investments and declining future benefit payments.
3 Therefore, the Company proposes in this rate proceeding to refund retail
4 customers \$37.5 million dollars upon receiving the Commission order on the
5 current Duke Energy Indiana rate case (expected to be in early 2025) and then
6 another \$37.5 million dollars at the beginning of 2026. For more information on
7 the Grantor Trust, see the testimony of Duke Energy Indiana Witness Ms.
8 Suzanne Sieferman (Petitioner's Exhibit 4).

9 **Q. DOES DUKE ENERGY INDIANA HAVE A PENSION PLAN?**

10 A. Duke Energy closed its pension plans to non-union new hires in 2014 and has
11 since negotiated closing pension participation for new hires for all union groups.
12 New hires participate in the Enhanced 401(k) Program and receive a Duke Energy
13 retirement contribution to the 401(k) in lieu of pension participation and have an
14 opportunity to receive company matching contributions if they choose to
15 contribute to the 401(k). Pension eligible employees have generally experienced
16 reductions in future pension benefit accruals with transitions from a final average
17 pay formula to a cash balance formula. As early as 1997, Duke Energy, through
18 mandatory conversions, choice windows and design change for new hires, moved
19 non-union and many union pension eligible employees to a cash balance design.
20 Moving the existing employees allowed the Company to reduce future pension
21 accrual, and reduce risks associated with longevity and investments (since most
22 participants take lump sum distributions). To offset the impact of these pension

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 reductions, Duke Energy increased its matching opportunity in the 401(k) plan.

2 The emphasis throughout this process was to create a competitive retirement

3 benefit, which provided as much comparability as possible across all legacy

4 organizations and new hires, while aligning to the market.

5 **Q. IN YOUR OPINION ARE DUKE ENERGY'S PENSION PLANS**
6 **SUFFICIENTLY FUNDED?**

7 A. Yes.

8 **Q. HOW DID YOU COME TO THIS DETERMINATION?**

9 A. Annually, Duke Energy engages WTW to prepare an Actuarial Valuation Report
10 of Duke Energy's pension plans. The most recent Duke Energy Indiana report is
11 attached at Confidential Attachment 16-C (SAC). This report provides
12 information for year-end financial reporting, net periodic benefit cost, and the
13 year-end funded status of the qualified pension plans for Duke Energy Indiana.
14 The funded percentage of the qualified pension plans for Duke Energy Indiana on
15 December 31, 2023, under US GAAP accounting was 104%. The qualified
16 pension plans had a projected benefit obligation ("PBO") of \$498M and a market
17 value of assets of \$516M. Duke Energy is committed to funding the qualified
18 pension plans as necessary to meet all future required contributions.

19 **Q. HOW DOES DUKE ENERGY DETERMINE THAT THE EMPLOYEE**
20 **BENEFIT PROGRAMS THAT IT OFFERS ARE REASONABLE AND**
21 **NECESSARY?**

22 A. Duke Energy routinely examines its benefits to confirm how we compare with

DUKE ENERGY INDIANA 2024 BASE RATE CASE
DIRECT TESTIMONY OF SHANNON A. CALDWELL

1 national trends among comparable employers, and we consider the most effective
2 ways to serve our diverse workforce who reside in over 25 states. Because we are
3 a company with a history of mergers and acquisitions, we try to ensure consistency
4 and fairness among legacy company employee groups as well as cost-
5 effectiveness. We benchmark our programs against other large employers from
6 both the utility industry and general industry, so that we are positioned to attract
7 and retain qualified employees needed to support our customers. Duke Energy
8 leverages its consultants, vendor partners and nationally recognized surveys to
9 evaluate the competitiveness of its benefits and costs. Examples of surveys
10 include WTW's Financial Benchmarks Survey, Best Practices in Health Care
11 Survey, Emerging Trends in Healthcare Survey and Benefits Data Source. These
12 surveys indicate that Duke Energy's benefit plans and employee contributions are
13 in line with its utility industry and general industry peers, making them reasonable
14 and necessary in order to compete with other employers for qualified talent. We
15 routinely determine if any changes should be made based on Duke Energy's
16 reviews of the competitiveness and reasonableness of its benefit programs and
17 employee costs compared to its peers.

18 **Q. HAS DUKE ENERGY TAKEN STEPS TO CONTROL THE COST OF**
19 **EMPLOYEE BENEFITS?**

20 A. Yes. On an ongoing basis, Duke Energy reviews its employee benefits and costs
21 in an effort to keep costs reasonable, while continuing to provide benefits that are
22 sufficient to attract and retain employees. Employees pay a portion or all of the

1 cost for many of their benefits, so we strive to manage costs for not just the
2 Companies, but for employees as well. Periodically, benefit plan changes are
3 made, and other steps are taken to control costs.

4 **VII. SCHEDULES AND FILING REQUIREMENTS**
5 **SPONSORED BY WITNESS**

6 **Q. HOW DID YOU ESTIMATE THE LABOR AND BENEFIT COST**
7 **CHANGES FOR THE FORECASTED PERIOD PROVIDED TO DUKE**
8 **ENERGY INDIANA WITNESSES MR. JOEL RUTLEDGE AND MS.**
9 **REBEKAH BUCK?**

10 A. I made reasonable estimates based on recent trends, current conditions, the market
11 studies by independent consultants that I discussed previously in my testimony,
12 and my previous experience with compensation and benefits matters. Based on
13 these considerations, I provided Mr. Rutledge and Ms. Buck with estimates for
14 the following for the forecasted test period consisting of the twelve months ending
15 December 31, 2025: the union and non-union labor rate increases, the anticipated
16 cost of incentive and benefits, and payroll tax.

1

VIII. CONCLUSION

2 **Q. WERE ATTACHMENTS 16-A (SAC) AND CONFIDENTIAL**

3 **ATTACHMENTS 16-B (SAC) AND 16-C (SAC) PREPARED BY YOU OR**

4 **AT YOUR DIRECTION?**

5 **A. Yes.**

6 **Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?**

7 **A. Yes.**
