RE: **RESOLUTION #4865 OPPOSING PROPOSED NIPSCO RATE INCREASE FOR ELECTRIC UTILITY**

Utility Consumer Counselor:

At the Michigan City Common Council meeting held on Tuesday, January 17, 2023 the Council approved **RESOLUTION #4865 OPPOSING PROPOSED NIPSCO RATE INCREASE FOR ELECTRIC UTILITY**.

Enclosed you will find a copy of the above Resolution. If you should have any questions, please do not hesitate to contact my office.

Sincerely,

A handwritten signature in blue ink that reads 'Gale A. Neulieb' followed by a stylized flourish.

Gale A. Neulieb
City Clerk

MICHIGAN CITY COMMON COUNCIL

RESOLUTION NO. 4865

OPPOSING PROPOSED NIPSCO RATE INCREASE FOR ELECTRIC UTILITY SERVICE

WHEREAS, Northern Indiana Public Service Company (NIPSCO), pursuant to I.C. §§8-1-2-42.7, 8-1-2-6I and 8-1-2.5-6 has filed a petition before the Indiana Utility Regulatory Commission (IURC) under Cause Number 45772 for:

1. Authority to modify its retail rates and charges for electric utility service through a phased-in increase of rates totaling, on average, 16.5%;
2. Approval of new schedules of rates and charges, general rules and regulations, and riders (both existing and new);
3. Approval of a new rider for variable non-labor O&M expenses associated with coal-fired generation;
4. Modification of the fuel cost adjustment to pass back 100% of off-system sales revenues net of expenses;
5. Approval of revised common and electric depreciation rates applicable to its electric plant in service;
6. Approval of necessary and appropriate accounting relief, including but not limited to approval of (a) certain deferral mechanisms for pension and other post-retirement benefits expenses; (b) approval of regulatory accounting for actual costs of removal associated with coal units following the retirement of Michigan City Unit 12; and (c) a modification of joint venture accounting authority to combine reserve accounts for purposes of passing back joint venture cash;
7. Approval of alternative regulatory plans for the (a) modification of this industrial service structure; and (b) implementation of a low-income program; and
8. Review and determination of NIPSCO's earnings bank for purposes of I.C. §8-1-2-42.3; and

WHEREAS, the IURC, having held a field hearing on January 4, 2023, is currently accepting public comments regarding the proposed 16.5% rate hike; and

WHEREAS, the electric rates of NIPSCO are already among the highest of the utilities mentioned on the website of the IURC; and

WHEREAS, residents of Michigan City are already hard pressed to pay high electric rates and certainly should not be burdened with a rate increase in these most difficult economic times; and

WHEREAS, we are concerned that NIPSCO's parent company, NiSource, has looked to NIPSCO electric customers to help subsidize and support other money-losing operations of the parent company; and

CR-206

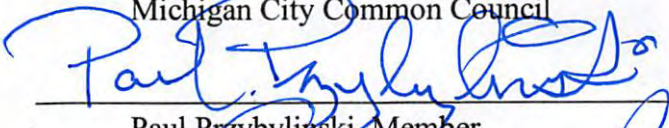

WHEREAS, we would like our sentiments opposing the rate increase placed on the public record for the consideration by the IURC.

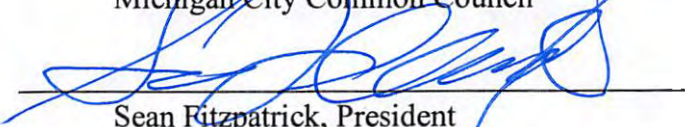

NOW, THEREFORE, BE IT RESOLVED by the Common Council of Michigan City, Indiana as follows:

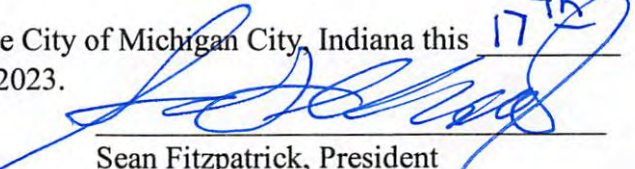

1. That the City of Michigan City, Indiana opposes the proposed increase to NIPSCO rates due to the adverse impact it would have on families struggling to pay existing utility bills.
2. That rather than being rewarded for failure, it is time that NIPSCO executives take pay cuts and undertake fiscally responsible cost-cutting measures instead of seeking a bail out from already over-burdened ratepayers.
3. The City Clerk is directed to forward a copy of this Resolution to Public Comments of the Indiana Office of Utility Consumer Counselor via email uccinfo@oucc.IN.gov or by mail at Consumer Services Staff, Indiana Office of Utility Consumer Counselor, 115 W. Washington St, suite 1500 South, Indianapolis, IN 46204.

This Resolution shall be in full force and effect after passage by the Michigan City Common Council and approval by the Mayor.

RE: NIPSCO Electric Rate Case (IURC Docket 45772)

On behalf of its approximate 800,000 members in Indiana, many of whom obtain their electric service from NIPSCO, AARP Indiana hereby submits its comments on NIPSCO's rate case proposal.

AARP Indiana advocates for fair utility rates and reliable service. Many of our members live on inflexible incomes which makes them more susceptible to payment struggles and falling behind on their utility bills. High inflation, NIPSCO's recent gas rate case increase, as well as other increases due to higher natural gas costs, makes this request especially untimely.

The multi-year increase that NIPSCO proposes is extreme. A 16.5% increase to residential electricity bills would hit consumer households hard during these inflationary times, as many are already struggling to afford basic necessities such as food and medicine. This increase comes on top of the 10% natural gas base rate increase approved last year.

Furthermore, the proposed increase from \$13.50 to \$17.00 for the residential monthly customer charge would be a 26% increase in this unavoidable fixed fee, making it one of the highest such fees for Indiana investor-owned utilities. The current \$13.50 charge is already too high, making it difficult for ratepayers to control costs. Customer charges should only include the costs that are specific to each customer, such as the costs of a meter and billing; other costs should be charged based upon usage. When electric rates are based more on usage, it allows customers to better manage their monthly bills.

AARP Indiana also opposes NIPSCO's attempt to piecemeal out the ratemaking process with a variety of add-on surcharges and riders, including the new coal plant variable cost tracker. Putting these extra single-issue charges on monthly bills confuses customers, and they also tend to increase the overall electric bill. The variable cost tracker would allow electric rates to increase for isolated costs outside of the general rate case process, through July 2024. This is an unfair method for raising rates. AARP Indiana believes that it is hard to accurately audit such automatic surcharges and trackers that are spun off of a general rate case. Current and proposed new trackers should therefore be reviewed closely and eliminated wherever possible.

AARP Indiana is concerned about NIPSCO's proposal to increase its rate recovery for corporate profit to 10.4% return on equity (ROE). NIPSCO is currently allowed 9.74% ROE, which is more than sufficient profit to be collecting from ratepayers and is well within regional averages.

Finally, the IURC should closely examine NIPSCO's spending requests and approve only necessary expenditures. \$841 million for new renewable power plants and \$501 million in grid spending should be closely scrutinized and reduced or phased in to limit the rate impact. Further, reliability and affordability should be of paramount concern. Power plants should not be closed before replacement power is available to avoid reliability issues. Any such actions should be done only so that the rate increase impact is minimized, and reliability is maintained.

Thank you for this opportunity to comment.

Sarah Waddle

January 16, 2023

Office of Utility Consumer Counselor
Attention: William Fine
115 W. Washington Street, Suite 1500 South
Indianapolis, IN 46204

Dear Consumer Counselor Fine:

The undersigned agencies, associations, and related organizations are committed to helping and improving the lives of our community's most vulnerable populations. We are writing in support of the low-income programs proposed and implemented by NIPSCO, particularly the Universal Service Program (Rider 597) for the LIHEAP-eligible electric customers in NIPSCO's jurisdiction.

Many Hoosiers are struggling to afford basic necessities as the negative impacts of the COVID-19 pandemic continue to materialize throughout the economy, evidenced by the fact that a growing number of people cannot keep up with soaring utility bills. Northern Indiana is no exception, and greater numbers of the customers in the thirty-two counties served by NIPSCO have faced soaring arrearages and rising numbers of disconnections throughout the past year. NIPSCO recognizes the immense need of low-income customers in its service territory in particular, and seeks to realize a number of measures aimed at mitigating economic distress.

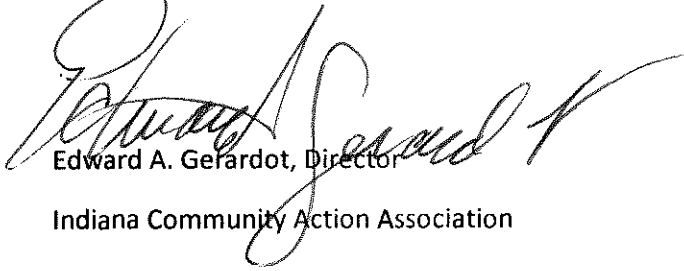

We support NIPSCO in their proposed electric low-income program, which seeks to address and help alleviate the difficult financial position many low-income customers find themselves in. The proposed program would utilize a bill assistance program, whereby all NIPSCO customers will pay \$0.40 per meter per month to assist LIHEAP-eligible customers in the form of a flat bill discount. The company projects that over \$2 million per year will be collected to fund the program, with an additional annual \$200,000 contribution from NIPSCO shareholders. This will result in projected monthly bill reductions of \$12-22 for program beneficiaries. With the proposed Rider 597, NIPSCO can establish a more reliable and steady funding source for LIHEAP-eligible customers.

NIPSCO's proposed Universal Service Program, if approved, would provide much needed relief to LIHEAP-eligible residents who are facing mounting pressure to keep up on electric utility bills. Along these lines, other important provisions include capping the LIHEAP-eligible customer deposit at \$50, and further instituting a commitment to well-meaning collaboration with low-income organizations and stakeholders in an effort to continue and improve upon programs aimed at low-income customers. These efforts are simple but deeply impactful components of NIPSCO's proposed program that, in addition to solidifying NIPSCO's role as a great partner for low-income issues, will provide material relief to struggling customers and facilitate further economic assistance.

This well-designed program allows for much-needed relief for LIHEAP-eligible electric customers, and the undersigned parties concerned with the welfare of these struggling customers support and implore the IURC to approve this much needed low-income program proposed by NIPSCO.

We ask these comments be included in **Cause No. 45772**. Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Edward A. Gefardot". The signature is fluid and cursive, with a large initial "E" and a long, sweeping tail that extends to the right.

RE: IURC Cause No. 45772, NIPSCO Electric Rates

Dear Indiana Utility Regulatory Commission,

Thank you for this opportunity to discuss the proposed 20% rate increase to our utility bills. What value will we, the NIPSCO customer, get for the increased rates? Exactly how will it contribute to our quality of life?

This proposal is driven by a claim that we must shift from reliable hydrocarbon electricity production to intermittent “clean” energy production using solar and windmill sources.

I am sadly disappointed that NIPSCO, and our regulators, are taking this route. As a publicly traded company, NIPSCO has bent their knee to the pressures of holding companies like Blackrock, Vanguard, and State Street, to get on board with “clean” energy production. These holding companies are aggressively pressuring local power companies throughout the country. NIPSCO is just one of many victims to this bully tactic. In theory, investment in “green” energy will secure a higher ESG (Environmental, Social, Governance) rating. It is a very subjective rating by research firms commissioned by holding companies to provide a social rating to each stock in their portfolio. The theory is that if a company has a high ESG rating it will attract investors to purchase their stock due to shared progressive values, not necessarily due to increased return on the investment.

This is a scam of wealth redistribution from the average citizen and business owner to those vested in these “clean” energy sources.

WE DID NOT ASK FOR THIS!!!

This is being forced on us without a long term impact study on our electrical grid. We already experience too many power outages in the current configuration. This shift will create more power outages and rolling blackouts. Just look at California and the east coast. People are experiencing these intrusive outages on a regular basis. We did not ask for this, nor do we want it. The cost is too high.

Hydrocarbon sources of electricity have provided a wealth of prosperity and human flourishing. A complete shift away from this reliable and cost-efficient source of energy is irresponsible and reckless and will place the public at risk, especially the most vulnerable among us. Just look at how Germany is firing up their coal plants due to the unreliable “clean” energy sources.

“Clean” energy is anything but. Environmental “experts” pushing these solutions lack full awareness of how destructive their initiatives are to local environments and the human suffering as a result.

The process to mine the raw materials and metals across the globe to build solar panels and storage batteries causes great harm to the local environment. Cobalt mines in the Congo have destroyed local villages by covering them with toxic cobalt dust and poisoning the local river streams. Lithium mining in Tibet, Argentina, and Chili deplete precious water supplies and create large toxic ponds that kill waterfowl in minutes when they land on the ponds. The disposal of solar panels and wind turbines at the end of useful life will increase the risk of corrosive chemicals seeping into our water resources.

It also causes human suffering at the hands of oppressive and corrupt governments. Children in the Congo as young as 14 years old are sent into open Cobalt pits at \$1 per day with thousands of others to hand chisel cobalt for 12 hours without any personal protective gear. I challenge you to watch the interview of Siddharth Kara by Joe Rogan on December 22nd to hear his investigative story and order his book “Cobalt Red”. If it does not move you to rethink what NIPSCO is supporting, then I question your conscience and business ethics.

It is well known that China is the largest exporter of solar panels. The Israeli company commissioned to provide the panels for the Mammoth project purchase materials from Chinese companies to build the panels, all run by the corrupt Chinese Communist Party. What you are asking of us is to financially support the Chinese Communist Party in the acquisition of these so called “clean” energy solutions, and to finance the unethical treatment of forced labor in the mining of raw materials.

Why did NIPSCO make such a rash decision to rely on solar and wind for our electricity, especially in a climate with significant cloud cover and the occasional blizzard storm? We demand 100% reliable energy, not intermittent sources based on the weather. We need to be energy independent, not reliant on corrupt imports from questionable foreign suppliers. Going nuclear would have been a much more cost-effective use of our limited financial resources for a reliable clean energy infrastructure. Nuclear energy should have been the solution and would have created value for the increased rates being forced on us.

Quite frankly, I do not see added value or increased quality of life for the rate increases proposed by NIPSCO. I vote NO on these unjustified increased rates.

Sincerely,

Gerard W. Egel

****** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ******

I am alarmed at these proposed hikes. I'm considered "middle class". In the Summer, my bill is over 400 a month. Winter bills are between 200-300. I can afford this, I am fortunate. But 15 years ago a 400 bill would seriously cut into my grocery budget with 3 boys to feed. Back then I had to do the program that spreads the bills out over 12 months. And once when my kids were little and I was in College our NIPSCO got disconnected d/t the Christmas holiday and delay of the payment posting. I was behind, but finally had what I owed. My kids had to understand that there would be few gifts because of the bills, how sad. Then after it was disconnected NIPSCO required a \$750 deposit d/t late payments and poor credit. If I had trouble paying my bill where was I supposed to get \$750? I had to do Payday loans and pawn items. It was absolutely awful and it took me almost a year of no late payments to get that money back! Back then I only made about \$20/hr, my income was the only household income. I barely scraped by.

That was 15 years ago, my God. How in the world can people making minimum wage, or even 15/hr, since that seems to be entry level pay, afford to keep their electric on? And what about low fixed income elderly, how can they afford it? Pay NIPSCO, or pay for medication and food?? What a choice.

No one should have to decide what will suffer so that they can keep up with their gas and electric bill! With housing costs, gas, grocery and everything else costing more right now what a kick in the teeth to have a rate hike from Nipsco.

Now I don't keep up with NIPSCO news and what they're building or why they need more money from everyone. But in my town I've not seen turbines or solar fields, why can't NIPSCO have more ways to create energy? Those things have been around for many years now. Seems like those things could decrease people's bills.

For someone making \$15/hr right now, after average 20% tax and insurance deductions they would probably bring home \$1750 ish, and about \$2400/month before deductions--let's say they are renting a 2 bedroom apartment in my town. Maybe rent is \$1000, which is average in Valpo. Water \$50. Phone \$50, gas \$40, vehicle and renters insurance \$60, internet service \$40, car payment \$300-- now we're at \$1540 for monthly bills. \$210 left to buy groceries and pay the Nipsco bill. If that NIPSCO bill reaches the \$130/month rate mentioned then it leaves \$80 a month for food and household needs. God forbid you get sick or need a car repair....

Per the income Guidelines for a 1 person household according to the NWI Community action website energy assistance is available if you make 2318.00 a month. So no help there. Food stamps? The income threshold is even less, so no help there.....

Please don't approve NIPSCO's greedy request. It's already a struggle for so many people to financially survive in NWI. There aren't many places to go here for financial assistance. If it's

anything like it was when I was on maternity leave, in the early 2000's, it's a horrible, slow process to get appointments and get approved for anything. Plus all of that is near impossible to do, if you work M-F during the hours these places are open. You'd have to take time off work to go take care of everything. Counterproductive for someone already struggling on 40 hrs of weekly pay.

Please take into account single parents, the elderly, the disabled, people with emergency medical conditions....these people will suffer even more if NIPSCO increases it's rates. Depending where you live NIPSCO is the only option for gas and electric. Our winters get very cold, our summers very warm. People with certain health conditions cannot survive in extreme temperatures!! Have some compassion for the many, many unfortunate people living in NWI.

Kristin Cochran
Valparaiso Resident for 49 years.

Nipsco price increase

I am on a fixed income, as a disabled widowed senior on Social Security. I was eligible for Energy Assistance last year, but this year, I am just a few dollars, literally, over the limit. So no help for me. NIPSCO has a lot of extra "fee's" already tacked on to the bills, and doesn't need a price increase. Here is exactly what is on my NIPSCO bill from August 24, 2022. For the gas portion of my bill: Gas commodity charge: \$1.34. Interstate transportation and storage charges: \$3.75. Delivery charges \$16.55. The \$1.34 in actual gas I used went up to \$23.15 with the extra charges. Here is the electric bill portion: Customer charge(for meter) \$13.50. Energy use charges: \$68.55.

**Your
Comments::**

I don't watch TV. I read. My TV stays unplugged. It was plugged in twice this year for a couple hours each time so company could watch a game. I had my house insulated thoroughly. I had an energy efficient water heater installed. My furnace has been totally reworked and all duct work tightened up and properly sealed. I have new windows and doors. I replaced all my appliances last year with new energy efficient ones. I have lined curtains to keep the cold out in the winter, and the heat out in the summer. I had a new energy efficient ceiling light/exhaust fan put in my bathroom. I shut off all lights as I leave a room. I turn down my thermostat at night. I have only used my central air when my COPD caused me to be short of breath because of the heat and humidity. Other than that, I have used fans to keep cool. So, what else am I supposed to do?

Subject: Brian Marx-NIPSCo Rate Hikes

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

I oppose the Rate increases! It is appalling that they would even ask for an increase in profit! I recommend the removal of Proffit due to mismanagement.

Nipsco has been raising its rates as far as I can tell without letting customers know. I see it a lot. Their profit is WAY too much already! Now they want more profit? Don't we all!

Why do they even get to charge as much as they do? Why do you allow them to take advantage of us?

Why are meter charges so high? A meter costs around \$400. I just looked back at a random bill from 2004, and there was no meter charge. They don't charge us for the transformers on the poles and the wires, these are expenses for doing business why do they charge for the meter? It is overhead that should go against their profit.

Why does a monopoly give away our money to charity? Lower my electric rate, and I will decide where I give to charity!

The fact that they mention tree service is a WOW to me; they should have been keeping up with that for the last ten years. It is an ongoing service that needs to be done. Where did the money for that the last ten years go?

How do I get a copy of their accounting I would like to see where the money goes. I hear the CEO has several bodyguards and extravagant things that as Nipsco customers we all pay for. is this legal?

As a Monopoly who oversees the books? Are there laws regarding how they spend the corporation's money?

In 1987 the rates were as follows:

Energy Charge -

16.522 cents per kilowatt hour for the next 14 kilowatt hours used per month

12.041 cents per kilowatt hour for the next 150 kilowatt hours used per month

9.637 cents per kilowatt hour for all over 200 kilowatt hours used per month

Then in 2011:

Customer Charge \$11.00 per month.

Energy Charge

\$0.096927 per kilowatt hour for all kilowatt hours used per month.

Then in 2016:

Customer Charge \$14.00 per month.

Energy Charge

\$0.106746 per kWh for all kWh used per month.

Then in 2022:

They list average numbers... What are the Facts?

Today I am paying \$.1853 per kWh including their meter based on the spreadsheet I just downloaded for 710 KWH, \$131.53. If in 2011 we were charged .096927 that is a 191% increase!
Wow!

Now they are shutting down generating stations, and we allow that? why? Next, we will be vulnerable to what other companies sell us their power. so the other company makes a profit then nipsco adds on their profit. how is that fair for consumers?

Finally, I would like the books listing all income and expenses incurred by NIPSCO!

Also, why do we allow a monopoly to pay HUGE salaries, hire bodyguards, and pay for extravagant benefits with our money? Are these expenses coming out of profit or expenses?

Why does a monopoly get to pay someone this much money? Our Money?

\$1,025,000	Base Pay
\$1,470,840	Bonus + Non-Equity Incentive Comp
\$2,495,840	Total Cash Comp

Subject: Say NO to NIPSCO's New Increase
Date: Thursday, January 5, 2023 5:50:18 PM

****** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ******

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

My husband and I worked a combined 53 years @ Nipsco. 37 for him and 16 for me. I was union and he was company. We were both working in the electric line area. My husband passed away 3 years ago. He never received a cola raise in the 29 years after he retired in his pension -- but Nipsco continues to raise our rates in spite of the many people they have laid off. He was pushed into an early retirement @ 60 to get rid of the higher paid employees. Since he was head of the line dept -- he knew what the budget was, etc, etc. We both enjoyed our years there, but also knew how much dead weight worked there. ANOTHER INCREASE continue to harm the senior citizens of Indiana. My heart bleeds for so many seniors in my age bracket that do not have decent pensions to add to their SS. PLEASE -- insist on an accounting to make sure Nipsco really needs an increase.

I realize technology is here to stay .. but when a company supplies NECESSARY SERVICES to the public, they should actually need the increase --- not just making the CEO's richer and giving them more benefits.

Thank you,

Patricia Woods

Utilities: NIPSCO
Type of Inquiry: Case Comment
Comments: I'm submitting this comment in reference to Case Number 45772.

Heating and cooling are not a luxury. They are a necessity for a full, productive, and safe life. What does it mean to monetize a utility that is essential to survival in our current world? What does it mean for a system, in which a relatively small group of individuals, make a moral decision to put profit over basic human needs? There is no rationalizing that. It is only cruelty and greed. Especially in this moment when inflation far outpaces wages.

I want NIPSCO to know that we are watching them make these kinds of calculations, where shareholder profits are given more consideration than the regular folks who have to make the decision between electricity bills and putting gas in the car. I want NIPSCO to know that we will fight them at every step of this rate increase. We will make sure to remind them that we see the shameful math they are using. The residents of northwest Indiana deserve better.

Subject: NIPSC O'S Rate Increase IURC Cause No. 45772
Date: Sunday, January 8, 2023 4:09:05 PM

****** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ******

My name is Silvia L. Holman, and I live at 8041 Maple Ave. Gary, IN 46403.

The rate increase that NIPSCO (IURC Cause No. 45772) is proposing is outrageous. This company has openly stated the purpose of the increase is to give more profits to shareholders and to transition from coal fired electricity generation, which should have been done years ago. Yet., they can not provide reliable service. Our power is lost all the time, due to wind, rain, trees, overly fed squirrels and God knows what else. If these shareholders want to invest in 19th century technology, that is their problem. In Europe, power lines are buried. They do not experience power failures as we do. If they want a rate increase, I would not mind, IF THEY BURIED THE LINES. So long as we must endure these constant outages, they do not deserve an increase. If this rate increase is passed, then they should change their name to "Northern Indiana Shareholders Service Company", public service is unknown to them.

How can Hoosiers pay their utility bills with a minimum wage of under \$8.00 an hour? We are also experiencing inflationary prices, due in part, to out of control corporations seeding record breaking profits. This utility increase is nothing more than an arrogant decree from a morally bankrupt utility company. The IURC must NOT allow this to happen. I humbly request that this proposal be denied.

Sincerely,
Silvia I. Holman

RECEIVED

NOV 28 2022

INDIANA UTILITY REGULATORY COMMISSION

I have heard that NIPSCO plans to increase rates upon us consumers,

Are we not struggling enough through bidenflation? Gas, groceries - these necessities are exorbitant. Insurance goes up yearly & property taxes have taken a huge jump. Often times, NIPSCO has raised rates over the years & now they are requesting yet another. To what end? I keep my thermostat at 61°! Yes, I have to dress warm & use blankets. I have worked since I was 14 (1974), always paid all bills in full & have never taken a hand out (welfare). I am conservative in every aspect & now at age 62, I feel like I'm at poverty level, & it's very depressing in spite of my hard work,

Please decline NIPSCO's request for increases. Whether it's due to this green/clean energy bunk or greed, we hard working Americans are struggling needlessly.

PLEASE.

Karen Reinking

NOV 20, 2022

IURC

I am writing to oppose any electric rate increase by NIPSCO or any future increases at all.

NipSCO is the ONLY gas + electric company in my area there is no choice for customers and they charge whatever they like. Last ^{few} months I was charged more for a delivery charge than for my gas usage! I have a small mobile home and all appliances except my furnace + stove use electric.

I understand prices increase, everything but paychecks, maybe if instead of their profits increasing they could/should dip into those funds to cover their increases if they had to. Struggle like most of us customers do they might understand.

As I'm reading the enclosed notice from NipSCO they say they have 483,000 customers across northern Indiana. If 483,000 customers are paying \$120 per month (just for electric) that's \$57,960,000.00 per month they receive with another \$6,520,000.00 per month for their flat charge of \$13.50² per month, with their proposed increase of \$19.00 a month that's another \$9,177,000.00 sounds and looks greedy.

It also says they plan on spending \$1,540,000,000.00 in upgrades by the end of 2023. If they plan to spend that obscene amount of money they certainly do not need a price increase from customers! Every time NipSCO wants to make changes whether

needed or wanted we the customers get stuck
paying the bill.

Thank you for your time

Sincerely

Cheryl Cook

ut NIPSCO's Electric y Rate Review

depend on a reliable and safe
ce at a fair price. That's why we
continually improve service,
s and keep customers safe.
est to change electric rates was
re investing approximately \$700
tric transmission and distribution
odes, and safety and reliability
well as approximately \$840
ewable energy projects to be
y the end of 2023, with plans for
ued investments.

ur costs to provide electric service
ustomers across northern Indiana
d and continue to increase as we
services and infrastructure today
ared to safely and effectively
ow's energy needs.

ese changes, we submitted
pposal with the Indiana Utility
ommission (IURC) requesting
o increase our electric rates.
SCO's proposal, an average
electric customer using 668
s (kwh) per month, paying
y \$120 today, would see an overall
pproximately \$19 per month,
tely 16.5 percent, spread over

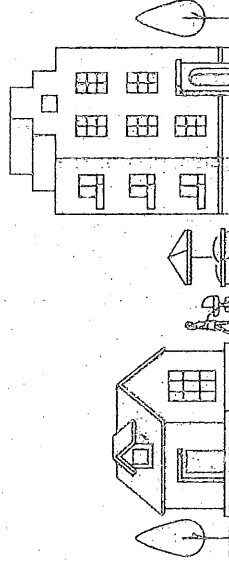

S.
ould begin to occur by
2023, with the remaining changes
rched 2024 and July 2024.

As NIPSCO retires its remaining coal-fired
generation, the costs associated with
operating and maintaining those facilities
during the transition to more renewable
resources will reduce and eventually be
eliminated. This proposal ensures customers
are only paying costs as NIPSCO incurs them,
and the associated savings of approximately
\$6 per month will be passed directly back to
customers – providing a more real-time benefit
to customers.

Actual projected bill impacts may vary
by customer – including non-residential
customers – depending on usage and future
potential changes in market prices for
commodities like coal.

The IURC will review our request and
solicit input from customers. It can take
approximately 10 months before the IURC
reaches a decision.

Public Comments
Indiana Office of Utility Consumer Counselor
115 W Washington ST
Suite 1500 SOUTH
Indianapolis IN 46204

RE: Northern Indiana Public Service Company (NIPSCO) rate increase

To Whom It May Concern:

I am against the utility rate hike that NIPSCO is requesting be approved by the IN Utility Regulatory Commission. I would speculate that most people that are against the proposed rate hike are basing those objections on purely financial reasons. I am against the requested rate hike for NIPSCO based on the unreliable electric service my neighborhood continually suffers. You should not reward sub-standard service with higher rates.

The specific area that has electric service issues is in Lowell, Indiana in the area bounded by Commercial Avenue on the north, Southview on the south, Burr Street to the east, and Joe Martin to the west. The unreliable electric service has gotten so frequent and prolonged that within minutes of a power interruption, the air resounds with the noise of many portable generator engines.

I have had a telephone conversation with a NIPSCO electrical engineer that first denied my area had a service issue. He then called back after I told him his service interruption data was incorrect and he agreed that the area in question not only had interruptions but the length of no electrical service was "unacceptable". One interruption this summer was over five and one-half hours – on a day that had no severe or inclement weather. Further he explained that there had been work orders submitted to correct slack wires that repairmen had observed would swing into each other in windy situations. As he further stated, "just because a work order is submitted, doesn't mean it gets done". This is NOT acceptable. I do not hold NIPSCO responsible for service interruptions due to severe weather or vehicle crashes that take out poles. Omitted maintenance and trees growing through power lines that cause outages ARE irresponsible and NIPSCO's fault.

Unless and until NIPSCO improves the electrical service and infrastructure to prevent outages in the area I detailed, then their request for a rate increase should be denied, or reduced at the very least.

Thank you in advance for considering my input concerning NIPSCO's rate increase request.

Sincerely,

Donald Smith

DEAR,
INDIANA OFFICE OF
UTILITY CONSUMER COUNSELOR,

Pg#1
10/28/22

MY NAME IS WILLIAM BOYER AND A CUSTOMER OF NIPSCO OF NORTHERN INDIANA. I AM WRITING THIS LETTER AND COMMENTS ABOUT NIPSCO'S PROPOSED ELECTRIC RATE INCREASE OF 16.5%.

I AM A RETIRED SENIOR WITH NUMEROUS HEALTH ISSUES. (70 YEARS OLD) I WROTE TO YOU ABOUT NIPSCO'S GAS RATE INCREASES LAST YEAR. IT WOULD APPEAR NIPSCO IS INCREASES BOTH GAS AND ELECTRIC RATES ON A YEARLY BASIS.

I AM ON A FIXED INCOME AND GET SOCIAL SECURITY WITH MEDICARE AND MEDICAID. I HAVE VERY EXPENSIVE MEDICATIONS (SOME FROM CONTRACTING COVERED 19 IN APRIL) I AM WHAT THEY CALL A LONG HAULER, ONE MEDICATION ALONE COSTS \$649.00 A MONTH.

IT WOULD SEEM THAT NIPSCO IS A MONOPOLY, AND MY UNINCORPORATED AREA IS SORRYLY NEGLECTED, READ AN ARTICLE IN THE TIMES NEWSPAPER (ARTICLE IS INCLUDED.) IT WOULD SEEM THAT THEY WANT TO DELIVER MORE PROFIT FOR SHARE HOLDERS. ALSO THEY WOULD LIKE

P#2

TO ADD ANOTHER 6.5% CLEANUP
CHARGE TO COVER EXPENSES INCURRED
FOR CLEANING UP STORED COAL ASH
AT ITS MICHIGAN CITY POWER PLANT.
MISCO DUMPED IT THERE, THEY SHOULD
BE RESPONSIBLE FOR THE COST OF CLEAN-
UP, NOT THE CONSUMER.

THE COST OF HEATING AND COOLING
MY HOME IS GETTING OUT OF CONTROL,
(ALONG WITH EVERYTHING ELSE WITH
THIS INFLATION.) I CANNOT AFFORD
THIS INCREASE AND ALREADY CUT
BACK MY MEDICATIONS AND FOOD.
DO I PAY FOR NECESSITIES OR HEAT
MY HOME?

AGAIN, THANK YOU FOR LETTING
EXPRESS MY CONCERNS AGAIN.

THANK YOU,
WILLIAM W. BOYER

Comments sought on NIPSCO rate hike

JOSEPH S. PETE
joseph.pete@nwi.com, 219-933-3316

The public can weigh in on NIPSCO's proposed 16.5% electric rate hike, to be phased in over the next two years.

The Indiana Office of Utility Consumer Counselor, which represents consumer interests in cases that go before the Indiana Utility Regulatory Commission, seeks written comments from the public through mid January.

NIPSCO proposes to raise electric bills in September 2023 and then again in 2024. The average customer using 668 kilowatt hours of electricity would go from paying \$107.78 a month to \$127.21 a month next year and

then \$133.43 in July of 2024.

The actual bills would vary, depending on how much electricity a home or business uses.

The rate hike would affect 483,000 customers in 20 counties. NIPSCO said it wants to fund infrastructure investments, such as the transition from coal-fired electricity generation to renewable energy. It also would deliver more profits to the company's shareholders, as it's a subsidiary of the publicly traded parent company NiSource.

NIPSCO hiked electricity rates in 2018 and just raised its natural gas bills by 10% in September. The Indiana Utility Regulatory Commission ultimately deter-

mines how much it can charge, as the utility is a monopoly that is not subject to the competitors and market forces that are normally supposed to keep prices in check.

Indiana Office of Utility Consumer Counselor analysts and attorneys are reviewing the testimony and exhibits NIPSCO presents to justify the rate hike. It will complete its review by Jan. 20 and people have until Jan. 13 to submit comments in writing.

The opportunity to comment will also be available at two public field hearings. The times, locations and dates have yet to be determined.

Citizens Action Coalition of Indiana, United States Steel Corp., NLMK Indiana and other parties have already weighed in.

Anyone who wishes to comment can visit www.in.gov/oucc/2361.htm, send comments by email to uccinfo@oucc.in.gov or send them by mail to Public Comments, Indiana Office of Utility Consumer Counselor, 115 W. Washington St., Suite 1500 SOUTH, Indianapolis, IN 46204.

Comments should include the customer's name, mailing address and a reference to either NIPSCO Electric Rates or IURC Cause No. 45772. Further questions can be addressed at 888-441-2494.

Time to sunset the Energy Efficiency Tracker?

NIPSCO Electric Rate Case (2022/2023) Cause Numbers 45772 and 43618

(Submitted by Stu Summers: I am a NIPSCO gas and electric customer.)

According to the OUCC's website: *"NIPSCO's request would raise an average monthly residential electric bill (668 kilowatt hours) from \$107.78 to \$127.21 under a two-phase increase taking effect in September 2023 and March 2024. The bill would then rise to \$133.43 under a new "tracker," or rate adjustment mechanism, that would gradually raise rates beginning in July 2024."*

(https://www.in.gov/oucc/files/NR_NIPSCO-Electric-Rates_10.20.22.pdf)

This would raise residential rates to 20 cents per kilowatt hour.

- For comparison, Indianapolis rates are 12.42¢ PER KWH, or about 60% less.
<https://findenergy.com/providers/aes-indiana/>

Recommendation: Before the IURC approves yet another tracker for NIPSCO, Indiana officials should first reexamine the cost-effectiveness of the energy efficiency tracker.

Background:

As our Indiana officials review NIPSCO's request to increase electric rates, they should also consider reducing or eliminating the mandatory energy efficiency charges that have proven to be a loser for schools, libraries, residential, and commercial ratepayers.

Each year, an independent evaluator reviews NIPSCO's energy efficiency/demand side management (DSM) programs. The 2020 report is exhaustive: 479-page report. 379 tables.

(<https://www.nipSCO.com/docs/librariesprovider11/energy-efficiency/2020-dsm-portfolio-evaluation-report.pdf>)

For some reason, NIPSCO's 2021 report did not contain an analysis of the cost-benefit of the program for ratepayers. I emailed the author, asking why there was no cost-effectiveness report in the latest study, but she has not responded. So, I relied upon the 2020 report that concluded that NIPSCO's energy-efficiency program is a loser for ratepayers.

Here are a couple of conclusions from the 2020 report:

- *"NIPSCO's energy efficiency programs were highly cost-effective, creating \$53 million in net benefits for NIPSCO,"* (page 477), yet;
- Residential and commercial customers lost more than \$23 million from the energy efficiency rider. (Page 378)
- For every \$1 NIPSCO collected from its residential customers for energy savings programs, the customer class received only 65 cents in benefits. (Page 465 table 369.)
- This adds up: Residential customers lost \$7,863,031. Our small business commercial customers, including our schools and libraries, lost \$15,493,006. (Page 475. Table 378.)

- Table 8, page 18: Residential return on investment was 0.65, **a loss**.

The big industrial customers figured out what a bad deal this extra rate could be for them. Big electrical customers used their clout to get a law passed giving them the option to drop out of the energy efficiency program and not have to pay the extra rider. (*Indiana Code 8-1-8.5-9. Energy Efficiency Programs; Opt Out by Industrial Customers*)

Indiana's homes, apartments, schools, libraries, and small businesses should be given the same option to opt out NIPSCO's energy efficiency rate riders.

Call to Action, please:

As part of the review of NIPSCO's request to increase rates and add another rate rider, **the Office of Utility Consumer Counselor (OUCC) and the Indiana Utility Regulatory Commission (IURC) should reevaluate the usefulness of the energy efficiency programs and consider eliminating this rider before approving yet another.**

- The 2020 study concluded that while it was a money maker for NIPSCO, the energy efficiency rider had no financial benefit for ratepayers. It has worn out its cost effectiveness.
- Most homes and businesses have already replaced their lights with energy efficient bulbs,
- and most of us are growing weary of paying for notices in the mail saying how our energy use compared to our neighbors.

We don't need to keep paying extra electric and gas rates for this program that has negative financial benefits to ratepayers.

Thank you for your every consideration.

Stu Summers

Subject: Please REJECT NIPSCO Electric's request for more profit!
Date: Tuesday, January 3, 2023 11:39:13 AM

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

Dear Mr. Fine,

It seems like every time I turn around, NIPSCO wants more of my money. We are in the midst of a recession, a global pandemic/ mass disabling event and times across the board are hard for more families than not. It is a struggle to choose between having heat or food for a lot of Hoosiers. In 2021 when the average joe had to struggle to provide essentials NIPSCO brought in 529.8 MILLION DOLLARS in profit. 529.8 million dollars!! (https://www.nwitimes.com/business/local/nisource-turned-a-529-8-million-profit-last-year/article_84ee67d8-02d4-584a-9051-ee251c20963e.html). They want me to pay to clean up for their toxic coal ash mess (which they made profit creating), along with extra profit for their shareholders. They keep hiking bills because of “the rising cost of fossil fuels”- again, a result of THEIR choice to use (and profit off of) fossil fuels for so long.

Now they want higher profits in Cause No 45772?! This is their third rate hike in the last 6 years! I know workers who haven't even gotten a raise in 6 years. Nipsco is making money hand over fist and it's disgusting.

They want higher profits to provide the same exact service, they want us to foot the bill but get literally nothing in return. Electricity and Heat are essentials for living not a luxury but you know what is luxurious? 529.8 million dollars. If this rate increase is approved it will be truly inexcusable and downright disgusting honestly.

How on earth are Hoosiers supposed to afford all these increases for an essential service we all need to survive?

Please REJECT NIPSCO's request to raise their profits and hike my fixed monthly charge in Cause No. 45772.

Please stand up for residential customers in this case. Corporations are not people. Please also advocate for vulnerable customers by supporting NIPSCO's proposed low-income program. We all know residential customers are already subsidizing NIPSCO's large industrial users (on top of all the bill increases I already mentioned). The least we can do is catch up to gas and water utilities by offering common sense programs to help senior citizens, low-income families, and people with disabilities afford their utility bills.

At what point will it be enough? At what point do they put Hoosiers before profits?

Regards,
Jayme Schymanoske

My name is Eric Walker, 2248 county road 39, Waterloo, In 46793.

Doesn't nipsco already have one of the highest electric rates in the state of Indiana?
I do not support nipsco rate increase cause no. 45772.

Why doesn't the state of Indiana give residents better options to put in private solar panels instead of a rate increase to nipsco.

Government officials are working the climate change problems from the wrong end.

Thank you Eric Walker

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

Hello,

I would like to submit some comments regarding NIPSCO's request to increase their base rate.

My husband and I (Darin and Tina Porter) are opposed to this rate increase for the following reasons:

As a consumer, we do not have the option to go with another service provider for our electricity. This leaves us at the mercy of NIPSCO.

Electricity to power our home and gas to heat it are basic necessities, not luxuries. We can turn the thermostat down to try to cut costs, but at what point does frugal cross the line to suffering while being cold? With the costs of other basic necessities increasing at alarming rates, such as rent, food, toiletries, prescription medications, clothing and gas for the vehicle (also all basic necessities), we feel like NIPSCO is exploiting their customers, especially since they had over a \$529 MILLION profit in 2021.

Many consumers are struggling to make ends meet, especially seniors on fixed incomes, and a rate increase could mean the difference between getting that needed medication or paying the NIPSCO bill. We are all being stretched thin as it is. Allowing them an even larger profit while some are eating Ramen noodles for dinner so they have enough left over to pay the NIPSCO bill would be foolish.

Thank you for your time.

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

Dear oucc,

I attended the January meeting in Valparaiso but did not speak. I do not get the newspaper and had not heard that we could speak that night. I am a widow of a Vietnam veteran, a mother, a grandmother, and a great grandmother at 79 years old. I would say a typical northwest Indiana family.

I am writing to ask that you deny the request NIPSCO has put before you. It is insulting to know the CEO of NIPSCO makes over 9 million dollars. My 24 year old grandson works 2 jobs and I have to pay his utility bill to help keep him afloat. I also have 2 grandchildren living with me. One has autism and the other is in school. My neighbor just retired and her 2 adult college grads are living with her. We already pay \$13.50 just to be an electric customer. The \$20.00 extra will be a burden for most households.

Our schools here in Valparaiso not only have free breakfast and lunch programs for those who can't pay, they also pack hundreds of backpacks on Fridays so the kids can eat over the weekend.

No this is not caused by NIPSCO. All citizens are dealing with climate change, natural disasters, covid, the war in Ukraine. All combined it has played havoc with our food chain, supplies and services. NIPSCO has not single handedly ruined our economy, but Please, while so many are suffering, let them know it is too much of a burden for a raise now and for the amount they are asking. Please tell the board of directors that they need to cut back as the Hoosiers they are servicing are. They can start by not sending me letters telling me I am using less than my neighbors. I don't care what others use. How about a revamp of salaries. A man at our meeting on January 4th figured out if the CEO worked 7 days a week 12 hours a day, he would be making \$500.00 per hour. True or not the CEO makes more than anyone in the Federal government. How is it that such a wealthy company keep asking for more?

NO IS A COMPLEAT SENTENCE
time and consideration.

Thank You, I appreciate your

To whom it may concern,

I am appalled at the rates Nipsco wants to raise to. They have raised rates one way or another every year. It is getting to the point where the average person cannot afford to heat or cool their house.

In the last couple of years, I have had to make several cutbacks in addition to giving up things at home in an effort to keep this bill in a range that I can afford to pay.

I realize we live in a world where cost are sky rocketing, but when a company raises prices, and then turns around and reports record profits, it is unacceptable.

Yes, for gas there are companies that I could shop around for to see if I could get a better rate. However, Nipsco is my only option for electricity. Also as they raise rates, it hurts the pockets of the residents of their service territory. Not to mention the strain it puts on government assistance programs.

Many don't understand how hard it is to get ahead in this world. I feel like as soon as I make any progress, I have a huge setback.

You shouldn't have to choose between food, gas for your car so you can go to work or heating your home. I have been in that situation, and it's not fun.

Please do something, because if you don't, when will it stop? Will it stop when our nipsco bills are as much as a mortgage?

Thank you for reading, I hope my message matters.

Thank you,

Philip Lau

As an investor in energy, it is concerning that a utility in Northwest Indiana is not open to the idea of selling, leasing or joint venture with one of their dormant assets that would in turn, lower cost of natural gas to ratepayers as well as reduce excessive pipeline leasing and reduce costly no-notice services with pipelines that hold NIPSCO ratepayers hostage. This has actually been discovered recently and we believe this justifies the IURC opening an investigation.

NIPSCO currently has 2 aquifer storages. One of which is operating (Trenton), the other is dormant (Mt. Simon) according to the Energy Information Association (EIA). The dormant storage field has been one of interest to investors that specialize in aquifer storage to potentially re-activate. Though, NISOURCE admins will not consider selling/leasing or willing to be a part of a joint venture for reasons unknown. Be advised NISOURCE has \$9 billion in debt, without NISOURCE admin saying it, it was clear that they would rather let it sit dormant than let well capitalized investment firms invest and benefit from the facility. We believe they do have the right to say whatever they choose, but when it affects the costs to the ratepayer, is their arrogance making decisions that are best for NIPSCO or ratepayer?

Being the Indiana Utility Regulatory Commission, we urge that you will reach out to NIPSCO and investigate their actions and allow the ratepayers to benefit from this facility before any further rate increases are approved.

Comments: I am a customer of NIPSCO and have been for several years. NIPSCO electric rates are already unaffordably high for the cost of living in the area. Higher electric rates are not necessary for the "service improvements" that NIPSCO claims to be making (which should be mandatory nonetheless, as movement to renewable energy is the only way forward). Please do not allow these rate hikes to go through without some form of assistance for the people who need it; the limited support that already exists is insufficient for these hikes.

Utilities: NIPSCO - CAUSE NUMBER 45772

Type of Inquiry: General Inquiry

Comments: I'm seriously questioning the purpose and mission of the OUCC and the IURC and their reason for existing in Indiana Government as the IURC and OUCC readily to approve YET ANOTHER RATE INCREASE FOR NIPSCO - A public utility with 6 EVP/CEO's making in excess of 1.5 Million up to the salary of President and CEO Joseph Hamrock who in 2017 made a reported \$5,407,202 in salary, equity, and other compensation!

And the IURC and OUCC will PROBABLY grant them the rate increase on the backs of struggling residents of Indiana!

Cause number 45772 will count towards NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels that have been APPROVED by the IURC and OUCC.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

NIPSCO consistently asks to raise our fixed monthly charge when everyone knows this causes disproportionate harm to senior citizens, low-income families with children, and people with disabilities - those who typically use less energy and are often barely scraping by. Meanwhile the OUCC and IURC has APPROVED THESE RATE HIKES seemingly without asking so much as a proof of need by the utility.

As frustrated as I am by rising NIPSCO bills, I do support their transition to renewable energy. Renewables are cheaper to operate and maintain, and they aren't subject to fuel price volatility like coal and gas. I'm definitely looking forward to the day when NIPSCO retires their coal plants and the cost savings that will bring.

I also support NIPSCO's proposed program for low-income customers. LIHEAP is a critical lifeline for folks in the cold winter months. It's also crucial to protect Hoosier health and safety by offering support during the hottest months of the year. We don't want to put people's lives in danger because they can't afford utilities.

Respectfully, I REQUEST YOU REJECT NIPSCO's REQUEST to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Type of Inquiry: Case Comment

Comments: Regarding IURC CauseNo. #45772, NIPSCO electric rates. These comments are of my behalf and I am currently a customer of NIPSCO. I do not agree that NIPSCO needs to increase residential electric rates at this time. It has been able to generate profits of \$571M in 2021 and \$507M in 2020 while simultaneously completing infrastructure projects. It estimates that \$750M will be needed to replace the coal Michigan City generating plant and 2 peaking gas units at Schahfer Generating, the entirety of which would be covered by previous years' profits. The proposed rate increase would bring the price from the current \$0.16/kWh (\$0.185/kWh including current riders and customer charge) to \$0.19/kWh beginning September 2023 and then \$0.20/kwh beginning July 2024. NIPSCO residential electric rates already match the national average (\$0.16/kWh, per BLS Nov 2022) and exceeds the midwest average (\$0.14/kWh, BLS Nov 2022). The proposed rate increase would just drive the NIPSCO residential rate further above average. Per the NIPSCO third quarter financial report, residential generation accounted for 23.3%, commercial 21.6%, and industrial 51.6%. The infrastructure burden should be placed on commercial and industrial customers instead of solely increasing residential rates. The IURC needs to reject the proposed increases as they would only benefit NIPSCO shareholders at the detriment of the residential consumers.

Comments: Kwh cost of electricity in my NIPSCO 12/20 bill was 13.44 c, 12/21 14.7 c, 12/22 16.64 c. There has been 23.8% increase from 12/20, and 13.2% increase from 12/21. There is already an increase in the rate. The cost of natural gas decreased significantly fro June 22 and Aug-Sept 22 peaks. NIPSCO intends to generate electricity solely by solar and wind, which are unreliable. It wants customers to pay for this transition. The cost of kwh electricity is not clear by these modalities. Retiring all coal powered, and eventually natural gas powered plants increase the risk of power shortage. I would ask to deny electricity rate increase.

To Whom it May Concern,

I am writing to voice my opposition to the increase in power costs as proposed over the next two years. The negative impact on this rate hike will by far outweigh potential benefits. For us, as I'm sure many other families, this along with higher costs of living is making me consider moving, taking away the only stable home my children have known. We would need to live in a less adequate smaller home that I could afford to heat and light.

As a single parent, it is making me consider taking on an additional job to my full time job. Pulling me away from my kids and elderly father to work more to pay for constant increases is not beneficial.

It may seem a solution to you, but for families and society in general it will cause many related strains and deteriorate quality of life.

Please consider other alternatives.

Sincerely,

Diane Armiger

Good morning,

I am not able to attend the meeting so I hope this email is taking into consideration.

The last bill that most homeowners hate to see each month is the Nipsco bill. For years neighbors had hoped Nipsco would have a competitor because the bills are so excessive, and now they are planning on increasing the rates to where some months people may not have enough money to even pay the monthly installment plans.

Every year during November- February I struggle to pay my bill even with the help of funding for customers in poverty.

In my opinion maybe this is being created because Nipsco can earn additional money because a lot of people will have their utilities cut off. Then Nipsco will charge additional money to have the utilities cut back on.

Please keep in mind that majority of the world is working and living from check to check and cannot afford any additional increases.

Hello I am writing as part of the public comments regarding Nipsco proposed rate hike for electricity over the next two years of over 16%.

At a time when Hoosiers are losing money in their paychecks already, a rate hike would be detrimental to the Indiana economy. What Nipsco is wanting is to have customers pay double the inflation rate of this country. People are spending more on groceries already with no end in sight. Already the proverbial belts are being tightened and Nipsco wants to increase rates. Rates were already increased in 2018 for electricity, but also many customers were hit with a gas rate hike from Nipsco last year. Their customers have yet to fully get used to that increase and now they want more. I understand they are a utility, but frankly their profit to shareholders is of little concern to their customers. Service is of their concern. I would argue that yes rates should increase to continue service, but that is not now nor ever an amount double that of inflation.

I would argue a 5% increase for 2023 and a 3.5% increase in 2024 covering that of inflation makes sense.

Please do not approve the rate increase as proposed. Doing so is not in the interest of the Hoosier community.

Thank you

Subject: NIPSCO Rate Increase Questions
Date: Wednesday, September 21, 2022 7:33:36 AM

****** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ******

To Whom It May Concern:

I am writing in reference to NIPSCO's proposed 16.5% rate increase, as per NIPSCO, to improve infrastructure and needs for cleaner energy through renewables. NIPSCO is requesting a rate hike to customers and goes on to say customers will receive a \$6 per month savings, customers receive credit up to 100% of the revenue from sales of excess energy, a forecast benefit of \$50 million annually, and customers will see cost savings in the long term.

My questions/comments:

1. Please explain the \$6 savings per month per customer. When will this begin and will the savings be indefinite?
2. Please explain the 100% credit from sales of excess energy. What does this mean? Will customers receive credits on their bills? When can customers expect the credits? Will the credits be indefinite?
3. If NIPSCO will see a \$50 million annual cost savings, why the need to increase rates when the savings will be realized by NIPSCO?
4. There have been numerous accounts of renewable energy grids that have fallen short with provide enough energy to customers and as a result, there have been blakouts and calls for reduced energy use. We know wind and solar cannot provide the quantity of energy needed to supply all demand all the time. Should NIPSCO customers expect energy blackouts and urged to reduce energy demand in the future?

Subject: Nipsco rate increase
Date: Sunday, October 16, 2022 4:47:58 PM

****** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ******

My name is Joseph Fetty and my wife Dawn and I are residents of Newton County, Indiana. We receive our electric and gas from NIPSCO and I am referencing cause #45772.

My wife and I have been retired for over 15 years and as any retired individuals we are constantly fighting the yearly increases of internet, telephone, electric, gas, groceries, auto fuel, insurances and television services. Social security increases have left us in the hole each year as it fails to meet the cost of living. State pensions, for those who have one, rarely see any increase. We are left deciding what we must have and what we must give up.

An approximate increase of \$19.43 per month, and an additional \$6.22 per month in 2024 is an absurd increase as I look at my income and that of other retirees in my community. Yes, it is good to improve infrastructure but perhaps the utility company should have the money before it begins work. That is the way the rest of the world operates. NIPSCO is already one of the most expensive providers of power. They are even able to sell power to other utility companies who are then able to charge their customers less than the NIPSCO billed customers.

I am asking that you refuse NIPSCO's requests for monthly electric rate increases, or break it down over several years to lessen the impact on monthly consumer bills.

Thank you for your attention to this matter.

Joseph Fetty

Dear Sir or Madam,

According to the Goshen News, NIPSCo is going to be seeking an electric rate hike of about 16.5%. I would like to comment about rate hikes by NIPSCo, again. I could not find the case on your web site, so I thought I would just send an email. NIPSCo should be operating as a public benefit company and should be best serving the interest of the public users of the utility. They continue to ask for rate increases, adding to the problem of inflation in other areas of the economy, while still paying a substantial dividend as NI Source. From my point of view this makes their focus appear to be shareholders and NOT the public that the utility is supposed to be benefiting. I feel a rate hike would be unnecessary if they would eliminate the dividend. They could use that money to "improve" their infrastructure. Another thing they could do would be to provide incentives to home owners to provide them with places to expand their solar energy footprint. They, currently, appear to be focused on removing viable farmland from production to put up solar farms when there are plenty of roof tops that could easily exceed the surface area needed to expand solar and not remove farmland from production. Instead they want to fight that idea. I would hope that the IURC would become more active in pushing utilities, including NIPSCo, to be more public centric and less shareholder and self centered. So in summary, I hope that the IURC will completely reject any rate increase from NIPSCo for electric rates.

Thank you
Ken Toole

IURC Cause No. 45772

**Your
Comments::**

I am a NIPSCO customer writing regarding IURC Cause No. 45772. NIPSCO proposes a 16.5% rate hike over the next two years. The timing of the proposed improvements and the associated cost increase to customers could not be timed worse. NIPSCO's desired infrastructure improvements are not mandated or required at this time and the proposed upgrades to their system are more "wants" rather than "needs." With inflation the highest in 40 years with no sign of slowing down, NIPSCO's customers are already struggling to make ends meet. Placing yet another financial burden on those dependent on electricity to provide for our basic needs will further strain already stretched pocketbooks and compound the inflation problem. NIPSCO's rate increase is regressive - impacting most those who are most economically challenged. Switching from coal-fired plants to renewable generation is a good goal. Hardening the electrical distribution network is a good plan. However, these improvements can wait until this wave of financial instability and the resulting economic misery it has generated passes. Everyday Americans have reduced their spending and tightened their budgets in response to this financial crisis. NIPSCO should do the same and downscale their spending and not shift this load to their ratepayers. NIPSCO needs to be more responsible with the harm they will cause to their customers.

I request that the IURC deny NIPSCO's proposed rate increase for the reasons stated above. Thank you for your consideration.

Subject: Please REJECT NIPSCO Electric's request for more profit!
Date: Thursday, January 12, 2023 10:55:00 PM

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

Dear Mr. Fine,

It seems like every time I turn around, NIPSCO wants more of my money. They want me to pay to clean up for their toxic coal ash mess (which they made profit creating), along with extra profit for their shareholders. They keep hiking bills because of the rising cost of fossil fuels - again, a result of their choice to use (and profit off of) fossil fuels for so long.

Now they want higher profits in Cause No 45772?! This is their third rate hike in the last 6 years!

How on earth are Hoosiers supposed to afford all these increases for an essential service we all need to survive?

Please REJECT NIPSCO's request to raise their profits and hike my fixed monthly charge in Cause No. 45772.

Please stand up for residential customers in this case. Please also advocate for vulnerable customers by supporting NIPSCO's proposed low-income program. We all know residential customers are already subsidizing NIPSCO's large industrial users (on top of all the bill increases I already mentioned). The least we can do is catch up to gas and water utilities by offering common sense programs to help senior citizens, low-income families, and people with disabilities afford their utility bills.

Regards,

Subject: Say NO to NIPSCO's New Increase
Date: Thursday, January 5, 2023 2:13:16 PM

****** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ******

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Also, Nipsco is required to switch over to renewable sources by end of this year and close down their coal burning plant in wheatfield indiana. In spring of 2022 they started buying and/or leasing farm fields to put "solar farms" on to. It's their fault they waited 10-20-30 years to do this. Not the customer's fault. In 5-10 years these solar farms will pay for themselves. Stop gouging the public for your commodities portfolio and to pay your shareholders and you're outrageous CEO and upper management salaries.

Thank you,

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

To Whom It May Concern,

I am writing you about the rate increase that Nipsco is purposing. Nipsco currently charges the highest rates in the area. Many have no choice but to have Nipsco for their provider. The constant increase in electricity costs is causing many that use Nipsco, to have their service shut off. The customers are finding it harder to pay each month. I used to have a bill of \$300 a couple times in the winter. Now my bill is \$300 to \$400 for three or four bills during the winter. My bills in the spring and summer used to be \$150 to \$250. Now in the summer bills are \$300 to \$400 for June and July. Not because of the gas. For example, my July bill gas was \$40, electric was \$360. The Electric costs Nipsco charges are outrages already. They are being extremely greedy by wanting to charge even more. Please consider not granting Nipsco the rate increase, or many others will soon not have heat or electricity for their home.

Thank you,

Ann Morrison

RatePayer Name: Andrea Webb
Mailing Address: 3124 W 21st Ave, Gary, IN 46404
Reference Cause No: 45772

I am writing to advise that as a consumer in Northwest Indiana and using NIPSCO utilities that the decision to increase the rate would be very harmful to myself and family with the current economic inflationary rising costs. Personally, our family pays a cost of approximately \$320.00 each month for gas and electric utilities which has been a strain so we can't imagine what an additional cost would mean for our family. We are asking for the request for the increase to be denied.

Thank you very much for hearing my concerns in this matter.

****** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ******

Dear Counselor Fine,

Hoosiers like me are already struggling with rising energy costs & inflation. Our NIPSCO electric bills have increased 36% in the last 10 years and 64% in the last 20!

Please OPPOSE NIPSCO's request for higher profit in Cause Number 45772. It's really disturbing that NIPSCO wants higher profits as we Hoosiers are coping with so much! And we all know that raising the fixed charge hurts low-income and fixed-income customers the most.

And on that note, please support NIPSCO's proposal to help low-income customers with their monthly bills and deposits. Big gas and water utilities already offer programs to assist low-income customers, and it's high time electric companies follow suit. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Please stand up for residential customers and OPPOSE NIPSCO's rate hike!

Many thanks,
Nicole Johnson

Comments: Please do not allow such large rate hikes. Our citizens are already fighting inflation along with higher prices in all that they do. The last thing we need to do is compound the issue and allow for more rate hikes. Green power is great but we shouldn't chase people from their homes due to such large price increases. Thanks for you time.

From the desk Keith Wortinger

Indianapolis Indiana, 46204

I am writing concerning NIPSCO electric rate increase. I do not buy their claim that it is needed to keep a safe a reliable electric service. I looked it up on the net and according to that information, as of September 30/2022 gross profits were at 3.64B, an increase already of 4.75% over one year. 4.75% is a lot of money already. How does profit increase so much when nipsco claims it is spending it on safe and reliable energy. They give rebates to the people rich enough to install solar or remodel their homes to be more efficient, Then they turn around and try to get the increase to get their rebates back, and then some. And so far they have been quite successful. Where does this all end many people are struggling to just make ends meet. Even when nipsco was not allowed to shut people off during Covid they enjoyed what I consider a huge profit. Now bless there little hearts they have come up with a payment plan. That's great! But these people are not just behind on utilities. They're behind on everything-food, rent, clothing, ct. With profits I see nipsco could knock say 25% off their back bill still keep the payment plan in place. Nipsco has been using my property to service the electrical service in the addition next to me for years now. They drive down the lane make ruts ect, that I have it to fix! Nipsco will not even discuss it with me. I could cut it off but it would only hurt my neighbors. I say all of this to make a point. As I see it from my end, this increase is not as much about safe and reliable electrical service as it is about more profit.

I certainly hope you will reject this bid for an increase.

Sincerely,

Keith Wortinger

Comments: Regarding NIPSCO (Cause #: 45772) electric rate increase. I'm certain it is no mystery that people are against this rate increase! NIPSCO posts record profits and yet continues to raise rates on both electric and gas. How are the citizens supposed to keep up with these utility rate increases alone? We are facing a major economic issue and the rich are now asking for another rate increase. This rate increase should not be given, let's see what happens this time.

Comments: Please do not allow NIPSCO to continue to raise their prices! They are making huge profits already. They will be getting all kinds of tax breaks to continue their expansion into solar and wind energy. And, they are still trying to increase their prices to pay for the cleanup of the mess they made, knowing that it would have to be cleaned up. This is the most outrageous scam in Indiana! Please protect consumers like me who cannot afford to pay more for gas and electric.

Comments: If they were focusing on giving base load power, they would have retrofitted the coal plant with coal burning scrubbers, instead they are wasting consumers dollars on wind and solar farms that will NOT keep the lights on. I refuse to pay extra for these pet projects that will hurt our power grid. Our government officials need to stop with the nonsense as well. If you don't like coal, build a nuclear plant, we will soon be in the dark and at the cost of all these rate increases from unsustainable projects that are too expensive.

Utilities: Regarding: NIPSCO 16.5% Increase

Type of Inquiry: General Inquiry

Comments: Regarding NIPSCO's proposal to increase electric utility rates by 16.5 percent. Please tell NIPSCO -- NO!!! They (NIPSCO) have been getting yearly raises since 2016 and I see they are still at it. Giv-me, giv-me, giv-me!! Their pockets are good and full by now -- I'm sure and they are STILL begging for more. Sixteen and half percent (16.5%) isn't anything to turn up your nose -- that is one hella raise!!! Our base is \$15 dollars plus 16.5%=\$2.475=\$17.457. They have been trying to get \$18.00 dollars base pay since 2016 -- they are almost there. Most working people don't get yearly raises; why should NIPSCO?!?!? It's shameful!!!

Utilities: NIPSCO rate hike

Type of Inquiry: Case Comment

Comments: Just received my highest bill ever so I looked back 2 years at my electric bill from NIPSCO since they are requesting a 16.5% rate hike. December 2020 rate 811 residential came in at .134 per kwh compared to December 2022 same rate which came in at .166 per kwh. Over that 2-year period they increased the price of electricity over 24% and now they want ANOTHER 16.5% rate hike for the next 2 years. Being a senior citizen and veteran on social security I feel their request should NOT be granted. Another thing that customers are being billed for is a "customer charge" on their electric bill of over \$150 dollars a year and they consider it wire maintenance and on top of that they charge a 7% state tax. They act as though they are caring for the customers but in reality they just want more money. I ask you to please consider denying their request for the increase for all the customers like myself who find it hard to make ends meet to fund basic necessities. Thank you Michael and Carol Walz

Dear Mr. Fine,

While coal fired power plants have been and will continue to provide the "heavy lifting" for major power users, we are transferring environmental costs on to future generations due to the generation of carbon dioxide and its effect on climate change. I can appreciate NIPSCO's desire to reward their shareholders, of whom I may be one, by extending operations of the coal fired power plants in place of expanding use of renewable resources such as solar and wind, but also developing small nuclear power plants not unlike those used in nuclear powered submarines and ships. The proposed electric power hikes of about \$30 per month per customer will be an issue to some. While I will see (at this point) only the increase in the fixed charge as virtually all of my electric use is supplied by the sun, others will see increases in their total bill. Four homes in our small homeowners association will see an increase in our fixed NIPSCO costs of about 25%. As a group we generate about 40 to 50 MW of power annually. Power in excess of our use is distributed to our non-solar powered neighbors, saving NIPSCO the need to send this power through existing lines to our area. In addition, we generate excess power frequently during times of greatest demand, thus minimizing the need for generating supplemental power during such times of peak power demand. This increase amounts to only \$3.50 a month, and those of us relying on solar electric and distributing excess to our neighbors appreciate the net metering aspect of our current arrangement. We would be very disappointed, however, to see that policy change increasing the cost of electric power purchased and decreasing the value of the electric power returned to NIPSCO.

Please do not let NIPSCO and it's parent company continue to pay high level executives crazy amount of money and then pass off these costs to customers.

They continue to provide very nice take home vehicles for a lot of employees, bonuses to managers and craft a like. Great insurance benefits etc.

Until these companies learn to do more with less, cut costs through salaries, bonuses and perks, they should not be allowed to raise rates.

I am all for taking care of employees, but it has to cost the company, not the customers.

Case Description: Hello, I am against the Rate Hike for Nipsco Electricity! Please do NOT allow this! We parents are facing extreme increases for cost of living, and jobs pay scale are not keeping up! When I bought my house in 2015 the Budget plan was \$110.00... now 8 years later my budget plan is \$301.00 Nipsco can seek money from Gov. Eric Holcomb, since he has so much money in our surplus that he's holding on to, bragging about! Trying to afford to feed my kids is a struggle! The cost of food is through the roof! They raised our property taxes to give the schools updates and the board a raise.. first for 7 years(then over spent), now it's for another 10 years! They took away SPED teachers on top of it! They raise our gas tax on Nipsco! Eric Holcomb raised our gas tax on vehicles. They raised our trash & recycle fee's & took away recycle every week and is now every other week. Eric Holcomb capped our mortgage tax! Eric Holcomb wants to refuse to legalize marijuana in the State of Indiana, when ALL that revenue could be paying for all the infrastructure needs in our county! Something has to give to give us parents a break on all these increased bills! What happened to people helping people? All I see is everyone taking more and more from the people and making us suffer & struggle! Forcing us parents to get 2nd & 3rd jobs just to be able to maintain. Meanwhile, our kids are facing all the suffering from overstressed parents and more of us falling into poverty or worse, depression while trying to stay a float and be there for our kids with love and attention! It is just NOT FAIR!

Please bring our bills back down!! This is killing us. I know our economy is inflated, but this is unacceptable. I have 5 children and work really hard (and too much). My wife is having to go back to work as well. I just ask you to reconsider how crucial is it for you to raise our bills this high. Put yourselves in our shoes. I know you need to make money. I know we need to pay for our home and utilities. I'm not trying to get off easy. I'm just asking for a little understanding on your part. You are hurting countless people when you do something like this. Please stop!

Thank you for your reconsideration,

I do not believe that Nipsco should be able to increase our energy prices for this simple reason... They do not have an equal competitor in those same areas that Nipsco does business. If there were two energy companies that could compete against each other for the best price then they can ask for more money, because quality would be paid for. In this case they are the only energy source nobody has a choice so they should not be able to increase their prices. They are getting paid enough for having every single Land owner as a customer.
Thank you for your time.

Hello,

As a NIPSCO customer, my household opposes the price hike. Our budget plan is already going up \$138/month even with us keeping our heat at 63 degrees in the winter time and at 75 in the summer. Eggs are \$4 a carton and gas is barely under \$3. Our escrow has a shortage and made our mortgage go up \$100 a month. We're getting hit every which way and everything is going up except our wages at our jobs. We have no other choice but to use NIPSCO to keep our home's functioning so NIPSCO has customers regardless. They will never not have customers. Please let us catch a break somewhere.

Thank you,
Alicia Herbeck

To Whom It May Concern,

I am a lifelong resident of Northwest Indiana, currently residing in Chesterton. The proposed rate hikes by NIPSCO would cause great difficulty upon myself and many other residents and families. Wages are not being raised to keep up with the rising cost of utilities. Unfortunately, unlike some areas, NIPSCO has a monopoly in my area. We do not have the choice to go with a different gas or electric provider. It's unfair and a bit cruel even to raise the prices so dramatically.

Please consider the average citizen when hearing this case. We are the ones who will suffer and have to decide between electricity/heating/cooling or food. The executives at NIPSCO do not have those worries, but we do.

Thank you for your time.

Utility companies and large corporations continue to make massive profits. Their consumers are suffering through raging inflation and recovery from the Covid pandemic. These are not everyday events. We've not seen times like this, like ever. The Utilities commission needs to weigh the fairness of that from both sides. I do not think now is the time to be raising rates, let us all recover a bit, or just a thought, maybe NIPSCO can make a little less profit for a few years during recovery like all the rest of us. I say postpone the hikes or allow less and spread them out over a longer period of time. The consumer is already grappling with the natural gas price getting ready to hit us this winter.

My first question with their request for an increase is just how profitable are they. In 2019 the posted a 9.57 profit margin , in 2020 a 2.77 loss and 2021 a 1.82 loss . that's a major swing 11.39 down turn . What cause this . My first thought a new way to calculate earnings and losses. The same game most large companies use to justify wage , benefit and retirement reductions. It now the public fault that their plan to move to solar hit a sang but they (stockholders) want the public to pay for it. I would thing the first thing they need to do is make their own company solid first . Accountability of all employee performances would be a good start. The answer to all our problems is not more money it money spent well.

Anthony McCallum
Grovertown, IN. NIPSCO customer

No rate increase. It's an inflationary cycle. Nipsco mentioned cost of infrastructure going to renewable energy being a reason for increase. This is crazy. Coal is cheaper and should be used. We should not be paying for some environmentalist agenda while saddling working people with enormous costs. For nothing if Nipsco eliminated all CO2 emissions what good will it do when other countries increase their pollution by 3 times. It only hurts citizens for no foreseeable gain.

Thank you.

As seniors living in northwest Indiana, my husband and I are finding it more and more difficult to stretch our monthly income dollars to afford everything from food, gasoline, health care costs, property taxes, etc., and now we are faced with ever increasing NIPSCO rates to keep our homes heated and cooled throughout the year.

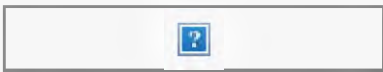

Something has to be done about this. In these tough economic times, increasing energy costs does not make sense for the average consumer. It only spells more hardship on us all.

Nipsco electric rates

**Your
Comments::**

Please do not allow Nipsco to raise their electricity rates! They have already raised the price of gas as everything else a human needs to survive on had also gone up in price. This monopoly should not be allowed to make record yearly profits for their CEO at the expense of the customers who have no choice but to keep paying and paying them. The biggest money making season of winter is coming up for Nipsco where we have no choice but to run our heat. The forecast predicts a very cold winter and Nipsco is going to take advantage of their customers who many are already struggling. Please please do not approve this!

Proposed 16% NIPSCO Electric Rate Hike

**Your
Comments::**

Renewable energy infrastructure? These are capital investments. Why doesn't NIPSCO issue additional stock or use other available methods to raise the funding instead of placing the burden on customers? If investors don't think this is a viable investment, perhaps NIPSCO should reconsider its plans. This is a preposterous proposal and shouldn't even be taken seriously. I'll take my current rate and coal fired electric generation. Customers > Shareholders...

Nipsco

**Your
Comments::**

Unbelievable how every thing is going up but not my paycheck I will be one of the ones that will have to decide to either pay my nipsco bill or my medication or food, there just isn't enough to help seniors, to bad I cant go back living when I had a. Coal stove and use to heat my house with that! Forty years ago but then I was y ou her and able now I'm not when it going to stop raising the prices it sucks, their should be something easier for seniors, I dont make a lot of money and I live with in my means I'm not on welfare or have a new car I dont try and rip the system off.

Raising gas rates in an already unbearable economy. The key phrase in the rate hike “to raise profits for share holders”. So share holders make more money on the disguise of renewable energy. This is nothing but a scam for corporate greed takin out on good hardworking blue collar citizens. Shame on indiana. For even letting this be a thought

To Whom It May Concern:

I am writing this letter to you as a current NIPSCO gas and electric customer in regards to Cause #45772. I would like to request that Nipsco's rate increase request be denied at this time. Their current rates and charges are killing the consumers in which they serve. We can not afford to have any more cost increases especially given the already high cost of living. I am on a budget plan with NIPSCO and my current budget is set at \$765, charges last month were actually \$789. We live in an average size home with about 1300 sq feet. We have done every cost saving measure we can think of to save money, from as simple as changing the type of light bulb to windows/doors. We are a middle-class family who is struggling to pay current utility costs that are currently so high they match, surpass mortgage and rent payments. If Nipsco customers were to be surveyed there would be very few who would be agreeable to this rate increase because the vast majority are already struggling. Upon reading things on social media many customers have resorted to turning off the heat or keeping it extremely low because they simply can not afford the costs associated with NIPSCO utilities. I urge you to deny this request at this time simply because the customers simply can not afford to fund any bigger projects, the customers are already paying mercifully for their gas rate increase.

As an example of what NIPSCO puts customers through I would like to share some specific examples from my bill dated 12/29/2022 gas charges \$181.14 delivery \$92.40 then the electric portion of the bill for the above-mentioned average size home is \$491.13 which includes the \$13.50-meter fee. Hopefully with these numbers you can see exactly why consumers can not afford an increase. Please remember Nipsco has successfully received several rate increases in the last few years, it is time to tell them no. They can learn to budget and make cuts like every other person and business does.

Sincerely,

Brandin Danielson

Nipsco got a raise increase in 2018, now wants 16.5% increase (\$19.00 per month)for 2023 for infrastructure. Nipsco is a monopoly. I thought that was against the law. BTW I received a home energy report from Nipsco telling me I can save \$15 per year if I hang my laundry on a clothes line and an additional \$185 per yr if I reduce my water heater temperature so I can freeze with cold water after 10 minutes. Thank you. No to any increases!

Why hasn't Nipsco taken care of its infrastructure issues for the 61 years I have lived under their monopoly?

Thanks for fighting for the peasants. And God Bless,
Bobett Kelley

Nipsco increasing pricing to pay shareholders NiSource. If they were putting in more systems that would generate more electricity more efficiently that is something I could get behind. Please do not allow them to increase our electric bills. I beg you. We all are dealing with inflation and a significantly slowing economy this would be just another nail in our coffins.

Dear Mr. Fine,

It seems like every time I turn around, NIPSCO wants more of my money. They want me to pay to clean up for their toxic coal ash mess (which they made profit creating), along with extra profit for their shareholders. They keep hiking bills because of the rising cost of fossil fuels - again, a result of their choice to use (and profit off of) fossil fuels for so long.

Now they want higher profits in Cause No 45772?! This is their third rate hike in the last 6 years!

How on earth are Hoosiers supposed to afford all these increases for an essential service we all need to survive?

Please REJECT NIPSCO's request to raise their profits and hike my fixed monthly charge in Cause No. 45772.

Please stand up for residential customers in this case. Please also advocate for vulnerable customers by supporting NIPSCO's proposed low-income program. We all know residential customers are already subsidizing NIPSCO's large industrial users (on top of all the bill increases I already mentioned). The least we can do is catch up to gas and water utilities by offering common sense programs to help senior citizens, low-income families, and people with disabilities afford their utility bills.

Dear Counselor Bill Fine,

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

NIPSCO consistently asks to raise our fixed monthly charge when everyone knows this causes disproportionate harm to senior citizens, low-income families with children, and people with disabilities - those who typically use less energy and are often barely scraping by.

As frustrated as I am by rising NIPSCO bills, I do support their transition to renewable energy. Renewables are cheaper to operate and maintain, and they aren't subject to fuel price volatility like coal and gas. I'm definitely looking forward to the day when NIPSCO retires their coal plants and the cost savings that will bring.

I also support NIPSCO's proposed program for low-income customers. LIHEAP is a critical lifeline for folks in the cold winter months. It's also crucial to protect Hoosier health and safety by offering support during the hottest months of the year. We don't want to put people's lives in danger because they can't afford utilities.

Please REJECT NIPSCO's request to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Sincerely,
Adriane Jagger

Dear Sir/Madam,

I just read an article from The Times of NW Indiana telling that NIPSCO is planning to raise our rates.

I am a NIPSCO customer who can't afford to pay more each month. I am, unfortunately, a retired school teacher. I have to pay \$700.05 out of my pocket to receive health insurance that has deductibles and copays. My budget is extremely tight.

If you care about average and poor people you will NOT raise our rates.

The Merrillville-based utility is seeking to raise rates that would increase the monthly cost to the average customer, using 668 kilowatt hours of electricity, from \$107.78 a month to \$127.21 a month next year and then to \$133.43 in July of 2024.

Thank you for reading my concern. Please listen to what I'm saying. I CANNOT PAY MORE BECAUSE I'M ON A LIMITED BUDGET. I'm sure there are many Hoosiers who can truthfully say the same thing.

Good Evening,

I strongly oppose the NIPSCO rate increase.

In a time of inflation, sky rocking food costs, and constant fears of a deep recession families are already financially strained.

Families cannot absorb NIPSCO's greed, especially when they do not have a track record of spending the rate increases appropriately. In 2011 soon after they got a rate increase approved the CEO received a raise (<https://www.ibj.com/articles/26473-nipsco-ceo-gets-pay-raise-after-seeking-rate-hike>)

Thank you for your time,

Matthew Sweet

Thank you for the information and quick response. I have since filed my complaint from the IURC online services portal and have included the contents of the complaint below. Please feel free to forward it to any legislative authority.

Sincerely,
David Gertz

Upon receipt and review of my \$482.82 August 2022 Nipsco utility bill, I reviewed the previous month's bill of July 2022 in the amount of \$458.38. What I discovered was that my NG usage was almost identical between months (0.3 Therms more usage in August). My electric usage was 90 kilowatts less in August than in July, however that is where the cost difference is. Nowhere on either of the month's bills is the cost per kWh or is there any notice of an increase in electrical rates. I then contacted Nipsco's customer service phone number on the bill. After a lengthy wait the representative could not provide me with any reasoning for the increase for electric charges for the August bill even though there was 90 kWh less in usage. I then questioned if the price per kWh had increased between the months and I was told that it had not and then the representative suggested that I look up the rates from their website. Approximately a week later I tried to find the rate per kWh from their website with no success. I then did an online chat explaining my current situation with another Nipsco representative who looked up my account and then had to do a little research before she was able to explain to me that there was an electrical rate increase due to a "fuel charge" and then provided a link to the information on their website. Upon reviewing the provided link (<https://www.nipsco.com/our-company/about-us/regulatory-information/electric-rates>) I had to sift through the many pdfs. of rates, riders, appendixes, and historical appendixes to find the specifics to match my current electrical service to the previous. I was finally able to confirm the past and current "fuel charge" explained by the chat representative and also noticed a "Transmission, Distribution and Storage System Improvement Charge" that again I was never aware of or was ever mentioned, but I do believe it applies to my bill. There are also other charges I noticed in the pdfs., however it is ambiguous to me if they would apply to my service.

The basis of my complaint is that in the name of transparency all electrical & gas rates should be broken down and itemized by applicable category on all bills as it would be most helpful to the consumer in understanding the costs and how they are applied. It was never aware to me until now and to most consumers that there are any other charges that apply to the electrical kWh rate as they never have appeared on any past Nipsco's bills. I have also noticed that when these rates change that they sustain for at least 3 months. This should also be disclosed as it is useful for helping consumers plan and or make any necessary adjustments for the upcoming months to their usage. Another substantial problem I am hearing from mostly older folks is they are not comfortable using a computer to look up non-disclosed rates online and sometimes believe that the increase is due to faulty appliances in their homes.

To Whom It May Concern,

I was saddened to read that Nipsco is again asking for another rate increase. Our poor senior citizens are struggling so much right now and now they want to increase rates again? They just received a small increase in their social security for this crazy inflation and now that will be eaten up by the increased rates. I understand that Nipsco asks for a large amount and then settles for something smaller, but maybe this year, the executives who make exorbitant amounts of money could forgo their raises and pass that savings onto their customers.

To whom it may concern,

As a Hoosier and an American living in an already struggling economy I believe the last thing I would do is increase electric bills on a struggling people. The majority of Americans are not in support of this “green” new change and we are being pushed upon to just accept it. If NIPSCO feels strongly about moving from coal burning to electric grids than they should have to eat the cost difference not an already struggling tax payer who can’t even put food on their table. It is tyrannical and communistic to force a people to do something they are not in support of.

“There will be no mercy for those who have not shown mercy to others. But if you have been merciful, God will be merciful when He judges you.” **James 2:13**

I am a NIPSCO consumer in Valparaiso, IN. I don't think I should have to pay any more for NIPSCO to delve into "renewable" energy production unless they provide guarantees that that energy will provided just as reliably as non-renewable sources and at a price that is no higher than using natural gas or nuclear energy.

Do not approve of Nipsco increase based on the company's decision to change to renewable electricity production. I think more energy resources that are affordable to ALL would be best approach since minority of Americans can afford renewable energy sources. We should not be forced to pay an increase on something we don't want nor need at this time. Nipsco is making energy less affordable for majority of Americans. Do not approve this increase.

Subject: I Say NO to NIPSCO's New Increase
Date: Wednesday, December 7, 2022 3:43:20 PM

****** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ******

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Carol Baker-Murray

Office of Utility Consumer Counselor

1150 WASH. ST

EVANS 1500 SUTL

Daly 460204.

Sirs:

IF I'm not too LATE, I'D
like to put in my 2¢ worth
about 3rd world power
(AKA MIPSCO) wanting a rate
hike, - in addition to the
14 1/2% they've gotten since
August.

They need to get those met
together. The LATEST example was
a few days before the time
change (they usually do it a few
days after, so you can reset all
the clocks again).

-2-

The power went off at about 5 AM. I wasn't going to try to get to the phone in the dark, I figured someone who was up would call them. Apparently they did because shortly after the phone started ringing about every 5 minutes (probably their re-call to tell me the light was off.)

I got up about the sun was up. By then they must have had someone here, because the calls started again, saying they expected it to be out ~~for~~ til about 3:00, It kept calling even after I answered.

The light came back on about 11:00, then the calls started again to tell me the light was on (LDA). ~~It~~

No explanation/excuse why they were off.
The wind was blowing.

3-

I suppose either ~~of~~ ~~a~~ A TREE
THAT SHOULD HAVE BEEN TRIMMED
GOT BLOWN INTO THE WIRES, OR
A ROTTEN ~~to~~ pole THAT SHOULD HAVE
BEEN CHANGED FELL OVER,

(SEVERAL YEARS AGO, A FEW
MILES SOUTH OF HERE, ON A WINDY
DAY A ROTTEN ~~to~~ pole BLOWN OVER,
BUT IT WAS ALSO ROTTEN AT THE
TOP, SO THE INSULATOR PULLED OUT
THE POLE AND THE WIRES WERE STILL
IN THE AIR.)

A ~~few~~ FEW YEARS AGO ON
A MILD EVENING, AT ABOUT 6³⁰
(LATE DARK) THE LIGHT WENT OFF
FOR ABOUT 10 SECONDS. ABOUT AN
HOUR LATER, I HAD ONE SOCK
OFF, WAS ON MY WAY TO THE
SHOWER AND THE ~~to~~ LIGHT WENT OFF

I CALLED, SHE TOOK A REPORT
FROM ME THAT THE POWER WAS OFF.

I COULDN'T DO ANYTHING ELSE, SO
I WENT FOR A DRIVE. I GOT UP
TO STATE RD. 10, WHERE THE
FIRE DEPT. HAD THE ROAD BLOCKED.

-4-

I WAS TOLD A CAR HIT A pole about an hour before and that Nipco had finally gotten there to shut off power so they could clear the car & road.

That means Nipco shut off the power. — When they got the call from the cops their pole calls should have gone out ~~at~~ telling us they would be turning off the power,

When it went off and I called I should have been told what was going on.

During bigger events, when fuses blow on taps, then eventually the entire circuit goes out, they quite often restore the the main circuit and don't check the TAPS. — Then try to get them back ~~home~~ here.

When they get outside help, those guys don't know where they're at, and Nipco gives them no help — just the address of an address — go figure it out.

There's a pole south of
me leaning towards the road —
been that way for years.

If a storm takes out any
of the triple shot fuses, they
don't change them before the
next storm.

I keep on a sheet of
paper for each year, each
month's usage, base price
per kWh & total price — after
sales tax and the ~~\$\$\$~~ \$13 something
per month for for the "privilege"
of being their customer (they
~~hit~~ hit me for that 3 times)
so I can see how much the
price goes up each month, and
they want more? — NO!

Sincerely
M M.

Case Description: Rate increases are too high. Consumers cannot afford electricity along with mortgage interest increases and other bill increases. I cannot believe the state has found it acceptable to allow for NIPSCO to increase their rates AGAIN for the second year in a row to average consumer usage to be \$100-\$250 a month HIGHER. It's robbery. It's asinine, and unreasonable. They're not using appropriate ethics when considering the rate increases and more focused on lining the pockets of the higher-ups. Good luck on keeping residents if you'll continue to allow this and don't fix this issue.

NIPSCO should not be entitled to raising rates to offset the cost of updating infrastructure and to increase profits to shareholders. Electricity rates were raised in 2018 and gas rates were just raised this past September. I am against any increases other than market increases that are due to supply and demand.

I am not in favor of a rate hike. One reason is to fund programs to help income based programs. Maybe stop making it so expensive in the first place. They only pay a part of that service anyway it seems. I could be wrong. Also money to improve a Nipsco App and other things that really, should we pay for that. We shouldn't have to pay for thier apps and items that should just be part of thier business improvement. I say nay to anything that is a forever hike for something they are currently doing. At the end of the day like most things though, if a business can charge for thier monopoly they will continue to do so.

Dear Utility Consumer Counselor representative,

Due to my disability I'm unable to attend the public meeting January 4th at 6pm to voice my opinion on Nipsco's plan to raise rates. I'm strongly opposed to this. People on a fixed income can barely afford to buy food with the rate of inflation. I can't even imagine that people can afford a newspaper subscription to see this notice. So I speak for those people as well.
Please tell them NO.

Thank you,
Julie Boban

I am a NIPSCO customer. The proposed rate hike of over 23% is ridiculous. Unless NIPSCO executives and managers agree to a 23% deduction in their salaries, AND every single corporate customer is assigned a 35% hike (corporate tax cuts allow them to pay more) this hike should be denied. A hike of 3% every other year for 12 years max totalling 18% would be more appropriate for individual citizens hikes. That way the pain is gradual.

Dear Counselor Bill Fine,

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

NIPSCO consistently asks to raise our fixed monthly charge when everyone knows this causes disproportionate harm to senior citizens, low-income families with children, and people with disabilities - those who typically use less energy and are often barely scraping by.

As frustrated as I am by rising NIPSCO bills, I do support their transition to renewable energy. Renewables are cheaper to operate and maintain, and they aren't subject to fuel price volatility like coal and gas. I'm definitely looking forward to the day when NIPSCO retires their coal plants and the cost savings that will bring.

I also support NIPSCO's proposed program for low-income customers. LIHEAP is a critical lifeline for folks in the cold winter months. It's also crucial to protect Hoosier health and safety by offering support during the hottest months of the year. We don't want to put people's lives in danger because they can't afford utilities.

Please REJECT NIPSCO's request to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Sincerely,
Alicia Valdez

Dear Commission,

I have been informed and read the announcement of the rate hike proposed by NIPSCO. The conversion over to renewable energy sources will lead to much higher prices for the citizens of Northwest Indiana. Please consider what is happening in Europe, Sri Lanka and Great Britain, which have all implemented programs to de-platform historical fossil fuels for renewables. In Sri Lanka, energy is no longer affordable and people are cutting trees to make affordable their energy needs. The same process will repeat in NW Indiana should this process go forward and complete shutdown of the coal industry be done before the renewable sources are ready.

In a newspaper in the Australian Journal of Agricultural and Resource Economics, a detailed Statistical Area Level 4 (SA4) data to quantified the extent to which local unemployment rates have increased following the closures of twelve coal-fired power stations across Victoria, NSW, Queensland, South Australia and Western Australia.

There are 87 SA4 regions in Australia, each with an average population of around 290,000 people. We found that on average the regional unemployment rate climbs by around 0.7 percentage points after a station closes.

The effect remains observable for year or two, although it varies from region to region.

Clearly, labor mobility and the creation of new jobs do not fully make up for the impact of such closures. This means there is scope and need for strategies to smooth the labor market transition as we move towards a lower-carbon energy system.

Nipsco of course welcomes this move forward as they make a percentage on investment and are not rewarded for keeping the energy costs lower for their customers. This is not what a commission should be approving. The destruction of an electric grid system that has served Northern Indiana so well over the past 50 years is being abandoned on the hopes of renewable electricity to be available. The result will be higher costs and unemployment, I beg of you to not do this thing. The projects are being developed due to the increased profitability for NIPSCO not for meeting energy needs of citizens. The result will be individuals seeking their own solutions which will worsen the outcome and pollution in the area. Please reject this proposal.

Best Regards.

I am sending this email to let you know I'm in opposition to the Nipsco Electric Rate increase. As a Nipsco customer I am personally affected by the continuing increase of my bill. I attended the meeting at Valparaiso high school on January 4th 2023. I would like to say first of all I'm surprised there was only 2 meetings for something this important. Secondly I want to express my concern with the actual wording of the case. You mentioned a "tracker" or rate adjustment mechanism, that would gradually raise rates. A question that comes to my mind is what will stop you from continuing these gradual increases with these smart meters? This increase isn't necessary for infrastructure or other projects

There are solar panels in fields popping up all over and if this is what you want to hike rates for then shame on you! We also know this is about greed. The top executives make at least a couple million and there was a CEO or CCO that cleared over a billion. So I am begging you to stop this increase.

Thank you

Dawn Miller

Utilities: NIPSCO

Type of Inquiry: Case Comment

Comments: The proposed rate hike for electricity for NIPSCO should not go to consumers and certainly not a 24% rate hike. Our utilities are already on the high end. Our gas bills have doubled in the past years. While I can afford these rate hikes, many, like my 82 year old mother on a fixed income cannot. Her medicare supplement has already swallowed up a great deal of her COLA for 2023. There has to be another way to figure out how to improve service and infrastructure without this kind of a rate hike that is out of line with inflation or any other measure.

From: [BRIAN RAFFERTY](#)

Before approving a rate hike of this magnitude, take a good look at what the company's stated profits are. If they're paying out record dividends and executive compensation packages, then a more equitable approach would be to plow some of those record profits into the infrastructure they need rather than putting it on the back of citizens. This is a 24% increase. By contrast, Social Security payments increased by 8.7%. And before you say "but there are assistance programs!" those run out of money long before they run out of need.

I don't doubt infrastructure improvements are needed, only whether they should be financed by those who can least afford to. Bonds would be a much better option.

Sincerely,

Alisa Deer

I understand that the cost of producing energy has gone up...like everything else in the past two years. I also understand that "public utility companies are not "non-profit organizations"..... but the entire economy is quite possibly heading into the worst recession since the 1970's.... I remember the mess that came with the Carter administration, and this will probably be worse. There is not a Ronald Reagan to help pull us out.

This increase will cause undue hardship on many families people struggling now and thousands more if the recession to come is as bad as I believe it will be.

Please be proactive and do not cause heartache on top of hardship.

Sincerely;

John M Moore

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Frances Peel

Dear Counselor Fine,

Hoosiers like me are already struggling with rising energy costs & inflation. Our NIPSCO electric bills have increased 36% in the last 10 years and 64% in the last 20!

Please OPPOSE NIPSCO's request for higher profit in Cause Number 45772. It's really disturbing that NIPSCO wants higher profits as we Hoosiers are coping with so much! And we all know that raising the fixed charge hurts low-income and fixed-income customers the most.

And on that note, please support NIPSCO's proposal to help low-income customers with their monthly bills and deposits. Big gas and water utilities already offer programs to assist low-income customers, and it's high time electric companies follow suit. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Please stand up for residential customers and OPPOSE NIPSCO's rate hike!

Many thanks,

Dear Mr. Fine,

It seems like every time I turn around, NIPSCO wants more of my money. They want me to pay to clean up for their toxic coal ash mess (which they made profit creating), along with extra profit for their shareholders. They keep hiking bills because of the rising cost of fossil fuels - again, a result of their choice to use (and profit off of) fossil fuels for so long.

Now they want higher profits in Cause No 45772?! This is their third rate hike in the last 6 years!

How on earth are Hoosiers supposed to afford all these increases for an essential service we all need to survive?

Please REJECT NIPSCO's request to raise their profits and hike my fixed monthly charge in Cause No. 45772.

Please stand up for residential customers in this case. Please also advocate for vulnerable customers by supporting NIPSCO's proposed low-income program. We all know residential customers are already subsidizing NIPSCO's large industrial users (on top of all the bill increases I already mentioned). The least we can do is catch up to gas and water utilities by offering common sense programs to help senior citizens, low-income families, and people with disabilities afford their utility bills.

Dear Counselor Bill Fine,

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

NIPSCO consistently asks to raise our fixed monthly charge when everyone knows this causes disproportionate harm to senior citizens, low-income families with children, and people with disabilities - those who typically use less energy and are often barely scraping by.

As frustrated as I am by rising NIPSCO bills, I do support their transition to renewable energy. Renewables are cheaper to operate and maintain, and they aren't subject to fuel price volatility like coal and gas. I'm definitely looking forward to the day when NIPSCO retires their coal plants and the cost savings that will bring.

I also support NIPSCO's proposed program for low-income customers. LIHEAP is a critical lifeline for folks in the cold winter months. It's also crucial to protect Hoosier health and safety by offering support during the hottest months of the year. We don't want to put people's lives in danger because they can't afford utilities.

Please REJECT NIPSCO's request to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Sincerely,
Raquel Michalec

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

Dear Counselor Fine,

As a pastor that uses NIPSCO energy but also a NIPSCO customer myself, I know that utility bills are a source of concern for many of us. My own family, even though my wife (a high school teacher) and I both have advanced degrees and professional jobs, worry about paying out bills every month. For us, as for most middle class families, one major unexpected expense would throw out budget into disarray. Raising rates to pay off shareholders is not justified at this time of rising costs and uncertainty. I support the message below, but wanted to add my own thoughts. Blessings.

Hoosiers like me are already struggling with rising energy costs & inflation. Our NIPSCO electric bills have increased 36% in the last 10 years and 64% in the last 20!

Please OPPOSE NIPSCO's request for higher profit in Cause Number 45772. It's really disturbing that NIPSCO wants higher profits as we Hoosiers are coping with so much! And we all know that raising the fixed charge hurts low-income and fixed-income customers the most.

And on that note, please support NIPSCO's proposal to help low-income customers with their monthly bills and deposits. Big gas and water utilities already offer programs to assist low-income customers, and it's high time electric companies follow suit. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Please stand up for residential customers and OPPOSE NIPSCO's rate hike!

Dear Counselor Fine,

Hoosiers like me are already struggling with rising energy costs & inflation. Our NIPSCO electric bills have increased 36% in the last 10 years and 64% in the last 20!

Please OPPOSE NIPSCO's request for higher profit in Cause Number 45772. It's really disturbing that NIPSCO wants higher profits as we Hoosiers are coping with so much! And we all know that raising the fixed charge hurts low-income and fixed-income customers the most.

And on that note, please support NIPSCO's proposal to help low-income customers with their monthly bills and deposits. Big gas and water utilities already offer programs to assist low-income customers, and it's high time electric companies follow suit. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Please stand up for residential customers and OPPOSE NIPSCO's rate hike!

Many thanks,
Hope Smith

Dear Mr. Fine,

It seems like every time I turn around, NIPSCO wants more of my money. They want me to pay to clean up for their toxic coal ash mess (which they made profit creating), along with extra profit for their shareholders. They keep hiking bills because of the rising cost of fossil fuels - again, a result of their choice to use (and profit off of) fossil fuels for so long.

Now they want higher profits in Cause No 45772?! This is their third rate hike in the last 6 years!

How on earth are Hoosiers supposed to afford all these increases for an essential service we all need to survive?

Please REJECT NIPSCO's request to raise their profits and hike my fixed monthly charge in Cause No. 45772.

Please stand up for residential customers in this case. Please also advocate for vulnerable customers by supporting NIPSCO's proposed low-income program. We all know residential customers are already subsidizing NIPSCO's large industrial users (on top of all the bill increases I already mentioned). The least we can do is catch up to gas and water utilities by offering common sense programs to help senior citizens, low-income families, and people with disabilities afford their utility bills.

Dear Mr. Fine,

Hi,

I wanted to change over to the natural energy in 2017, but then I was told that it would cost me \$15 dollars more a month than what I was already paying.

With an SSDI check of \$705 a month and living alone, well you can see why I decided to not take that option.

Why it would cost my bill to be more is beyond me!

But I figured that I would place my own message at top of the auto generated message that's below in hopes that you'll read my plea.

Due to 4 failed spine surgeries it has made me 82% disabled, we're (doctors and myself) now looking at a 5th surgery due to the negative domino affects.

I live below poverty level, and I live alone, our local water company has raised the water bill and plans to raise it again shortly, but on top of this, they raised the (because you need it) fee charge \$20! as well as taken our garden watering credit in the summer away, stating that they have to re-clean that water that was used, which they don't, because that watering of my vegetable garden only went down to 1' (foot) into the ground, for the city to receive the water that I use for the garden, it has to go a lot further down into the ground.

I use as little water use as possible that I have even shocked the water company when I only paid \$53 a month to \$64 for the added 2-3 loads of laundry....so now imagine what I'm FORCED into NOT doing or taking care of daily or weekly of normal hygiene or chores that require to live normally, because of the cost hikes and the ridiculous FEE and the hikes of that, as I'm now seeing \$74 or more a month?

For not showering for a month, 2 loads of laundry, a sink of dishes, and flushing only when required (#2 or just before bed) it cost me \$76

You know, if I didn't have to pay a fee for the water, I could have done the required laundry, flushing of toilet and showering! But now I can't.

So how much lower am I going to be forced in turning down my set 66° thermostat for Winter?

I just bought my very first house in Oct 2016, I tell everyone that God found this house for me, as it has an open basement so I can fix things myself if needed, it is a very large house,

with very little issues, and because of all the hikes in bills and ridiculous fees, Im thinking I need to buy a shed, fix it into a little house and find property in country, and if lucky it will already have electric and sewage on the property.

How lucky do you think I'll be finding such a country property at little costs?

God would have to move that miracle.

I have liheap, but when are things going to get so bad that it will no longer be available?

I try to spread out the assistance throughout winter and summer for it to pay \$50 a month towards my bills, but now Im going to be losing some months due to all the fee and cost hikes.

Thank you for reading, if you did.

Staci Garrison

Dear Counselor Bill Fine,

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

NIPSCO consistently asks to raise our fixed monthly charge when everyone knows this causes disproportionate harm to senior citizens, low-income families with children, and people with disabilities - those who typically use less energy and are often barely scraping by.

As frustrated as I am by rising NIPSCO bills, I do support their transition to renewable energy. Renewables are cheaper to operate and maintain, and they aren't subject to fuel price volatility like coal and gas. I'm definitely looking forward to the day when NIPSCO retires their coal plants and the cost savings that will bring.

I also support NIPSCO's proposed program for low-income customers. LIHEAP is a critical lifeline for folks in the cold winter months. It's also crucial to protect Hoosier health and safety by offering support during the hottest months of the year. We don't want to put people's lives in danger because they can't afford utilities.

Please REJECT NIPSCO's request to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Sincerely,
James Dershem

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

NIPSCO consistently asks to raise our fixed monthly charge when everyone knows this causes disproportionate harm to senior citizens, low-income families with children, and people with disabilities - those who typically use less energy and are often barely scraping by.

As frustrated as I am by rising NIPSCO bills, I do support their transition to renewable energy. Renewables are cheaper to operate and maintain, and they aren't subject to fuel price volatility like coal and gas. I'm definitely looking forward to the day when NIPSCO retires their coal plants and the cost savings that will bring.

I also support NIPSCO's proposed program for low-income customers. LIHEAP is a critical lifeline for folks in the cold winter months. It's also crucial to protect Hoosier health and safety by offering support during the hottest months of the year. We don't want to put people's lives in danger because they can't afford utilities.

Please REJECT NIPSCO's request to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Please oppose cause number 45772.

Sincerely,
Audrey Mather

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Yolanda Gregory

I am applying for the electric not to go higher in fee. As I live on a fixed income. I am living in my parents, who are both dead now, by myself. When ever a bill comes along for a large sum of money, I would always pray to the Lord, that some how I am able to pay it. As I have no place else to move to, my only brother that is left, and had 4 brothers. He does not want me to come over to his home or even stay there. Then there is Chuck Richardson

my ex husband. He does ²not want
me at his home for any reason.
So where would I stay, Robert
who lives in Burlington Heights
Allison says no Ken Chuck
who lives in Knox Indiana
says no. So I just have to
watch every cent that I
spend, which I don't get a
large social security check.

So, please don't raise the
electric bill, should you
do, please not sky high.

I am also writing
in for Maxine Evers who

has a problem with her eyes. ³
As in time she would be blind.
I get it keep on praying that
she doesn't go blind. She
also lives in South Haven as
she is also ~~is~~ raising her 21
year old granddaughter. As
her granddaughter doesn't get
along with her mother, and
has an alcoholic father. Her
parents are divorced and
needed a place to stay so she
is living with her grand mother
who is 83 years old.
~~has~~
I am also on the energy

assistance program. Now I
am going to try to get
the internet on this home, but
I don't have a computer or
a tablet. Get the government
would pay \$30.00 a month on
the bill, and I would have to
pay the rest. Except they will
not install the internet if
you don't have a computer,
or a tablet. I only have a
grandie pad from Concrete
Culture. Do you know of
anyone who would want to
help me in getting the internet
by helping me to obtain a

Tablet. Should you ever hear of ⁵
someone who wants to give some-
one a tablet, please give them
my name & phone no. & address.

I sure would appreciate.

Have ~~the~~ ~~most~~
wonderful day in the Lord

God Bless you
& your family

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Barbara Jones

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Mohammad Satti

Helpful Definitions

Gas Service Definitions

Gas Delivery Charges are the costs of delivering gas to retail customers. The charges for these services are regulated and these services must be purchased from the local distribution company.

Gas Supply Charges include the commodity cost of natural gas, interstate pipeline charges, storage costs, and related charges and is passed through to customers at cost without markup.

Therm (thm) is equal to 100,000 Btus and is the basic billing unit for gas.

Electric Service Definitions

Customer Charges cover basic costs associated with providing service.

Energy Use Charges are calculated based on your monthly usage. Fuel Charges incurred in the generation and acquisition of electricity are passed through to customers without markup.

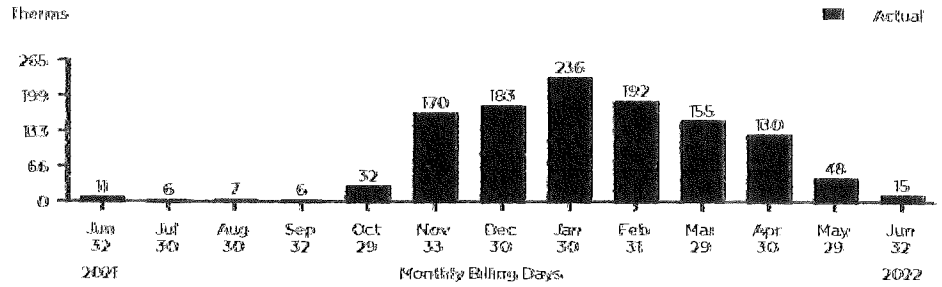

Kilowatt-Hour (kwh) is equal to 1,000 watts used for one hour and is the basic billing unit for electricity.

DG Billing Credit - Dollar credit determined by multiplying the energy delivered by the Marginal DG Price.

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Lisa Smith

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Shappelle Cole

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Patte Lau

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Loretta Crockett-Tyler

****** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ******

Dear Counselor Bill Fine,

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

NIPSCO consistently asks to raise our fixed monthly charge when everyone knows this causes disproportionate harm to senior citizens, low-income families with children, and people with disabilities - those who typically use less energy and are often barely scraping by.

As frustrated as I am by rising NIPSCO bills, I do support their transition to renewable energy. Renewables are cheaper to operate and maintain, and they aren't subject to fuel price volatility like coal and gas. I'm definitely looking forward to the day when NIPSCO retires their coal plants and the cost savings that will bring.

I also support NIPSCO's proposed program for low-income customers. LIHEAP is a critical lifeline for folks in the cold winter months. It's also crucial to protect Hoosier health and safety by offering support during the hottest months of the year. We don't want to put people's lives in danger because they can't afford utilities.

Please REJECT NIPSCO's request to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Sincerely,
Glen Doering

Dear Counselor Fine,

Hoosiers like me are already struggling with rising energy costs & inflation. Our NIPSCO electric bills have increased 36% in the last 10 years and 64% in the last 20!

Please OPPOSE NIPSCO's request for higher profit in Cause Number 45772. It's really disturbing that NIPSCO wants higher profits as we Hoosiers are coping with so much! And we all know that raising the fixed charge hurts low-income and fixed-income customers the most.

And on that note, please support NIPSCO's proposal to help low-income customers with their monthly bills and deposits. Big gas and water utilities already offer programs to assist low-income customers, and it's high time electric companies follow suit. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Please stand up for residential customers and OPPOSE NIPSCO's rate hike!

Many thanks,

Dear Counselor Fine,

Please OPPOSE NIPSCO's request for higher profit in Cause Number 45772. It's really disturbing that NIPSCO wants higher profits on the shoulders of hard working Hoosiers. Raising the fixed charge hurts low-income and fixed-income customers the most. It is unconscionable that they are asking for more profits right on the heels of winning the Net Pay fight for small solar producers.

If NIPSCO needs additional production from renewables, then why aren't they encouraging small independent producers to help take some of the load?! Please say no to this expansion of their greed and instead call on them to think more creatively for solutions that benefit all Hoosiers and our world.

Please do support NIPSCO's proposal to help low-income customers with their monthly bills and deposits. Big gas and water utilities already offer programs to assist low-income customers, and it's high time electric companies follow suit. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Big gas and water utilities already offer programs to assist low-income customers, and it's high time electric companies follow suit. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Please stand up for residential customers and OPPOSE NIPSCO's rate hike!

Many thanks,

Dear Counselor Fine,

Hoosiers like me are already struggling with rising energy costs & inflation. Our NIPSCO electric bills have increased 36% in the last 10 years and 64% in the last 20!

Please OPPOSE NIPSCO's request for higher profit in Cause Number 45772. It's really disturbing that NIPSCO wants higher profits as we Hoosiers are coping with so much! And we all know that raising the fixed charge hurts low-income and fixed-income customers the most.

And on that note, please support NIPSCO's proposal to help low-income customers with their monthly bills and deposits. Big gas and water utilities already offer programs to assist low-income customers, and it's high time electric companies follow suit. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Please stand up for residential customers and OPPOSE NIPSCO's rate hike!

Dear Counselor Fine,

Hoosiers are already dealing with rising energy costs & inflation. NIPSCO electric bills have increased 36% in the last 10 years and 64% in the last 20!

I ask that you oppose NIPSCO's request for higher profit in Cause Number 45772. These rate increases need to be better substantiated. Raising the fixed charge mostly affects low-income and fixed-income customers.

I ask that you please support NIPSCO's proposal to help low-income customers with their monthly bills and deposits. Other utilities already offer programs to assist low-income customers; electric companies should do the same. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Please stand up for residential customers and OPPOSE NIPSCO's rate hike!

Dear Mr. Fine,

It seems like every time I turn around, NIPSCO wants more of my money. They want me to pay to clean up for their toxic coal ash mess (which they made profit creating), along with extra profit for their shareholders. They keep hiking bills because of the rising cost of fossil fuels - again, a result of their choice to use (and profit off of) fossil fuels for so long. They raise their rates more often than any other company and it's out of control.

Now they want higher profits in Cause No 45772?! This is their third rate hike in the last 6 years!

How on earth are Hoosiers supposed to afford all these increases for an essential service we all need to survive?

Please REJECT NIPSCO's request to raise their profits and hike my fixed monthly charge in Cause No. 45772.

Please stand up for residential customers in this case. Please also advocate for vulnerable customers by supporting NIPSCO's proposed low-income program. We all know residential customers are already subsidizing NIPSCO's large industrial users (on top of all the bill increases I already mentioned). The least we can do is catch up to gas and water utilities by offering common sense programs to help senior citizens, low-income families, and people with disabilities afford their utility bills.

Dear Mr. Fine,

This is BS.

If NIPSCO wants to be able to pay for clean ups or the rising costs of using fossil fuels when they JUST raised prices not that long ago, they need to take it out of the record profits they ALREADY HAVE, you know, the ones they got from the last couple hikes. They have the money for it, WE DON'T!

It seems like every time I turn around, NIPSCO wants more of my money. Dear Mr. Fine,

It seems like every time I turn around, NIPSCO wants more of my money. They want me to pay to clean up for their toxic coal ash mess (which they made profit creating), along with extra profit for their shareholders. They keep hiking bills because of the rising cost of fossil fuels - again, a result of their choice to use (and profit off of) fossil fuels for so long.

Now they want higher profits in Cause No 45772?! This is their third rate hike in the last 6 years!

How on earth are Hoosiers supposed to afford all these increases for an essential service we all need to survive?

Please REJECT NIPSCO's request to raise their profits and hike my fixed monthly charge in Cause No. 45772.

Please stand up for residential customers in this case. Please also advocate for vulnerable customers by supporting NIPSCO's proposed low-income program. We all know residential customers are already subsidizing NIPSCO's large industrial users (on top of all the bill increases I already mentioned). The least we can do is catch up to gas and water utilities by offering common sense programs to help senior citizens, low-income families, and people with disabilities afford their utility bills.

Regards,
Robyn Gentile

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Suzanne Sebenste

Dear Counselor Bill Fine,

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

NIPSCO consistently asks to raise our fixed monthly charge when everyone knows this causes disproportionate harm to senior citizens, low-income families with children, and people with disabilities - those who typically use less energy and are often barely scraping by.

As frustrated as I am by rising NIPSCO bills, I do support their transition to renewable energy. Renewables are cheaper to operate and maintain, and they aren't subject to fuel price volatility like coal and gas. I'm definitely looking forward to the day when NIPSCO retires their coal plants and the cost savings that will bring.

I also support NIPSCO's proposed program for low-income customers. LIHEAP is a critical lifeline for folks in the cold winter months. It's also crucial to protect Hoosier health and safety by offering support during the hottest months of the year. We don't want to put people's lives in danger because they can't afford utilities.

Please REJECT NIPSCO's request to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Sincerely,
Mark Henderson

Dear Counselor Bill Fine,

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

NIPSCO consistently asks to raise our fixed monthly charge when everyone knows this causes disproportionate harm to senior citizens, low-income families with children, and people with disabilities - those who typically use less energy and are often barely scraping by.

As frustrated as I am by rising NIPSCO bills, I do support their transition to renewable energy. Renewables are cheaper to operate and maintain, and they aren't subject to fuel price volatility like coal and gas. I'm definitely looking forward to the day when NIPSCO retires their coal plants and the cost savings that will bring.

I also support NIPSCO's proposed program for low-income customers. LIHEAP is a critical lifeline for folks in the cold winter months. It's also crucial to protect Hoosier health and safety by offering support during the hottest months of the year. We don't want to put people's lives in danger because they can't afford utilities.

Please REJECT NIPSCO's request to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Sincerely,
Carolyn McCrady

Dear Counselor Bill Fine,

Please don't raise the rates. I can barely afford what I already have to pay. My bill says that I run an efficient house compared to my neighbors, but my bill doesn't seem to reflect that. I don't have central air conditioning and I only keep my heat at 65-67 in the winter time- yes I am freezing. Please think of the people who can't afford their monthly bill.

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Joseph Penczak

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Donna Dmitt

****** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ******

Dear Counselor Fine,

Hoosiers like me are already struggling with rising energy costs & inflation. Our NIPSCO electric bills have increased 36% in the last 10 years and 64% in the last 20!

Please OPPOSE NIPSCO's request for higher profit in Cause Number 45772. It's really disturbing that NIPSCO wants higher profits as we Hoosiers are coping with so much! And we all know that raising the fixed charge hurts low-income and fixed-income customers the most.

And on that note, please support NIPSCO's proposal to help low-income customers with their monthly bills and deposits. Big gas and water utilities already offer programs to assist low-income customers, and it's high time electric companies follow suit. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Please stand up for residential customers and OPPOSE NIPSCO's rate hike!

Many thanks,
Rose Campbell

Dear Mr. Fine,

It seems like every time I turn around, NIPSCO wants more of my money. They want me to pay to clean up for their toxic coal ash mess (which they made profit creating), along with extra profit for their shareholders. They keep hiking bills because of the rising cost of fossil fuels - again, a result of their choice to use (and profit off of) fossil fuels for so long.

Now they want higher profits in Cause No 45772?! This is their third rate hike in the last 6 years!

How on earth are Hoosiers supposed to afford all these increases for an essential service we all need to survive?

Please REJECT NIPSCO's request to raise their profits and hike my fixed monthly charge in Cause No. 45772.

Please stand up for residential customers in this case. Please also advocate for vulnerable customers by supporting NIPSCO's proposed low-income program. We all know residential customers are already subsidizing NIPSCO's large industrial users (on top of all the bill increases I already mentioned). The least we can do is catch up to gas and water utilities by offering common sense programs to help senior citizens, low-income families, and people with disabilities afford their utility bills.

Dear Mr. Fine,

It seems like every time I turn around, NIPSCO wants more of my money. They want me to pay to clean up for their toxic coal ash mess (which they made profit creating), along with extra profit for their shareholders. They keep hiking bills because of the rising cost of fossil fuels - again, a result of their choice to use (and profit off of) fossil fuels for so long.

Now they want higher profits in Cause No 45772?! This is their third rate hike in the last 6 years!

How on earth are Hoosiers supposed to afford all these increases for an essential service we all need to survive?

Please REJECT NIPSCO's request to raise their profits and hike my fixed monthly charge in Cause No. 45772.

Please stand up for residential customers in this case. Please also advocate for vulnerable customers by supporting NIPSCO's proposed low-income program. We all know residential customers are already subsidizing NIPSCO's large industrial users (on top of all the bill increases I already mentioned). The least we can do is catch up to gas and water utilities by offering common sense programs to help senior citizens, low-income families, and people with disabilities afford their utility bills.

Regards,
Lynn CRIST

Dear Counselor Bill Fine,

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

NIPSCO consistently asks to raise our fixed monthly charge when everyone knows this causes disproportionate harm to senior citizens, low-income families with children, and people with disabilities - those who typically use less energy and are often barely scraping by.

As frustrated as I am by rising NIPSCO bills, I do support their transition to renewable energy. Renewables are cheaper to operate and maintain, and they aren't subject to fuel price volatility like coal and gas. I'm definitely looking forward to the day when NIPSCO retires their coal plants and the cost savings that will bring.

I also support NIPSCO's proposed program for low-income customers. LIHEAP is a critical lifeline for folks in the cold winter months. It's also crucial to protect Hoosier health and safety by offering support during the hottest months of the year. We don't want to put people's lives in danger because they can't afford utilities.

Please REJECT NIPSCO's request to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Sincerely,
Barbara Hargrove

To whom it may concern,

I am against the proposed rate increase proposed by NIPSCO.

I would also like to comment that NIPSCO's billing and statements in regards to residential solar and net metering is extremely confusing. As a residential customer with a solar system, NIPSCO is not doing a great job of simple statements that are understandable as well as what will be next after net metering expires. If NIPSCO and the State of Indiana truly cares about solar on a residential level I believe some changes are warranted.

Thank you,

Matt Kwiatkowski

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

BLANCA ARANDA

Also outages with no explanation as to why! The area I live in has power surges quite often. A technician was sent to my home and stated NIPSCO is aware of the ongoing issue! However, they have no idea how to repair it! He told me exactly what I needed experience and said unfortunately there is no solution for the problem!

Why should we pay for a price increase for less than service! What are we getting in return for a price increase??

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Susan Anduskey

Subject: Say NO to NIPSCO's New Increase
Date: Wednesday, December 7, 2022 3:06:26 PM

****** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ******

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

My name is Joseph Fetty and my wife is Dawn and I are residents of Newton County, Indiana. We receive our electric and gas from NIPSCO and I am referencing cause #45772.

My wife and I have been retired for over 15 years and as any retired individuals we are constantly fighting the yearly increases of internet, telephone, auto fuel, groceries, insurances and television services. Social security increases have left us in the hole each year as it fails to meet the cost of living. State pensions, for those who have one, rarely see any increase. We are left deciding what we must have and what we must give up.

An approximate increase of \$19.43 per month, and an additional \$6.22 per month is an absurd increase as I look at my income and that of other retirees in my community. Yes, it is good to improve infrastructure but perhaps the utility company should have the money before it begins work. That is the way the rest of the world operates. NIPSCO is already on the most expensive providers of utilities. They are even able to sell power to other utility companies who are then able to charge their customers less than the NIPSCO billed customers.

I am asking that you refuse NIPSCO'S requests for monthly electric rate increases, or break it down over several years to lessen the impact on monthly consumer bills. At the current rate request and 500,000 customers, the entire infrastructure costs should be paid in less than a year. Will the monthly bills then revert to a lower rate per month?

Thank you for your attention to this matter.

Thank you,

Joseph Fetty

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Terry Scott

****** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ******

Dear Counselor Fine,

Hoosiers like me are already struggling with rising energy costs & inflation. Our NIPSCO electric bills have increased 36% in the last 10 years and 64% in the last 20!

Please OPPOSE NIPSCO's request for higher profit in Cause Number 45772. It's really disturbing that NIPSCO wants higher profits as we Hoosiers are coping with so much! And we all know that raising the fixed charge hurts low-income and fixed-income customers the most.

And on that note, please support NIPSCO's proposal to help low-income customers with their monthly bills and deposits. Big gas and water utilities already offer programs to assist low-income customers, and it's high time electric companies follow suit. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Please stand up for residential customers and OPPOSE NIPSCO's rate hike!

Many thanks,

And on that note, please support NIPSCO's proposal to help low-income customers with their monthly bills and deposits. Big gas and water utilities already offer programs to assist low-income customers, and it's high time electric companies follow suit. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Please stand up for residential customers and OPPOSE NIPSCO's rate hike!

Many thanks,
Melissa Floyd

Dear Counselor Fine,

Hoosiers like me are already struggling with rising energy costs & inflation. Our NIPSCO electric bills have increased 36% in the last 10 years and 64% in the last 20!

Please OPPOSE NIPSCO's request for higher profit in Cause Number 45772. It's really disturbing that NIPSCO wants higher profits as we Hoosiers are coping with so much! And we all know that raising the fixed charge hurts low-income and fixed-income customers the most.

And on that note, please support NIPSCO's proposal to help low-income customers with their monthly bills and deposits. Big gas and water utilities already offer programs to assist low-income customers, and it's high time electric companies follow suit. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Please stand up for residential customers and OPPOSE NIPSCO's rate hike!

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

Dear Mr. Fine,

It seems like every time I turn around, NIPSCO wants more of my money. They want me to pay to clean up for their toxic coal ash mess (which they made profit creating), along with extra profit for their shareholders. They keep hiking bills because of the rising cost of fossil fuels - again, a result of their choice to use (and profit off of) fossil fuels for so long.

Now they want higher profits in Cause No 45772?! This is their third rate hike in the last 6 years!

How on earth are Hoosiers supposed to afford all these increases for an essential service we all need to survive?

Please REJECT NIPSCO's request to raise their profits and hike my fixed monthly charge in Cause No. 45772.

Please stand up for residential customers in this case. Please also advocate for vulnerable customers by supporting NIPSCO's proposed low-income program. We all know residential customers are already subsidizing NIPSCO's large industrial users (on top of all the bill increases I already mentioned). The least we can do is catch up to gas and water utilities by offering common sense programs to help senior citizens, low-income families, and people with disabilities afford their utility bills.

Regards,
Donna Elencik

Please stand up for residential customers in this case. Please also advocate for vulnerable customers by supporting NIPSCO's proposed low-income program. We all know residential customers are already subsidizing NIPSCO's large industrial users (on top of all the bill increases I already mentioned). The least we can do is catch up to gas and water utilities by offering common sense programs to help senior citizens, low-income families, and people with disabilities afford their utility bills.

Dear Mr. Fine,

It seems like every time I turn around, NIPSCO wants more of my money. They want me to pay to clean up for their toxic coal ash mess (which they made profit creating), along with extra profit for their shareholders. They keep hiking bills because of the rising cost of fossil fuels - again, a result of their choice to use (and profit off of) fossil fuels for so long.

Now they want higher profits in Cause No 45772?! This is their third rate hike in the last 6 years!

How on earth are Hoosiers supposed to afford all these increases for an essential service we all need to survive?

Please REJECT NIPSCO's request to raise their profits and hike my fixed monthly charge in Cause No. 45772.

Please stand up for residential customers in this case. Please also advocate for vulnerable customers by supporting NIPSCO's proposed low-income program. We all know residential customers are already subsidizing NIPSCO's large industrial users (on top of all the bill increases I already mentioned). The least we can do is catch up to gas and water utilities by offering common sense programs to help senior citizens, low-income families, and people with disabilities afford their utility bills.

Dear Mr. Fine,

It seems like every time I turn around, NIPSCO wants more of my money. They want me to pay to clean up for their toxic coal ash mess (which they made profit creating), along with extra profit for their shareholders. They keep hiking bills because of the rising cost of fossil fuels - again, a result of their choice to use (and profit off of) fossil fuels for so long. With the rise in food, my husband and I are retired on fixed income and it scares me on how we will afford to pay for gas and electric. Please think of the consumers that are barely getting by and stop them from raising our rates again.

Now they want higher profits in Cause No 45772?! This is their third rate hike in the last 6 years!

How on earth are Hoosiers supposed to afford all these increases for an essential service we all need to survive?

Please REJECT NIPSCO's request to raise their profits and hike my fixed monthly charge in Cause No. 45772.

Dear Mr. Fine,

It seems like every time I turn around, NIPSCO wants more of my money. They want me to pay to clean up for their toxic coal ash mess (which they made profit creating), along with extra profit for their shareholders. They keep hiking bills because of the rising cost of fossil fuels - again, a result of their choice to use (and profit off of) fossil fuels for so long.

Now they want higher profits in Cause No 45772?! This is their third rate hike in the last 6 years!

How on earth are Hoosiers supposed to afford all these increases for an essential service we all need to survive?

Please REJECT NIPSCO's request to raise their profits and hike my fixed monthly charge in Cause No. 45772.

Please stand up for residential customers in this case. Please also advocate for vulnerable customers by supporting NIPSCO's proposed low-income program. We all know residential customers are already subsidizing NIPSCO's large industrial users (on top of all the bill increases I already mentioned). The least we can do is catch up to gas and water utilities by offering common sense programs to help senior citizens, low-income families, and people with disabilities afford their utility bills.

Regards,
kathy werner

****** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ******

Dear Counselor Bill Fine,

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

NIPSCO consistently asks to raise our fixed monthly charge when everyone knows this causes disproportionate harm to senior citizens, low-income families with children, and people with disabilities - those who typically use less energy and are often barely scraping by.

As frustrated as I am by rising NIPSCO bills, I do support their transition to renewable energy. Renewables are cheaper to operate and maintain, and they aren't subject to fuel price volatility like coal and gas. I'm definitely looking forward to the day when NIPSCO retires their coal plants and the cost savings that will bring.

I also support NIPSCO's proposed program for low-income customers. LIHEAP is a critical lifeline for folks in the cold winter months. It's also crucial to protect Hoosier health and safety by offering support during the hottest months of the year. We don't want to put people's lives in danger because they can't afford utilities.

Please REJECT NIPSCO's request to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Sincerely,
Richard Gratt

Dear Counselor Bill Fine,

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

NIPSCO consistently asks to raise our fixed monthly charge when everyone knows this causes disproportionate harm to senior citizens, low-income families with children, and people with disabilities - those who typically use less energy and are often barely scraping by.

As frustrated as I am by rising NIPSCO bills, I do support their transition to renewable energy. Renewables are cheaper to operate and maintain, and they aren't subject to fuel price volatility like coal and gas. I'm definitely looking forward to the day when NIPSCO retires their coal plants and the cost savings that will bring.

I also support NIPSCO's proposed program for low-income customers. LIHEAP is a critical lifeline for folks in the cold winter months. It's also crucial to protect Hoosier health and safety by offering support during the hottest months of the year. We don't want to put people's lives in danger because they can't afford utilities.

Please REJECT NIPSCO's request to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Sincerely,
Brunner Jacqueline

Dear Counselor Bill Fine,

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

Please REJECT NIPSCO's request to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Sincerely,
Kristin Gorden

Dear Counselor Bill Fine,

This is NIPSCO Electric's third rate hike in the last 6 years - on top of the recent significant increases on our electric bills for the cost of fossil fuels.

How are Hoosiers supposed to keep up with all of these increases? And when is enough truly enough when it comes to rising monopoly utility profits and hikes in the fixed monthly charge?

NIPSCO consistently asks to raise our fixed monthly charge when everyone knows this causes disproportionate harm to senior citizens, low-income families with children, and people with disabilities - those who typically use less energy and are often barely scraping by.

As frustrated as I am by rising NIPSCO bills, I do support their transition to renewable energy. Renewables are cheaper to operate and maintain, and they aren't subject to fuel price volatility like coal and gas. I'm definitely looking forward to the day when NIPSCO retires their coal plants and the cost savings that will bring.

I also support NIPSCO's proposed program for low-income customers. LIHEAP is a critical lifeline for folks in the cold winter months. It's also crucial to protect Hoosier health and safety by offering support during the hottest months of the year. We don't want to put people's lives in danger because they can't afford utilities.

Please REJECT NIPSCO's request to raise their profits and our fixed monthly charge, and SUPPORT their transition to renewables and their proposed low-income program.

Sincerely,
Donald McBride

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

James Houlihan

Dear Decision Maker,

I urge the IURC to oppose NIPSCO's proposal included in Cause No. 45772, which includes increases to not only our electricity rates, but also the customer charge.

This combined increase comes at a time when many older Hoosiers are already struggling with higher household costs and utility rates that have been raised again and again.

Please protect residential customers from already too-high electricity rates.

Thank you,

Jean Peron

Subject: Cause No. 45772 - please stand up for NIPSCO residential customers!

**** This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email. ****

Dear Counselor Fine,

Hoosiers like me are already struggling with rising energy costs & inflation. Our NIPSCO electric bills have increased 36% in the last 10 years and 64% in the last 20!

Please OPPOSE NIPSCO's request for higher profit in Cause Number 45772. It's really disturbing that NIPSCO wants higher profits as we Hoosiers are coping with so much! And we all know that raising the fixed charge hurts low-income and fixed-income customers the most.

And on that note, please support NIPSCO's proposal to help low-income customers with their monthly bills and deposits. Big gas and water utilities already offer programs to assist low-income customers, and it's high time electric companies follow suit. Senior citizens, families with children, and people with disabilities shouldn't have to choose between paying for food, shelter, health care, or electricity.

Please stand up for residential customers and OPPOSE NIPSCO's rate hike!

Many thanks,
joyce niksic
