REPORTER

VERIFIED DIRECT TESTIMONY OF KEVIN J. BLISSMER

- 1 Q1. Please state your name, business address and title.
- 2 A1. My name is Kevin J. Blissmer. My business address is 801 E. 86th Avenue,
- 3 Merrillville, Indiana 46410. I am Manager of Regulatory for NiSource
- 4 Corporate Services Company.
- 5 Q2. On whose behalf are you submitting this direct testimony?
- 6 A2. I am submitting this testimony on behalf of Northern Indiana Public Service
- 7 Company LLC ("NIPSCO" or "Company").
- 8 Q3. Please describe your educational and employment background.
- 9 A3. I graduated from Purdue University with a Bachelor of Science Degree
- majoring in both Accounting and Finance. I was employed at Universal
- 11 Access, a small public telecommunications company based in Chicago,
- 12 Illinois for three years, where I progressed in my career to Assistant
- 13 Controller before leaving to join NiSource Inc. ("NiSource"). I joined
- NiSource in 2003 as the Manager of SEC Reporting and Research until 2010,
- after which I held roles as Manager of Accounting Research and Manager

of Corporate Finance. I joined NIPSCO's Rates and Regulatory Finance

Department in 2014 as the Manager of Regulatory Accounting, and, on

November 1, 2017, I accepted my current position as Manager of

Regulatory. I am a Registered Certified Public Accountant ("CPA") in the

State of Illinois.

6 Q4. What are your responsibilities as Manager of Regulatory?

7

8

9

10

11

12

13

14

15

16

17

A4. As Manager of Regulatory, I am responsible for the preparation and coordination of NIPSCO's Electric Transmission, Distribution and Storage System Improvement Charge ("TDSIC") filings, Green Power Rider annual filings (Cause No. 44198-GPR-X), Electric Demand Side Management filings (Cause No. 43618-DSM-X), and Regional Transmission Organization Adjustment semi-annual filings (Cause No. 44156-RTO-XX). I am also responsible for the preparation and coordination of NIPSCO's annual Attachments O, GG, and MM postings to the Midcontinent Independent System Operator, Inc. ("MISO"). I also support the preparation and coordination of Columbia Gas of Maryland regulatory filings.

Q5. What is the purpose of your testimony?

A5. The purpose of my testimony is to (1) explain the schedules supporting the proposed RTO Adjustment factors in this proceeding; (2) describe the demand and energy allocators; (3) explain the impact of customer migrations, if any; (4) provide NIPSCO's current Attachments O, GG, and MM; and (5) provide the current forecasted amount of Schedule 26-A revenues for the period November 2020 through April 2021, which is the forecasted period in this case.

8 Q6. Please provide a background on the RTO Adjustment.

A6. The Commission's August 25, 2010 Final Order in Cause No. 43526 ("43526 Order") found that NIPSCO's MISO non-fuel costs and revenues and offsystem sales ("OSS") sharing should be included in one mechanism designated as the RTO Adjustment. The Commission's December 21, 2011 Final Order in Cause No. 43969 ("43969 Order") authorized the implementation of the RTO Adjustment from Cause No. 43526 by approving NIPSCO's Rider 671 – Adjustment of Charges for Regional Transmission Organization and NIPSCO's Appendix C – Regional Transmission Organization Adjustment Factor. The 43969 Order specified

10

15

16

17

¹ 43526 Order at 93-94.

1 that the RTO Adjustment will be a semi-annual mechanism coordinated 2 with the Fuel Adjustment Clause ("FAC") audit process.² 3 The Commission's July 18, 2016 Order in Cause No. 44688 ("44688 Order") 4 specified that the RTO Adjustment will recover MISO non-fuel costs and 5 revenues that exceed \$16,585,108 annually or \$8,292,554 semi-annually (the 6 amount of MISO non-fuel credits and charges included in base rates). The 7 44688 Order also reset the RTO benchmark to recover or pass back any 8 amounts above or below this amount through the RTO Adjustment and 9 reset the OSS margin credit to base rates to reflect the level of OSS included 10 in the test year of \$4,741,390. The 44688 Order also directed NIPSCO to flow 11 through the RTO Tracker 100% of its OSS margins, below (down to zero) or 12 above \$4,741,390 annually (the level built into base rates).³ 13 The Commission's December 4, 2019 Order in Cause No. 45159 ("45159 14 Order") approved NIPSCO's Verified Petition requesting authority to 15 modify its rates and charges for electric utility service. As part of that 16 approval effective January 2020 with Step 1 base rates, the Commission,

² 43969 Order at 70.

³ 44688 Order at 88.

among other things, approved NIPSCO's Rider 871 – Adjustment of Charges for Regional Transmission Organization and NIPSCO's Appendix C – Regional Transmission Organization Adjustment Factor, including approval to: (1) remove MISO charges and credits previously included in base rates and collect 100% of MISO charges that are not included in the FAC through the RTO; (2) remove positive or negative OSS margins previously included in base rates and flow back 100% of any OSS margins net of expenses through the RTO; (3) remove all back-up and maintenance margins a currently included in base rates and pass back 100% of such margins net of expenses through the RTO; (4) change the allocation methodology to the 4 Coincident Peak allocation set out in Corrected Rate 831 Implementation Agreement Exhibit A to the approved Rate 831 Settlement; and (5) remove the Utility Receipts Tax ("URT").

Q7. Please summarize the relief NIPSCO is requesting in this proceeding.

These revenues are collected under Rider 876 - Back-Up, Maintenance, and Temporary Services ("BUM").

Stipulation and Settlement Agreement on Rate 831 Implementation by and among NIPSCO, NIPSCO Industrial Group, NLMK Indiana, and United States Steel Corporation, filed in Cause No. 45159 (as revised June 7, 2019) (the "Rate 831 Settlement").

1 A7. NIPSCO requests approval of revised RTO Adjustment factors to be 2 applicable and made effective for bills rendered during the billing cycles of 3 November 2020 through April 2021 or until replaced by different factors 4 approved in a subsequent filing. 5 In this proceeding, NIPSCO is seeking to: (1) recover its MISO non-fuel 6 costs, net of revenues, estimated for the billing cycles of November 2020 7 through April 2021, (2) provide actual MISO non-fuel costs for the period 8 January through June 2020 and refund the variance between these actual 9 RTO costs incurred compared to revenue collected for those months, and 10 (3) report OSS and BUM margins incurred for the period January through 11 June 2020. OSS and BUM margins from this RTO-18 filing will be compiled 12 with OSS and BUM margins for the period July through December 2020 (to 13 be reported in RTO-19) for the purposes of calculating any OSS and BUM 14 margins (net of expenses) that may be flowed back through the RTO in 15 accordance with the 45159 Order. Therefore, the annual OSS and BUM 16 margins to be returned to customers in this proceeding is \$0 [Schedule 3, 17 Line 17].

Q8. Are you sponsoring any attachments to your direct testimony?

18

- 1 A8. Yes. I am sponsoring <u>Attachments 1-A through 1-D</u>, which were prepared
- 2 by me or under my direction and supervision.
- 3 Q9. Please explain Attachment 1-A.
- 4 A9. Attachment 1-A is the Verified Petition filed in this Cause, including
- 5 Attachments A, B, and C attached thereto.
- 6 Q10. Please explain Attachment 1-A, Attachment A.
- 7 A10. Attachment 1-A, Attachment A includes Schedules 1 through 6. Schedule
- 8 1 shows the allocation of all costs based on energy or demand to derive the
- 9 proposed RTO Adjustment factors for the billing period. Schedule 2 shows
- 10 the determination of the MISO non-fuel costs, net of revenues, for the six
- 11 month estimate period. Schedule 3 shows the actual OSS and BUM margins
- per month for January through June 2020 and the determination of actual
- annual OSS and BUM margins to be returned in this proceeding [Schedule
- 3, Line 14].⁶ Schedule 4 shows the reconciliation of the actual costs and
- revenues. Schedule 5 shows the detail of the actual costs included in the

As noted above, beginning January 1, 2020, all OSS and BUM margins (net of expenses) are being returned to NIPSCO's customers as no OSS or BUM margin amounts are included in base rates. The amount of OSS and BUM margins for 2020 will be addressed in RTO-19.

| 1 | | reconciliation. Schedule 6 shows the details of the variance and OSS |
|----|------|--|
| 2 | | margins included in the reconciliation. |
| 3 | Q11. | What charges or credits are included for recovery as "Other" or |
| 4 | | "Miscellaneous" on Schedule 5 in this filing? |
| 5 | A11. | There is a \$337 charge included for recovery in "Other Miscellaneous |
| 6 | | Transmission Schedules/Amounts," on Schedule 5, Page 2, Line 21. |
| 7 | | NIPSCO Witness Weiss describes the charge in his testimony. |
| 8 | Q12. | How did NIPSCO calculate the total amount of RTO charges and credits |
| 9 | | included in this proceeding? |
| 10 | A12. | Schedule 1, Lines 1 through 6 of <u>Attachment 1-A</u> , Attachment A show how |
| 11 | | the total charges of \$16,135,712 were calculated. The amount of prior period |
| 12 | | variance included in this proceeding is a credit for an over-collection of |
| 13 | | \$645,735. NIPSCO Witness Weiss describes the \$1,782,182 (over-collection) |
| 14 | | variance attributable between actual and estimated costs. The remaining |
| 15 | | \$1,136,447 (under-collection) variance is due to volumetric and timing |
| 16 | | differences. |
| 17 | Q13. | How did NIPSCO calculate the RTO Adjustment factors proposed in this |
| 18 | | proceeding? |

| A13 | Schedule 1 includes the demand-allocated and energy-allocated MISO non- |
|-----|---|
| | fuel costs and credits from Schedule 2, the OSS and BUM margins amount |
| | from Schedule 3 (if applicable), and the prior period variance from Schedule |
| | 4. The forecasted MISO non-fuel costs and credits from Schedule 2 are |
| | allocated to each rate class using the allocators approved in the 45159 Order |
| | adjusted for Rate 831 adjustments and the impact of significant migrations |
| | of customers to different rate classes. OSS and BUM margins, if applicable, |
| | are allocated to each rate class using the allocators in effect during the |
| | respective month of collection. The prior period variance is allocated to |
| | each rate class using the allocators in effect during the 6-month |
| | reconciliation period. These allocated costs by rate are then divided by the |
| | forecasted sales for the billing period to determine the individual billing |
| | components which comprise the RTO Adjustment factor for each rate |
| | (Schedule 1, Column (p)). Attachment 1-A, Attachment C shows the RTO |
| | Adjustment factors proposed to be effective for bills rendered during the |
| | billing cycles of November 2020 through April 2021, which begins October |
| | 29, 2020. |

| 1 | Q14. | Please describe the demand and energy allocators used to calculate the |
|----|------|--|
| 2 | | demand- and energy-related costs by rate code. |
| 3 | A14. | The demand and energy allocators being utilized in this filing were |
| 4 | | approved in the Commission's 45159 Order (at 158-159), whereby the |
| 5 | | demand allocators are based upon forecasted customer revenue and the |
| 6 | | energy allocators are based upon forecasted volumes at the source for the |
| 7 | | forecasted test year ended December 31, 2019. |
| 8 | Q15. | Is NIPSCO proposing any adjustments to its demand allocators in this |
| 9 | | filing? |
| 10 | A15. | Yes. As shown in <u>Attachment 1-A</u> , Attachment B, NIPSCO has adjusted its |
| 11 | | demand allocation percentages to reflect the migration of customers |
| 12 | | amongst Rates 824 and 826 and for current contractual demand under Rate |
| 13 | | 831. These adjustments are appropriate in order to prevent any unintended |
| 14 | | consequences of the migration of customers to different rate classes and to |
| 15 | | properly allocate their share of RTO charges/credits, as well as to properly |
| 16 | | allocate RTO charges/credits in association with current contractual |
| 17 | | demand volumes for Rate 831 customers. |

| 1 | Q16. | Is NIPSCO proposing any adjustments to its energy allocators in this |
|----|------|--|
| 2 | | filing? |
| 3 | A16. | Yes. As shown in <u>Attachment 1-A</u> , Attachment B, NIPSCO has adjusted its |
| 4 | | energy allocation percentages to reflect the migration of customers amongst |
| 5 | | Rates 824 and 826, and for current contractual agreements under Rate 831. |
| 6 | | These adjustments are appropriate in order to prevent any unintended |
| 7 | | consequences of the migration of customers to different rate classes and to |
| 8 | | properly allocate their share of RTO charges/credits, as well as to properly |
| 9 | | allocate RTO charges/credits in association with current contractual energy |
| 10 | | volumes for Rate 831 customers. |
| 11 | Q17. | Please explain Attachment 1-A, Attachment C. |
| 12 | A17. | Attachment 1-A, Attachment C is Petitioner's Appendix C – Regional |
| 13 | | Transmission Organization Adjustment Factor (Second Revised Sheet No. |
| 14 | | 204) showing the RTO Adjustment factors proposed to be effective for bills |
| 15 | | rendered during the billing cycles November 2020 through April 2021, |
| 16 | | which begins October 29, 2020. |
| 17 | Q18. | What effect will the proposed RTO Adjustment factors have on an |
| 18 | | average residential customer? |

- A18. The proposed factor will add \$2.34 to a 700 kWh residential bill, which was
 the average monthly residential bill during the test year in NIPSCO's last
 rate case. This will be an increase of \$0.51 compared to the factor currently
 in effect.
- The proposed factor will add \$3.34 to a 1,000 kWh residential bill, which is \$0.72 more than the factor currently in effect.

7 Q19. Please identify Attachment 1-B.

8

9

10

11

12

13

14

15

16

A19. Attachment 1-B is NIPSCO's most current Attachment O effective on July 1, 2020. Attachment O, which is submitted by every Transmission Owner in MISO, is a rate formula that sets forth the method for calculating and collecting charges and distributing revenues associated with those charges for all applicable transmission assets under MISO's functional control. In general, the collection of charges and distribution of revenues associated with this attachment is accomplished through Schedules 7, 8, and 9 for all Transmission Owners. In RTO-1, NIPSCO agreed to provide this information.

17 Q20. Please identify Attachment 1-C.

1 Attachment 1-C is NIPSCO's most current Attachment GG effective on July A20. 1, 2020. Attachment GG is only applicable to certain projects designated as 2 3 eligible for cost sharing by MISO. Attachment GG sets forth the method for 4 calculating and collecting the charges associated with network upgrades 5 eligible for cost sharing and for distributing the revenues associated with 6 such charges. The collection of charges and distribution of revenues 7 associated with these projects is accomplished through Schedule 26. In 8 RTO-1, NIPSCO agreed to provide this information.

9 Q21. Please identify Attachment 1-D.

10 Attachment 1-D is NIPSCO's most current Attachment MM effective on 11 July 1, 2020. Attachment MM is only applicable to projects which are 12 declared to be Multi Value Projects ("MVP") eligible by MISO. Attachment 13 MM sets forth the method for calculating and collecting the charges 14 associated with MVP eligible network upgrades and for distributing the 15 revenues associated with such charges. The collection of charges and 16 distribution of revenues associated with these projects is accomplished 17 through Schedule 26-A. In RTO-1, NIPSCO agreed to provide this 18 information.

- 1 Q22. Please identify the amount of MISO Schedule 26-A revenues NIPSCO
- 2 currently forecasts for the period November 2020 through April 2021.
- 3 A22. Based on NIPSCO's current forward looking formula rate structure, which
- 4 uses NIPSCO forecast information and is trued up in a future period using
- 5 FERC Form 1, NIPSCO projects Schedule 26-A revenues of approximately
- 6 \$32.6 million for the period November 2020 through April 2021.
- 7 Q23. Does this conclude your prepared direct testimony?
- 8 A23. Yes.

VERIFICATION

I, Kevin J. Blissmer, Manager of Regulatory of NiSource Corporate Services Company, affirm under penalties of perjury that the foregoing representations are true and correct to the best of my knowledge, information and belief.

Kevin J. Blissmer

| ADJUSTMENT FACTORS TO BE APPLICABLE |) | CAUSE NO. 44156 RTO 18 |
| DURING THE BILLING CYCLES OF NOVEMBER |) | |
| 2020 THROUGH APRIL 2021 PURSUANT TO |) | |
| IND. CODE § 8-1-2-42. |) | |

VERIFIED PETITION

Northern Indiana Public Service Company LLC ("NIPSCO" or "Petitioner") petitions the Indiana Utility Regulatory Commission ("Commission") for approval of regional transmission organization adjustment ("RTO Adjustment") factors to be applicable for bills rendered during the billing cycles of November 2020 through April 2021, or until replaced by different RTO Adjustment factors that are approved in a subsequent filing, pursuant to Ind. Code § 8-1-2-42. In accordance with 170 IAC 1-1.1-8 and 1-1.1-9, Petitioner submits the following information in support of this petition.

Petitioner's Corporate and Regulated Status

1. NIPSCO is a limited liability company organized and existing under the laws of the State of Indiana with its principal office and place of business at 801 East 86th Avenue, Merrillville, Indiana. Petitioner renders electric public utility service in the State of Indiana and owns, operates, manages and controls, among other things, plant and equipment within the State of Indiana used for the generation, transmission, distribution and furnishing of such service to the public. Petitioner is a "public utility" under Ind. Code § 8-1-2-1 and is subject to the jurisdiction of this Commission in the manner and to the extent provided by the Public Service Commission Act, as amended, and other pertinent laws of the State of Indiana.

Petitioner's Operations

2. Petitioner is a member of the Midcontinent Independent System Operator, Inc. ("MISO"), a FERC-approved regional transmission organization. Petitioner participates in the various markets administered by MISO. As a participant in the MISO markets, NIPSCO is subject to various charges and credits assessed by MISO.

Background

3. The Commission's August 25, 2010 Final Order in Cause No. 43526 ("43526 Order") found that NIPSCO's MISO non-fuel costs and revenues and offsystem sales ("OSS") sharing should be included in one mechanism designated as the RTO Adjustment. 43526 Order at 93-94. The Commission's December 21, 2011 Final Order in Cause No. 43969 ("43969 Order") authorized the implementation of the RTO Adjustment from Cause No. 43526 by approving NIPSCO's Rider 671 –

Adjustment of Charges for Regional Transmission Organization and NIPSCO's Appendix C – Regional Transmission Organization Adjustment Factor. 43969 Order at 70. The 43969 Order specified that the RTO Adjustment will be a semi-annual mechanism coordinated with the FAC audit process. *Id.*

- 4. The Commission's July 18, 2016 Order in Cause No. 44688 ("44688 Order") specified that the RTO Adjustment will recover MISO non-fuel costs and revenues that exceed \$16,585,108 annually or \$8,292,554 semi-annually (the amount of MISO non-fuel credits and charges included in base rates). The 44688 Order also reset the RTO benchmark to recover or pass back any amounts above or below this amount through the RTO Adjustment and reset the OSS margin credit to base rates to reflect the level of OSS included in the test year of \$4,741,390. The 44688 Order also directed NIPSCO to flow through the RTO Tracker 100% of its OSS margins, below (down to zero) or above \$4,741,390 annually (the level built into base rates).
- 5. The Commission's December 4, 2019 Order in Cause No. 45159 ("45159 Order") approved, among other things, NIPSCO's Rider 871 Adjustment of Charges for Regional Transmission Organization and NIPSCO's Appendix C Regional Transmission Organization Adjustment Factor, including approval to (1) remove MISO charges and credits previously included in base rates and collect

100% of MISO charges that are not included in the FAC through the RTO; (2) remove positive or negative OSS margins currently included in base rates and flow back 100% of any OSS margins net of expenses through the RTO; (3) remove all back-up and maintenance margins previously included in base rates and pass back 100% of back-up, maintenance, and temporary services margins net of expenses through the RTO; (4) change the allocation methodology to the 4 Coincident Peak allocation set out in Corrected Rate 831 Implementation Agreement Exhibit A to the approved Rate 831 Settlement; and (5) remove the Utility Receipts Tax. The 45159 Order became effective January 1, 2020 with the implementation of Step 1 rates.

Relief Sought by Petitioner

- 6. In this proceeding, NIPSCO requests Commission approval of RTO Adjustment factors to be applicable and made effective for bills rendered by NIPSCO during the billing cycles of November 2020 through April 2021 or until replaced by different factors approved in a subsequent filing pursuant to provisions of the Public Service Commission Act, as amended.
 - 7. The proposed RTO Adjustment factors are calculated based on

BUM refers to Back-Up, Maintenance, and Temporary Services under Rider 876.

Stipulation and Settlement Agreement on Rate 831 Implementation by and among NIPSCO, NIPSCO Industrial Group, NLMK Indiana, and United States Steel Corporation, filed in Cause No. 45159 (as revised June 7, 2019) (the "Rate 831 Settlement").

estimated costs, flow back of 100% of any OSS and BUM margins net of expenses (as authorized in Cause No. 45159), energy and demand allocators, and forecasted usage for the period of November 2020 through April 2021. The proposed RTO Adjustment factors include reconciliations for the period January through June 2020. The data supporting the RTO Adjustment factors proposed herein is attached hereto as <u>Attachment A</u>.

- 8. The 45159 Order set forth the demand and energy allocators for the RTO Adjustment. NIPSCO has adjusted its demand and energy allocation percentages to reflect Rate 831 adjustments and the impact of significant migration of customers to different rate classes. The demand and energy allocators are shown in <u>Attachment B</u>.
- 9. Petitioner's total costs to be recovered during the billing cycles of November 2020 through April 2021 are shown on <u>Attachment A</u>, Schedule 1.
- 10. A clean and redlined version of Petitioner's Appendix C Regional Transmission Organization Adjustment Factor (Second Revised Sheet No. 204), reflecting the RTO Adjustment factors proposed herein is attached hereto as Attachment C.

Procedural Matters

11. The books and records of Petitioner supporting such data,

calculation, and allegations are available for inspection and review by the Office of Utility Consumer Counselor and this Commission.

- 12. The RTO Adjustment factors will be applied to bills rendered by Petitioner during the billing cycles of November 2020 through April 2021, which begins October 29, 2020. To accommodate this billing date, NIPSCO respectfully requests that the Commission hold a hearing on or before October 12, 2020 and issue an order in this matter by October 28, 2020.
- 13. In its April 25, 2012 Order in Cause No. 44156-RTO-1, the Commission approved the following proposed procedural schedule for subsequent RTO Adjustment proceedings which is consistent with NIPSCO's FAC audit process:
 - (a) Petitioner will file its Case-in-Chief (including a verified petition, proposed tariff revisions and supporting testimony) and provide the OUCC and any Intervenors with copies of all supporting workpapers no less than seventy-five (75) days before the effective date of the proposed RTO factors. Petitioner's Case-in-Chief will not be considered complete until all items listed above are filed (or, in the case of workpapers, submitted).
 - (b) The OUCC and any Intervenors will file their respective Cases-in-Chief approximately 45 days after Petitioner files its completed Case-in-Chief.
 - (c) Petitioner will file its rebuttal testimony (if any) no less than five (5) days prior to the evidentiary hearing.
 - (d) Petitioner will make its staff reasonably available to the

OUCC and any Intervenors to facilitate an informal discovery process for its RTO filings. Any response or objection to a formal discovery request should be made within ten (10) calendar days of the receipt of such request, and the parties will utilize electronic discovery.

With respect to this proceeding, the procedural schedule is as follows:

| NIPSCO filed Petition and Case-In-Chief | August 17, 2020 |
|---|------------------|
| OUCC / Intervenors Filings | October 1, 2020 |
| NIPSCO Rebuttal | October 5, 2020 |
| Evidentiary Hearing | October 12, 2020 |
| Order | October 28 2020 |

Applicable Law

14. Petitioner considers the provisions of the Public Service Commission Act, as amended, including Ind. Code §§ 8-1-1-8 and 8-1-2-4, 10, 12, 38, 39, 42, 68 and 71 to be applicable to the subject matter of this Petition and believes that such traditional statutes provide the Commission authority to approve the requested relief.

Petitioner's Counsel

15. The names and addresses of persons authorized to accept service of papers in this proceeding are:

Counsel of Record:

Bryan M. Likins (No. 29996-49) NiSource Corporate Services - Legal 150 W. Market Street, Suite 600 Indianapolis, Indiana 46204

WHEREFORE, Northern Indiana Public Service Company LLC respectfully requests that the Commission promptly publish notice, make such other investigation, and hold such hearings as are necessary or advisable on or before October 12, 2020 in this Cause and, thereafter, make and enter an order in this Cause by October 28, 2020:

- (a) Authorizing and approving the RTO Adjustment factors set forth in <u>Attachment A</u>, Schedule 1 to this Petition to become effective for bills rendered by NIPSCO during the billing cycles of November 2020 through April 2021 or until replaced by different RTO Adjustment factors that are approved in a subsequent filing;
- (b) Approving Petitioner's Appendix C Regional Transmission Organization Adjustment Factor set forth in <u>Attachment C</u> to this Petition, which contains the RTO Adjustment factors to become effective for bills rendered by NIPSCO during the billing cycles of November 2020 through

April 2021, which begins October 29, 2020; and

(c) Making such other and further findings and orders in the premises as the Commission may deem appropriate and proper.

Dated this 17th day of August, 2020.

APPENDIX C REGIONAL TRANSMISSION ORGANIZATION ADJUSTMENT FACTOR

Sheet No. 1 of 1

As shown in Appendix A, the Regional Transmission Organization ("RTO") Adjustment Factor in Rates 811, 820, 821, 822, 823, 824, 825, 826, 831 Tier 1 and Tier 2, 832, 833, 841, 842, 844, 850, 855 and 860, and Rider 876 shall be computed in accordance with Rider 871 – Adjustment of Charges for Regional Transmission Organization.

Effective for bills rendered during the November 2020 through April 2021 billing cycles, or until new factors are approved by the Commission, the RTO Factor shall be:

RATE SCHEDULES

| Rate | Charge |
|-----------------|---|
| Rate 811 | A charge of \$0.003338 per kWh used per month |
| Rate 820 | A charge of \$0.000946 per kWh used per month |
| Rate 821 | A charge of \$0.003615 per kWh used per month |
| Rate 822 | A charge of \$0.001266 per kWh used per month |
| Rate 823 | A charge of \$0.003770 per kWh used per month |
| Rate 824 | A charge of \$0.002987 per kWh used per month |
| Rate 825 | A charge of \$0.001915 per kWh used per month |
| Rate 826 | A charge of \$0.001995 per kWh used per month |
| Rate 831 Tier 1 | A charge of \$0.002068 per kWh used per month |
| Rate 831 Tier 2 | A charge of \$0.000421 per kWh used per month |
| Rate 832 | A charge of \$0.001854 per kWh used per month |
| Rate 833 | A charge of \$0.001600 per kWh used per month |
| Rate 841 | A charge of \$0.001483 per kWh used per month |
| Rate 842 | A charge of \$0.006034 per kWh used per month |
| Rate 844 | A charge of \$0.002183 per kWh used per month |
| Rate 850 | A charge of \$0.003470 per kWh used per month |
| Rate 855 | A charge of \$0.003098 per kWh used per month |
| Rate 860 | A charge of \$0.003138 per kWh used per month |
| Rider 876 | See note below |

The RTO Factor for Rider 876 will be the RTO Factor associated with the firm service under Rate Schedule 831 Tier 1 and 831 Tier 2 being used in conjunction with this Rider.

Formula Rate - Non-Levelized

Rate Formula Template Utilizing FERC Form 1 Data

Attachment O Page 5 of 5 For the 12 months ended 12/31/2020

Northern Indiana Public Service Company LLC

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#) References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

Note Letter

- Α Peak as would be reported on page 401b, column d of Form 1 at the time of the applicable pricing zone coincident monthly peaks.
- Labeled LF, LU, IF, IU on pages 310-311 of Form 1at the time of the applicable pricing zone coincident monthly peaks.
- Labeled LF on page 328 of Form 1 at the time of the applicable pricing zone coincident monthly peaks.
- Labeled LF on page 328 of Form 1 at the time of the applicable pricing zone coincident monthly peaks.
- The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff.
- The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to ASC 740. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against operating income as discussed in Note K. Account 281 is not allocated. The calculation of ADIT in the annual projection amd Annual True-Up calculations will be performed in accordance with Treasury regulation Section 1.167(1)-1(h)(6). Differences attributable to under-projection of ADIT in the annual projection will result in an adjustment to the projected prorated ADIT activity by the difference between the projected monthly activity and the actual monthly activity. However, when projected monthly ADIT activity is an increase and actual monthly ADIT activity is a decrease, actual monthly ADIT activity will be used. Likewise, when projected monthly ADIT activity is a decrease and actual monthly ADIT activity is an increase, actual monthly ADIT activity will be used. Work papers supporting the ADIT calculations will be posted with each Annual True-Up and or Projected Net Revenue Requirement and included in the annual Informational Filing submitted to the Commission. The Annual True-Up or Projected Net Revenue Requirement ADIT worksheets set forth the calculation pursuant to Treasury regulation Section 1.167(1)-1(h)(6). Beginning with the 2020 rate year, the Annual True-Up for a given year will use the same methodology that was used to project that year's rates.
- Identified in Form 1 as being only transmission related balances.
- Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5. Prepayments are the electric related prepayments booked to Account No. 165 and reported on Page 111, line 57 in the Form 1.
- Line 5 EPRI Annual Membership Dues listed in Form 1 at 353.f, all Regulatory Commission Expenses itemized at 351.h, and non-safety related advertising included in Account 930.1. Line 5a - Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351.h.
- Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.
- The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) (page 3, line 26).

FIT = 21.00% Inputs Required: SIT= 5.375% (State Income Tax Rate or Composite SIT) 0.00% (percent of federal income tax deductible for state purposes)

- Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and 561.BA.
- M Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until Form 1 balances are adjusted to reflect application of sevenfactor test).
- N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.
- o NIPSCO is a combined gas and electric company and does have common plant assets. As all common plant balances and related depreciation expenses are allocated to either gas or electric plant on page(s) 356 of FERC Form 1 using ratios approved by the state jurisdiction, NIPSCO has not included a balance for gas assets in lines 5 and 11 of page 2 nor gas expenses in lines 6 and 11 of page 3. Therefore, there is no need to populate line 18 on page 4 as the gas plant balances and expenses have been eliminated from amounts reported in this Attachment O.
- Debt cost rate = long-term interest (line 21) / long term debt (line 27). Preferred cost rate = preferred dividends (line 22) / preferred outstanding (line 28). ROE will be supported in the P eriginal filing The allowed base ROE shall be established by FERC and no change in ROE may be made absent a filing with FERC. A 50 basis point adder for RTO participation may be added to the ROE up to the upper end of the zone of reasonableness established by FERC.
- Q Line 33 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor.
- R Includes income related only to transmission facilities, such as pole attachments, rentals and special use.
- S Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4, page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have not been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.
- Т The revenues credited on page 1, lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.
- Account 456.1 entry shall be the annual total of the quarterly values reported at Form 1, 330.x.n.
- Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements.
- W Pursuant to Attachment GG of the MISO Tariff, removes dollar amount of revenue requirements calculated pursuant to Attachment GG.
- Х Removes from revenue credits revenues that are distributed pursuant to Schedules associated with Attachment GG of the MISO Tariff, since the Transmission Owner's Attachment O revenue requirements have already been reduced by the Attachment GG revenue requirements.
- Page 2, line 23a includes any unamortized balances related to the recovery of abandoned plant costs approved by FERC. Page 3, line 9a includes the Amortization expense of abandonment plant costs approved by FERC. These are shown in the workpapers required pursuant to the Annual Rate Calculation and True-Up Procedures.
- Calculate using 13 month average balance, reconciling to FERC Form No. 1 by page, line and column as shown in Column 2.
- AA For items not subject to proration under Note F. Calculate using a simple average of beginning of year and end of year balances reconciling to FERC Form No. 1 by page, line and column as shown in Column 2.
- вв Calculation of Prior Year Divisor True-Up:

Historic Year Actual Divisor Pg 1, Line 15 2,899,500 Projected Year Divisor Pg 1, Line 15 2,803,455 Difference between Historic & Project Yr Divisor

Prior Year Projected Annual Cost (\$ per kw per yr.) Pg 1, Line 16

38.70100 (3,717,054)

Projected Year Divisor True-up (Difference * Prior Year Projected Annual Cost)

- CC Pursuant to Attachment MM of the MISO Tariff, removes dollar amount of revenue requirements calculated pursuant to Attachment MM.
- DD Removes from revenue credits revenues that are distributed pursuant to Schedules associated with Attachment MM of the MISO Tariff, since the Transmission Owner's Attachment O revenue requirements have already been reduced by the Attachment MM revenue requirements.
- EE Schedule 10-FERC charges should not be included in O&M recovered under this Attachment O.
- FF Stores Expense Undistributed (Account 163) will be the average of the beginning of the year and the end of year balances, multiplied by the "Ratio O&M" percentage for electric, as reported on page(s) 356 of the Form 1, multiplied by the Net Plant (NP) Allocator, as calculated on page 2, line 18, column 4 of this Attachment O.
- GG Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC.
- HH NIPSCO agrees to provide an annual Attachment O adjustment pursuant to Docket No. EL17-10 until NIPSCO files for new Attachment O depreciation rates. For the first year of this adjustment, NIPSCO will prorate the adjustment based on the effective date for the EL17-10 depreciation rates. To the extent NIPSCO files for new Attachment O depreciation rates with an effective date other than January 1 of a particular year, NIPSCO will likewise prorate the adjustment to cover only the portion of the year covered by the EL17-10 depreciation rates.
- II Includes the amortization of any excess/deficient deferred income taxes resulting from changes to income tax laws, income tax rates (including changes in apportionment) and other actions taken by a taxing authority. Excess and deficient deferred income taxes will reduce or increase tax expense by the amount of the excess or deficiency multiplied by (1/(1-T)) (page 3, line 26a).
- JJ Includes the annual income tax cost or benefits due to permanent differences or differences between the amount of expenses or revenues recognized in one period for ratemaking purposes and the amounts recognized for income tax purposes which do not reverse in one or more other periods, including the cost of income taxes on the Allowance for Other Funds Used During Construction. T multiplied by the amount of permanent differences and depreciation expense associated with Allowance for Other Funds Used During Construction is included in page 3, line 24b and will increase or decrease tax expense by the amount of the expense or benefit included on line 24b multiplied by (I/(1-T)) (page 3, line 26b).

NOTES

- 1) Column J is the difference between projected monthly and actual monthly activity (Column I minus Column F). Specifically, if projected and actual activity are both positive, a negative in Column J represents over-projection (amount of projected activity that did not occur) and a positive in Column J represents under-projection (excess of actual activity are both negative, a negative in Column J represents under-projection (excess of actual activity) and a positive in Column J represents over-projection (amount of projected activity) that did not occur).
- 2) Column K preserves proration when actual monthly and projected monthly activity are either both increases or decreases. Specifically, if Column J is over-projected, enter Column G x [Column F]. If Column J is under-projected, enter the amount from Column G and complete Column I). In other situations, enter zero.
- 3) Column L applies when (1) Column J is under-projected AND (2) actual monthly and projected monthly activity are either both increases or decreases. Enter the amount from Column J. In other situations, enter zero.
- 4) Column M applies when (1) projected monthly activity is an increase while actual monthly activity is a decrease OR (2) projected monthly activity is a decrease while actual monthly activity is an increase. Enter actual monthly activity (Col I). In other situations, enter zero.
- 5) Column N is computed by adding the prorated monthly activity, if any, from Column K to 50 percent of the portion of monthly activity, if any, from Column L or M to the balance at the end of the prior month. The activity in columns L and M is multiplied by 50 percent to reflect averaging of rate base to the extent that the proration requirement has not been applied to a portion of the monthly activity.
- 6) For the non-property-related component of the balance, the Average Balance is computed using the average of beginning of year and end of year balance. For the property-related component of the balance, the Average Balance is computed as described in Note 5.

Rev. Req. Adj For Attachment O

71,598,897

Note Letter

- Gross Transmission Plant is that identified on page 2 line 2 of Attachment O and includes any sub lines 2a or 2b etc. and is inclusive of any CWIP included in rate base when authorized by FERC order less any prefunded AFUDC associated with gross plant and CWIP, if applicable. References to Attachment O "Column 5" throughout this template is an illustrative column designation intended to reference the appropriate right-most column in Attachment O which position may vary by company.
- Net Transmission Plant is that identified on page 2 line 14 of Attachment O and includes any sub lines 14a or 14b etc. and is inclusive of any CWIP included in rate base when authorized by FERC order.
- Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1 and includes CWIP in rate base when authorized by FERC order less any prefunded AFUDC, if applicable. С This value includes subsequent capital investments required to maintain the facilities to their original capabilities.
- Note deliberately left blank.
- Project Depreciation Expense is the actual value booked for the project and included in the Depreciation Expense in Attachment O page 3 line 12, less any prefunded AFUDC amortization, if applicable, related to the project.
- True-Up Adjustment is included pursuant to a FERC approved methodology, if applicable.
- The MVP Annual Revenue Requirement is the value to be used in Schedules 26-A and 39.
- The Total General and Common Depreciation Expense excludes any depreciation expense directly associated with a project and thereby included in page 2 column 13. Transmission Accumulated Depreciation that is identified on page 2 line 8 of Attachment O less any amortized prefunded AFUDC balance, if applicable.
- Project Accumulated Depreciation for the project is calculated in the same method as the Transmission Accumulated Depreciation value in line 1a.
