Case Description: For the year 2025 the Indiana Utility Regulatory Commission approved an 11% rate increase for Duke Energy. Duke Energy has gone way above that approved rate increase. Duke Energy a few years ago stopped putting the cost per kilowatt for their total electric charges. The purpose of this was to intentionally screw over their customers thinking that we will not catch price increases and that we're inept to figure TOTAL cost per kilowatt. Those of us like me who excelled in math in high school & college know how to figure it out. In the 12 months prior to Duke raising their rates my cost per kilowatt averaged 13 cents a kilowatt. February's bill received in March 2025 was 1816 kilowatts was \$255.90 which was 13 cents a

kilowatt minus taxes & lightning strike charge. Now an 11% increase on a yearly average would be 14.5 cents a kilowatt MAXIMUM allowed by the IURC. After the increased allowed by the IURC my April bill for March was 996 kilowatts for \$186.71 at 17.2 cents a kilowatt. THIS IS A 24.4% INCREASE WAY ABOVE 11% ALLOWED!!! Then comes May bill for April; 797 kw at \$156.33 for 18 cents per kw AN INCREASE OF 27.8% AGAIN WAY ABOVE THE 11% INCREASE ALLOWED BY IURC!!! Then comes June's bill for May; 637 total used kw for \$132.15 for 19 cents a kilowatt for A 31.5% INCREASE ABOVE THE ALLOWABLE 11% INCREASE!!! Now on June 6, I contacted Olivia of IURC via phone & was told to contact Duke first. So I contacted them via phone & filed a complaint. When done I was told I would be contacted by phone or email in 24 to 48 hours. I gave them the benefit of the doubt for the weekend. Here it is Wednesday with no phone calls or email. So I filed a complaint on their website Tuesday. I immediately received an email that stated this complaint has already been phoned in. THAT'S IT & NOW IT'S WAY PAST 24 TO 48 HOURS WHICH TELLS ME DUKE WILL CONTINUE TO DEFY ITS CUSTOMERS & THE STATE OF INDIANA!!!! Now I expected to hear the excuse from them and you that the more electricity you use the cheaper the kilowatt. THIS HAS NOT BEEN THE PRACTICE OF THE PAST. The lady I talked to said this should have been explained in a letter from Duke before rates were raised. I told her I've been living here for 18 years & Duke Energy HAS NEVER EVER SENT ME A RATE INCREASE LETTER. If I am not satisfied and this is not straightened out by the IURC I am prepared to notify the FBI, FTC, BBB, PLUS seek an attorney in Indianapolis who does class action lawsuits which means the IURC may be investigated for collusion & possible bribery charges. Duke Energy is a greedy company that is totally out of control!!!!!! I have a neighbor behind me that has budget billing. There was a note in his last bill that stated after his year is up for budget billing his rates will increase 11%. Now they never warn me in my bills that rates are going up. I heard it on channel 13 news Indy. I told Duke they are penalizing me for not doing budget billing & making up for it.

Sincerely,

Olivia Johnson

Subject: Abigail Asher - No more rate hikes! Please stand up for customers in Cause Number 46193
Date: Friday, May 2, 2025 2:45:36 PM

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am troubled to see Duke file for a \$3.3 BILLION project right after receiving approval to collect another \$244 million from us every year. If a \$244 million rate increase raises my bills by \$19/month, I am horrified to imagine what a \$3.3 billion request will do.

I am also really disappointed by the fact that Duke wants to replace one fossil fuel with another. This makes no sense. Duke is already almost exclusively reliant on fossil fuels: 96% of their electricity generation came from coal and gas in 2023. This stubborn overreliance on fossil fuels may generate significant profits for Duke's shareholders, but it's harming customer wallets and our environment.

I would like to see the OUCC and the IURC push Duke to increase investments in energy efficiency and replace the Cayuga units with solar, wind, and battery storage. This would help save us all money and help our environment. Unlike fossil fuels, renewables and efficiency do not require fuel to operate, which generates cost savings and reduces a big affordability risk to Hoosier households, as natural gas prices are notoriously volatile.

Please do everything you can to stand up for Hoosiers and REJECT Duke's request in Cause Number 46193.

Respectfully,
Abigail Asher

Subject: beverly myers - Please Reject Duke's \$3.3 Billion Request in Cause Number 46193
Date: Tuesday, May 20, 2025 4:49:29 PM

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

People are already having a tough time coping with huge increases in the cost of everything we need to survive: energy, food, housing, and healthcare.

Now, Duke customers will be forced to pay another \$19/month due to the rate increase approved earlier this year. I am anxious about how much bills will increase if Duke's newest \$3.3 billion request is approved as well. I am urging you to please do everything you can to reject Duke's request in 46193.

We all know that this huge gas plant could end up costing dramatically more than \$3.3 billion because of Construction Work in Progress (CWIP) approved by the Indiana General Assembly. CWIP means that Duke gets to pass construction costs onto customers like me before the plant produces any energy, which means they have no incentive to keep costs down.

We also all know what happened the last time Duke used customers as a blank check with CWIP: the Edwardsport power plant went \$1.5 billion over budget and ended up costing a whopping \$3.5 billion. I am not looking forward to seeing how much Duke will go over budget with this new gas plant.

Please stand up for Duke customers like me by rejecting Duke's \$3.3 billion request. Please push Duke to adopt cleaner and more affordable options that move Duke away from their extreme overreliance on fossil fuels.

Investments in energy efficiency, renewable energy, and battery storage will help Duke to diversify its generation portfolio and save us money. We simply can't afford any more increases. Unlike Duke and their parent company - one of the largest energy holding companies in the entire country - Hoosiers aren't rolling in the dough.

Please reject Duke's request in Cause Number 46193.

Thank you,
beverly myers

Dear Counselor Bill Fine,

As Duke Energy and their parent company rake in healthy profits, many Hoosiers are forced to make tough decisions every day. People have to choose whether to pay for groceries, medicine, or their electric bill. Whether to run their air conditioning or suffer through the heat. Whether to pay their landlord or Duke. We heard as much throughout the public hearings for Duke's 2024 rate case, and that was before folks saw their Duke bills increase by \$19/month from the rate hike they just got.

It's appalling that Duke is already back at the IURC asking for even more of our money, a whopping \$3.3 billion. And it's alarming that the \$3.3 billion is the floor and not the ceiling.

First off, since Duke wants to build a huge gas plant, we know that customers will be on the hook for additional future rate hikes to pay for pipelines, operations & maintenance for the plant, and the fuel to run it.

But that's not all, thanks to Construction Work in Progress, granted to Duke by the Indiana General Assembly. CWIP shifts construction risks away from utilities and their shareholders and onto the backs of captive customers like me. With CWIP, Duke has no incentive to keep costs low because they can pass costs directly onto customers. We've already seen the impact of CWIP with Duke's own Edwardsport plant: cost overruns totaling \$1.5 billion. Please don't force us to repeat that experience!

Please reject Duke's request to hike our bills for a dirty gas plant in Cause Number 46193. Please push Duke to adopt cheaper, cleaner options that will help reduce its extreme overreliance on dirty and expensive fossil fuels.

Regards,
beverly myers

Dear Counselor Bill Fine,

People are already having a tough time coping with huge increases in the cost of everything we need to survive: energy, food, housing, and healthcare.

Now, Duke customers will be forced to pay another \$19/month due to the rate increase approved earlier this year. I am anxious about how much bills will increase if Duke's newest \$3.3 billion request is approved as well. I am urging you to please do everything you can to reject Duke's request in 46193.

We all know that this huge gas plant could end up costing dramatically more than \$3.3 billion because of Construction Work in Progress (CWIP) approved by the Indiana General Assembly. CWIP means that Duke gets to pass construction costs onto customers like me before the plant produces any energy, which means they have no incentive to keep costs down.

We also all know what happened the last time Duke used customers as a blank check with CWIP: the Edwardsport power plant went \$1.5 billion over budget and ended up costing a whopping \$3.5 billion. I am not looking forward to seeing how much Duke will go over budget with this new gas plant.

Please stand up for Duke customers like me by rejecting Duke's \$3.3 billion request. Please push Duke to adopt cleaner and more affordable options that move Duke away from their extreme overreliance on fossil fuels.

Investments in energy efficiency, renewable energy, and battery storage will help Duke to diversify its generation portfolio and save us money. We simply can't afford any more increases. Unlike Duke and their parent company - one of the largest energy holding companies in the entire country - Hoosiers aren't rolling in the dough.

Please reject Duke's request in Cause Number 46193.

Thank you,
Gail Bray

Dear Counselor Bill Fine,

I am troubled to see Duke file for a \$3.3 BILLION project right after receiving approval to collect another \$244 million from us every year. If a \$244 million rate increase raises my bills by \$19/month, I am horrified to imagine what a \$3.3 billion request will do.

I am also really disappointed by the fact that Duke wants to replace one fossil fuel with another. This makes no sense. Duke is already almost exclusively reliant on fossil fuels: 96% of their electricity generation came from coal and gas in 2023. This stubborn overreliance on fossil fuels may generate significant profits for Duke's shareholders, but it's harming customer wallets and our environment.

I would like to see the OUCC and the IURC push Duke to increase investments in energy efficiency and replace the Cayuga units with solar, wind, and battery storage. This would help save us all money and help our environment. Unlike fossil fuels, renewables and efficiency do not require fuel to operate, which generates cost savings and reduces a big affordability risk to Hoosier households, as natural gas prices are notoriously volatile.

Please do everything you can to stand up for Hoosiers and REJECT Duke's request in Cause Number 46193.

Respectfully,
Harold Goodman

Dear Counselor Bill Fine,

As Duke Energy and their parent company rake in healthy profits, many Hoosiers are forced to make tough decisions every day. People have to choose whether to pay for groceries, medicine, or their electric bill. Whether to run their air conditioning or suffer through the heat. Whether to pay their landlord or Duke. We heard as much throughout the public hearings for Duke's 2024 rate case, and that was before folks saw their Duke bills increase by \$19/month from the rate hike they just got.

It's appalling that Duke is already back at the IURC asking for even more of our money, a whopping \$3.3 billion. And it's alarming that the \$3.3 billion is the floor and not the ceiling.

First off, since Duke wants to build a huge gas plant, we know that customers will be on the hook for additional future rate hikes to pay for pipelines, operations & maintenance for the plant, and the fuel to run it.

But that's not all, thanks to Construction Work in Progress, granted to Duke by the Indiana General Assembly. CWIP shifts construction risks away from utilities and their shareholders and onto the backs of captive customers like me. With CWIP, Duke has no incentive to keep costs low because they can pass costs directly onto customers. We've already seen the impact of CWIP with Duke's own Edwardsport plant: cost overruns totaling \$1.5 billion. Please don't force us to repeat that experience!

Please reject Duke's request to hike our bills for a dirty gas plant in Cause Number 46193. Please push Duke to adopt cheaper, cleaner options that will help reduce its extreme overreliance on dirty and expensive fossil fuels.

Regards,
Heidi Foil

Dear Counselor Bill Fine,

We all need utility service to live safe and healthy lives. Please do everything in your power to advocate for affordable bills for residential customers in Cause Number 46038.

Although we all feel the impact of huge utility rate hikes, vulnerable Hoosiers are hit the hardest by extreme increases in our monthly bills. Seniors with fixed incomes, people with disabilities, and families with low- to moderate-incomes will be forced to tighten their already tight belts if Duke Energy is allowed to raise our bills by \$500 more every year.

Our most vulnerable neighbors will also be disproportionately impacted by a 30% increase in our fixed charge and Duke's continued reliance on declining block rates. Please reject Duke's requests on both fronts; we shouldn't penalize people who use less energy purely for the sake of utility profits.

I find it appalling that as Duke's parent company rakes in \$2.87 billion in profit last year, Duke has the gall to ask Indiana customers to pay more for their overreliance on coal. This rate case makes it painfully obvious that the more coal Duke burns, the more profit they make, and the higher our bills.

Duke wants us to pay to study carbon capture and storage at Edwardsport and to profit from us bailing them out for their huge overstock of coal at their power plants. Meanwhile, they want to extend retirement dates at dirty coal plants and burn more coal than they have the past few years. We should not be forced to pay more so that a giant monopoly can rake in more profits by burning more coal and creating more coal ash!

Residential customers desperately need an advocate to stand up to Duke Energy, Indiana's biggest and dirtiest electric utility. Please advocate for fair and affordable bills in Cause Number 46038.

Dear Counselor Bill Fine,

As Duke Energy and their parent company rake in healthy profits, many Hoosiers are forced to make tough decisions every day. People have to choose whether to pay for groceries, medicine, or their electric bill. Whether to run their air conditioning or suffer through the heat. Whether to pay their landlord or Duke. We heard as much throughout the public hearings for Duke's 2024 rate case, and that was before folks saw their Duke bills increase by \$19/month from the rate hike they just got.

It's appalling that Duke is already back at the IURC asking for even more of our money, a whopping \$3.3 billion. And it's alarming that the \$3.3 billion is the floor and not the ceiling.

First off, since Duke wants to build a huge gas plant, we know that customers will be on the hook for additional future rate hikes to pay for pipelines, operations & maintenance for the plant, and the fuel to run it.

But that's not all, thanks to Construction Work in Progress, granted to Duke by the Indiana General Assembly. CWIP shifts construction risks away from utilities and their shareholders and onto the backs of captive customers like me. With CWIP, Duke has no incentive to keep costs low because they can pass costs directly onto customers. We've already seen the impact of CWIP with Duke's own Edwardsport plant: cost overruns totaling \$1.5 billion. Please don't force us to repeat that experience!

Please reject Duke's request to hike our bills for a dirty gas plant in Cause Number 46193. Please push Duke to adopt cheaper, cleaner options that will help reduce its extreme overreliance on dirty and expensive fossil fuels.

Regards,
Meosha Huff

Dear Counselor Bill Fine,

People are already having a tough time coping with huge increases in the cost of everything we need to survive: energy, food, housing, and healthcare.

Now, Duke customers will be forced to pay another \$19/month due to the rate increase approved earlier this year. I am anxious about how much bills will increase if Duke's newest \$3.3 billion request is approved as well. I am urging you to please do everything you can to reject Duke's request in 46193.

We all know that this huge gas plant could end up costing dramatically more than \$3.3 billion because of Construction Work in Progress (CWIP) approved by the Indiana General Assembly. CWIP means that Duke gets to pass construction costs onto customers like me before the plant produces any energy, which means they have no incentive to keep costs down.

We also all know what happened the last time Duke used customers as a blank check with CWIP: the Edwardsport power plant went \$1.5 billion over budget and ended up costing a whopping \$3.5 billion. I am not looking forward to seeing how much Duke will go over budget with this new gas plant.

Please stand up for Duke customers like me by rejecting Duke's \$3.3 billion request. Please push Duke to adopt cleaner and more affordable options that move Duke away from their extreme overreliance on fossil fuels.

Investments in energy efficiency, renewable energy, and battery storage will help Duke to diversify its generation portfolio and save us money. We simply can't afford any more increases. Unlike Duke and their parent company - one of the largest energy holding companies in the entire country - Hoosiers aren't rolling in the dough.

Please reject Duke's request in Cause Number 46193.

Thank you,
Elizabeth Piekarczyk

Dear Counselor Bill Fine,

I am troubled to see Duke file for a \$3.3 BILLION project right after receiving approval to collect another \$244 million from us every year. If a \$244 million rate increase raises my bills by \$19/month, I am horrified to imagine what a \$3.3 billion request will do.

I am also really disappointed by the fact that Duke wants to replace one fossil fuel with another. This makes no sense. Duke is already almost exclusively reliant on fossil fuels: 96% of their electricity generation came from coal and gas in 2023. This stubborn overreliance on fossil fuels may generate significant profits for Duke's shareholders, but it's harming customer wallets and our environment.

I would like to see the OUCC and the IURC push Duke to increase investments in energy efficiency and replace the Cayuga units with solar, wind, and battery storage. This would help save us all money and help our environment. Unlike fossil fuels, renewables and efficiency do not require fuel to operate, which generates cost savings and reduces a big affordability risk to Hoosier households, as natural gas prices are notoriously volatile.

Please do everything you can to stand up for Hoosiers and REJECT Duke's request in Cause Number 46193.

Respectfully,
Shelly Modesitt
