

STATE OF INDIANA

INDIANA UTILITY REGULATORY COMMISSION

PETITION OF INDIANA MICHIGAN POWER)
COMPANY FOR APPROVAL OF A TARIFF RATE)
AND ACCOMPANYING TARIFF TERMS AND) Cause No. 45506
CONDITIONS FOR THE PROCUREMENT OF)
EXCESS DISTRIBUTED GENERATION)
PURSUANT TO IND. CODE CH. 8-1-40.)

COMPLIANCE FILING
EXCESS DISTRIBUTED GENERATION RIDER

Indiana Michigan Power Company (I&M), by counsel, pursuant to the Order issued January 26, 2022 in this cause, hereby submits its annual update of the Procured Generation Credit Rate available to customers participating in Rider EDG (Excess Distributed Generation Rider). I&M's Rider EDG provides customers the opportunity to voluntarily interconnect an eligible distributed generation facility to the Company's system. This applies to customers who own and operate an eligible distributed generation renewable energy resource such a solar photovoltaic, wind, biomass, or hydro electrical generating facility designed to operate in parallel with the Company's system.

I&M's updated Procured Generation Credit Rate is updated as follows:

1. As provided in Attachment A, the Procured Generation Credit Rate for the Rider EDG is calculated pursuant to Ind. Code 8-1-40-17, wherein (1) the average marginal price of electricity paid by the electricity supplier during the most recent calendar year; is multiplied by (2) one and twenty-five hundredths (1.25). In particular, Attachment A provides the 2024 Average Real-Time LMP for I&M Zone and calculation of the Rider EDG Procured Generation Credit Rate.

2. I&M proposes a Procured Generation Credit Rate for Rider EDG of \$0.03639 per kWh to be applied to bills rendered effective with the March 2025 billing cycle and remain in effect until replaced by an updated price in a subsequent compliance filing.
3. I&M's First Revised Sheet No. 41.8, reflects the updated Procured Generation Credit Rate to become effective for bills rendered with the March 2024 billing cycle (February 28, 2025).
4. I&M has also updated First Revised Sheet No. 41.8 to reflect the annual update to Rider EDG is being done by a compliance filing and not a 30-day filing. This revision incorporates the directive of the Commission's Order issued January 26, 2022.

Dated February 13, 2025.

Respectfully submitted,

RIDER EDG
(Excess Distributed Generation Rider)
(Cont'd from Sheet No. 41.7)

Metering.

One of the following metering options, if not already present, shall be installed on the distributed generation customer's premises by the Company to properly record the kWh that is delivered and received:

- (1) One main watt-hour meter capable of measuring both the customer usage and the excess generation during instances when the eligible onsite generation is producing more energy than is being consumed at the customers' premises.
- (2) One main watt-hour meter measuring the flow of energy to the distributed generation customer and a second watt-hour meter measuring the flow of energy to the Company during instances when the eligible onsite generation is producing more energy than is being consumed at the customers' premises.

The Company may install one or more additional meters to monitor the flow of electricity.

Monthly Charges, Credits and Billing.

Monthly charges for energy, and demand where applicable, to serve the customer's total load shall be determined according to the Company's standard service tariff under which the customer would otherwise be served, absent the customer's eligible distributed generation facility. Energy charges under the customer's standard tariff shall be applied to the total amount of energy delivered from the utility to the customer's premises through the Company metering for the billing period. The meter register will record instances when the eligible onsite generation is producing more than what is being consumed at the premises (excess distributed generation) and the customer will be credited for the total of this excess generation on the customer's current bill for the billing period. The customer will be credited for energy procured from the customer at the current approved rate as stated below and pursuant to IC 8-1-40-17. If the credit for energy procured from the customer exceeds the current charges in the billing period, any excess credit shall be carried forward and applied against future charges to the customer as long as the customer receives retail electric service from I&M at this meter location on the customer premises. Any unused credit shall be credited back to all customers through the FAC.

Procured Generation Credit.

Procured Generation Credit Rate = \$0.036~~3940~~ per kWh.

I&M will update this rate annually by making a compliance 30-day filing with the Commission on or before March 1.
