Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0NTk2MGRhODNmZWE3MTQxYWM1ZWZkNmNkZWIzNDJlNjo3OmU2ZTQ6ZDQ1MWMyYTRhNDBiMWU4N2I1NWUxNmJjMWUxNGYyMzY5NGQ5MDc1ZDk1ODBiMGQzNzJiOWY4MTY1YWUzNzMwMzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Penny Leeson

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4MTA0NDM5ZjYwYzE4NDBmMmY1MjI2Y2ZjN2EzYWRmMTo3OmJjY2E6ODMyZjk4NWU4MGI3MzMzZDY3NDdiYWU0YzFhNmFkZjgwNmYzMGE4MjA4MGU4ODVlMDBkZTI3MDYxYTUwZTBiMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Ross mapes

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Sally Webb

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmOTJhN2U2M2UxZTExMGI3ZmNmZGE3YzlkNDg3MDhjZjo3OjY0ZmI6NmY4MDY0Y2FhZGU3YzU1ZWYxZWMzNmIwMzk1MTJlMjhjYTE1MjExYWU4NDRmZGUyODJhN2Q5ZDRmYjNlNWU0Yzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Sandra Striebeck

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Sharon Dunn

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3ZjI2NzRjNGZiZDM5MjRiZmExY2JkOGNjMTUwZGQyYTo3OmE3YmQ6ZDJkOTkyNjYyNjdhNDIwNTRhZTVhYWM3ZWYxZDQ2ZGJiZmJmZGRmY2E5MWQ5YWFlZDdjYjdhNzQyYWUzNDMwMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Tamara White

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjODQ1MjU0M2NjYWYxYjE4MTExOGJkYWFkMDhhYTQ4ODo3OmQxZmI6MGY2NWExYmQyMWU2YTg1M2ZkNGUyNDExZTdmOGZjNjVjYjc4ZmFiN2IzM2RlOTc4OGE1ZDA3N2VhMDIyYjJhMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Terrie Hofer

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjYTU1MWU1NmRkN2I4YzA3OGRhN2RhNTBjMzY3NTcxOTo3OjFkZjc6MTlkMTNkNjlhODk5NzI4NjE4OTdmYTBhOGI4MjEyNjIxNDQxZTA0ODEyMDljNjAyMzQzMTczMGViNjE0ZjU1ZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
William Ball

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3Nml0ZDA4OGJlMzc3MmNkMjJjZDg0YTQ0OGYzMml3MDo3OmYzMDc6YWFmMWIyZjJlMTc4NmEwYTkxZDZmMjUzYzliZmVmNWU2YzBjMTVjMDliYWIzN2E1NDQxYzRlYTc1YjFjODg4OTp0OlQ6Tg).

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Alison Cerra

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1ZTUzZjQwMTc4ZDA0MjY1MjU5Y2VmODdkZGJiNGEwZDo3OjNmMjM6OTVjYTM1NWNkZjcyOTdjZDZlNDY1YTI3MGE0ZWFkMjEzZWJkYzdlOTA2YjQ0ODA1YzNmZjUyMGYwMDM1ODNjNzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Ann Smock

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Avery Miller

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Brenda Owens

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Brenda Owens

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzphZjhiZDg5YTExMTc5NDRhYjY3NjUwY2QzZGU3ZTo3OjQ0NDc6M2M2ZTRiMTQ3MDQ0MmM0MmNhMTBiYWUxZmFhNTY4MzA3MTYwNzMxZTUzYmUxNTkxYTAyNWM5YmIxY2MwNDZkYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Cherry Nichols

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Cindy Hardcastle

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpIYWNlNGJhN2I4ZTU3NGY3NDg5ZmUxN2FlYzJiM2VmMjo3OmNhZDQ6Y2NjZmI1NTFhZjQzNWQyZTViMTYwMTlkMTIzZWViODFkYTQ1MTNkNzEzMWExN2NmNjcyNmU0MGMzOWFiNTI4Mjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Courtney Brand

ON A PERSONAL NOTE**********
My last AES electric bill was 45% higher than any other billing period in my account history and triple the amount I paid last month. I have lived on the near east side of Indianapolis for over 15 years and never imagined that utility costs would be the reason I would begin questioning whether i could continue to afford to raise my three kids in Indianapolis. As a professional with a post college degree, I am facing the reality of electric bills I simply cannot pay. *******

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Donella Fulton

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Doris King

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplYzNjMDQwMzE2NjE0Y2l4Y2Q3NDIzM2Q3MWZlMWFmNzo3OjQzODY6YjQ0NWE4NGMyZGU3NTVjMzk1NjEwMDk4MTlkNTM1NWMyYmIzOTE1ZTg2YWM1NjZhMjE4MmJmNjZkZDJjMTgyYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Gary Snelson

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Gayle Steigerwald

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiMmUwYzIxNDY0NjFlMjZhYTlhYzVjMGE0M2EwMGQzZDo3OmQ0NDU6OGEyMDFiOTVmYjk3ZmMxYWZlNzNiYjM3ZmFiZTEwZGQ5MTk4MThiZDljNzc2NDhiZDgzYWIxMjU3YzdlZGZlNjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Ginger Challis

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Jamie Malone

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Jane Wignall

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkMGJjMDU2Njk5MjYwMjk2ZTdkNmRmOTRlZjY1MDcyYjo3OjMzMDI6OThiYzlmY2IzMjMxYTE4OTJiZTM4ZTU4ZmZhOWMzNDgyMWZjY2Y0NjdhYWZmYTQ0YzM1M2YwY2IwYjAxNTdjNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
John Hanger

Dear Counselor Bill Fine,

I am very concerned about the proposed rate hike from AES.

This most recent massive rate hike request comes on the heels of a busy and chaotic few years for AES customers, who have had to deal with:

Ridiculously long outage periods for thousands of customers after severe storms in 2023 and 2025.

A disastrous rollout of a new billing system in 2024 that caused customers to get significantly overcharged for bills and took over a year to fix.

A rate hike of $9+ per month approved by state utility regulators in April 2024. What have customers been receiving in exchange for this rate hike??

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month--especially in light of AES' ineffectual service. Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplOTMxNDAxYTRjOWE1NjhlNDZhYjVhOTdjZDFmNmFjZDo3OjI1MjM6NzA1NzVlZGJjZWIwMjIzMjBmYTY4ZjJhMmQ4YTVmZWU2MjA0ZDdkOTAzZmY4YzA4NGIwNTA3NmI5NGEyOTFmOTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3MWEyOWI1MDBkNTcwNjZlNGQ5M2I0NmUwMDFmZDlmNzo3OmE2NzI6MDE5N2VlZWVkZmM2MWMwYjdjM2MyOWEzZjllYzQxZjViOWUyOGU1YWFlMThiZTQzZDBlYmEwYjVjMTdjYWQ4NDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Karrie Pierce

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Keith Yarbrough

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3M2I2NTQ2M2VmNWI2OTE4YmQ0NzhiNzBmYmM3Yjk2OTo3OmQ3N2E6NDRhMzM5YjczNTFiZGIwZWZmNWQyNTZmYmEzNTFjZjBlNGEzMzk4Y2MxZDFhMmQwNzUxODQxM2RkYTJlZGNmZjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Linda Brenner

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiMTM4MzJmYTY4MTYwZml1NDI3MTZiZTkwZjVmY2ExZDo3OjRjNWM6ZTI2ZjlhNjEzY2RlOGRiZmJkNGExYjhjZDBhNjFiZWExOTMyOGFmYWRkYmJkMmU3MzVjNmZhOTQ5N2M4NTFjMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Mary Decaussin

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Mary Gurrola

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzphMGQwOTg2YzNlNGVlMzg2YjY4NmFlMzY0ZWQ5ZjRmNTo3OjE3ZTA6ODZiNDJkZjk2ZTgxZDRiMDkxZWNmODFmYzEyODQ3MzBmMTFiNzc3Zjg0N2Y3NzdmZWI0YWNkYTNiNDlhMjliMDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Pamella Jahnke

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Patricia Matthews

Dear Counselor Bill Fine,

Dear Counselor Fine,

I am writing as a concerned resident of Indiana to strongly oppose the proposed rate increases by AES Indiana and other investor-owned utilities. These excessive hikes will place an unfair and unnecessary burden on hardworking Hoosiers—especially low-income families, seniors, and those already struggling with the rising cost of living.

Utility service is a basic necessity, and any changes to rates should be rooted in fairness, transparency, and accountability. I urge you to stand with Indiana residents and support reforms that prioritize affordability, public oversight, and equitable access to essential services.

Please oppose any legislation that enables or fails to regulate unjustified utility rate increases. Your constituents are counting on you to put people over profit.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjMTFiNjJhNGFkMzU0OWUzNjMxMDFmY2VmMjM1MTI1ODo3OjBlZWI6NTBiMzU2ODgwZDY4Y2ZjODAzODY4NGFhNDVjYjc1MDk1ODM2ZmRjMjFhMTcyMGMzZGNjZjM4NGEwYzQ2M2Y5YTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Also we need to require full net metering for all residential solar installations.

Regards,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Roni Warwick

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Roxann Pattison

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyNzFmZDY5YTE1OGY4YTVlZWJhOGZlNmUyNjc2Zjg3Mzo3OmRhMDA6MDQzNjA2NDE2MWU4N2IwMWJhNmQzNzc5NDA1NjE5YjFhMzg2ZDBhODk1OTJjYzUzNzRmNTcxOGE0YjExOGFmNjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Steven Prange

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Sue calufetti

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmOTk3ZmFkZjQ0ZjgxYjYyNjk2NjYyM2M4ZDAzMmU1OTo3OjMwYTY6N2EwMTYwZDk3MmViMGJlNDU5MWFlNDNkYzJkY2MxN2QyYzEzYzczYTkyZDA2OGUyNTQyODAxYjg3ZDAwOTU3Njp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

Dear Counselor Bill Fine,

I am very concerned about billing issues AES customers have experienced for over six months. Please do everything you can to initiate an investigation by the Indiana Utility Regulatory Commission into this issue. We need to understand the extent of the problem and necessary steps towards resolution for all impacted customers.

We now know that more than 60,000 customers have been impacted by billing problems. Some customers report being charged up to 10 times for the same bills, while others pay their bill only to find that AES has no record of them doing so.

While anyone can be put into a difficult position by being overcharged for utility service, duplicate charges can be especially harmful for our most vulnerable neighbors: seniors on fixed incomes and families with low-incomes in particular. When you’re pinching pennies to make it through the month, every dollar counts. Overdraft fees can really hit Hoosiers hard. Other customers may have to pay late fees for other bills because AES overcharged them.

I understand that implementing a new customer interface system is a challenging endeavor. However, these issues have now been going on for nearly a year. I'm glad to see that the IURC is holding a hearing about this, but we've waited long enough for a resolution; it's time for the IURC to open a full-blown investigation.

Customers deserve transparency about the extent of the billing issues and assurance that AES is implementing corrective measures as swiftly and efficiently as possible. A major priority should be prompt refunds to those who have been overcharged. Again, please do everything you can to bring about a resolution for impacted customers as quickly as possible.

Respectfully,
Tina Hopson

As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowNzE5MzNiYzFjNmQ2NWFlNzg3M2MyYjFlY2IzMDBhODo3OmYyMWU6N2M5NDY2Yzc5YjYyMTMzZWJmNmU3OTNhNWIzODQzN2E4MGY2NmM0NmM1ZGYxYmEyMjlkYjU1YzcyNjZjZjQ3ZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Alissa Parker

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Andrew Yanke

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozYTQ5ZjRkM2E2Y2VjMzk4YWI1ZGFjMTJhZTE3MGYyOTo3OjUyZjA6MjVmZWExMjU0N2U2ZDlhNjYzYzMwMWJkMTE1MzY2YTJiMTVmZmM3MGIzNmRkZjFkNGQ2ZGVjNjM3NDJjYWQ2MTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Aubrey Kearney

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiYjUwZmU1YTEzOWJiODdkN2ZlNDFmMTA3MjVlMzkwOTo3OjY1MzE6OThlMTI0MmJhNDlhNzRiODZmNGM3ZmRjNjkxYjllZGEwMWU2OTZmNTYxNjgyMmUwNWUzNGM0ZTc4YzFjN2UxNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Bob Schussler

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Braylon Myers

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzphMzQzNzZiN2UyMDNmZjc1OTUxOGMwODE5M2JiNzJlYTo3OjEzODY6OTM0YzRhM2Q1Y2NiY2M5NTJmYjE3YzgxZDE5NDhlMTRhYTg1MGI0ZTbjMDU3NWVmNmY2MDVmNDVhZWVjZDgwMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Casandra Reagan

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Cathy Weinmann

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Darius Brown

Dear Counselor Bill Fine,

I live in Evansville Indiana . I just received my electric bill. It was $654! It is the highest one I've ever had in my 76 years. I survived on Social Security and I'm at a loss to know how I'm going to survive these high rates. I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjODM5YTc2OTg2MjdkMjRjMTM2NTc0ODA0NmQyNDZmMTo3Ojg4NWQ6ZGJmMzVlOGUxMGMyYWYxN2JmMjIzMGRhYmVhYmQ0Njk5MmRhOTRjNjhiZGE4ZDBmYjcwYjUxZGRlM2FhY2UwMzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Donna Stroude

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking bill increase that we can't afford. The cost of living continues to rise especially for growing families like ours. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Elizabeth Nicol

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxZmMxYzJhYmQ4NzllMmM3ZTk1Y2FhODFkMWVhOTBkMjo3OjZlZTA6NjdhZjJhN2E3Mjc3MTJlOGFkY2JiNmQ3ZjE0ZmYxMDdmMjY5ZDZhZjczZDEwZGNlNWM3MTNkOGY0Yzk3YmIxMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Gina Hoggs

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2NWY1NmJmMmY5Mjg0YmM0MTUwNDJiZGU4YWQ1MDc1Yjo3OjRiODc6NjgwYzE3NzVjOGZhNzNjYTc5OTc1MmM1ZGJmNjQ3MWU4Y2I2YmNlNTQ2MzlhYjU2NzA4ZDU2NjEyY2I3ZjIzZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Irma Boyett

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Jay Wetzel

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Jo Hewitt

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowOTMxYTFkYTAxMmIzYmQwMzY2NTM0NmMzOTBiMTE0Yzo3OmZiMGI6NGYwNjkyMWRkMTk1NDY4MDFiN2FhZmM2MmU0ODI3ZGZjOTFhOGEwZjAxOTViZThlYjBhY2M3NjA1NTBmNGRmZjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiYmVkNTYzZDhlOWE2MzY4NGZmNDJkODdiZWQ1YTEwYzo3Ojg4NTE6NDk4NTA3YTQzNmMzOGE5YzUwYmQ3MDZiYjgzZTQzY2Q4ZGY1Y2YyNjEyMzY3MjY4ZDFhNmI4YWI1MzY3ZGYzNTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Katy Saylor

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiMTJlNmVmOGFlNjI0YjZlMzViMDc1NGJiZDc1ZGYyZjo3OmM1NGU6NWI4NTdjNTJmNTE1OGVmZDhlYjgzYzRkZWZhNTcwOGJiNGFkYzEwYTc1MDhhOTA5NWI0YTFmYWM0NTc5YTA5Zjp0OlQ6Tg).

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Lana Mumford

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjOTEwNGNmYWQ1MzQzZTI4YzRlMzJkZDM2Njc3NDM3Yzo3OmY3MjE6ZTRkZGQyYzg4YWNlOWM4ODRlMmVkYzkwMTZmZTdiODA0Y2ZjMGMyZDllNmMxNjNkNzZkNjMyOGY2ZWIwNTk3Yjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Lawrence Coffman

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowOTdiZWJkOGQ1NGZmZmRjNDEzOGQxNGFjNDM1NzY1ZDo3OmQwMmY6YmM2ZDQ5OTBiMTIyOWFkYjkzMzJjZmEyMDZmZDNmMDE0YmE4NWEwZGVjNjFhYTYzNmFkYjVjMTZkMTVmZDZiYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5OGZhNTZiNjk4ZDUyZGUzYWUxMWU3NWYxNmEwNDY0YTo3Ojg2MTQ6ZTQwY2ViMmI3NDZlODNkZDcwZGY3ZjM4NWMyNWRmYjMzOGI4Nml4ZTZmMWMwMDA1NTZkMjY0NzA4YzJlMDk3ODp0OlQ6Tg).

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Michael Hill

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5YTMwNzAzYTJlMjdmYzljOWVjYThhMDM0M2E0OTZhZDo3OjE1MTI6NGY5MDRmNDgzMWVlM2IyNWZmYWRjMWI2ZGM0YjlkOGE1OTk0OTNiNmU3NGFkYWJmZTZiZDVmZTViZjAyZTljMDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Patricia Lewis

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Priya Trivedi

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2OGYxMmZmNzU3NDVmNGJjYWI0NzhiM2Y1Y2IyY2M0Mzo3OjBmZT16YjBlMGU4NDdhOTBmZjY1OGQwNmU3OWMzODhiOWU1Y2NjMDY1Y2EzOTdkYTQ4N2NjMDA3YzAwM2M0NWQxMGMxYjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Rick Covington

It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplYzYxZmVkMTI0NTYxN2I3MjAwMzg5MThjNDE2Zjk2MTo3OmVhOGQ6NjIwNjBiMzYwNmFlNDUyNmQwZTA2MDg3ZWIyY2FmZTFmOTA0MmRmNmUxZDRjNTI0ZmM0Y2E3ODkyY2ExYjI2OTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Samantha Okey

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Sarah Tobin

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Shelbie Woodall

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0ZThlZmNjOGFkZGVjNGU3OGZlMjg5MjkyZGEyNWM5Zjo3OmU4ZjY6ZDM5ODkxMWY1NzBhMTY1Y2I5ZWYzNTY0ZTU0ZjNiNzgwZDJmMTJkOTJkZDczYmNhYjgzNTk1YjdiZDZlOTZhZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Sherry Tate

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Thomas Feeney

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare, utilities, buying birthday and Christmas for our children, buying them school supplies, school clothes, extra clothes if they outgrow the ones they have. Buying our children things like braces, glasses when they break theirs. Trying to get our own health needs taken care of. With the prices of Healthcare alone I barely have enough to make ends meet. Increasing our bill yet again its gonna make or break us with 2 full time jobs.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Tricia Couch

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmOTQ4YTBjNmMyMTM5MmI2YTEwMjJmMjRlYjBjMGNhMTo3OjEzMTA6YjdiMzhmNzQxNjg5MWZjZjU3YjkxZDgwMDg5ZjA4YTk5YmIzOTllZGUwZGJiNGY4ZWFjMWEyZDlmZGE0OGFiNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Alfred Edyvean
5013 N Kitley Ave
Indianapolis, IN 46226

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

AES has the worst customer service, they do nothing for Hoosiers except raise energy bills. I had a YEAR of incorrect bills that they just did nothing to fix. I was told I have "service tickets" in the queue and they never did anything about them. I lost days of my life calling and fighting this all to no resolve.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozZGQxOTE3Y2JmZGYwMjhlNzJiMjk2ZThiM2U5MDIyOTo3OjlkNDY6YTlkMzEzMzY5OTFjZTU5OTIyZDMwYTc4ZTM3OWMyMzdjZGIwM2ZjNGMwZDkzNjVkNDAzZGU1MTViYjgyODgyNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Allyson Boyington

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Alyssa Geisler

LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Ben Ericsen

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Bradley Johnson

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxMmI2NmJmYzBlYWFmMjU2OGIyZjQwMDFjYTM3ZjU2ZDo3OjU2ZDU6MTgyODE4ZTcwNDEwNmIyZjFkZjk1ZjQyNTI2Mjk4NmFhZjYzYzZlNjVhYjI2ZTM3MGZjZGU1MzM3ZWIxNWFlZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned about billing issues AES customers have experienced for over six months. Please do everything you can to initiate an investigation by the Indiana Utility Regulatory Commission into this issue. We need to understand the extent of the problem and necessary steps towards resolution for all impacted customers.

We now know that more than 60,000 customers have been impacted by billing problems. Some customers report being charged up to 10 times for the same bills, while others pay their bill only to find that AES has no record of them doing so.

While anyone can be put into a difficult position by being overcharged for utility service, duplicate charges can be especially harmful for our most vulnerable neighbors: seniors on fixed incomes and families with low-incomes in particular. When you’re pinching pennies to make it through the month, every dollar counts. Overdraft fees can really hit Hoosiers hard. Other customers may have to pay late fees for other bills because AES overcharged them.

I understand that implementing a new customer interface system is a challenging endeavor. However, these issues have now been going on for nearly a year. I'm glad to see that the IURC is holding a hearing about this, but we've waited long enough for a resolution; it's time for the IURC to open a full-blown investigation.

Customers deserve transparency about the extent of the billing issues and assurance that AES is implementing corrective measures as swiftly and efficiently as possible. A major priority should be prompt refunds to those who have been overcharged. Again, please do everything you can to bring about a resolution for impacted customers as quickly as possible.

Respectfully,
Carrie Warner

While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Catherine Snyder

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2MmQ3MzJlODgzN2E4MzBiOWFmMTFiMGZmMDA4ZTE0Mzo3OjcxYjE6OGY2N2QwMTI5MmU2MWY1MDQ1NWQxZjBiYzNkMzc1ODA3NGM5N2RkMjQ4MzUzYmEwYzk2YTJjZjFlOWFiNTAyZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Subject: Chiamaka Ukachukwu - Public Comment for Proposed AES Indiana Rate Increase, Chiamaka Ukachukwu
Date: Friday, June 6, 2025 2:25:58 PM

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

To Whom It May Concern:

I am writing as a concerned Marion County resident and customer of AES Indiana to express my strong opposition to the proposed rate increase by AES Indiana (Cause No. 46258)

While I understand the importance of investing in infrastructure and ensuring reliable energy delivery, I am deeply troubled by reports that this increase may, in large part, be intended to support the growing energy demands of large data centers rather than serving the broader public interest. It is fundamentally unfair to shift the financial burden of corporate expansion —especially from highly profitable technology companies—onto everyday consumers, families, and small businesses who are already facing rising costs across the board.

Electric utility rates should reflect the principle of fairness. If data centers or other high-demand users are driving the need for increased capacity or infrastructure upgrades, those entities should bear a proportionate share of the cost. Residential customers should not be asked to subsidize private enterprise, especially when many of us are already struggling to make ends meet.

At a time when many households are already stretched thin due to inflation and a difficult economic climate, there is no clear or sufficient justification for raising rates on everyday consumers. I oppose this rate hike regardless of whether it is tied to infrastructure or data centers. However, if a major driver is to support large-scale energy users like data centers, it is even more unacceptable. These companies should not be subsidized by working families and small businesses.

I urge those in power to reject this rate hike request and to protect the interests of Indiana’s working families and ensures transparency about who benefits from and who pays for these infrastructure investments.

Thank you for considering my comments and for your commitment to fair and just utility oversight.

Sincerely,
Chiamaka Ukachukwu, Ph.D.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027. Maybe take some extra needed money out of your over paid CEO's salary!!!! I personally can't afford these constant rate increases. I am on SS. We don't get the increases in our Social Security to make up for this and you never explain why. Why do you need this kind of increase year after year after year?

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Cynthia Radseck

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1OTYwZTdhOTVkMGNkMTVjZTk4NzkwZDRhOTBmZGI3ZTo3OjA1NjU6MmM0MDFkYzAzMmEwMTdhOWY5OGQwZDRhZTRjMTBjYTUyMDg1ZjVjOGU4MjFiZDNjMjcyN2FlZDZiMWIwOTA5MDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Dana Chattam

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large

Respectfully,
Denise Dragash

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkOWYwNjkwZDNmOTQ4ZmVlMGI5OTgyODZkNTI4NTFjYzo3OjIxNTU6NGJhYzk3ZmQ3MjFmZWNlZTJjZDRlODQwZWFmNmRjYWQxMGIxNGY4YzAyOGRlZWMwY2U2ZjcxMGEyMzNhOGI4OTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Duane Edwards

Dear Counselor Bill Fine,

I urge you to reject AES's new request in Cause Number 46258. I especially oppose any base rate increase as we should be encouraging businesses and consumers to conserve electricity.

AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

Consumers should not have to pay for the power needs of new data centers,

Thank you for your consideration.

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Eleena Morse

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Gary Wigand

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
george evans

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2OTdkMGYyMTFmMjI5MWNlNDU3ODg2OWM0NDc5NDUyNTo3OjkyMDk6ZTQzYzMyNjZkZDUyMjBkOWJlYTE1OGNlZWI0YmRkM2VmNTY2ODFiYjdlNjZjY2RlZmRiMzZjMmQ5NmU3NGRkYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3NTBhMDU1MmI4N2JhYWJkMzM5ZGE4NTZjOTA3N2IxNzo3OmM0NDY6OGE2NDJhOGI0MDA1MTBiN2IxZDE5ZTk0NGJiNThjMzEwY2U4MzIwZTYxMGMxM2MwYzI5NzQwZmM1MzliMjY3Mzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Jasmine Robertson

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Jasmine Robertson

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Jean Melloy

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
judy HOFFMAN

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
K Hilton

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

I spend three days each week at the Boulevard Place food pantry, where we provide food for over 400 families every week and that number grows each week. An increase in electricity costs will force these citizens, who already rely on food assistance, to risk having their power cut off because they cannot afford to pay the greed-driven increase. The Pantry itself will have less money to buy food each month if it has to pay more for electricity to run our freezers and refrigeration coolers. It's a losing proposition for everyone except the head honchos at AES who will no doubt profit from this increase.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! PLEASE stand up for residential customers and reject AES Indiana's request to

raise our electric bills in Cause Number 46258!

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiMWFhNDVjZmVhMjUyNmEzYzA0NzFmYjg3YTIyY2JhNzo3OjVhNDY6NmMwMDQyMjA0Zjg3NDJjYzgxMzJhM2JjNDU4ODc3MGEyMjM0YzZlMjJkODBhYWQwOTAzY2FkYjY3OTRhYWU0ZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community of fellow senior citizens will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty, many of them seniors.

As a growing number struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana!!!!

AES does not even begin to deserve more profit. In the 2 years since AES filed their last base rate case, thousands of AES customers including my household and my neighbors endured high temperatures without electricity for multiple days! We lost a whole refrigerator of food already this summer - quite a cost to absorb!

60,000 customers also experienced serious billing problems, causing additional stress, due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's very upsetting that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay, such as data centers - especially considering all the other rate hikes that will hit our bills soon.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks, especially our Senior Citizens, are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiMWNlMmFiMjkyNjAzOGI1ZWFjYWY4ZDUwYWQ3MDkxMTo3OjY3YTg6NmY0MjA3MmE3N2UyMmJhZDk0ZDlhMzI2MjM1MTcyYmI0NDg4MmViOTY5OGYyMDA4NDQ3MmRkZDFhMGY0ZGRkODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Kristie Finch

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Lana Schneider

I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

And in less than a month's time, I have gone without power for over a week combined on multiple occasions. The longest stint involved a dangerous downed power line in my yard, where my dogs are to utilize and kids can access. I personaly live in a poverty stricken area and the unforseen costs forced upon me and neighbors due to these outages surpasses what that increase would put on each household. I can barely make ends meet as is, and for them to offer 0 accomodations or assistance due to their inability to keep power lines maintained, is despicable. They won't even allow payment plans for accounts with good standings. We the people are already being forced to payout large amounts to survive during these outages. And then we see no change in our bills, a week without power, during heat advisories and they send out bills that reflect no drop in usuage. That's essentially robbing their customer of access to safe power and pocketing the money.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

My bill is currently $3600 and my power has been disconnected. It is summer it is hot I have no water or air. This company is not offering me any help or extension payment plan etc. The wait times to speak to a rep are 40+ minutes and when someone answers they are instantly RUDE. Please do everything in your power to help resolve the billing issues impacting over 60,000 AES customers. While I am happy that the Indiana Utility Regulatory Commission is holding a hearing about this issue, they really need to open a full-blown investigation to shed light on the extent of the problem and the steps AES is taking to resolve all ongoing issues.

It feels like the cost of everything is going through the roof these days. The thought of being overcharged for my AES bill - by hundreds of dollars - and then having to wait weeks to get it refunded is a nightmare. A recent IndyStar article mentioned that AES may even be trying to charge customers for getting their money refunded. That is outrageous to me. It’s not our fault AES overcharged people! Furthermore, AES is a financially healthy multi-national corporation while many of us are pinching pennies to get by.

I'm especially concerned for my neighbors with low and fixed incomes. Being overcharged by AES may force people to incur late charges for other bills or overdraft fees. Those extra fees can really add up!

We need a thorough evaluation the extent of billing issues faced by AES customers and all the steps AES is taking to bring about resolution for everyone who has been impacted. We need to be able to trust that customers are getting the refunds they deserve in a timely fashion.

Customers have been bearing the brunt of AES's billing issues for long enough. Please do everything you can to ensure customers get the solutions they deserve through an IURC investigation into this matter.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplOWU5OTliNzJlNjhhZGM2ZTE1NzE2YWFkNjJiNzQxMDo3Ojk1YWY6YTU2YjcxYzc2Y2MwZDk3YTg2MjcyMjdiNTExODlmM2FmMDJmMWM1NDNjOGNkZjhhNmRjMjY3NDkxZTlmYzMzNTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Marcia Winkelmann

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Marcia Wolfla

In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, it's concerning that AES continues to offer substandard service after storms, with "multi-day outage events" now becoming the norm for Hoosier households. All Hoosiers deserve uninterrupted access to essential services and reasonable restoration times (made possible only by hiring sufficient repair personnel and equipment fixes).

The last increase provided Hoosiers with little more than a new AES website with "improved" billing services, which, in reality, is more of a benefit to AES than its customers. Consumers want fewer interruptions in service and quicker restoration times. Why can that not happen? It was certainly far better when AES was IPL!

As more and more members of our community have a harder time affording basic necessities, and as Hoosiers now routinely go for days at a time with no service after storms, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

All Hoosiers need utility service to stay safe and healthy. I've noticed significant increases in my electric and gas bills over the past few years. I am very concerned for those struggling to keep up, especially those forced to choose between paying for food, shelter, healthcare, or utilities.

The General Assembly has enabled rising utility costs by passing laws that give trackers (or bill riders) to Indiana's monopoly utilities. These trackers reduce regulatory oversight and increase profits for the utilities. One huge tracker state legislators gave to monopoly utilities is the TDSIC tracker (Transmission, Distribution, and Storage Improvement Charge). Since SEA 560 passed in 2013 and HEA 1470 passed in 2019, we've seen BILLIONS of dollars worth of utility bill hikes across Indiana as a result of this egregious tracker.

Hoosiers need and deserve affordable monthly utility bills. Please reject more trackers for the electric and gas monopolies. Please work to repeal legislation like the bills I mentioned so that all Hoosier households have a fair shake in the utility ratemaking process. And please push hard to ensure that we protect public health by adopting common sense policies to insulate those struggling the most, like limiting excessive deposit and reconnection fees, and utility debt repayment plans based on customers ability to pay.

Dear Counselor Bill Fine,

AES needs to try something else to get shareholders excited: Its price is currently is $12.57. Maybe the company is already doing a poor job managing the money it has.

I am an investor myself. I am able to curtail my greed. AES needs to curtail its greed, too.

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Micah McVicker

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxNWM0YzQwNTE2ZDBjZTFlOTk0NWEwZDE4MzQ0OWU5Mzo3Ojk3OTg6OTU1ZjQwZmU2NDljOWMyYjgwMDc4ZTNlNGI3OGIzOTEwMzMzZTM2Zjc4YWE3NGRkMjQzNDdhMDVlZjgwNWZiODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Michelle Christensen

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258. Please stop allowing the increase of corporate profits to come from the backs of hardworking Hoosiers.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Michelle Mariani

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Nancy Knapp

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjODg2ZGQ0ZjQ3Y2ViMDZjNTUwZGUwYWUwNTBiNDk4Njo3OmMxMGI6MDJkZWMzY2Y2MDRmMzk0MTRkMzc4NWQ1YTc3YWQ0MGE4NTg5NzA0ZjI3NGIzNzBmNjBiMGQ1MGJiNGFhNWNlZjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjNTZhMjJyNmEyNzFkNWNmMTEzMzNmMzhjYWFjMmU5Mjo3OmE5Nzc6Y2U5ZjFjNTFiNzI4OTFlMzRkYzVkYTdmNWU1YWE4M2E3MmMwZTUxZTUxNDFiNTMxZTI4NTAxNjFlYTU3ZGJlMzp0OlQ6Tg).

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Paul Powell

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Penny Hinsky

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowODYxYjZkNDVmZmIwMWJiNmVkZjdmODYzN2FlMzljMDo3Om14OGQ6Y2QwY2Q4MzZkYzBkZGVhYjNjM2IxZGEzMTUzYmZkN2Y1MmRhN2RmMGQyOWI0MWU1MTM5YzBlOGFiOGUwMmY5NTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. Dear Counselor Bill Fine,

Please do everything in your power to help resolve the billing issues impacting over 60,000 AES customers. While I am happy that the Indiana Utility Regulatory Commission is holding a hearing about this issue, they really need to open a full-blown investigation to shed light on the extent of the problem and the steps AES is taking to resolve all ongoing issues.

It feels like the cost of everything is going through the roof these days. The thought of being overcharged for my AES bill - by hundreds of dollars - and then having to wait weeks to get it refunded is a nightmare. A recent IndyStar article mentioned that AES may even be trying to charge customers for getting their money refunded. That is outrageous to me. It’s not our fault AES overcharged people! Furthermore, AES is a financially healthy multi-national corporation while many of us are pinching pennies to get by.

I'm especially concerned for my neighbors with low and fixed incomes. Being overcharged by AES may force people to incur late charges for other bills or overdraft fees. Those extra fees can really add up!

We need a thorough evaluation the extent of billing issues faced by AES customers and all the steps AES is taking to bring about resolution for everyone who has been impacted. We need to be able to trust that customers are getting the refunds they deserve in a timely fashion.

Customers have been bearing the brunt of AES's billing issues for long enough. Please do everything you can to ensure customers get the solutions they deserve through an IURC investigation into this matter.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmMTNjZmZiMjM5ZWNlZTMwZGM0Y2UzMjM0ZTg0M2NkNjo3OmU1MjA6YjQzMTVkOTdiYzZiNWEyMTg1OWVlOWEyMjRlNWQ4ZDU3YjM0NmE2YmIxMTlmMzIwZjY2YjcyZjY3Yjk3MmQwZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258. Part of this huge increase was due to the trees in the power lines. Why do I have to pay for someone elses trees interfering with the lines. Make the homeowner be responsible or you charge them for cutting the tree(s) down completely eliminating the problem

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Sherrie Hamilton

Subject: Sierra Nance - AES Rate Increase for Marion County
Date: Friday, June 6, 2025 2:28:23 PM

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

I am writing as a concerned Marion County resident and customer of AES Indiana to express my strong opposition to the proposed rate increase by AES Indiana (Cause No. 46258).

While I understand the importance of investing in infrastructure and ensuring reliable energy delivery, I am deeply troubled by reports that this increase may, in large part, be intended to support the growing energy demands of large data centers rather than serving the broader public interest. It is fundamentally unfair to shift the financial burden of corporate expansion —especially from highly profitable technology companies—onto everyday consumers, families, and small businesses who are already facing rising costs across the board.

Electric utility rates should reflect the principle of fairness. If data centers or other high-demand users are driving the need for increased capacity or infrastructure upgrades, those entities should bear a proportionate share of the cost. Residential customers should not be asked to subsidize private enterprise, especially when many of us are already struggling to make ends meet.

I urge those in power to reject this rate hike in its current form and to demand a more equitable funding structure that protects the interests of Indiana’s working families and ensures transparency about who benefits from and who pays for these infrastructure investments.

Thank you for considering my comments and for your commitment to fair and just utility oversight.

Sincerely,
Sierra Nance, Ph.D.

Dear Counselor Bill Fine,

I am very concerned about billing issues AES customers have experienced for over six months. Please do everything you can to initiate an investigation by the Indiana Utility Regulatory Commission into this issue. We need to understand the extent of the problem and necessary steps towards resolution for all impacted customers.

We now know that more than 60,000 customers have been impacted by billing problems. Some customers report being charged up to 10 times for the same bills, while others pay their bill only to find that AES has no record of them doing so.

While anyone can be put into a difficult position by being overcharged for utility service, duplicate charges can be especially harmful for our most vulnerable neighbors: seniors on fixed incomes and families with low-incomes in particular. When you’re pinching pennies to make it through the month, every dollar counts. Overdraft fees can really hit Hoosiers hard. Other customers may have to pay late fees for other bills because AES overcharged them.

I understand that implementing a new customer interface system is a challenging endeavor. However, these issues have now been going on for nearly a year. I'm glad to see that the IURC is holding a hearing about this, but we've waited long enough for a resolution; it's time for the IURC to open a full-blown investigation.

Customers deserve transparency about the extent of the billing issues and assurance that AES is implementing corrective measures as swiftly and efficiently as possible. A major priority should be prompt refunds to those who have been overcharged. Again, please do everything you can to bring about a resolution for impacted customers as quickly as possible.

Respectfully,
Stephen Sylvester

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Timothy Cheesman

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Travis Gill

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmY2VkNTRlNTZjMzQ4MzJmODAwY2U3Yjk4YWZlYjAyMzo3OjJiN2I6NTJiNzZkMTRjN2QwOWQyNWQ0MTVlN2EyY2EyYjJmNjY4OGM0NTBkZDYyODY1Y2RjZTU3ZjE4ZjljNTdkNTk5YTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1ODBmYTQ0NDg1ZTZiZTU0NmE5YWRiZjVhNTJiOTU5MDo3OjkzMTA6ZjhhM2VjMDcyMGFjMTYxZjBlNjViYzQ1NDM5NzA0ZjdhZDkxOTk0MTE4OGM1MjEyNDRiNjEwYTNmNWZhNWRlZjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Amanda Lewis

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxMjJjODJiYmM0OWQxZmEyOTNjN2NjNWVjOTAxMDY2ZTo3OjkwODQ6NDA5ZjUzNDc2NTVmMjViYzY1ZmQ3ZDg5MDM5OGQwNjc1ZGU4MWJkODgyM2UyZmMzNmRmYTc0OWM5ODM0NTkwNDp0OlQ6Tg).

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Atkins Natasha

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Chrissie McInturff

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1N2RjZmJmNDExYjE0ODhiNWE3N2FiN2E5NzUyMjUzZDo3OmY0NTc6MWM3MDg5YjE5NTQ4ZDFhMGI2NWVlN2VlYjk2MzUxZGRhNDIwOGJkNDk2OTZjMDg2MmI0ZWVhYzQyZmRjMTE3ZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

My utility bills just keep going up, despite my best efforts to keep them down. Using less energy doesn't make much of a dent in my bills, thanks to high fixed monthly charges and regressive declining block rates approved by unaccountable utility regulators. Legislation passed by Indiana lawmakers in recent years also makes it harder for me to save money and control my own energy use.

SEA 309, passed in 2017, ended net metering in Indiana. Now, Hoosiers only get credited for excess electricity their panels produce at a rate that is 75% lower than what we pay to buy electricity from the utility. In other words, ending net metering enabled monopoly utilities to steal the financial benefit of installing rooftop solar. Their greed truly knows no bounds.

We need to repeal SEA 309 (2017) so that Hoosiers can gain some independence from monopoly control. And we need to go further by authorizing independent community solar in Indiana. Right now, community solar is virtually nonexistent for a majority of Hoosiers because existing laws only allow electric utilities to own and operate community solar facilities, which they are failing to deploy.

Senate Bill 541 and House Bill 1581, introduced in the 2025 session, would have allowed Hoosiers to subscribe to independently-owned and operated community solar facilities to receive credits on their monthly bills, but Indiana lawmakers allowed both bills to die without giving them any hearings.

And finally, state legislators have contributed to rising energy costs by killing Indiana's energy efficiency program, Energizing Indiana, with SEA 340 (2014) and SEA 412 (2015). Energy efficiency is the cheapest energy resource available, emits no pollution, reduces utility bills, and creates local jobs which cannot be outsourced. These programs should be free from the influence of monopoly utilities, who are in the business of selling electricity and gas. Utilities can even charge us for the power they're not selling because of energy efficiency (so-called "lost revenues").

I urge you: please champion the people you are at the Statehouse to represent. Please support policies that make monthly electric bills affordable for your constituents like me.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Dina Avgoustis

Dear Counselor Bill Fine,

I am writing to share my opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. AES customers cannot afford such a hike. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Donald Braid

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2N2JlYmVmNDViNzE0YzA2ZGVjMjI1NzNhNDc0MzI2NDo3OjIwMTU6MDZlMmQ5YjU0ODIwYjAyM2RjNDEwNDgzZTA2Y2ZkNTVlZDU2Y2ZjYmZhNzU3ZDVhNTEwOGIxMDE1MzViNDgyYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Gregory Baker

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjMWIyMzRlMjhiYWQ4NmIwMDA3OTc5NGVlYTc3NzQ0Yzo3OmViMzM6NzBiYjUyM2EwYjM0NjkyN2U5NzViODNkZTc3ZmI2ODZiZTIzZTA1YjQ0MTZhMGZkYjM3MDVlZThjMDdjMmNkMDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Helen Coleman

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Jennifer Alexander

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Jennifer Morris

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyNjYyZTkwNjM3N2VkZDQ2NzAwYmQ2ZmVlMDJjNTUxNDo3OmIzOTU6YTZkNGU0Y2RhY2VhMjlmZDVhNDI0ODhiN2Y5ZjNlODliNDgyYzRhODY4MDI1MjdhMGY3MTMyNWE3MDUyMDViZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am concerned my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is maddening to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does NOT deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Kathryn Oakley

Dear Counselor Bill Fine,

I am very concerned that my family and others throughout my community will not be able to afford another rate hike from AES.

Over the past three years, my July AES bill (typically my highest monthly bill) has risen from $75.04, to $121.81, to $146.88. Over the two most recent years, that equates to increases of 62% and 21%. What hasn't increased? My family's household income. We even faced a layoff earlier this year. What has increased? AES CEO Andrés Gluski's salary, from $12.7 in 2023 to $13.4 in 2024.

In 2024, AES's annual gross profit was $2.314 billion, yet the company wants to raise rates for residential customers. We, those residential customers, are already struggling with high utility rates, stagnant wages, and inflation. We can't bear additional rate hikes, while AES continues to profit.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system. I was one of those customers who recently lost power. On August 16 and 17, my family was without electricity for 16 hours. AES provided no updates or estimates when power would be restored. I called the customer service number only to be directed through an automated system. I never did reach a human employee. This level of customer service is unacceptable. Yet, AES wants to raise rates, without promises of improved service for residential customers.

In addition, it’s disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

I beg you: Please stand up for residential customers and reject AES’s request to raise our rates in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Keith Parker

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplNmZiOTMwNTQ0ZTk1MDNlNmQ4YzMyYjhlM2VlOGMwOTo3OjE2YTM6NzNhMDRiNDhmYzRiZWJmNTUyYjdlMjk0MzRiZGQyNTcxNTAyMmJlYjRmZjliNjVmZDEyMGI3Y2NiMjU5NDUzMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned about billing issues AES customers have experienced for over six months. Please do everything you can to initiate an investigation by the Indiana Utility Regulatory Commission into this issue. We need to understand the extent of the problem and necessary steps towards resolution for all impacted customers.

We now know that more than 60,000 customers have been impacted by billing problems. Some customers report being charged up to 10 times for the same bills, while others pay their bill only to find that AES has no record of them doing so.

While anyone can be put into a difficult position by being overcharged for utility service, duplicate charges can be especially harmful for our most vulnerable neighbors: seniors on fixed incomes and families with low-incomes in particular. When you’re pinching pennies to make it through the month, every dollar counts. Overdraft fees can really hit Hoosiers hard. Other customers may have to pay late fees for other bills because AES overcharged them.

I understand that implementing a new customer interface system is a challenging endeavor. However, these issues have now been going on for nearly a year. I'm glad to see that the IURC is holding a hearing about this, but we've waited long enough for a resolution; it's time for the IURC to open a full-blown investigation.

Customers deserve transparency about the extent of the billing issues and assurance that AES is implementing corrective measures as swiftly and efficiently as possible. A major priority should be prompt refunds to those who have been overcharged. Again, please do everything you can to bring about a resolution for impacted customers as quickly as possible.

Respectfully,

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Laurie Guerrettaz

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4YTVlNzMxODUyNTZhODI2MWJjMTMxNDYxMDFjYzYxZDo3OmE3OGQ6NTk3ZGI4ZGRiMGM3MjQ4YTQwMjFkNGVjZDBkMDM2NTE0ZjFjMDNiYWZkOWNkMTI3YWUwNmU2MTU2YTVjNmU5NTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Lisa Hess

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Lorie Gaffney

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwcl.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozNTIxODVmOTYwMzM3MDdiZDkzYTU3MGEyMTg3NzAxNDo3OjhiMjQ6ZGNhNGFjZjlhNDM1NmYyYjZhNDZmY2Q3NDZlNGQxNzk5NjFkODgyMjA1NWY4MGFkNzE2NjUwOTI5YjdlZTE5NDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Marc Malone

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Michael Bauer

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3YThhNGFhYTBlZWRjZTU2OWE5MDNlZmE0MmFjZmQ1Zjo3OmQ2OTY6NGJiYmFjNzhmYTEzNDg4YjhjMjRlYTE1MmVlZDBiN2VhODQ5ZDgzOThkN2JhMGU5ZmJkYWE0ZDRiYjlyOTA4Nzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear

I'm writing to oppose AES Indiana's proposed rate hike. While the company says it's facing rising costs, so are everyday customers. Groceries, rent, and medical bills are all going up, and adding another $30 a month to our electric bills makes it even harder to keep up. This increase hits residential customers the hardest, and many of us simply can't afford it.

I urge the IURC to look very closely at the proposal from AES Indiana in Cause No. 46258, and please protect residential customers from already too-high electricity rates.

Thank you.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozODg5ZThkNWE1NTY3YjdmZWVjY2JiNThlYjdlMDJmZjo3OjMxODE6OWI0ZTNjODJjMDdlYzA4NTg0ZDQzYjVjOWMzOTllNTU3ZWEyYmZmZjlhNjgwOTViNjQ3ZWQ3OTQ3OTg2NGM3Njp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxYmFkNmYwZTljZDY5ODM5NmQ4ZjY2MTNhYmRkMzEzYzo3OmNlMjk6OGJhYTlmMDE0Y2UxYzBhMjUzOTc4MjhhMWM3ZGM2Yzc2MTllZWZlYTNmM2IwYmYyZmNjNTM1MTA3ZjU0YjZiYTp0OlQ6Tg).

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Peggy Magers

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4MTg1ZGM4MzRiMGE2ZmZhMWFjZWY1MGJlYjE4YWY3Nzo3OmEyZjI6YTRkNTRhZjA5MjNmZGI2NDA1MjcwNzFhZjUzN2I0YWQwNWJiZWMyODIyYmRmN2VmZWU3MTM0M2M5YjU4MmIxZjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Tamara Babbs

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. AES should have to tighten it belt and reduce expenses, rather than asking for a second rate increase when the first one is not even gone in effect. Customers should not be on the hook for data center expenses.

As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkMDc1ZGJmOTZhZWEzMTVhY2RiOWY1MDUyMGE4OGM2Mjo3OmQxYzQ6MDE4MzMyMmYwN2U1ZjA1MDVjOGQ5YTExN2QyMDc2MzhiMTc1NmEwNWIwYmY3NjE4YWU0ODg5OGNmNjQxZGVkMzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiMTM5ODFlNTY4ZTY1ZDllZDY2ZjMzNDBkNWY0ZDY0ODo3OjczNGY6ZDM3Y2U5OTA3ODU2NGNhZDQ0NmUzMml3NzA4NDc5MDQ3M2Y2NDA1NDY3ZjkwNDZjYWU5YTVmYmMyYTdkZGZlMzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjYmZlODRkM2FlM2FhY2NmNTA3Mjg5MDg0YWIxZWMxYjo3OjE5N2E6YjVkM2Q4MjZkYTJkNGZhNzI2ODU0ZDI4YjZjNjdiNGNjZjU3OGU3OWZkNDQ2YzJhMzA0YjM1YzU0YmI2OTI0Mjp0OlQ6Tg).

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Timothy Armstrong

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Tina Brown

Hello,
According to the attached ALICE report, with statistics dating back to 2023, Indianapolis families are in no position to have an AES rate increase on top of childcare costs, health and care insurance, and numerous other bills. It is no secret that prices have been rising, but our pay is not. Please have the communities back on this matter! It will save a lot of suffering.
Thank you very much,
Vivien

THE STATE OF ALICE IN » INDIANA

2025 Update on Financial Hardship

UNITED FOR ALICE

UNITED WAY Indiana United Ways

UNITED WAY Central Indiana

INTRODUCING ALICE®

ALICE Households

In 2023, based on the Federal Poverty Level (FPL), 12% of Indiana households were defined as being in poverty. Yet this measure failed to account for an additional 26% of the state's households – more than twice as many – that were also experiencing financial hardship. These households are **ALICE**: **A**sset **L**imited, **I**ncome **C**onstrained, **E**mployed – earning above the FPL, but not enough to afford basic expenses in the county where they live.

Between ALICE households and households living in poverty, **an estimated 38% of households in Indiana were below the ALICE Threshold in 2023.** This rate placed Indiana 17th among all states and the District of Columbia (with 1st representing the lowest rate of hardship). Households below the Threshold are forced to make impossible choices – like deciding whether to pay for utilities or a car repair, whether to buy food or fill a prescription.

Households below the ALICE Threshold are in every state and county across the U.S. and represent all demographic groups. Workers below the ALICE Threshold often perform the jobs that keep our economy functioning smoothly – they are child care providers, food service workers, cashiers, personal care aides, delivery drivers, and more. Their stories capture the systemic and structural barriers to financial stability, and the struggles and resilience of families experiencing financial hardship.

ALICE Measures

The ALICE measures were developed by United For ALICE to answer the pressing need for a more accurate picture of financial hardship. The FPL does not consider the wide variation in cost of living by location (except for a slightly higher state-level FPL for Alaska and Hawai'i). As a result, official measures based on the FPL sharply underestimate the true extent of financial hardship in the U.S. And because the FPL is the basis for defining eligibility for many types of public assistance, ALICE households often do not qualify.

Two pillars of the ALICE measures are household costs and income. The ALICE Household Survival Budget calculates the cost of household basics for each county in Indiana, relying on a wide range of publicly available sources, outlined on page 5. Change over time in the cost of these household basics is tracked in the ALICE Essentials Index.

Household costs are compared to income to determine if households are **below the ALICE Threshold.** For household income, ALICE measures rely on the U.S. Census Bureau's American Community Survey (ACS) – both household tabulated data and individual data from the Public Use Microdata Sample (PUMS) records. To provide additional details on household assets, this Report also includes analysis of the Federal Reserve Board's Survey of Household Economics and Decisionmaking (SHED) (2023).

The data included in this Report spans 2010 to 2023 (latest available). This data does not reflect policy or funding changes that have occurred since, yet it provides an important baseline and context to inform current conversations and decision making.

United For ALICE

Launched in 2009 with a study of financial hardship in one New Jersey county, the nonpartisan United For ALICE movement has grown to include 35 states and the District of Columbia. With a commitment to equity for ALICE, United For ALICE partners use the ALICE data to give voice to the challenges ALICE households face. Together, they inspire action, strategies, and policies to ensure that all households have enough income for necessities and can save for the future.

In Indiana, this research is brought to you by Indiana United Ways and United Way of Central Indiana. Learn more about how the ALICE data is being used to inform strategies and solutions across our partner states in the ALICE in Action Database.

KEY FINDINGS

Financial hardship: In 2023, of Indiana's 2.7 million households, 12% (337,484) were below the Federal Poverty Level (FPL), and another 26% (713,547) were ALICE – households with income above the FPL, but not enough to afford the ALICE Household Survival Budget for their household composition and location. **Combining these two groups, 38% (1,051,031) of households in Indiana were below the ALICE Threshold** (Figure 1).

The cost of basics: In Indiana in 2023, the ALICE Household Survival Budget was $27,696 for a single adult and $74,376 for a family of four with two adults, an infant, and a preschooler – much higher than the FPL ($14,580 for an individual and $30,000 for a family of four). Basic costs varied substantially by county.

ALICE demographics: There were households below the ALICE Threshold across all demographic groups in Indiana. However, due to systemic racism, ageism, gender discrimination, and geographic barriers that limit many families' access to resources and opportunities for financial stability, certain groups were more likely to experience hardship. These groups included Black households (56% below the Threshold) and Hispanic households (44%); households headed by people under age 25 (62%) or age 65 and older (50%); single-parent-headed households (73% single-female-headed, 48% single-male-headed); and households in rural areas (40%).

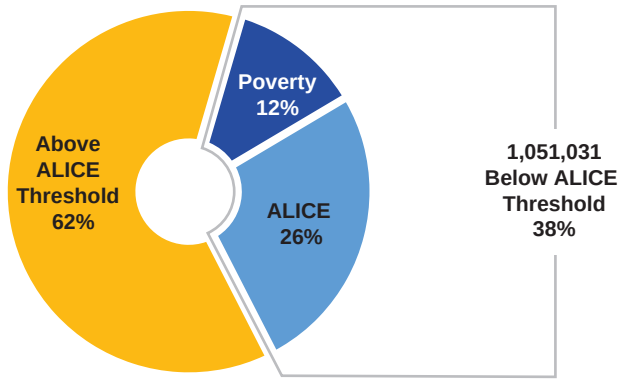
ALICE in the labor force: Of the 20 most common occupations in Indiana in 2023, 14 paid less than $20 per hour. And of all workers in the 20 most common occupations, 29% lived in households below the ALICE Threshold, with rates as high as 45% for cooks and 44% for personal care aides.

Trends in Indiana: Between 2010 and 2023, the total number of households in Indiana increased by 10%, the number of households in poverty remained flat, and the number of ALICE households increased by 14%. Behind these overall trends, there were important changes in the numbers of families with children and 65+ households. In addition, housing affordability continued to be a challenge, and basic costs continued to outpace wages in low-wage jobs.

More recently, from 2022 to 2023, the percentage of households below the Threshold decreased from 40% to 38%, with a dip in the number of ALICE households.

Stable households, stronger communities: If all households in Indiana had enough income to meet their basic needs, not only would households' hardship be eased, but there would be a positive economic impact on the wider community through increased consumer spending and contributions to the tax base.

Figure 1. Thirty-Eight Percent of Indiana Households Faced Financial Instability in 2023



Sources: ALICE Threshold, 2010–2023; U.S. Census Bureau, American Community Survey, 2023

KEY TERMS

- **ALICE: A**sset **L**imited, **I**ncome **C**onstrained, **E**mployed – households with income above the Federal Poverty Level (FPL) but less than the basic cost of living in their county
- **ALICE Household Survival Budget:** Reflects the minimum costs of household necessities (housing, child care, food, transportation, health care, and technology) plus taxes, adjusted for all U.S. counties and various household compositions
- **ALICE Threshold:** Derived from the Household Survival Budget, the minimum average income that a household needs to afford basic costs, calculated for all U.S. counties
- **Below ALICE Threshold:** Includes households in poverty and ALICE households combined

***Data Notes**: The income data used in this Report rely on ACS estimates. The ACS is based on a representative sample of housing units and people; therefore, these estimates have a degree of uncertainty. Some data points are geographic averages, others are one- or five-year averages depending on population size (these are reported in the Data Sheet). Percentages are rounded to whole numbers, sometimes resulting in percentages totaling 99% or 101%. ALICE analysis includes households regardless of work status, as employment is fluid and most households have members who are working, have worked, are out on disability, or are looking for work. ALICE analysis includes families and roommates but does not include people who are unhoused or living in group quarters (such as college residence halls, skilled nursing facilities, and military barracks).*

BASIC COSTS: THE ALICE HOUSEHOLD SURVIVAL BUDGET

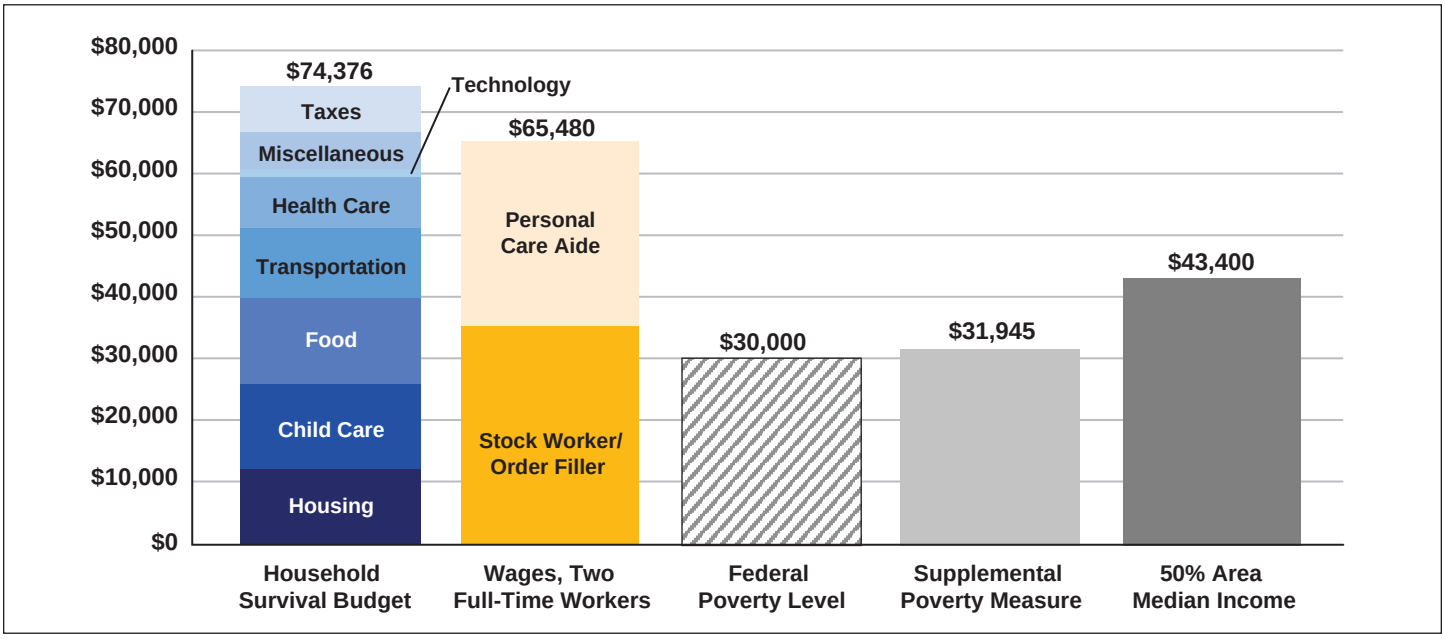
To capture the reality of household costs across Indiana, **the ALICE Household Survival Budget is calculated for all counties and various household compositions.** This budget reflects the minimum cost to live and work in today's economy. (See the Budget Overview on page 5 and use the ALICE Budget and Income Status Tool for custom budgets by household composition and location.)

Figure 2 illustrates the mismatch between costs, wages, and official measures of financial hardship. It includes ALICE Household Survival Budget costs for an Indiana family with two adults, an infant, and a preschooler (totaling $74,376 annually) and the combined full-time wages of two common Indiana occupations – a personal care aide and a stock worker/ order filler (totaling $65,480 annually). Figure 2 also compares costs and income to three governmental measures of financial hardship:

- **The Federal Poverty Level** (FPL): The FPL relies on an outdated methodology for household costs; it does not account for cost-of-living differences across the continental U.S., or within states; and it is adjusted by the Consumer Price Index, which underestimates inflation in essential costs (as demonstrated by the ALICE Essentials Index). In 2023, the FPL was $14,580 for a single adult and $30,000 for a family of four.
- **The Supplemental Poverty Measure** (SPM): First published by the U.S. Census Bureau in 2011, the SPM is based on the costs of food, clothing, shelter, and utilities. In 2023, the SPM threshold for a renter household with two adults and two children in Indiana was $31,945.
- **Area Median Income** (AMI): The AMI is the midpoint of income distribution within a geographic area (half of households earn more, half earn less). Percentages of AMI are used for federal housing assistance; very low-income households earn less than 50% of AMI, the typical threshold for Section 8 eligibility. AMI is based on income, not costs, so it does not capture whether households can afford basic expenses. In Indiana in 2023, for a four-person household, 50% of AMI was $43,400 – higher than the FPL and SPM, but still well below the Household Survival Budget.

Figure 2. Basic Costs Exceeded Wages of Common Jobs and Official Measures of Hardship

Annual Budget, Wages, and Official Measures of Financial Hardship, Family of Four, Indiana, 2023



Note: Personal care aides monitor the condition of people with disabilities or chronic illnesses and help them with daily living activities. Stock workers/order fillers receive, store, and issue merchandise, materials, equipment, and other items from stockrooms, warehouses, or storage yards, and may operate power equipment to fill orders.

ALICE Household Survival Budget, Indiana		State Average Costs, 2023		
	Budget Item Description and Sources *(See Methodology for more details)*	**Single Adult, Age 18–64**	**Single Adult, Age 65+**	**2 Adults, 1 Infant, 1 Preschooler**
Housing	110% of Fair Market Rent (FMR) for an efficiency, one-bedroom, or two-bedroom apartment (based on family size), including utilities, adjusted in metro areas using Small Area FMR ***Source***: *U.S. Department of Housing and Urban Development (HUD)* **Update**: As of 2023, based on HUD's new FMR policy, housing costs are calculated using 110% of FMR to more accurately reflect the rental market. Small Area FMR is used in metro areas, where rents are higher than 110% of FMR. In prior years, costs used standard FMR and were adjusted in metro areas using ACS housing costs. To avoid reporting artificial rent decreases, 2022 rents are used if higher than 2023 rents.	$723	$723	$1,012
Child Care	Cost for registered Family Child Care Homes for infants (0–2 years), preschool-age children (3–4 years), and school-age children (5–12 years) ***Source***: *Family and Social Services Administration (FSSA)*	$0	$0	$1,158
Food	USDA Thrifty Food Plan by age, with county variation from Feeding America ***Sources***: *Feeding America; U.S. Department of Agriculture (USDA)*	$429	$394	$1,164
Transportation	Operating costs for a car (average daily miles by age, cost per mile, license, fees, and insurance), or public transportation where viable ***Sources***: *AAA, Federal Highway Administration, National Association of Insurance Commissioners (NAIC) (car); Consumer Expenditure Survey (CEX) (public transportation)* **Update**: The source for insurance premiums changed from the Zebra to NAIC in 2023; rates are similar and updated more frequently. **Note**: In 2023 transportation costs were lower than in the 2022 budget for some household types, largely due to a decrease in both gas prices and average miles traveled.	$390	$326	$938
Health Care	Health insurance premiums based on employer-sponsored plans plus out-of-pocket costs for households with $40,000–$69,999 annual income by age, weighted with the poor-health multiplier. For the ALICE 65+ Survival Budget, cost of Medicare Parts A and B, out-of-pocket costs, plus average out-of-pocket spending for the top five chronic diseases as reported by CMS. ***Sources***: *Centers for Medicare & Medicaid Services (CMS); CEX (health); Medical Expenditure Panel Survey (MEPS)*	$172	$530	$690
Technology	Basic broadband internet at home and a smartphone plan with unlimited data for each adult in a household ***Sources***: *Consumer Reports; USTelecom*	$86	$86	$116
Miscellaneous	Cost overruns estimated at 10% of the budget, excluding taxes, to cover one-time unanticipated costs within the other categories	$180	$206	$508
Taxes	Federal payroll taxes (Social Security and Medicare) and federal, state, and local income taxes owed on household income to cover the Survival Budget, as well as the federal Child Tax Credit and the Child and Dependent Care Tax Credit ***Sources***: *Internal Revenue Service; Tax Foundation; calculated for United For ALICE by the Federal Reserve Bank of Atlanta (FRBA)* **Note**: 2022 tax data was revised by FRBA for this update.	$328	$396	$612
	Monthly Total	$2,308	$2,661	$6,198
	Annual Total	$27,696	$31,932	$74,376
	Hourly Full-Time Earnings Needed to Support the Household Survival Budget*	$13.85	$15.97	$37.19

**Represents the earnings needed at 40 hours/week, 50 weeks/per year to support the annual total, including taxes.*

FINANCIAL HARDSHIP BY DEMOGRAPHIC GROUP

There are households below the ALICE Threshold across Indiana, and they reflect a wide range of demographics and household types (Figure 3). However, some groups had a higher rate of financial hardship in 2023, a result of factors including systemic racism, ageism, gender discrimination, and geographic barriers that limit many families' access to resources and opportunities for financial stability:

- **Age:** In 2023, the youngest and oldest households had the highest rates of financial hardship: 62% of households headed by someone under age 25 and 50% of households headed by someone age 65 and over lived below the ALICE Threshold in Indiana. By comparison, rates were lower for those in their prime working years, with 33% of households headed by people age 25–44 and 32% of households headed by those age 45–64 living below the Threshold.
- **Race/ethnicity:** Rates of financial hardship differed substantially by race/ethnicity in Indiana. In 2023, the largest number of households below the ALICE Threshold were White (782,265), making up 36% of all White households. Black households were the next largest group below the Threshold (138,695), yet they made up 56% of all Black households. There were also 70,535 Hispanic households below the Threshold, making up 44% of all Hispanic households, and 50,201 households headed by someone of Two or More Races, with 44% below the Threshold. Other, smaller groups also had high rates of hardship: 46% of American Indian/Alaska Native households and 45% of Native Hawaiian/Pacific Islander households were below the Threshold. Asian households had the lowest rate of financial hardship (34%).
- **Household type:** In 2023, 36% of single or cohabiting households without children headed by someone under age 65 – the most common household type – were below the ALICE Threshold in Indiana. Among families with children, 31% were below the Threshold. Yet this overall percentage conceals longstanding disparities in financial hardship by household type: 73% of single-female-headed families and 48% of single-male-headed families were below the Threshold, compared to 14% of married-parent families.
- **Location:** In 2023, the rate of financial hardship was slightly higher in rural areas of Indiana, where 40% of all households were below the ALICE Threshold, compared to 38% in urban areas. By county, the percentage of households below the Threshold was highest in Vigo County at 53% and lowest in Hamilton County at 25%. Hardship varied even within counties: For example, in Hamilton County, the percentage of households below the Threshold ranged from 43% in ZIP code 46069 (Sheridan) to 17% in ZIP code 46033 (Carmel).

INTERACTIVE ALICE DATA

ALICE data is available online by race/ethnicity, age of householder, household type, county, county subdivision, census designated place, ZIP code, and legislative district. See all available geographies and more on the ALICE Mapping Tool.

Figure 3. Financial Hardship Varied Substantially by Demographic Group

Key Demographic Groups, Indiana, 2023

	Total	Below ALICE Threshold	Poverty / ALICE / Above ALICE Threshold
ALL HOUSEHOLDS	**2,730,489**	**1,051,031**	**12% 26% 62%**
AGE			
Under 25 Years	140,864	87,185	32% 30% 38%
25 to 44 Years	895,954	291,824	12% 20% 67%
45 to 64 Years	961,816	304,709	11% 21% 68%
65 Years and Over	731,855	367,313	11% 39% 50%
RACE/ETHNICITY			
American Indian/ Alaska Native	6,148	2,843	13% 34% 54%
Asian	56,399	19,374	11% 24% 66%
Black	248,644	138,695	18% 38% 44%
Hispanic	160,381	70,535	9% 35% 56%
Native Hawaiian/ Pacific Islander	575	259	4% 41% 55%
Two or More Races	115,333	50,201	10% 34% 56%
White	2,160,912	782,265	7% 29% 64%
HOUSEHOLD TYPE			
Married With Children	482,816	67,448	5% 9% 86%
Single-Female-Headed With Children	167,184	121,693	40% 33% 27%
Single-Male-Headed With Children	68,437	33,184	18% 31% 52%
Single or Cohabiting, Under 65, no Children	1,280,197	461,393	12% 24% 64%
RURAL/URBAN			
Rural	629,315	250,745	12% 28% 60%
Urban	2,101,174	800,286	12% 26% 62%

Note: The groups shown in this figure are based on head of household and overlap across categories. Within the race/ethnicity category, all racial categories except Two or More Races are for one race alone. Race and ethnicity are overlapping categories; in this Report, the American Indian/Alaska Native, Asian, Black, Native Hawaiian (includes other Pacific Islanders), and Two or More Races groups may include Hispanic households. The White group includes only White, non-Hispanic households. The Hispanic group may include households of any race. Because household poverty data is not available for the American Community Survey's race/ethnicity categories, annual income below $15,000 is used as a proxy. Counties are defined as rural or urban based on the USDA's designation of metropolitan or non-metropolitan at the census tract level. Counties with 50% or more of the population in metropolitan tracts are designated as urban; those with 50% or more of the population in non-metropolitan tracts are designated as rural.

Sources: ALICE Threshold, 2023; U.S. Census Bureau, American Community Survey, 2023

ALICE IN THE LABOR FORCE

Workers below the ALICE Threshold increasingly bear the brunt of economic change and uncertainty as the workforce shifts to incorporate new technology and automation and as employers increase reliance on non-standard work arrangements – like hourly paid work, part-time employment, and gig work. These arrangements make it easier to reduce work hours or cut employment altogether when the economy ebbs (which happened to a large degree during the COVID-19 pandemic) and expand them when demand increases (which happens seasonally for a range of industries such as hospitality, recreation, and retail sales).

In 2023, of the 20 most common occupations in Indiana as reported by the Bureau of Labor Statistics (BLS), 14 still paid less than $20 per hour. And of the workers in these 20 occupations, 29% were living in households below the ALICE Threshold. Occupations with the largest share of workers in households below the Threshold included cooks (45%), personal care aides (44%), fast food and counter workers (41%), nursing assistants (39%), and cashiers (39%) (Figure 4).

Figure 4. A Large Share of Workers in the 20 Most Common Occupations Were Below the ALICE Threshold

Labor Characteristics, Most Common Occupations, Indiana, 2023

Most Common Occupations	Total Employment (BLS)	Percent of Workers Below ALICE Threshold (ACS PUMS)	Median Hourly Wage (BLS)
Laborers and Material Movers	99,990	35%	$18.24
Fast Food and Counter Workers	98,670	41%	$13.35
Deliver Drivers/Sales Workers	94,630	23%	$20.55
Retail Salespersons	80,330	28%	$14.45
Registered Nurses	68,850	9%	$37.75
Office Clerks	68,190	25%	$19.19
Cashiers	67,850	39%	$14.38
Stock Workers and Order Fillers	66,890	32%	$17.05
Janitors and Building Cleaners	58,830	35%	$15.33
Customer Service Representatives	53,070	23%	$18.77
General and Operations Managers	49,470	6%	$49.54
Cooks	47,340	45%	$15.06
Waiters and Waitresses	44,570	36%	$11.53
Personal Care Aides	44,390	44%	$14.43
Elementary and Middle School Teachers	40,850	9%	$26.17
Sales Representatives, Wholesale and Manufacturing	38,800	10%	$38.16
Other Healthcare Support Workers	36,120	37%	$19.00
Maintenance and Repair Workers	35,270	19%	$22.91
Orderlies and Psychiatric Aides	32,720	31%	$18.59
Nursing Assistants	29,800	39%	$17.69

Note: BLS = Bureau of Labor Statistics; ACS PUMS = American Community Survey Public Use Microdata Sample. This figure includes all workers with income from these occupations (full-time, part-time, and freelance). ALICE Threshold status is determined by comparing workers' total household income to the ALICE Household Survival Budget for their household composition and location.

Sources: ALICE Threshold, 2023; Bureau of Labor Statistics–Occupational Employment Statistics, 2023; U.S. Census Bureau, American Community Survey, PUMS, 2023

The Labor Landscape

Full- and part-time work: Though the majority of adults in Indiana were working in 2023 and most households had at least one worker, only 22% of the population age 16 and over had the security of a full-time job with a salary. Of those in the labor force (blue bars in Figure 5), nearly two-thirds (65%) were paid hourly and/or worked part time. Workers who are paid by the hour are more likely to have fluctuations in income due to schedule changes and variable hours, and they are less likely to receive benefits, such as health insurance, paid time off, family leave, or retirement plans.

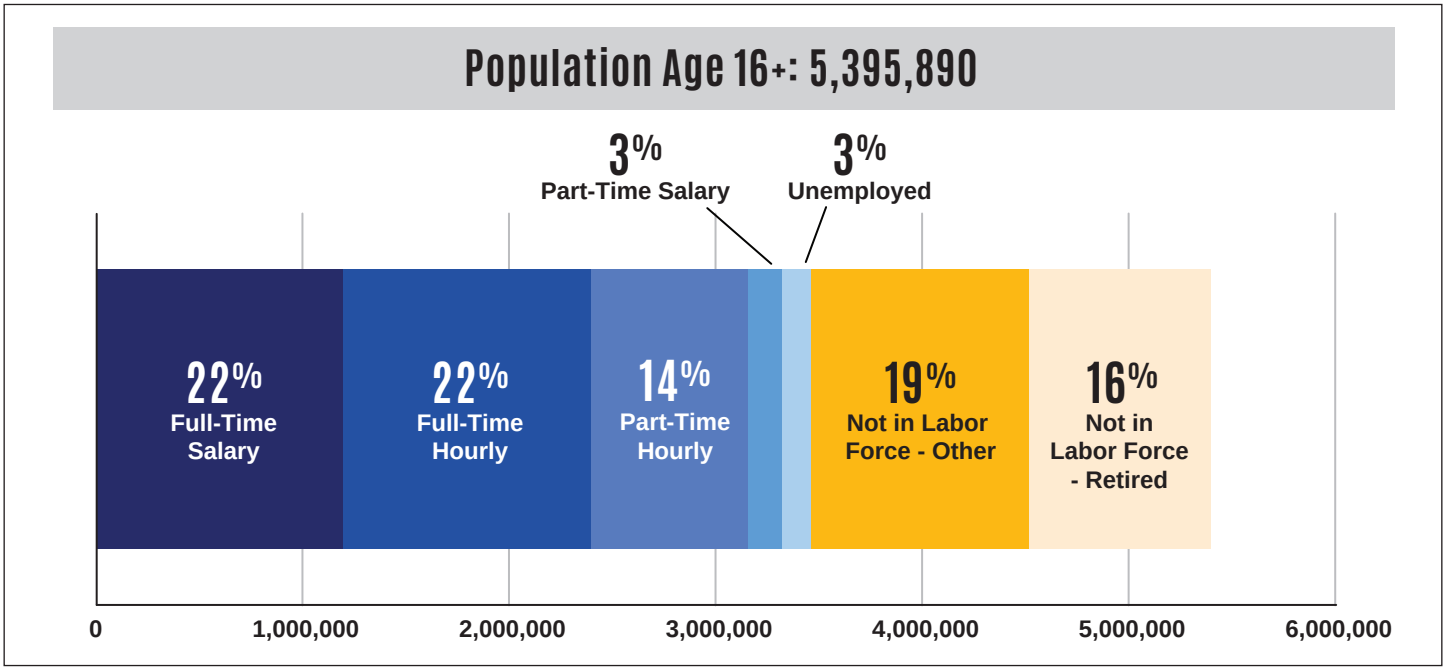
Unemployment: In 2023, 3% of Hoosiers age 16 and over were unemployed – not currently working but looking for work in the prior four weeks (light blue bar in Figure 5). The unemployment rate for workers below the ALICE Threshold in different parts of the state is often notably higher than the official rate. To see more data on workers below the ALICE Threshold in your community, visit UnitedForALICE.org/ALICE-EVD.

Out of the labor force: Another 35% of Hoosiers age 16 and over were out of the labor force in 2023 (gold bars in Figure 5), including those who were retired (16%), and those who stopped looking for work or were out of the labor force for other reasons, such as disability, health issues, caregiving responsibilities, or student status (19%).

For more data on the labor landscape and occupations in your state, visit UnitedForALICE.org/Labor-Force/Indiana.

Figure 5. Less Than One-Fourth of People Worked Salaried, Full-Time Jobs

Labor Status, Population Age 16+, Indiana, 2023



Note: Data for full- and part-time jobs is only available at the national level; these national rates (approximately 50% of full-time workers and 82% of part-time workers paid hourly) have been applied to the total state workforce to calculate the breakdown shown in this figure. Full-time represents a minimum of 35 hours per week at one or more jobs for 48 weeks per year.

Sources: Federal Reserve Bank of St. Louis, 2023; U.S. Census Bureau, American Community Survey, 2023

SPOTLIGHT ON SAVINGS AND ASSETS

When households are not earning enough to cover basic costs, their ability to save for emergencies, retirement, or other future needs is greatly hindered. According to the Federal Reserve Board's Survey of Household Economics and Decisionmaking (SHED), in 2023, respondents below the ALICE Threshold in the Census East North Central Division (which includes Indiana) were far less likely than those above the Threshold to have savings that could cover three months of expenses in the event of an emergency (31% vs. 69%), or to have retirement assets (39% vs. 88%). Additionally, non-retirees below the Threshold were less likely to say that their retirement savings plan was on track (11%, vs. 36% above the Threshold).

TRENDS IN INDIANA

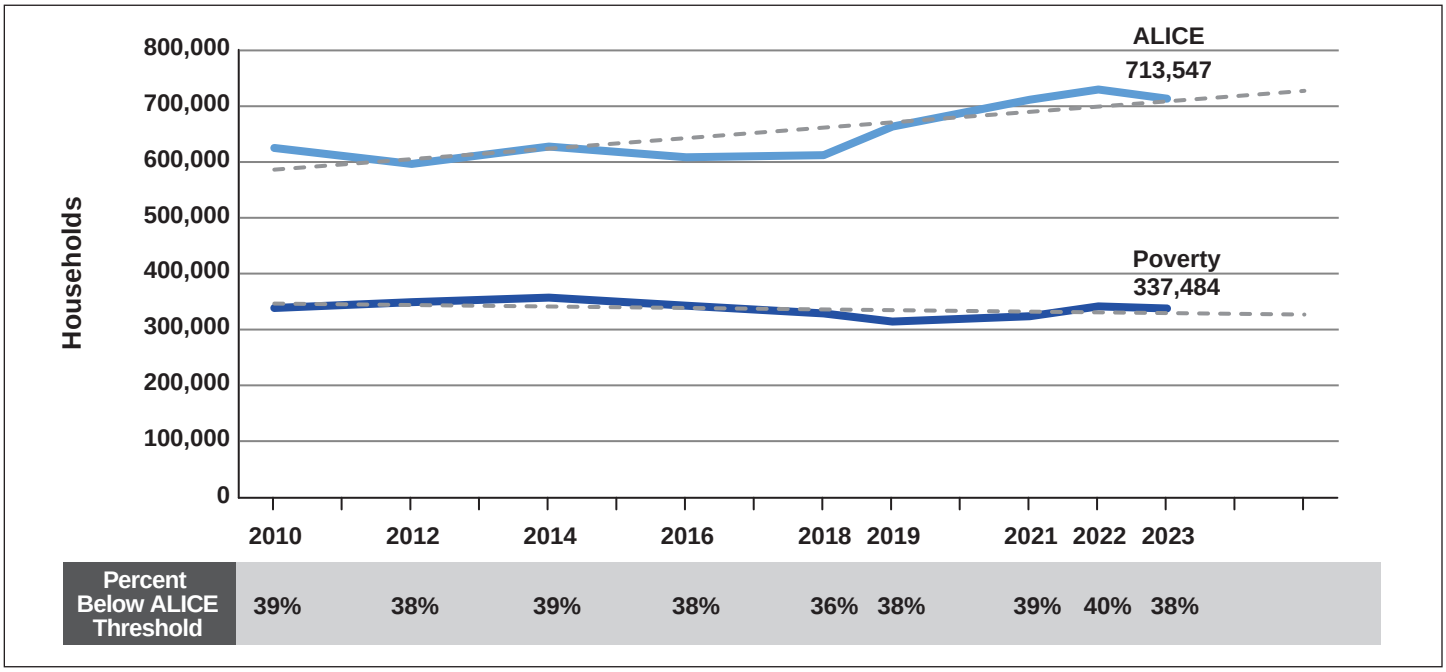
Over the last decade, the number of ALICE households in Indiana has continued to rise as wages have failed to keep up with the cost of household basics. When prices increase faster than wages, purchasing power decreases. This is especially challenging for ALICE households that are already struggling to make ends meet.

Between 2010 and 2023, the total number of households in Indiana increased by 10% and the number of households in poverty remained flat, while the number of ALICE households increased by 14%.

Over the years, the percentage of households below the ALICE Threshold in Indiana has mainly fluctuated between 38% and 39%, with a low of 36% in 2018 and a high of 40% in 2022. It will be important to track these trends in the coming years to see if the number of households living in financial hardship improves, worsens, or stabilizes.

Figure 6. ALICE Households Grew, While Households in Poverty Remained Largely Flat

Number of Households by Income, Indiana, 2010–2023



Note: The gray dashed trend lines in this figure highlight the general direction of the point-in-time data for the years shown. These lines indicate whether the numbers of ALICE and poverty-level households have been generally increasing, decreasing, or remaining flat. The ALICE trend line is statistically significant at p<0.005; however, the Poverty trend line is not statistically significant.

Sources: ALICE Threshold, 2010–2023; U.S. Census Bureau, American Community Survey, 2010–2023

Families with children: From 2010 to 2023, the total number of Indiana households with children under age 18 fell by 4%. During the same time, the number of households with children living below the ALICE Threshold declined even further (down 10%). Yet trends varied by household type: Both married-parent and single-female-headed households with children below the Threshold declined, while single-male-headed households with children living below the Threshold increased.

Older Americans: With the aging of the Baby Boomer generation, households headed by people age 65 and over were the fastest-growing age group in Indiana (up 38% between 2010 and 2023). They were also the age group with the most substantial increase in the number of households below the ALICE Threshold (reaching 50% of all 65+ households in 2023).

Wages: Across the country, wages increased from 2018 to 2023, growing fastest in 2022. Wage growth was fastest among low-wage workers during this time largely due to the tight labor market and increased competition for workers. State minimum wage increases also helped workers at the lower end. Yet Indiana's minimum wage, which matches the federal minimum wage, has remained at $7.25 per hour since 2009.

Even in jobs that have experienced wage increases, wages have generally not been enough to make up for years of falling behind. For example, in 2010, retail sales workers – selling goods ranging from clothes to appliances to cars – earned a median wage of $9.21 per hour ($19,160 annually for full-time work) in Indiana. This worker's household fell $9,987 short of the annual Household Survival Budget for a family with one adult and one school-age child ($29,147). By 2023, the median wage for this occupation increased by 57%, to $14.45 per hour ($30,060 annually, full-time). Yet the annual Household Survival Budget for one adult and one school-age child also grew (to $40,320), leaving these essential workers $10,260 short of covering basic costs – even further behind than they were in 2010.

Housing: Housing costs continued to challenge households below the ALICE Threshold. In 2023, 29% of all renter households below the Threshold in Indiana paid 30% to 49% of their income on housing. An additional 43% paid half of their income or more. **Combined, 72% of all renter households below the Threshold in Indiana were rent burdened** (paying 30% or more of their income on rent and utilities), up from 65% in 2021. For homeowners below the Threshold, 47% were housing burdened (paying 30% or more of their income on homeowner costs, including mortgage payments, utilities, and homeowner's insurance), up from 43% in 2021.

STABLE HOUSEHOLDS, STRONGER COMMUNITIES

Households below the ALICE Threshold play a vital role in their communities – as neighbors, family members, and civic participants. They also contribute to their local economies – as workers, consumers, and taxpayers. Yet these households, nearly 1.1 million in Indiana, did not earn enough to cover basic costs in 2023.

This is not a new problem. The share of households below the ALICE Threshold in Indiana has varied only slightly for more than a decade, persisting through shifting economic conditions and the COVID-19 pandemic, and across political administrations.

This is not a small problem. In Indiana, 38% of all households were below the ALICE Threshold in 2023. These households face day-to-day challenges of trying to make ends meet, while also being more vulnerable to the impacts of crises, both widespread (i.e., natural disasters, public health emergencies) and personal (from unexpected car repairs to major health issues). And while isolated interventions can help ameliorate some of these challenges, the core issue remains: There is a wide gap between households' income and what they need to make ends meet.

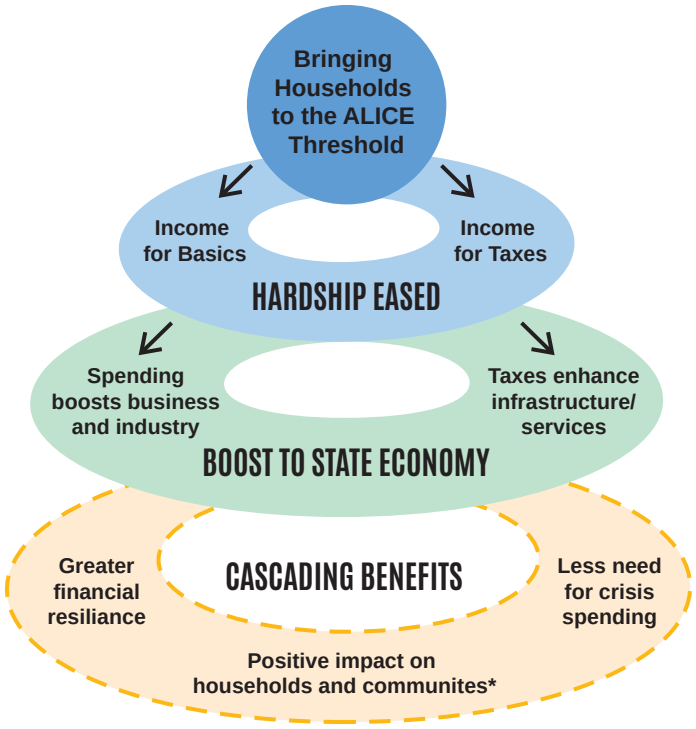
But what if all households had enough income to cover their basic needs? In Indiana, bringing all households to the ALICE Threshold would have taken $19.5 billion in 2023. Working to meet this gap through coordinated effort and investment from multiple sectors, including government, nonprofit, business, and philanthropy, would change the trajectory for Hoosiers who are struggling financially – and it would also benefit the state economy.

This matters for all of us. Households below the ALICE Threshold are more likely to spend than to save additional income, so this income would largely go back into the economy as households spend to cover costs and pay additional taxes.

Increased spending in the local economy has a multiplier effect. Mark Zandi, Chief Economist at Moody's Analytics, estimates economic multipliers for additional household income spending on food (1.57), utilities (1.27), and other necessities (1.42). For instance, every dollar spent on food spurs an additional 57 cents in business growth in the retail, agriculture, trucking, and rail freight industries.

There are also economic multipliers for the additional income taxes that households below the ALICE Threshold would pay.

Zandi estimates economic multipliers for tax revenue spent on aid to state and local governments (1.27) and transportation infrastructure (1.23), meaning that every dollar households below the Threshold pay in additional taxes would fuel even more in state and local investments.



** See Figure 7 for additional details/sources related to the benefits of meeting basic needs.*

Beyond these economic contributions, there are cascading benefits of meeting basic needs in Indiana (Figure 7). If all households are on a more solid financial footing, communities can look beyond crisis spending and poverty alleviation toward broader community well-being. For example, funding that went toward emergency housing or food assistance could be redirected to create more affordable housing and locally grown food systems for the long term. Funding could also be used to enhance opportunities for civic engagement, arts, and recreation. Together, these investments can improve physical and mental health and overall quality of life – not just for ALICE families, but for entire communities and the state as a whole.

Figure 7. Cascading Benefits of Meeting Basic Needs

If households have sufficient income for…	Benefits for ALICE Households	Benefits for the Wider Community
Safe, Affordable Housing	Improved physical and mental health through safer environments and reduced stress; improved educational performance and outcomes for children; greater stability for household members; a means to build wealth and racial equity for homeowners	Expanded and updated housing stock, reduced systemic housing inequities; lower health care costs; reduced homelessness; increased opportunities for jobs and more money spent in local communities
Quality Child Care and Education	Increased labor force participation, lifetime earnings and retirement security for women; health benefits for children, school readiness, improved educational attainment and graduation rates; improved performance in higher education; higher lifetime earnings	Reduced racial/ethnic inequalities in learning and development; positive health, education, and economic outcomes for children and families; stronger community economies; more homebuyers and higher property values through availability of quality child care
Adequate Food	Decreased food insecurity; improved health (especially for children and adults age 65 and over); decreased likelihood of developmental delays and behavioral problems in school	Lower health care costs; improved school and workplace productivity; less spending on emergency food services; greater equity by gender, race/ethnicity and immigration status
Reliable Transportation	Decreased transportation insecurity; improved access to work/job opportunities, school and child care, health care and social services, food/retail markets, and support systems (friends, family, faith communities)	Improved air quality and reduced gasoline consumption/carbon emissions; increased economic opportunity through returns on investment; a more diverse labor market; decreased income disparities; more integrated neighborhoods
Quality Health Care	Better mental and physical health (including increased life expectancy); improved access to preventive care; fewer missed days of work and school; decreased need for emergency services; lower share of income spent on health	Decreased health care spending and strain on emergency services; reduced racial/ethnic disparities in insurance coverage and access to care; fewer communicable diseases; improved workplace productivity; decreased wealth-health gap; better outcomes during health crises
Reliable Technology	Improved access to job opportunities; expanded access to health information and telemedicine services; increased job and academic performance	Closing the "digital divide" in access to technology by income; increased economic development; increased connectivity and social inclusion that helps reduce social, economic, and political disparities
Savings	Ability to withstand emergencies without impacting long-term financial stability; greater asset accumulation over time (e.g., interest on savings; ability to invest in education, property, or finance a secure retirement)	Less spending on public services to cover basic needs like health care, food, and housing — especially for unexpected or emergency expenses

We All Have a Role to Play

Our vision is a country where ALICE families not only have sufficient income to afford the basics but can also save and invest in their future. This is a vision not only for ALICE, but for the nation as a whole. The information presented in this Report can help stakeholders prioritize economic prosperity for all. We all have a role to play:

Community members:

- Raise awareness of ALICE through ALICE news and videos or share your experiences
- Connect with your local United Way for advocacy, support, and volunteer opportunities
- Advocate for the continuation of current government datasets (e.g., American Community Survey, Fair Market Rents). Consistent data over time is crucial for informed decision-making, effective policy implementation, and accountability.

Policymakers and nonprofits:

- Explore ALICE by district using the Legislative District Tool
- Map ALICE by location to pinpoint need and identify gaps in community resources
- Use interactive tools from the Federal Reserve Bank of Atlanta (which use ALICE budgets), including the Policy Rules Database and the Career Ladder Identifier and Financial Forecaster
- See examples of policies, practices, and programs United For ALICE partners have implemented using ALICE data

Employers:

- Implement strategies that support the well-being and retention of ALICE workers while also boosting engagement, productivity, and the bottom line
- Advocate for community resources that support your employees – from affordable housing to quality child care

ABOUT UNITED FOR ALICE AND OUR PARTNERS

The State of ALICE in Indiana: 2025 Update on Financial Hardship is brought to you by Indiana United Ways and United Way of Central Indiana in partnership with United For ALICE, a driver of innovative research and action to promote financial stability for **ALICE®** (**A**sset **L**imited, **I**ncome **C**onstrained, **E**mployed) households. With a commitment to equity for ALICE, United For ALICE and United Ways across Indiana share this work with foundations, government, corporations, and other nonprofits to inform policy and promote positive change for ALICE households.

The grassroots ALICE movement, developed by United Way of Northern New Jersey, has spread to 35 states and the District of Columbia. Learn more about the ALICE movement here.

To create the ALICE Reports, our team of researchers works with Research Advisory Committees composed of experts from our partner states. This work is guided by our rigorous methodology, which is updated biennially with experts from across our Research Advisory Committees.

Director and Lead Researcher: Stephanie Hoopes, Ph.D.

ALICE Research Team: Andrew Abrahamson; Ashley Anglin, Ph.D.; Catherine Connelly, D.M.H., M.A.; Jessica Fernandez; Dana Isaac; Victoria Mutuku, M.A.

United For ALICE partners with Indiana United Ways and United Way of Central Indiana to bring this research to the state.

BEFORE THE INDIANA UTILITY REGULATORY COMMISSION

IURC Cause No. 46258

PETITION OF INDIANAPOLIS POWER & LIGHT COMPANY D/B/A AES INDIANA FOR AUTHORITY TO INCREASE RATES AND CHARGES

PUBLIC COMMENT IN OPPOSITION AND REQUEST FOR COMMISSION SCRUTINY

To the Indiana Office of Utility Consumer Counselor, IURC Commissioners, and Elected Representatives:

Please accept this formal public comment from an AES Indiana customer in Indianapolis. I strongly oppose this request and urge the Commission to subject it to the most rigorous possible scrutiny to protect ratepayer interests and ensure any approved rates are truly just and reasonable.

Introduction

AES Indiana seeks to raise its annual revenues by approximately $192.9 million, following a $71 million base rate increase approved in April 2024, along with ongoing recovery through its Distribution Investment Rider (DIR). The Company's Petition, filed June 3, 2025, justifies this request based on a speculative forward-looking test year and billions in planned capital expenditures.

As a stakeholder, I urge the Commission to critically evaluate the prudence, necessity, and fairness of this duplicative and premature request.

Background and Context

Contradictions Between Petition and AES' Own Financials

- Earnings Strength: AES reported net income of $441 million in Q2 2025, up from $331 million in Q1【Q2 2025 10-Q, p. 5】. Adjusted EBITDA grew to $681 million, up from $658 million in Q2 2024【Transcript, p. 3】. Adjusted EPS rose to $0.51, up from $0.38【Transcript, p. 9】. AES reaffirmed full-year guidance of $2.65–$2.85 billion Adjusted EBITDA and $2.10–$2.26 Adjusted EPS, describing itself as "in a uniquely strong position"【Transcript, p. 1–2】.
- Cash Flow: Q2 2025 operating cash flow reached $976 million, more than double the prior year's $392 million【Q2 2025 10-Q, p. 34】. Over the past 12 months, AES disclosed $1.78 billion in distributions from subsidiaries to the parent company, including from Indiana【Q2 2025 10-Q, p. 35】.
- Dividends Maintained: AES confirmed continuation of its quarterly shareholder dividend of $0.17595 per share【Q2 2025 10-Q, p. 36】. If Indiana rates were truly "confiscatory" as claimed (Petition ¶24), maintaining shareholder payouts would not be defensible.
- Aggressive Expansion: AES highlighted the largest investment program in AES Indiana's history, including the Pike County battery project (200 MW/800 MWh), the Petersburg Energy Center (250 MW solar + 180 MWh storage), and coal-to-gas repowering at Petersburg by 2026【Transcript, p. 7】. Simultaneously, AES signed 1.6 GW of new PPAs this quarter alone, 100% with data centers such as Meta【Transcript, p. 2–3】.

Taken together, AES' SEC filings and earnings call disclosures confirm financial health and aggressive expansion — directly at odds with its claim that current Indiana rates are "unjust" or "confiscatory."

Concerns and Grounds for Commission Scrutiny

1. *Potential Double Recovery and Unproven Future Costs*

AES must reconcile this request with revenues already recovered through the 2024 Base Rate Order and the ongoing DIR rider. Its reliance on a forward-looking test year (ending Dec. 31, 2026) risks charging ratepayers for speculative costs — projected at $957.3 million in 2026 alone【Petition, ¶30】 — without enforceable guarantees of benefits.

2. *Lack of Demonstrated Customer Benefit*

While AES testifies (Petition ¶39) to supporting its "Five Pillars," it has not demonstrated measurable improvements in SAIDI/SAIFI reliability indices or customer service from the hundreds of millions already collected. Its vegetation management program has exceeded budget, yet no proportional reliability improvements have been documented. Ratepayers are being asked to pay more without verified value.

3. *Significant Affordability Concerns*

A nearly 10% cumulative increase — raising an average 1,000 kWh bill to $177.60/month【Petition, ¶¶45–47】 — presents a severe burden on low-income families, seniors, and small businesses. The proposal to increase the fixed monthly charge (Witness Rimal) disproportionately harms low-use and low-income customers, undermining AES' own stated "Affordability" pillar.

4. *Question of Necessity and Profitability*

AES is seeking a 10.7% Return on Equity (ROE) — the high end of U.S. regulated utility benchmarks — while reporting strong net income, $976 million quarterly cash flow, and nearly $2 billion distributed upstream【Q2 2025 10-Q, p. 35】. The Commission must question whether this request serves Indiana customers or AES' global shareholder strategy.

Requested Information and Disclosures

To ensure transparency, I respectfully request the Commission require AES to:

- Provide a detailed reconciliation proving no overlap with the 2024 Base Rate Order or DIR rider revenues.

- Conduct a prudence review of the Petersburg Repowering Project and other large capital expenditures cited in the Petition.
- Publish a customer-class bill impact study showing combined effects of volumetric and fixed charge increases on low-income, fixed-income, and small business customers.
- Disclose all federal/state grants and financing sources considered before shifting costs to ratepayers.
- Establish a binding reliability performance plan with SAIDI/SAIFI/CAIDI targets and financial penalties for missed metrics, particularly for vegetation management.
- Reject the proposed Property Tax Adjustment Rider (PTA), which would bypass Commission review and erode ratepayer protections.
- Require an enhanced low-income assistance program to mitigate hardship from any approved increase.

Conclusion

AES Indiana's petition is excessive, premature, and unsupported by its own financial disclosures. The company has not met its burden to prove this request is just and reasonable.

At a minimum, the Commission must:

1. Require AES to reconcile new revenues with existing recovery mechanisms,
2. Tie any approved revenues to measurable, enforceable customer benefits, and
3. Provide robust protections for vulnerable households.

Approval of this request as filed would prioritize global shareholder returns over Indiana ratepayers, contrary to the compact of a regulated monopoly.

Respectfully submitted,

/s/ Kristy Schaler

Indianapolis, IN 46203

The AES Corporation
Financial Review Call Script
Second Quarter 2025

Susan Harcourt: Thank you, Operator. Good morning and welcome to our Second Quarter 2025 Financial Review Call. Our press release, presentation and related financial information are available on our website at aes.com.

Today we will be making forward-looking statements. There are many factors that may cause future results to differ materially from these statements, which are disclosed in our most recent 10-K and 10-Q filed with the SEC. Reconciliations between GAAP and non-GAAP financial measures can be found on our website, along with the presentation.

Joining me this morning are Andrés Gluski, our President and Chief Executive Officer; Steve Coughlin, our Chief Financial Officer; Ricardo Falú, our Chief Operating Officer, and other senior members of our management team.

With that, I will turn the call over to Andrés.

Andrés Gluski: Good morning, everyone, and thank you for joining our second quarter 2025 financial review call. Today, I am pleased to reaffirm both our 2025 guidance and our long-term growth targets. Our business remains resilient, and we continue to execute on our strategy, which I will discuss in more detail. Following my remarks, Steve Coughlin, our CFO, will provide additional color on our financial performance and outlook.

Before delving into our second quarter results, allow me to share a few thoughts regarding the state of the electricity market in the US. Obviously, the past couple of months have seen major policy announcements which will have a significant impact on the sector. Not to get distracted by some of the noise surrounding these developments, it's important to keep in mind key market fundamentals. Demand for energy in the US is growing rapidly by historical measures; prices are rising and the bulk of new additions over the next five years will be renewables and energy storage. These are the technologies that can be feasibly built, given their shorter time to power, advanced development pipeline, existing supply chains, competitive Levelized Cost of Energy and customer preference.

Current government policies aim to increase the amount of future power coming from fossil fuels, nuclear and enhanced geothermal. While measures can be

taken to increase generation from existing thermal plants, new additions will take years to materially come online, some more than others. In the meantime, AES has a mature pipeline of renewables and battery storage with a substantial, safe harbored, backlog of signed PPAs, positioning us to meet our clients' growing energy needs. As an all of the above energy company, we have the capabilities to deliver those technologies that are most cost competitive and demanded by our customers. We see our business model as supplying not a specific technology, but the electric energy and capacity in the shape, cost and reliability the market demands. Over many years AES has demonstrated its flexibility and innovation time and again.

Now turning to our results, beginning on Slide 4. We are executing well, and on track to achieve all of our financial metrics. Our performance was in line with our expectations, with Adjusted EBITDA of $681 million and Adjusted EPS of $0.51.

We are seeing significant growth in our Renewables SBU with Adjusted EBITDA for the second quarter of $240 million, representing overall growth of 56% versus Q2 last year. This growth is directly related to the 3.2 GW of new projects that we have added to our portfolio over the last four quarters. We are also seeing

the benefit of more projects with higher returns, which we forecasted early last year and are now hitting our results, as these projects come online.

We are on track to add a total of 3.2 GW of new projects in operation in 2025. Year-to-date, we have completed construction of 1.9 GW, and we are approximately 80% complete on the remaining 1.3 GW. I am pleased to report that our progress so far this year includes the completion of the 1 GW Bellefield 1 solar-plus-storage project, which is the first phase in the largest project of its kind in the country. As a part of our construction efforts, we utilized our AI robotic solar installation technology, Maximo, which makes construction significantly faster, less labor intensive, and more cost-effective.

Since our last call, we have signed PPAs for an additional 1.6 GW of new projects, including 650 MW with Meta, bringing our backlog to 12 GW. The 1.6 GW of new PPAs is entirely with data center customers, further solidifying our position as the leading provider of renewables to this customer segment.

Now turning to Slide 5. Our business is resilient to changes in renewables policy, whether it's the new legislation signed by Congress, the prospect of additional tariffs, or changes to IRS guidelines around tax credits. We have significant

protections due to the actions we have taken over the last several years, including safe harboring, ensuring a US supply chain, and avoiding projects on federal land.

Let me also emphasize that for the majority of our business, any of the recent changes in US policy are largely inconsequential. This includes our entire operating portfolio, our utilities and our international business.

Turning to Slide 6. We feel very confident in the strength of our backlog of renewables and energy storage projects, which have signed contracts, but are not yet operational. Of this 12 GW backlog, 4.1 GW are international, selling primarily to mining companies and data centers, with no exposure to US policy. Looking at our 7.9 GW US backlog, we plan to place in service 6 GW before year-end 2027, all of which qualify for existing tax credits under recent legislation. Of the remaining 1.9 GW coming online after 2027, nearly all is safe harbored under the current Treasury guidance.

Even looking out to 2028 and beyond, our pipeline includes an additional 4 GW of projects that are expected to be added to our backlog over the coming years. I should add that 35% of our US pipeline is energy storage, which will be

supported by tax credits from start of construction through 2033. In short, our backlog is well-protected, and we have a long runway of projects that we expect to bring online with tax incentives.

Turning to Slide 7. Our supply chain strategy also provides us with strong protections from changes in US policy or potential future tariffs. All of our major equipment is now either on-site or coming from US-based suppliers with their own supply chains diversified outside of China. We have essentially eliminated any potential impact from previously announced tariffs, and our projects comply with the restrictions on Foreign Entities of Concern, or FEOC.

Now to Slide 8 and our future growth. Even as tax credits expire, we expect strong demand, which will enable us to maintain or improve our existing project returns, and continue to rapidly grow our EBITDA. We are uniquely positioned as the top provider of renewables to data center companies, with over 11 GW of agreements signed to-date, and we are confident in our ability to deliver on our financial objectives for the following three reasons:

- First, we're seeing robust demand for electricity, driven primarily by the rapid growth of data centers. Meeting this demand in the US will require over 600 terawatt-hours of additional power generated by the end of the decade, which

is roughly equivalent to the current ERCOT system. With this backdrop, as you can see on Slide 9, the corporate PPA market for renewables has a long history of adjusting to account for changes in market conditions, with average contract prices moving as the underlying cost of building new projects has evolved. It is worth noting that for data centers, electricity represents less than 10% of total lifetime cost on average.

- Second, turning to Slide 10. Renewables offer a competitive Levelized Cost of Energy, or LCOE, for new generation, even without tax credits. Over the past year, the cost of a new gas turbine has more than doubled, and lead times have stretched to four years or more. Additionally, new gas pipelines have yet to be approved, permitted and built. As a result, a surge in new gas plants coming online will likely take time.

- And third, our strategy remains centered on meeting our customer needs. Today, customers are asking for renewables and storage because they can be deployed quickly and at scale. I should add that AES has extensive gas development capabilities, and we are focused on delivering those solutions that our large data center customers are requesting.

Finally, turning to Slide 11 and the robust growth program we are undertaking at our US utilities. We are executing on the largest investment program in the history of both AES Indiana and AES Ohio, to improve customer reliability and support economic development. In 2025 across these utilities, we are on track to invest approximately $1.4 billion in areas such as hardening the distribution network, smart grid, new generation, and transmission build-out for data centers.

At AES Indiana, we are making significant progress with our generation buildout. Earlier this year we completed the Pike County energy storage project, which includes 200 MW of installed capacity and 800 MWh of dispatchable energy, the largest operational battery project in MISO. We are also on track to bring online the Petersburg Energy Center, a 250 MW solar and 180 MWh energy storage facility, by the end of the year. Furthermore, we are on schedule with repowering two of the Petersburg units from coal to natural gas. We expect this project to be completed in 2026.

This quarter, we also filed a petition for a regulatory rate review with the Indiana Utility Regulatory Commission. This rate case represents our first using a forward-looking test year, which will reduce regulatory lag and enable a more

efficient investment program, as we work to best serve our customers with cost-effective and reliable electricity service.

At AES Ohio, our current regulatory rate review with the Public Utilities Commission of Ohio is on track for a timely order and we are optimistic that we will be able to reach a settlement agreement in the third quarter. In addition, with the passage of House Bill 15 this spring, we are working toward a new regulatory framework that will incorporate three forward-looking test years, significantly reducing regulatory lag in Ohio. With our current ESP regulatory structure in place until early 2027, we expect to file for new rates later this year, which will include 2027 to 2029 as the test years.

With that, I would now like to turn the call over to our CFO, Steve Coughlin.

Stephen Coughlin: Thank you, Andrés, and good morning, everyone. I am very pleased to share that AES had a great second quarter keeping us well on track toward our full year 2025 guidance targets.

First turning to Adjusted EBITDA on Slide 13. Second quarter Adjusted EBITDA was $681 million versus $658 million a year ago. This was driven by significant

growth from new renewables projects and the positive impact from cost reductions we announced on our fourth quarter call. These were partially offset by several portfolio changes, including the prior year Warrior Run coal PPA monetization, the sale of AES Brasil and the 30% sell-down of AES Ohio.

Turning to Slide 14, second quarter Adjusted EPS increased 34% to 51 cents per share versus 38 cents in the prior year. In addition to the EBITDA growth drivers, EPS also increased as a result of $185 million of higher US renewable tax attributes. This strong growth was partially offset by higher Parent interest expense and a higher adjusted tax rate. Next, I'll cover the performance drivers within each of our Strategic Business Units on the next four slides.

Beginning with our Renewables SBU on Slide 15, the 56% increase in EBITDA was as expected and puts us well on our way to achieving our full year guidance of $890 to $960 million. This was primarily driven by 3.2 GW of new capacity brought online since Q2 2024, as well as the positive impacts from the cost reductions and scaling down of our development spending that we discussed on our fourth quarter call. This year, hydrology has normalized in Colombia, improving results versus the prior year. The net effect of moving Chile

renewables to the Renewables SBU this year was offset by the sale of our 5 GW AES Brasil business.

In the Utilities SBU, lower Adjusted Pre-Tax Contribution, or PTC, in the quarter was mostly driven by planned outages and the sell-down of AES Ohio that closed in April. These results were fully anticipated in our guidance, and we expect significant growth in the Utilities SBU in the year-to-go, driven by new investments in the rate base.

Turning to our Energy Infrastructure SBU on Slide 17. Lower EBITDA versus Q2 2024 primarily reflects the prior year recognition of the Warrior Run coal PPA monetization and Chile renewable assets moving to our Renewables segment in 2025, partially offset by our acquisition of the remaining ownership in the Cochrane coal plant. Excluding these portfolio changes, Energy Infrastructure EBITDA would have increased by $23 million as a result of higher availability across the fleet.

Finally, lower EBITDA at our New Energy Technologies SBU primarily reflects AES' share of the lower results reported by Fluence in their fiscal second quarter.

Turning to Slide 19, we are reaffirming our 2025 Adjusted EBITDA guidance of $2.65 to $2.85 billion, driven by the robust 51% growth in our Renewables business year-to-date and our strong position heading into the second half of this year. Growth in the year-to-go will be driven by the 3.7 GW of projects brought online in 2024, the 1.9 GW already brought online year-to-date and the additional 1.3 GW we will bring online through the end of the year. Our business has reached a level of scale and maturity that allows us to operate even more effectively and efficiently, which is improving EBITDA margins.

As I mentioned, hydrology conditions in Colombia have normalized and we see our hydro plants well-positioned to hit their targets through the end of year. We expect 7% year-over-year growth at our Utilities SBU driven by the $1.3 billion of rate base investment we've made over the last twelve months. We have already locked in the cost savings actions implemented during the first quarter, which will yield at least the $150 million savings target we discussed on our fourth quarter call. To put this year into context, when adjusted to exclude the impacts of asset sales, year-over-year Adjusted EBITDA growth will be approximately 11%.

Looking beyond 2025, asset sales will be less of a driver due to the substantial progress we've already made. This means that Adjusted EBITDA growth will

significantly accelerate in 2026, as the strong growth in our Renewables and Utilities businesses will not be offset by significant asset sales. As a result, we still expect at least low-teens EBITDA growth in 2026, putting us well on track to achieve our long-term growth rate through 2027.

Now looking at our 2025 Adjusted Earnings per Share on Slide 20. We are reaffirming our guidance of $2.10 to $2.26, which exceeds the mid-point of the 7% to 9% long-term growth rate we introduced back in 2021. In addition to the drivers of Adjusted EBITDA, we expect higher interest expense as a result of new debt for our growth investments and a slightly higher adjusted tax rate. We expect to benefit from higher tax credit monetization in the year-to-go, as we complete an additional 600 MW of projects in the US, and expect these tax attributes to be weighted approximately equally between the third and fourth quarters.

Now let's turn to our 2025 Parent capital allocation plan on Slide 21. Sources reflect approximately $2.7 billion of total discretionary cash, including achieving the upper half of our $1.15 to $1.25 billion of Parent Free Cash Flow target, reflecting double-digit year-over-year growth. Additional sources include the sell-down of our global insurance business that closed in the second quarter, and we

expect to borrow an additional $500 million at the Parent to support our attractive growth investment plan.

On the right-hand side you can see our planned use of capital. We will return approximately $500 million to shareholders this year with our 70 cent per share annual dividend, while investing approximately $1.8 billion toward new growth, primarily in the Renewables and Utilities businesses. We have also repaid approximately $400 million of subsidiary debt in line with our balance sheet optimization objectives.

Turning to Slide 22, we are reaffirming our long-term growth rate for Adjusted EBITDA of 5% to 7%, driven by Renewables growth of 19% to 21% and Utilities growth of 13% to 15%. We are also reaffirming our long-term growth rates for Adjusted EPS and Parent Free Cash Flow. I want to emphasize that the recently passed reconciliation bill does not impact the growth plan included in our long-term guidance. As Andrés discussed, all projects coming online through year-end 2027 qualify to receive existing tax credits under the recently passed legislation. Additionally, we have either already taken delivery of key components for our backlog projects, or we have secured domestic supply chains which mitigate impacts of new tariffs. These actions give us clear line of sight to achieving our

long-term guidance. As a reminder, AES' Adjusted EBITDA does not include renewables tax credits. As a result, we do not expect any reduction in Adjusted EBITDA from the eventual sunsetting of renewables tax credits.

I would also like to share a few thoughts on our balance sheet. Our Parent Free Cash Flow-to-Parent Debt metric in the second quarter improved versus a year ago from 19% to 25% and we remain on track to reach our 12% FFO-to-debt target with Moody's by the end of next year. Our plan through 2027 is fully self-funded with internally generated cash flow, tax capital, partner capital, and incremental debt capacity.

As we consider how the business will evolve with the step-down of tax credits toward the end of the decade and beyond, we feel confident in the resilience of our business due to our industry-leading position with data centers. Data center customers have an incredible need for new power, and future expirations of renewables incentives are unlikely to slow this down. Our expectation is that PPA prices will adjust to fully remunerate invested capital at attractive returns. In other words, while future projects without tax incentives would require additional debt and equity to replace tax value monetization, those projects will also earn higher cash and EBITDA to remunerate that additional capital and achieve our

target returns. This also means that we could generate similar EBITDA and cash growth with less MW and without increasing capital needs.

We will maintain this flexibility to scale our growth investments to be in line with available capital sources within AES and our partners. Looking beyond 2027, our growth will continue to be funded primarily with internally generated cash, partner capital, and debt capacity in line with our investment grade credit rating. AES' future growth rates will be strong as declines we've seen in our Energy Infrastructure SBU related to asset sales and coal retirements will be largely behind us, allowing the high growth rates of Renewables and Utilities to dominate AES' overall rate of growth.

In summary, I am very pleased with the progress we've made toward our financial objectives for 2025 and beyond, as our business strategy and execution continue to prove resilient and successful. With more than half of the year behind us, I am confident we will achieve our 2025 objectives and look forward to providing an update on next quarter's call.

With that, I'll turn the call back over to Andrés.

Andrés Gluski: Thank you, Steve.

Before opening up the call to questions, I will share some closing thoughts.

AES' business is resilient, and we are reaffirming all of our 2025 and longer-term financial and business objectives. We are on track to complete 3.2 GW of construction in full year 2025 and have signed 2 GW of new PPAs so far this year. Our backlog of 12 GW of signed PPAs is either international or safe harbored, and a majority will be completed by 2027. AES' renewables Adjusted EBITDA grew by 56% in the quarter, as we delivered on our construction projects. At the same time, our balance sheet metrics are on track to meet all requirements to maintain our triple investment grade.

Our resilience is the result of years of preparation: of creating a domestic supply chain; a safe harbored backlog and pipeline; and being the preferred provider of the fastest growing market segment, namely data centers and corporate clients. AES has earned the reputation as the most reliable developer and builder of renewable projects, as well as the most innovative company in our sector. We see ourselves as a provider of electric energy and capacity with the cost, shape and carbon intensity that our clients demand. AES will continue to deliver the

solutions our customers need, as we always have done in the past. For all of these reasons, we feel confident in our ability to deliver on our financial commitments through our guidance period and continue to show strong growth beyond.

With that, I would ask the operator to open up the call for questions.

END

AES Reports Second Quarter 2025 Results; On Track to Deliver on 2025 Guidance and Long-Term Targets

Second Quarter 2025 Renewables SBU Adjusted EBITDA Grew 56% Versus Second Quarter 2024

Strategic Accomplishments

- On track to add 3.2 GW of new projects in operation in 2025
  - 1.9 GW already completed
  - Remaining 1.3 GW 78% complete
- Since the first quarter call in May, signed or awarded new long-term PPAs for 1.6 GW of solar and wind, all with data center companies
- PPA backlog of 12 GW, including 5.2 GW under construction
- AES Indiana filed a petition for regulatory rate review with the Indiana Utility Regulatory Commission (IURC)

Q2 2025 Financial Highlights

- GAAP Financial Metrics
  - Net Loss of $150 million, compared to Net Income of $153 million in Q2 2024
  - Net Loss Attributable to The AES Corporation of $95 million, compared to Net Income Attributable to The AES Corporation of $276 million in Q2 2024
  - Diluted EPS of ($0.15), compared to $0.39 in Q2 2024
- Non-GAAP Adjusted Financial Metrics
  - Adjusted EBITDA[1] of $681 million, compared to $658 million in Q2 2024
  - Adjusted EBITDA with Tax Attributes[1,2] of $1,057 million, compared to $849 million in Q2 2024
  - Adjusted EPS[3] of $0.51, compared to $0.38 in Q2 2024

Financial Position and Outlook

- Reaffirming 2025 guidance for Adjusted EBITDA[1] of $2,650 to $2,850 million
  - Reaffirming annualized growth target of 5% to 7% through 2027, off a base of 2023 guidance
  - Reaffirming expectation for 2025 Adjusted EBITDA with Tax Attributes[1,2] of $3,950 to $4,350 million
- Reaffirming 2025 guidance for Adjusted EPS[3] of $2.10 to $2.26
  - Reaffirming annualized growth target of 7% to 9% through 2025, off a base of 2020 and 7% to 9% through 2027, off a base of 2023 guidance

ARLINGTON, Va., July 31, 2025 – The AES Corporation (NYSE: AES) today reported financial results for the quarter ended June 30, 2025.

"AES is in a uniquely strong position due to our diversified operating portfolio, well-protected 12 GW backlog of signed long-term PPAs, and established domestic supply chain," said Andrés Gluski, AES President and Chief Executive Officer. "With 1.6 GW of signed PPAs with data centers since our first quarter results in May, we are a leader in the fastest growing segment in the market."

---

[1] Adjusted EBITDA is a non-GAAP financial measure. See attached "Non-GAAP Measures" for definition of Adjusted EBITDA and a description of the adjustments to reconcile Adjusted EBITDA to Net Income (Loss) for the quarter ended June 30, 2025. The Company is not able to provide a corresponding GAAP equivalent or reconciliation for its Adjusted EBITDA guidance without unreasonable effort.

[2] Pre-tax effect of Production Tax Credits, Investment Tax Credits, and depreciation tax deductions allocated to tax equity investors, as well as the tax benefit recorded from tax credits retained or transferred to third parties.

[3] Adjusted EPS is a non-GAAP financial measure. See attached "Non-GAAP Measures" for definition of Adjusted EPS and a description of the adjustments to reconcile Adjusted EPS to Diluted EPS for the quarter ended June 30, 2025. The Company is not able to provide a corresponding GAAP equivalent or reconciliation for its Adjusted EPS guidance without unreasonable effort.

"We made excellent progress during the second quarter of 2025, as demonstrated by the robust growth in Adjusted EBITDA at our Renewables SBU, which was 56% higher than in the same period last year," said Stephen Coughlin, AES Executive Vice President and Chief Financial Officer. "Our strong track record with our customers, resilient supply chain strategy, and advanced construction execution enable us to confidently reaffirm both our 2025 guidance and long-term growth rate targets through 2027."

Q2 2025 Financial Results

Second quarter 2025 Net Loss was $150 million, a decrease of $303 million compared to Net Income of $153 million in second quarter 2024, primarily due to higher day-one losses on sales type leases at AES Clean Energy Development[4]. In addition, Net Income was negatively impacted by higher income tax expense, lower margins from the Energy Infrastructure Strategic Business Unit (SBU) from prior year unrealized derivative gains and higher prior year revenues from the monetization of the Warrior Run coal plant PPA. This decrease was partially offset by the impact of reclassifying Mong Duong from held-for-sale to held and used, and higher contributions from renewables projects placed in service in the current year.

Second quarter 2025 Adjusted EBITDA[5] (a non-GAAP financial measure) was $681 million, an increase of $23 million compared to second quarter 2024, driven by higher contributions from the Renewables SBU primarily due to higher revenues from renewables projects placed in service and prior year outages in Colombia. This was partially offset by the sale of AES Brasil, higher prior year revenues from the monetization of the Warrior Run coal plant PPA, and the impact of the sell-down of AES Ohio in the Utilities SBU.

Second quarter 2025 Adjusted EBITDA with Tax Attributes[5,6] (a non-GAAP financial measure) was $1,057 million, an increase of $208 million compared to second quarter 2024, due to higher realized tax attributes driven by more projects placed in service and higher income from tax credit transfers, as well as the drivers above.

Second quarter 2025 Diluted Earnings Per Share from Continuing Operations (Diluted EPS) was ($0.15), a decrease of $0.54 compared to second quarter 2024, mainly driven by higher income tax expense, day-one losses on the commencement of sales-type leases at AES Clean Energy Development, and lower earnings at the Energy Infrastructure SBU primarily due to higher prior year revenues from the monetization of the Warrior Run coal plant PPA. This was partially offset by the derecognition of a valuation allowance on the loan receivable upon reclassifying Mong Duong from held-for-sale to held and used.

Second quarter 2025 Adjusted Earnings Per Share[7] (Adjusted EPS, a non-GAAP financial measure) was $0.51, an increase of $0.13 compared to second quarter 2024, mainly driven by a lower adjusted tax rate and higher contributions due to new renewables projects placed in service, partially offset by lower contributions from the Utilities SBU due to planned outages.

Strategic Accomplishments

- The Company's backlog, which consists of projects with signed contracts, but which are not yet operational, is 12 GW, including 5.2 GW under construction. Since the Company's first quarter 2025 earnings call in May 2025, the Company:
  - Completed the construction of 1.2 GW of energy storage and solar, including the 1 GW Bellefield 1 solar-plus-storage facility, for a total of 1.9 GW year-to-date, and is on track to add a total of 3.2 GW to its operating portfolio by year-end 2025; and

---

[4] Losses recognized on the commencement of sales-type leases primarily relate to the exclusion of the value of Investment Tax Credits from the fair value of the renewable asset.

[5] Adjusted EBITDA is a non-GAAP financial measure. See attached "Non-GAAP Measures" for definition of Adjusted EBITDA and a description of the adjustments to reconcile Adjusted EBITDA to Net Income for the quarter ended June 30, 2025. The Company is not able to provide a corresponding GAAP equivalent or reconciliation for its Adjusted EBITDA guidance without unreasonable effort.

[6] Pre-tax effect of Production Tax Credits, Investment Tax Credits, and depreciation tax deductions allocated to tax equity investors, as well as the tax benefit recorded from tax credits retained or transferred to third parties.

[7] Adjusted EPS is a non-GAAP financial measure. See attached "Non-GAAP Measures" for definition of Adjusted EPS and a description of the adjustments to reconcile Adjusted EPS to Diluted EPS for the quarter ended June 30, 2025. The Company is not able to provide a corresponding GAAP equivalent or reconciliation for its Adjusted EPS guidance without unreasonable effort.

- Signed or was awarded new long-term PPAs for 1.6 GW of renewables, all with data center companies, and a total of 2 GW year-to-date.

- In June, AES Indiana filed a petition for regulatory rate review with the Indiana Utility Regulatory Commission (IURC).
  - This is AES Indiana's first rate case using a forward-looking test year, which will enable a more efficient investment program to best serve customers with cost-effective and reliable electricity service.

Guidance and Expectations[8,10]

The Company is reaffirming its 2025 guidance for Adjusted EBITDA[8] of $2,650 to $2,850 million. Growth in 2025 is expected to be driven by contributions from new renewables projects, rate base growth at the Company's US utilities, and normalized results in Colombia and Mexico, partially offset by revenues from the monetization of the Warrior Run coal plant PPA in 2024 and asset sales.

The Company is reaffirming its expectation for annualized growth in Adjusted EBITDA[8] of 5% to 7% through 2027, from a base of its 2023 guidance of $2,600 to $2,900 million.

The Company is reaffirming its expectation that 2025 Adjusted EBITDA with Tax Attributes[8,9] of $3,950 to $4,350 million.

The Company is reaffirming its 2025 Adjusted EPS[10] guidance of $2.10 to $2.26. Growth in 2025 is expected to be primarily driven by contributions from new renewables projects, rate base growth at the Company's US utilities, and normalized results in Colombia and Mexico, partially offset by revenues from the monetization of the Warrior Run coal plant PPA in 2024, asset sales, higher Parent interest, and a higher adjusted tax rate.

The Company is reaffirming its annualized growth target for Adjusted EPS[10] of 7% to 9% through 2025, from a base year of 2020. The Company is also reaffirming its annualized growth target for Adjusted EPS[8] of 7% to 9% through 2027, from a base of its 2023 guidance of $1.65 to $1.75.

The Company's 2025 guidance is based on foreign currency and commodity forward curves as of June 30, 2025.

The Company expects to maintain its current quarterly dividend payment of $0.17595 going forward.

Non-GAAP Financial Measures

See Non-GAAP Measures for definitions of Adjusted EBITDA, Adjusted EBITDA with Tax Attributes, Tax Attributes, Adjusted Earnings Per Share, and Adjusted Pre-Tax Contribution, as well as reconciliations to the most comparable GAAP financial measures.

Conference Call Information

AES will host a conference call on Friday, August 1, 2025 at 10:00 a.m. Eastern Time (ET). Interested parties may listen to the teleconference by dialing 1-833-470-1428 at least ten minutes before the start of the call. International callers should dial +1-404-975-4839. The Participant Access Code for this call is 439668. Internet access to the conference call and presentation materials will be available on the AES website at www.aes.com by selecting “Investors” and then “Presentations and Webcasts.”

---

[8] Adjusted EBITDA is a non-GAAP financial measure. See attached "Non-GAAP Measures" for definition of Adjusted EBITDA and a description of the adjustments to reconcile Adjusted EBITDA to Net Income for the quarter ended June 30, 2025. The Company is not able to provide a corresponding GAAP equivalent or reconciliation for its Adjusted EBITDA guidance without unreasonable effort.

[9] Pre-tax effect of Production Tax Credits, Investment Tax Credits, and depreciation tax deductions allocated to tax equity investors, as well as the tax benefit recorded from tax credits retained or transferred to third parties.

[10] Adjusted EPS is a non-GAAP financial measure. See attached "Non-GAAP Measures" for definition of Adjusted EPS and a description of the adjustments to reconcile Adjusted EPS to Diluted EPS for the quarter ended June 30, 2025. The Company is not able to provide a corresponding GAAP equivalent or reconciliation for its Adjusted EPS guidance without unreasonable effort.

A webcast replay will be accessible at www.aes.com beginning shortly after the completion of the call.

About AES

The AES Corporation (NYSE: AES) is a Fortune 500 global energy company accelerating the future of energy. Together with our many stakeholders, we're improving lives by delivering the greener, smarter energy solutions the world needs. Our diverse workforce is committed to continuous innovation and operational excellence, while partnering with our customers on their strategic energy transitions and continuing to meet their energy needs today. For more information, visit www.aes.com.

Safe Harbor Disclosure

This news release contains forward-looking statements within the meaning of the Securities Act of 1933 and of the Securities Exchange Act of 1934. Such forward-looking statements include, but are not limited to, those related to future earnings, growth and financial and operating performance. Forward-looking statements are not intended to be a guarantee of future results, but instead constitute AES' current expectations based on reasonable assumptions. Forecasted financial information is based on certain material assumptions. These assumptions include, but are not limited to, our expectations regarding accurate projections of future interest rates, commodity price and foreign currency pricing, continued normal levels of operating performance and electricity volume at our distribution companies and operational performance at our generation businesses consistent with historical levels, as well as the execution of PPAs, conversion of our backlog and growth investments at normalized investment levels, and rates of return consistent with prior experience.

Actual results could differ materially from those projected in our forward-looking statements due to risks, uncertainties and other factors. Important factors that could affect actual results are discussed in AES' filings with the Securities and Exchange Commission (the "SEC"), including, but not limited to, the risks discussed under Item 1A: "Risk Factors" and Item 7: "Management's Discussion & Analysis" in AES' 2024 Annual Report on Form 10-K and in subsequent reports filed with the SEC. Readers are encouraged to read AES' filings to learn more about the risk factors associated with AES' business. AES undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except where required by law.

Any Stockholder who desires a copy of the Company's 2024 Annual Report on Form 10-K filed March 11, 2025 with the SEC may obtain a copy (excluding the exhibits thereto) without charge by addressing a request to the Office of the Corporate Secretary, The AES Corporation, 4300 Wilson Boulevard, Arlington, Virginia 22203. Exhibits also may be requested, but a charge equal to the reproduction cost thereof will be made. A copy of the Annual Report on Form 10-K may be obtained by visiting the Company's website at www.aes.com.

Website Disclosure

AES uses its website, including its quarterly updates, as channels of distribution of Company information. The information AES posts through these channels may be deemed material. Accordingly, investors should monitor our website, in addition to following AES' press releases, quarterly SEC filings and public conference calls and webcasts. In addition, you may automatically receive e-mail alerts and other information about AES when you enroll your e-mail address by visiting the "Subscribe to Alerts" page of AES' Investors website. The contents of AES' website, including its quarterly updates, are not, however, incorporated by reference into this release.

THE AES CORPORATION
NON-GAAP FINANCIAL MEASURES
(Unaudited)
RECONCILIATION OF ADJUSTED EBITDA, ADJUSTED PTC AND ADJUSTED EPS

We define EBITDA as earnings before interest income and expense, taxes, depreciation, amortization, and accretion of AROs. We define Adjusted EBITDA as EBITDA adjusted for the impact of NCI and interest, taxes, depreciation, amortization, and accretion of AROs of our equity affiliates, adding back interest income recognized under service concession arrangements, and excluding gains or losses of both consolidated entities and entities accounted for under the equity method due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits and costs associated with dispositions and acquisitions of business interests, including early plant closures, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring, and (f) costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts. We define Adjusted EBITDA with Tax Attributes as Adjusted EBITDA, adding back the pre-tax effect of Production Tax Credits ("PTCs"), Investment Tax Credits ("ITCs"), and depreciation tax deductions allocated to tax equity investors, as well as the tax benefit recorded from tax credits retained or transferred to third parties.

The GAAP measure most comparable to EBITDA, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes is net income. We believe that EBITDA, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes better reflect the underlying business performance of the Company. Adjusted EBITDA is the most relevant measure considered in the Company's internal evaluation of the financial performance of its segments. Factors in this determination include the variability due to unrealized gains or losses pertaining to derivative transactions, equity securities, or financial assets and liabilities remeasurement, unrealized foreign currency gains or losses, losses due to impairments, strategic decisions to dispose of or acquire business interests, retire debt, or implement restructuring initiatives, and the variability of allocations of earnings to tax equity investors, which affect results in a given period or periods. In addition, each of these metrics represent the business performance of the Company before the application of statutory income tax rates and tax adjustments, including the effects of tax planning, corresponding to the various jurisdictions in which the Company operates. EBITDA, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes should not be construed as alternatives to net income, which is determined in accordance with GAAP.

Reconciliation of Adjusted EBITDA and Adjusted EBITDA with Tax Attributes (in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2025	2024	2025	2024
Net income (loss)	$ (150)	$ 153	$ (223)	$ 431
Income tax expense (benefit)	167	(35)	184	(51)
Interest expense	352	389	694	746
Interest income	(70)	(88)	(139)	(193)
Depreciation, amortization, and accretion of AROs	354	315	691	633
EBITDA	$ 653	$ 734	$ 1,207	$ 1,566
Less: Adjustment for noncontrolling interests and redeemable stock of subsidiaries [1]	(253)	(182)	(387)	(346)
Less: Income tax expense (benefit), interest expense (income) and depreciation, amortization, and accretion of AROs from equity affiliates	45	28	81	62
Interest income recognized under service concession arrangements	14	16	29	33
Unrealized derivatives, equity securities, and financial assets and liabilities losses (gains)	133	(53)	132	(138)
Unrealized foreign currency losses (gains)	4	12	(3)	3
Disposition/acquisition losses	126	62	167	19
Impairment losses (reversals)	(87)	23	(54)	49
Loss on extinguishment of debt and troubled debt restructuring	4	18	12	50
Restructuring costs	42	—	88	—
Adjusted EBITDA [1]	$ 681	$ 658	$ 1,272	$ 1,298
Tax attributes	376	191	562	419
Adjusted EBITDA with Tax Attributes [2]	$ 1,057	$ 849	$ 1,834	$ 1,717

(1) The allocation of earnings and losses to tax equity investors from both consolidated entities and equity affiliates is removed from Adjusted EBITDA. NCI also excludes amounts allocated to preferred shareholders during the construction phase before a project becomes operational, as this is akin to a financing arrangement.

(2) Adjusted EBITDA with Tax Attributes includes the impact of the share of the ITCs, PTCs, and depreciation deductions allocated to tax equity investors under the HLBV accounting method and recognized as *Net loss (income) attributable to noncontrolling interests and redeemable stock of subsidiaries* on the Condensed Consolidated Statements of Operations. It also includes the tax benefit recorded from tax credits retained or transferred to third parties. The tax attributes are related to the Renewables and Utilities SBUs.

(Unaudited)
RECONCILIATION OF ADJUSTED EBITDA, ADJUSTED PTC AND ADJUSTED EPS

We define Adjusted PTC as pre-tax income from continuing operations attributable to The AES Corporation excluding gains or losses of the consolidated entity due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits, and costs associated with dispositions and acquisitions of business interests, including early plant closures, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring; and (f) costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts. Adjusted PTC also includes net equity in earnings of affiliates on an after-tax basis adjusted for the same gains or losses excluded from consolidated entities.

We define Adjusted EPS as diluted earnings per share from continuing operations excluding gains or losses of both consolidated entities and entities accounted for under the equity method due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits and costs associated with dispositions and acquisitions of business interests, including early plant closures, and the tax impact from the repatriation of sales proceeds, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring; and (f) costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts.

The GAAP measure most comparable to Adjusted PTC is income from continuing operations attributable to AES. The GAAP measure most comparable to Adjusted EPS is diluted earnings per share from continuing operations. We believe that Adjusted PTC and Adjusted EPS better reflect the underlying business performance of the Company and are considered in the Company's internal evaluation of financial performance. Factors in this determination include the variability due to unrealized gains or losses pertaining to derivative transactions, equity securities, or financial assets and liabilities remeasurement, unrealized foreign currency gains or losses, losses due to impairments, and strategic decisions to dispose of or acquire business interests, retire debt, or implement restructuring initiatives, which affect results in a given period or periods. In addition, for Adjusted PTC, earnings before tax represents the business performance of the Company before the application of statutory income tax rates and tax adjustments, including the effects of tax planning, corresponding to the various jurisdictions in which the Company operates. Adjusted PTC and Adjusted EPS should not be construed as alternatives to income from continuing operations attributable to AES and diluted earnings per share from continuing operations, which are determined in accordance with GAAP.

The Company reported diluted loss per share of $0.15 and $0.08 for the three and six months ended June 30, 2025. The Company reported diluted earnings per share of $0.39 and $0.99 for the three and six months ended June 30, 2024. For purposes of measuring earnings per share under U.S. GAAP, income available to AES common stockholders is reduced by increases in the carrying amount of redeemable stock of subsidiaries to redemption value and increased by decreases in the carrying amount to the extent they represent recoveries of amounts previously reflected in the computation of earnings per share. While the adjustment for the three and six months ended June 30, 2025 decreased earnings per share and the adjustment for the three months ended June 30, 2024 increased earnings per share, neither adjustment impacted *Net income* on the Condensed Consolidated Statement of Operations. For purposes of computing Adjusted EPS, the Company excluded the adjustment to redemption value from the numerator. The table below reconciles the income available to AES common stockholders used in GAAP diluted earnings per share to the income from continuing operations used in calculating the non-GAAP measure of Adjusted EPS.

Reconciliation of Numerator Used for Adjusted EPS	**Three months ended June 30, 2025**			**Six months ended June 30, 2025**		
(in millions, except per share data)	**Loss**	**Shares**	**$ per Share**	**Loss**	**Shares**	**$ per Share**

(1) NCI is defined as Noncontrolling Interests.

(2) Amount primarily relates to remeasurement of our investment in 5B of $48 million, or $0.07 per share, net unrealized derivative losses at the Energy Infrastructure SBU of $38 million, or $0.05 per share, and unrealized derivative losses on commodities at AES Clean Energy of $33 million, or $0.05 per share.

(3) Amount primarily relates to unrealized gains on foreign currency derivatives at Corporate of $34 million, or $0.05 per share, and unrealized gains on cross currency swaps in Brazil of $25 million, or $0.03 per share.

(4) Amount primarily relates to remeasurement of our investment in 5B of $48 million, or $0.07 per share, net unrealized derivative losses at the Energy Infrastructure SBU of $46 million, or $0.06 per share, and unrealized derivative losses on commodities at AES Clean Energy of $17 million, or $0.02 per share.

(5) Amount primarily relates to net unrealized derivative gains at the Energy Infrastructure SBU of $59 million, or $0.08 per share, unrealized gains on foreign currency derivatives at Corporate of $37 million, or $0.05 per share, and unrealized gains on cross currency swaps in Brazil of $28 million, or $0.04 per share.

(6) Amount primarily relates to day-one losses on commencement of sales-type leases at AES Clean Energy Development of $149 million, or $0.21 per share, partially offset by gain on sale of Dominican Republic Renewables of $45 million, or $0.06 per share.

(7) Amount primarily relates to day-one losses at commencement of sales-type leases at AES Renewable Holdings of $63 million, or $0.09 per share.

(8) Amount primarily relates to day-one losses on commencement of sales-type leases at AES Clean Energy Development of $149 million, or $0.21 per share, and AES Renewable Holdings of $9 million, or $0.01 per share, and losses on remeasurement of contingent consideration at AES Clean Energy of $12 million, or $0.02 per share, partially offset by gain on sale of Dominican Republic Renewables of $45 million, or $0.06 per share.

(9) Amount primarily relates to day-one losses at commencement of sales-type leases at AES Renewable Holdings of $63 million, or $0.09 per share, and the loss on partial sale of our ownership interest in Amman East and IPP4 in Jordan of $10 million, or $0.01 per share, partially offset by a gain on dilution of ownership in Uplight due to its acquisition of AutoGrid of $52 million, or $0.07 per share.

(10) Amount primarily relates to the derecognition of the valuation allowance on a loan receivable accounted for under ASC 310 and the elimination of estimated costs to sell at Mong Duong of $127 million, or $0.18 per share, after reclassification to held and used, partially offset by impairments at AES Clean Energy of $29 million, or $0.04 per share.

(11) Amount primarily relates to impairment at AES Brasil of $12 million, or $0.02 per share.

(12) Amount primarily relates to the derecognition of the valuation allowance on a loan receivable accounted for under ASC 310 and the elimination of estimated costs to sell at Mong Duong of $127 million, or $0.18 per share, after reclassification to held and used, partially offset by impairments at AES Clean Energy of $54 million, or $0.08 per share, and at Mong Duong of $9 million, or $0.01 per share.

(13) Amount primarily relates to impairment at Mong Duong of $22 million, or $0.03 per share, and impairment at AES Brasil of $12 million, or $0.02 per share.

(14) Amount primarily relates to losses incurred at AES Andes due to early retirement of debt of $16 million, or $0.02 per share.

(15) Amount primarily relates to losses incurred at AES Andes due to early retirement of debt $29 million, or $0.04 per share, and costs incurred due to troubled debt restructuring at Puerto Rico of $20 million, or $0.03 per share.

(16) Amount primarily relates to impairments at AES Clean Energy Development that were the result of the Company-wide restructuring program of $38 million, or $0.05 per share.

(17) Amount primarily relates to severance costs associated with the Company-wide restructuring program of $50 million, or $0.07 per share, and impairments at AES Clean Energy Development that were the result of the Company's restructuring program of $38 million, or $0.05 per share.

(18) Amount primarily relates to income tax expense associated with the day-one losses on commencement of sales-type leases at AES Clean Energy Development of $95 million, or $0.13 per share, impairments at AES Clean Energy Development of $50 million, or $0.07 per share, remeasurement and downward adjustment of our investment in 5B of $28 million, or $0.04 per share, the selldown of AES Ohio of $13 million, or $0.02 per share, and net unrealized derivative losses at Integrated Energy of $18 million, or $0.03 per share.

(19) Amount primarily relates to income tax benefits associated with the tax over book investment basis differences related to the AES Brasil held-for-sale classification of $59 million, or $0.08 per share, for the three and six months ended June 30, 2024.

(20) Amount primarily relates to income tax expense associated with the day-one losses on commencement of sales-type leases at AES Clean Energy Development of $95 million, or $0.13 per share, impairments at AES Clean Energy Development of $57 million, or $0.08 per share, severance costs related to the Company-wide restructuring program of $23 million, or $0.03 per share, remeasurement and downward adjustment of our investment in 5B of $28 million, or $0.04 per share, net unrealized derivative losses at Integrated Energy of $19 million, or $0.03 per share, and the selldown of AES Ohio of $13 million, or $0.02 per share.

---

(1) Subsidiary distributions received by Qualified Holding Companies ("QHCs") excluded from Schedule 1. Subsidiary Distributions should not be construed as an alternative to Consolidated Net Cash Provided by Operating Activities, which is determined in accordance with US GAAP. Subsidiary Distributions are important to the Parent Company because the Parent Company is a holding company that does not derive any significant direct revenues from its own activities but instead relies on its subsidiaries' business activities and the resultant distributions to fund the debt service, investment and other cash needs of the holding company. The reconciliation of the difference between the Subsidiary Distributions and Consolidated Net Cash Provided by Operating Activities consists of cash generated from operating activities that is retained at the subsidiaries for a variety of reasons which are both discretionary and non-discretionary in nature. These factors include, but are not limited to, retention of cash to fund capital expenditures at the subsidiary, cash retention associated with non-recourse debt covenant restrictions and related debt service requirements at the subsidiaries, retention of cash related to sufficiency of local GAAP statutory retained earnings at the subsidiaries, retention of cash for working capital needs at the subsidiaries, and other similar timing differences between when the cash is generated at the subsidiaries and when it reaches the Parent Company and related holding companies.

(2) Parent Company Liquidity is defined as cash available to the Parent Company, including cash at qualified holding companies (QHCs), plus available borrowings under our existing credit facility. AES believes that unconsolidated Parent Company liquidity is important to the liquidity position of AES as a Parent Company because of the non-recourse nature of most of AES' indebtedness.

(3) The cash held at QHCs represents cash sent to subsidiaries of the company domiciled outside of the US. Such subsidiaries have no contractual restrictions on their ability to send cash to AES, the Parent Company. Cash at those subsidiaries was used for investment and related activities outside of the US. These investments included equity investments and loans to other foreign subsidiaries as well as development and general costs and expenses incurred outside the US. Since the cash held by these QHCs is available to the Parent, AES uses the combined measure of subsidiary distributions to Parent and QHCs as a useful measure of cash available to the Parent to meet its international liquidity needs.

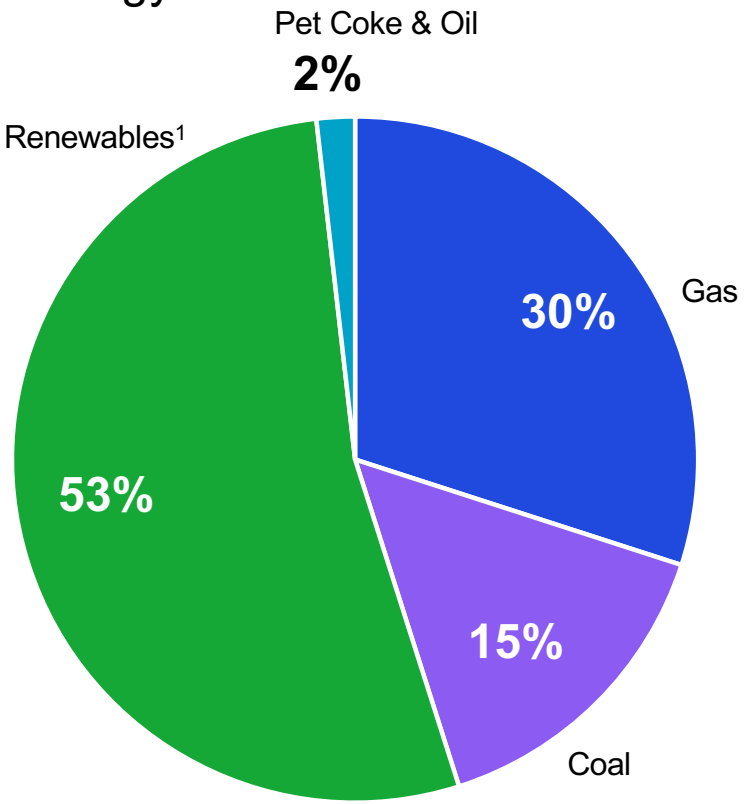
The AES Corporation

Fact Sheet

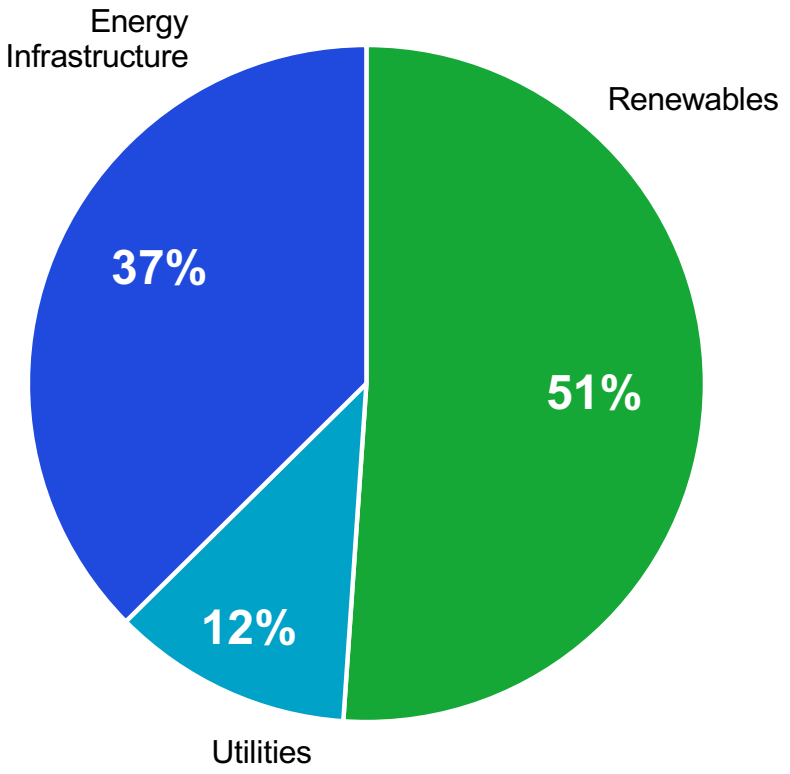
As of July 31, 2025

AES Total: 33,958 Gross MW in Operation

Technology



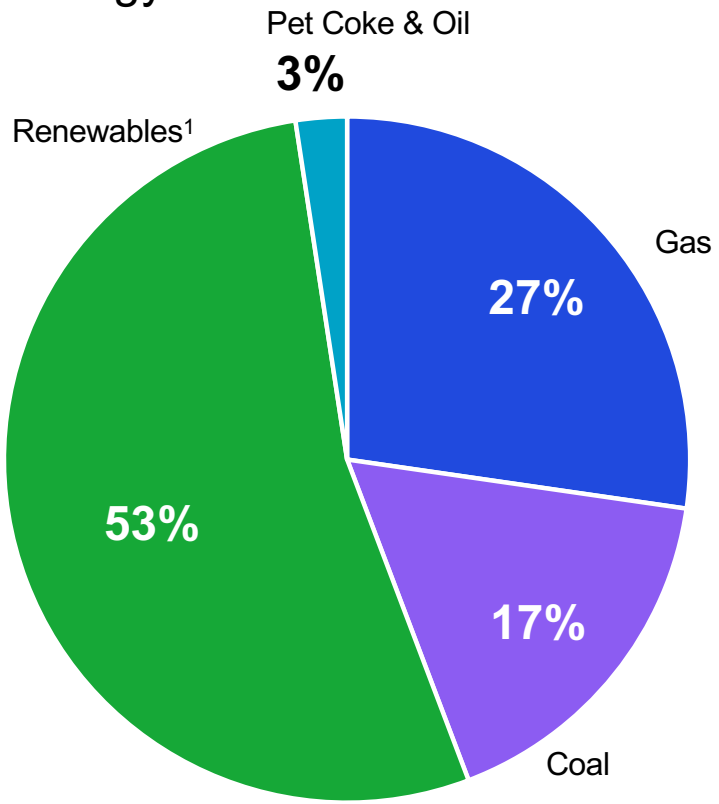
Segment



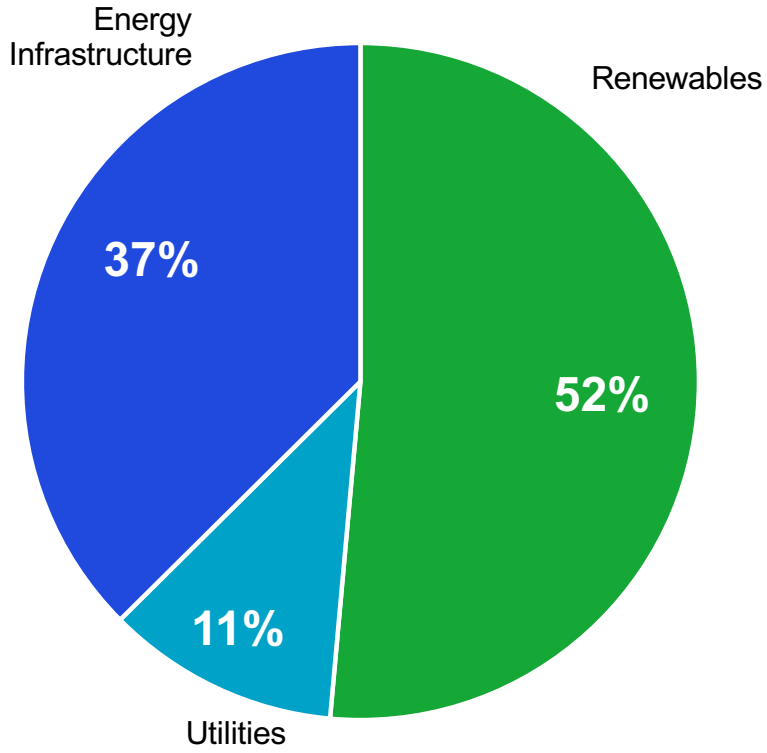
1. Includes solar, hydro, wind, energy storage and landfill gas.

AES Total: 24,432 Proportional MW in Operation

Technology



Segment



1. Includes solar, hydro, wind, energy storage and landfill gas.

Renewables Total: 17,349 Gross MW in Operation

1. Unconsolidated entity, accounted for as an equity affiliate.
2. AES owns these assets together with third-party tax equity investors with variable ownership interests. The tax equity investors receive a portion of the economic attributes of the facilities, including tax attributes, that vary over the life of the projects. The proceeds from the issuance of tax equity are recorded as Noncontrolling interest or Redeemable stock of subsidiaries in the Company's Consolidated Balance Sheets, depending on the partnership rights of the specific project.

Utilities Total			3,561		2,684,000	32,688	

1. Unconsolidated entity, accounted for as an equity affiliate.
2. AES Ohio's GWh sold in 2024 represent total transmission sales. AES Ohio's wholesale sales and AES Ohio's Standard Service Offer (SSO) utility sales, which are sales to utility customers who use AES Ohio to source their electricity through a competitive bid process, were 2,440 GWh in 2024. AES Ohio owns a 4.9% equity ownership in OVEC, an electric generating company. OVEC has two plants in Cheshire, Ohio and Madison, Indiana with a combined generation capacity of approximately 2,109 MW. AES Ohio's share of this generation is approximately 103 MW. On April 4, 2025, DPL closed on the sale of an approximate 30% equity interest in AES Ohio to a wholly-owned subsidiary of Caisse de depot et placement du Québec (CDPQ).
3. CDPQ owns direct and indirect interests in IPALCO (AES Indiana's parent) which total approximately 30%. AES owns 85% of AES US Investments and AES US Investments owns 82.35% of IPALCO. AES Indiana plants: Georgetown, Harding Street, Petersburg, Eagle Valley, Hoosier Wind, Hardy Hills Solar and Pike County. 20 MW of AES Indiana total is considered a transmission asset.

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

☒ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the Quarterly Period Ended March 31, 2025
or

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

Commission file number 1-12291

THE AES CORPORATION

(Exact name of registrant as specified in its charter)

Delaware	**54-1163725**
(State or other jurisdiction of incorporation or organization)	**(I.R.S. Employer Identification No.)**
4300 Wilson Boulevard **Arlington, Virginia**	**22203**
(Address of principal executive offices)	**(Zip Code)**

Registrant's telephone number, including area code: (703) 522-1315

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Trading Symbol(s)	Name of Each Exchange on Which Registered
Common Stock, par value $0.01 per share	**AES**	**New York Stock Exchange**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer”, “accelerated filer”, “smaller reporting company”, and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒ Accelerated filer ☐ Smaller reporting company ☐ Emerging growth company ☐ Non-accelerated filer ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The number of shares outstanding of Registrant’s Common Stock, par value $0.01 per share, on April 29, 2025 was 711,922,815.

Glossary of Terms

The following terms and acronyms appear in the text of this report and have the definitions indicated below:

2024 Base Rate Order	The order issued in April 2024 by the IURC authorizing AES Indiana to, among other things, increase its basic rates and charges by $71 million annually
Adjusted EBITDA	Adjusted earnings before interest income and expense, taxes, depreciation and amortization, a non-GAAP measure of operating performance
Adjusted EBITDA with Tax Attributes	Adjusted earnings before interest income and expense, taxes, depreciation and amortization, adding back the pre-tax effect of Production Tax Credits, Investment Tax Credits and depreciation tax deductions allocated to tax equity investors, a non-GAAP measure
Adjusted EPS	Adjusted Earnings Per Share, a non-GAAP measure
Adjusted PTC	Adjusted Pre-tax Contribution, a non-GAAP measure of operating performance
AES	The Parent Company and its subsidiaries and affiliates
AES Andes	AES Andes S.A., formerly AES Gener
AES Brasil	AES Brasil Operações S.A., formerly branded as AES Tietê
AES Clean Energy Development	AES Clean Energy Development, LLC
AES Indiana	Indianapolis Power & Light Company, formerly branded as IPL. AES Indiana is wholly-owned by IPALCO
AES Ohio	The Dayton Power & Light Company, formerly branded as DP&L. For the periods covered by this report, AES Ohio was wholly-owned by DPL. Beginning in April 2025, CDPQ owns an aggregate indirect equity interest in AES Ohio of approximately 30%.
AES Renewable Holdings	AES Renewable Holdings, LLC, formerly branded as AES Distributed Energy
AFUDC	Allowance for Funds Used During Construction
AGIC	AES Global Insurance Company, AES' captive insurance company
AOCL	Accumulated Other Comprehensive Loss
ASC	Accounting Standards Codification
ASU	Accounting Standards Update
CAA	United States Clean Air Act
CCR	Coal Combustion Residuals, which includes bottom ash, fly ash, and air pollution control wastes generated at coal-fired generation plant sites
CECL	Current Expected Credit Loss
CDPQ	Caisse de dépôt et placement du Québec
CO_2	Carbon Dioxide
CSAPR	Cross-State Air Pollution Rule
CWA	U.S. Clean Water Act
DG Comp	Directorate-General for Competition
DIR	Distribution Investment Rider - established in ESP 4 to recover certain distribution capital investments placed in service beginning June 30, 2020, and subject to increasing annual revenue limits and other terms. The annual revenue limit for 2025 is $49.4 million.
DPL	DPL LLC and its consolidated subsidiaries. On April 3, 2025, DPL Inc. converted its form of business organization from an Ohio corporation to an Ohio limited liability company. Upon the conversion, DPL Inc. changed its name to DPL LLC. References to DPL are to DPL Inc. before April 3, 2025, and DPL LLC on and after April 3, 2025.
EBITDA	Earnings before interest income and expense, taxes, depreciation, amortization, and accretion of AROs, a non-GAAP measure of operating performance
ECCRA	Environmental Compliance Cost Recovery Adjustment
ENSO	El Niño-Southern Oscillation
EPA	United States Environmental Protection Agency
EPC	Engineering, Procurement and Construction
ESP	Electric Security Plan
EU	European Union
FASB	Financial Accounting Standards Board
Fluence	Fluence Energy, Inc and its subsidiaries, including Fluence Energy, LLC, which was previously our joint venture with Siemens (NASDAQ: FLNC)
GAAP	Generally Accepted Accounting Principles in the United States
GHG	Greenhouse Gas
GILTI	Global Intangible Low Taxed Income
GW	Gigawatts
GWh	Gigawatt Hours
HLBV	Hypothetical Liquidation at Book Value
IPALCO	IPALCO Enterprises, Inc. CDPQ owns direct and indrect interests in IPALCO of approximately 30%.
ITC	Investment Tax Credit
IURC	Indiana Utility Regulatory Commission
LNG	Liquid Natural Gas
MMBtu	Million British Thermal Units
MW	Megawatts
MWh	Megawatt Hours
NAAQS	National Ambient Air Quality Standards
NCI	Noncontrolling Interest
NEK	Natsionalna Elektricheska Kompania (state-owned electricity public supplier in Bulgaria)

NM	Not Meaningful
NOV	Notice of Violation
NO_X	Nitrogen Oxide
NPDES	National Pollutant Discharge Elimination System
OVEC	Ohio Valley Electric Corporation, an electric generating company in which AES Ohio has a 4.9% interest
Parent Company	The AES Corporation
Pet Coke	Petroleum Coke
PPA	Power Purchase Agreement
PREPA	Puerto Rico Electric Power Authority
PUCO	The Public Utilities Commission of Ohio
RSU	Restricted Stock Unit
SBU	Strategic Business Unit
SEC	United States Securities and Exchange Commission
SO_2	Sulfur Dioxide
TDSIC	Transmission, Distribution, and Storage System Improvement Charge
TEG	Termoeléctrica del Golfo, S. de R.L. de C.V.
TEP	Termoeléctrica Peñoles, S. de R.L. de C.V.
U.S.	United States
USD	United States Dollar
VIE	Variable Interest Entity

Notes to Condensed Consolidated Financial Statements

For the Three Months Ended March 31, 2025 and 2024

(Unaudited)

1. FINANCIAL STATEMENT PRESENTATION

Consolidation — In this Quarterly Report, the terms “AES,” “the Company,” “us” or “we” refer to the consolidated entity, including its subsidiaries and affiliates. The terms “The AES Corporation” or “the Parent Company” refer only to the publicly held holding company, The AES Corporation, excluding its subsidiaries and affiliates. Furthermore, VIEs in which the Company has an ownership interest and is the primary beneficiary, thus controlling the VIE, have been consolidated. Certain consolidated VIEs have arrangements which may require the Company to contribute additional equity totaling $1.7 billion. Such contributions are generally contingent upon the underlying asset achieving specific project milestones. Investments in entities where the Company has the ability to exercise significant influence, but not control, are accounted for using the equity method of accounting, except for our investment in Alto Maipo, for which we have elected the fair value option as permitted under ASC 825. All intercompany transactions and balances are eliminated in consolidation.

Interim Financial Presentation — The accompanying unaudited condensed consolidated financial statements and footnotes have been prepared in accordance with GAAP, as contained in the FASB ASC, for interim financial information and Article 10 of Regulation S-X issued by the SEC. Accordingly, they do not include all the information and footnotes required by GAAP for annual fiscal reporting periods. In the opinion of management, the interim financial information includes all adjustments of a normal recurring nature necessary for a fair presentation of the results of operations, financial position, comprehensive income, changes in equity, and cash flows. The results of operations for the three months ended March 31, 2025 are not necessarily indicative of expected results for the year ending December 31, 2025. The accompanying condensed consolidated financial statements are unaudited and should be read in conjunction with the 2024 audited consolidated financial statements and notes thereto, which are included in the 2024 Form 10-K filed with the SEC on March 11, 2025 (the “2024 Form 10-K”).

Cash, Cash Equivalents, and Restricted Cash — The following table provides a summary of cash, cash equivalents, and restricted cash amounts reported on the Condensed Consolidated Balance Sheets that reconcile to the total of such amounts as shown on the Condensed Consolidated Statements of Cash Flows (in millions):

	March 31, 2025	December 31, 2024
Cash and cash equivalents	$ 1,753	$ 1,524
Restricted cash	735	437
Debt service reserves and other deposits	78	78
Cash, Cash Equivalents, and Restricted Cash	$ 2,566	$ 2,039

Tax Credit Transferability — The U.S Inflation Reduction Act of 2022 (the “IRA”) allows us to directly transfer investment tax credits (“ITCs”) to unrelated tax credit buyers. The Company accounts for tax credits that it will retain or transfer under ASC 740—*Income Taxes*, as a reduction in income tax expense by either including the expected amount of the tax credit to be claimed or the cash to be received when transferred, respectively, in the calculation of its annual effective tax rate throughout the year the renewables project is placed in service. The estimated tax credits are updated on a quarterly basis, with the year-end calculation including only the tax credits that are associated with projects placed in service, comprising credits claimed or transferred during the year. In assessing realizability for credits to be transferred, the Company includes cash it anticipates receiving in establishing any valuation allowance and establishes a valuation allowance equal to its best estimate of any discount on the transfer. During the three months ended March 31, 2025, the Company did not execute any transfers of ITCs directly to third parties, however we received cash proceeds of $75 million related to a tax credit transfer agreement executed in 2024. The receipt of cash from the transfer of tax credits is treated as an operating cash inflow on the Condensed Consolidated Statements of Cash Flows.

New Accounting Pronouncements Adopted in 2025 — The Company assessed all accounting pronouncements adopted in 2025 and determined they were either not applicable or did not have a material impact on the Company’s condensed consolidated financial statements.

New Accounting Pronouncements Issued But Not Yet Effective — The following table provides a brief description of recent accounting pronouncements that could have a material impact on the Company’s condensed consolidated financial statements once adopted. Accounting pronouncements not listed below were assessed and

determined to be either not applicable or are expected to have no material impact on the Company's condensed consolidated financial statements.

New Accounting Standards Issued But Not Yet Effective

ASU Number and Name	Description	Date of Adoption	Effect on the financial statements upon adoption
2023-09 Income Taxes (Topic 740): Improvements to Income Tax Disclosures	The amendments in this Update require that public business entities on an annual basis (1) disclose specific categories in the rate reconciliation and (2) provide additional information for reconciling items that meet a quantitative threshold. Furthermore, companies are required to disclose a disaggregated amount of income taxes paid at a federal, state, and foreign level as well as a breakdown of income taxes paid in a jurisdiction that comprises 5% of a company's total income taxes paid. Lastly, this ASU requires that companies disclose income (loss) from continuing operations before income tax at a domestic and foreign level and that companies disclose income tax expense from continuing operations on a federal, state, and foreign level.	The amendments in this Update are effective for fiscal years beginning after December 15, 2024.	The Company is currently evaluating the impact of adopting the standard on its consolidated financial statements. This ASU only affects annual disclosures, which will be provided when the amendment becomes effective.
2024-03: Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures (Subtopic 220-40)	The amendments in this Update require disclosure, in the notes to financial statements, of specified information about certain costs and expenses. The amendments require that at each interim and annual reporting period an entity: 1. Disclose the amounts of (a) purchases of inventory, (b) employee compensation, (c) depreciation, (d) intangible asset amortization, and (e) depreciation, depletion, and amortization recognized as part of oil- and gas-producing activities (DD&A) (or other amounts of depletion expense) included in each relevant expense caption. A relevant expense caption is an expense caption presented on the face of the income statement within continuing operations that contains any of the expense categories listed in (a)–(e). 2. Include certain amounts that are already required to be disclosed under current generally accepted accounting principles (GAAP) in the same disclosure as the other disaggregation requirements. 3. Disclose a qualitative description of the amounts remaining in relevant expense captions that are not separately disaggregated quantitatively. 4. Disclose the total amount of selling expenses and, in annual reporting periods, an entity's definition of selling expenses.	The date for each amendment in this Update is effective for fiscal years beginning after December 15, 2026, and interim reporting periods beginning after December 15, 2027. Early adoption is permitted.	The Company is currently evaluating the impact of adopting the standard on its consolidated financial statements. This ASU only affects disclosures, which will be provided when the amendment becomes effective.
2024-04: Debt—Debt with Conversion and Other Options (Subtopic 470-20)	The amendments in this Update clarify the requirements for determining whether certain settlements of convertible debt instruments should be accounted for as an induced conversion.	The date for each amendment in this Update is effective beginning after December 15, 2025, and interim reporting periods within those annual reporting periods.	The Company is currently evaluating the impact of adopting the standard on its consolidated financial statements.

2. INVENTORY

The following table summarizes the Company's inventory balances as of the dates indicated (in millions):

	March 31, 2025	December 31, 2024
Spare parts and supplies	$ 362	$ 347
Fuel and other raw materials	262	246
Total	$ 624	$ 593

3. FAIR VALUE

The fair value of current financial assets and liabilities, debt service reserves, and other deposits approximate their reported carrying amounts. The estimated fair values of the Company's assets and liabilities have been determined using available market information. Because these amounts are estimates and based on hypothetical transactions to sell assets or transfer liabilities, the use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. For further information on our valuation techniques and policies, see Note 5—*Fair Value* in Item 8.—*Financial Statements and Supplementary Data* of our 2024 Form 10-K.

Recurring Measurements

The following table presents, by level within the fair value hierarchy, the Company's financial assets and liabilities that were measured at fair value on a recurring basis as of the dates indicated (in millions). For the Company's investments in marketable debt securities, the security classes presented were determined based on the nature and risk of the security and are consistent with how the Company manages, monitors, and measures its marketable securities:

	March 31, 2025				December 31, 2024			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Assets								
DEBT SECURITIES:								
Available-for-sale:								
Certificates of deposit	$ —	$ 3	$ —	$ 3	$ —	$ 4	$ —	$ 4
Government debt securities	—	4	—	4	—	4	—	4
Total debt securities	—	7	—	7	—	8	—	8
EQUITY SECURITIES:								
Mutual funds	49	—	—	49	51	—	—	51
Common stock	2	—	—	2	4	—	—	4
Total equity securities	51	—	—	51	55	—	—	55
DERIVATIVES:

Foreign currency derivatives	—	6	43	49	—	9	52	61
Commodity derivatives	207	92	5	304	193	80	5	278
Total derivatives — assets [1]	207	300	48	555	193	438	57	688
TOTAL ASSETS	$ 258	$ 307	$ 48	$ 613	$ 248	$ 446	$ 57	$ 751
Liabilities								
Contingent consideration [2]	$ —	$ —	$ 173	$ 173	$ —	$ —	$ 145	$ 145
DERIVATIVES:								
Interest rate derivatives	—	62	2	64	—	14	1	15
Foreign currency derivatives	—	15	—	15	—	18	—	18
Commodity derivatives	199	39	3	241	185	44	26	255
Total derivatives — liabilities [1]	199	116	5	320	185	76	27	288
TOTAL LIABILITIES	$ 199	$ 116	$ 178	$ 493	$ 185	$ 76	$ 172	$ 433

(1) Includes $1 million and $3 million of derivative assets reported in *Current held-for-sale assets* and $8 million and $3 million of derivative liabilities reported in *Current held-for-sale liabilities* on the Condensed Consolidated Balance Sheets related to Dominican Republic Renewables as of March 31, 2025 and December 31, 2024, respectively.

(2) The level 3 contingent consideration is mainly related to the acquisition of Bellefield in June 2023.

As of March 31, 2025, all available-for-sale debt securities had stated maturities within one year. For the three months ended March 31, 2025, no impairments of marketable securities were recognized in earnings or other comprehensive income (loss). Credit-related impairments are recognized as an allowance with a corresponding impact recognized as a credit loss in *Other expense*. Gains and losses on sales of investments are determined using the specific identification method. The following table presents gross proceeds from the sale of available-for-sale securities for the periods indicated (in millions):

	Three Months Ended March 31,	
	2025	2024
Gross proceeds from sale of available-for-sale securities	$ 3	$ 119

The Company accounts for equity securities without readily determinable fair values using the measurement alternative in accordance with ASC 321. These securities are measured at cost minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for the identical or similar investment of the same issuer. As of both March 31, 2025 and December 31, 2024, the carrying amount of equity securities accounted for using the measurement alternative was $62 million, inclusive of $22 million of cumulative upward adjustments recorded in *Other income* in prior years to reflect observable price changes.

The following tables present a reconciliation of assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three months ended March 31, 2025 and 2024 (derivative balances are presented net), in millions. Transfers between Level 3 and Level 2 principally result from changes in the significance of unobservable inputs used to calculate the credit valuation adjustment.

Three Months Ended March 31, 2025	Derivative Assets and Liabilities				
	Interest Rate	Foreign Currency	Commodity	Contingent Consideration	Total
Balance at January 1, 2025	$ (1)	$ 52	$ (21)	$ (145)	$ (115)

Balance at March 31, 2024	$ (2)	$ 64	$ (79)	$ (158)	$ (175)
Total gains for the period included in earnings attributable to the change in unrealized gains (losses) relating to assets and liabilities held at the end of the period	$ —	$ 3	$ 6	$ 6	$ 15

The following table summarizes the significant unobservable inputs used to value Level 3 derivative assets (liabilities) as of March 31, 2025 (in millions, except range amounts):

Type of Derivative	Fair Value	Unobservable Input	Amount or Range (Average)
Interest rate	$ (2)	Subsidiary credit spread	0.5% to 3.2% (1.9%)
Foreign currency:			
Argentine peso	43	Argentine peso to USD currency exchange rate after one year	1,328 to 1,342 (1,335)
Commodity:			
CAISO energy swap	4	Forward CAISO energy prices per MWh after 2031	$7.89 to $132.30 ($65.53)
MISO energy swap	(2)	Forward MISO energy prices per MWh after 2031	$23.83 to $75.68 ($43.19)
Total	$ 43		

For the Argentine peso foreign currency derivatives, increases (decreases) in the estimate of the above exchange rate would increase (decrease) the value of the derivative. For the CAISO and MISO energy swap, increases (decreases) in the estimate above would decrease (increase) the value of the derivative.

Contingent consideration is primarily related to future milestone payments associated with acquisitions of renewables development projects. The estimated fair value of contingent consideration is determined using probability-weighted discounted cash flows based on internal forecasts, which are considered Level 3 inputs. Changes in Level 3 inputs, particularly changes in the probability of achieving development milestones, could result in material changes to the fair value of the contingent consideration and could materially impact the amount of expense or income recorded each reporting period. Contingent consideration is updated quarterly with any prospective changes in fair value recorded through earnings. Gains and losses on the remeasurement of contingent consideration are recognized in *Other income* and *Other expense*, respectively, on the Condensed Consolidated Statements of Operations.

Nonrecurring Measurements

The Company measures fair value using the applicable fair value measurement guidance. Impairment expense, shown as pre-tax loss below, is measured by comparing the fair value at the evaluation date to the then-latest available carrying amount and is included in *Asset impairment expense* on the Condensed Consolidated Statements of Operations. The following table summarizes our major categories of asset groups measured at fair value on a nonrecurring basis and their level within the fair value hierarchy (in millions):

Three Months Ended March 31, 2025	Measurement Date	Carrying Amount [1]	Fair Value Level 1	Fair Value Level 2	Fair Value Level 3	Pre-tax Loss
Held-for-sale businesses: [2]						
Mong Duong [3]	3/31/2025	$ 383	$ —	$ 371	$ —	$ 17

Three Months Ended March 31, 2024	Measurement Date	Carrying Amount [1]	Fair Value Level 1	Fair Value Level 2	Fair Value Level 3	Pre-tax Loss
Held-for-sale businesses: [2]						
Mong Duong	3/31/2024	$ 450	$ —	$ 413	$ —	$ 37

(1) Represents the carrying values of the asset groups at the dates of measurement, before fair value adjustment.

(2) See Note 18—*Held-for-Sale and Dispositions* for further information.

(3) The pre-tax loss recognized was calculated using the fair value of the Mong Duong disposal group less costs to sell of $5 million.

AES Clean Energy Development Projects — On a quarterly basis, the Company reviews the status of development projects to identify projects that are no longer viable and will be abandoned. The fair value of each abandoned project with no salvage value is determined to be zero as there are no future projected cash flows, resulting in a full write-off of the carrying value of project development intangibles and capitalized development costs incurred.

The Company recognized $31 million and $7 million of pre-tax asset impairment expense related to AES Clean Energy Development Projects during the three months ended March 31, 2025 and 2024, respectively. See Note 16—*Asset Impairment Expense* for further information.

Financial Instruments Not Measured at Fair Value in the Condensed Consolidated Balance Sheets

The following table presents (in millions) the carrying amount, fair value, and fair value hierarchy of the Company's financial assets and liabilities that are not measured at fair value in the Condensed Consolidated Balance Sheets as of the dates indicated, but for which fair value is disclosed:

		March 31, 2025				
		Carrying Amount	Fair Value Total	Fair Value Level 1	Fair Value Level 2	Fair Value Level 3
Assets:	Accounts receivable — noncurrent [1]	$ 90	$ 197	$ —	$ —	$ 197
Liabilities:	Non-recourse debt	24,007	24,559	—	22,073	2,486
	Recourse debt	5,978	4,871	—	4,871	—

		December 31, 2024				
		Carrying Amount	Fair Value Total	Fair Value Level 1	Fair Value Level 2	Fair Value Level 3
Assets:	Accounts receivable — noncurrent [1]	$ 87	$ 171	$ —	$ —	$ 171
Liabilities:	Non-recourse debt	22,743	23,066	—	20,981	2,085
	Recourse debt	5,704	4,538	—	4,538	—

(1) These amounts primarily relate to the sale of the Redondo Beach land, payment deferrals granted to mining customers as part of our green blend agreements in Chile, and fair value of the Argentine FONINVEMEM receivables. These are included in *Other noncurrent assets* in the accompanying Condensed Consolidated Balance Sheets. See Note 5—*Financing Receivables* for further information.

4. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

For further information on the Company's derivative and hedge accounting policies, see Note 1—*General and Summary of Significant Accounting Policies—Derivatives and Hedging Activities* of Item 8.—*Financial Statements and Supplementary Data* in the 2024 Form 10-K.

Volume of Activity — The following tables present the Company's maximum notional (in millions) over the remaining contractual period by type of derivative as of March 31, 2025, and the dates through which the maturities for each type of derivative range:

Interest Rate and Foreign Currency Derivatives	Maximum Notional Translated to USD	Latest Maturity[1]
Interest rate	$ 10,020	2058
Foreign currency:		
Chilean peso	105	2027
Euro	97	2026
Colombian peso	83	2027
Mexican peso	70	2026

Commodity Derivatives	Maximum Notional	Latest Maturity
Natural Gas (in MMBtu)	221	2029
Power (in MWhs) [2]	62	2040
Coal (in Metric Tons)	8	2028

(1) Maturity dates are consistent for both designated and non-designated positions.

(2) Includes one contract designated as a cash flow hedge with a final maturity date in 2038.

Accounting and Reporting — *Assets and Liabilities* — The following tables present the fair value of the Company's derivative assets and liabilities as of the dates indicated (in millions):

Fair Value	March 31, 2025			December 31, 2024		
Assets	Designated	Not Designated	Total	Designated	Not Designated	Total
Interest rate derivatives	$ 202	$ —	$ 202	$ 349	$ —	$ 349
Foreign currency derivatives	12	37	49	16	45	61
Commodity derivatives	4	300	304	4	274	278
Total assets [1]	$ 218	$ 337	$ 555	$ 369	$ 319	$ 688
Liabilities						
Interest rate derivatives	$ 64	$ —	$ 64	$ 15	$ —	$ 15
Foreign currency derivatives	6	9	15	10	8	18
Commodity derivatives	3	238	241	29	226	255
Total liabilities [1]	$ 73	$ 247	$ 320	$ 54	$ 234	$ 288

	March 31, 2025		December 31, 2024	
Fair Value	Assets	Liabilities	Assets	Liabilities
Current	$ 344	$ 206	$ 369	$ 170
Noncurrent	211	114	319	118
Total [1]	$ 555	$ 320	$ 688	$ 288

(1) Includes $1 million and $3 million of derivative assets reported in *Current held-for-sale assets* and $8 million and $3 million of derivative liabilities reported in *Current held-for-sale liabilities* on the Condensed Consolidated Balance Sheets related to Dominican Republic Renewables as of March 31, 2025 and December 31, 2024, respectively.

Earnings and Other Comprehensive Income (Loss) — The following table presents the pre-tax gains (losses) recognized in AOCL and earnings related to all derivative instruments for the periods indicated (in millions):

	Three Months Ended March 31,	
	2025	2024
Cash flow hedges		
Gains (losses) recognized in AOCL		
Interest rate derivatives	$ (166)	$ 225
Foreign currency derivatives	4	(9)
Commodity derivatives	30	28
Total	$ (132)	$ 244
Gains reclassified from AOCL into earnings		
Interest rate derivatives — Interest expense	$ 15	$ 1
Foreign currency derivatives — Foreign currency transaction gains (losses)	3	1
Commodity derivatives — Cost of sales—Non-Regulated	2	—
Total	$ 20	$ 2
Gains (losses) on fair value hedging relationships		
Cross-currency derivatives		
Derivatives designated as hedging instruments	$ —	$ (56)
Hedged items	—	43
Total	$ —	$ (13)
Gains reclassified from AOCL to earnings due to change in forecast	$ 8	$ —
Gain (losses) recognized in earnings related to		
Not designated as hedging instruments:		
Foreign currency derivatives — Foreign currency transaction gains (losses)	$ (2)	$ 13
Commodity derivatives — Revenue—Non-Regulated	23	95
Commodity derivatives — Cost of sales—Non-Regulated	(5)	(4)
Total	$ 16	$ 104

Reclassifications from AOCL to earnings are forecasted to increase pre-tax income from continuing operations by $2 million for the twelve months ended March 31, 2026, primarily related to interest rate derivatives.

5. FINANCING RECEIVABLES

Receivables with contractual maturities of greater than one year are considered financing receivables. The following table presents long-term financing receivables, excluding lease receivables and amounts classified as held-for-sale, by country as of the dates indicated (in millions):

	March 31, 2025			December 31, 2024		
	Gross Receivable	Allowance	Net Receivable	Gross Receivable	Allowance	Net Receivable
U.S.	$ 49	$ 16	$ 33	$ 48	$ 15	$ 33
Chile	49	—	49	45	—	45
Other	8	—	8	9	—	9
Total [1]	$ 106	$ 16	$ 90	$ 102	$ 15	$ 87

U.S. — AES has recorded non-current receivables pertaining to the sale of the Redondo Beach land. The anticipated collection period extends beyond March 31, 2026.

Chile — AES Andes has recorded receivables pertaining to revenues recognized on regulated energy contracts that were impacted by the Stabilization Funds created by the Chilean government in October 2019, August 2022, and April 2024, in conjunction with the Tariff Stabilization Laws. Historically, the government updated the prices for these contracts every six months to reflect the contracts' indexation to exchange rates and commodities prices. The Tariff Stabilization Laws do not allow the pass-through of these contractual indexation updates to customers beyond the pricing in effect at July 1, 2019, until new lower-cost renewables contracts are incorporated to supply regulated contracts. Consequently, costs incurred in excess of the July 1, 2019 price are accumulated and borne by generators. AES Andes aimed to reduce its exposure through the sale of receivables.

Through different agreements and programs, as of March 31, 2025, AES Andes sold and collected $151 million and $217 million related to agreements executed in August 2023 and October 2024 to sell up to $227 million and $254 million of receivables pursuant to the Stabilization Funds, respectively. As of March 31, 2025, $11 million of current receivables and $5 million of noncurrent receivables were recorded in *Accounts receivable* and *Other noncurrent assets*, respectively. In April 2025, AES Andes sold and collected the remaining $11 million of receivables pursuant to the Stabilization Funds. Additionally, $43 million of payment deferrals granted to mining

customers as part of our green blend agreements were recorded as financing receivables included in *Other noncurrent assets* at March 31, 2025.

6. ALLOWANCE FOR CREDIT LOSSES

The following table represents the rollforward of the allowance for credit losses for the periods indicated (in millions):

Three Months Ended March 31, 2025	Accounts Receivable	Mong Duong Loan Receivable [1]	Argentina Receivables	Other [2]	Total
CECL reserve balance at beginning of period	$ 52	$ 23	$ 5	$ 16	$ 96
Current period provision	13	—	—	—	13
CECL reserve balance at end of period	$ 65	$ 23	$ 5	$ 16	$ 109

Three Months Ended March 31, 2024	Accounts Receivable	Mong Duong Loan Receivable [1]	Argentina Receivables	Other	Total
CECL reserve balance at beginning of period	$ 15	$ 26	$ 7	$ 16	$ 64
Current period provision	4	—	—	2	6
Write-offs charged against allowance	1	—	—	—	1
Recoveries collected	(1)	(1)	—	—	(2)
Foreign exchange	—	—	(1)	—	(1)
CECL reserve balance at end of period	$ 19	$ 25	$ 6	$ 18	$ 68

[1] Mong Duong loan receivable credit losses allowance was classified in *current held-for-sale assets* on the Condensed Consolidated Balance Sheet as of March 31, 2025 and 2024.

[2] Primarily relates to credit losses allowance on financing receivables in the U.S. as of March 31, 2025.

Beginning in 2024 and continuing into 2025, the current period provision and allowance for credit losses on customer accounts receivable has increased due to a temporary pause of customer disconnections and certain collection efforts and write-off processes after the implementation of customer billing system upgrades at our utilities in 2023 and 2024. This has resulted in higher past due customer receivables as of March 31, 2025. AES Indiana reinstituted customer disconnections and write-off processes in March 2025, and AES Ohio anticipates doing so later in 2025.

7. INVESTMENTS IN AND ADVANCES TO AFFILIATES

Summarized Financial Information — The following table summarizes financial information of the Company's 50%-or-less-owned affiliates that are accounted for using the equity method (in millions):

	50%-or-less Owned Affiliates	
Three Months Ended March 31,	2025	2024
Revenue	$ 460	$ 517
Operating loss	(14)	(33)
Net loss	(108)	(103)
Net loss attributable to affiliates	(118)	(68)

Jordan — In March 2024, the Company completed the sale of approximately 26% ownership interest in Amman East and IPP4 for a sale price of $58 million. After adjusting for dividends received since the execution of the sale and purchase agreement, the Company received a net cash payment of $45 million. After completion of the sale, the Company retained 10% ownership interest in each of the businesses, which are accounted for as equity method investments. See Note 18—*Held-for-Sale and Dispositions* for further information. Amman East and IPP4 are reported in the Energy Infrastructure SBU reportable segment.

Uplight — In February 2024, Uplight acquired AutoGrid, a market leader in the Virtual Power Plant space, from Schneider Electric. As part of the transaction, Schneider contributed an additional $40 million to Uplight, and Uplight issued approximately 91 million additional common units to Schneider as consideration for the acquisition. No incremental investment was required from AES or any other investor. As a result, AES' 29% ownership interest in Uplight was diluted to 25%. The transaction was accounted for as a partial disposition in which AES recognized a gain of $52 million in *Gain (loss) on disposal and sale of business interests* upon remeasurement. As the Company

still does not control but has significant influence over Uplight after the transaction, it continues to be accounted for as an equity method investment and is reported in the New Energy Technologies SBU reportable segment.

Alto Maipo — In May 2022, Alto Maipo emerged from bankruptcy in accordance with Chapter 11 of the U.S. Bankruptcy Code. Alto Maipo, as restructured, is considered a VIE. As the Company lacks the power to make significant decisions, it does not meet the criteria to be considered the primary beneficiary of Alto Maipo and therefore does not consolidate the entity. The Company has elected the fair value option to account for its investment in Alto Maipo as management believes this approach will better reflect the economics of its equity interest. As of both March 31, 2025 and December 31, 2024, the fair value was insignificant. Alto Maipo is reported in the Renewables SBU reportable segment.

Barry — The Company holds a 100% ownership interest in AES Barry Ltd. ("Barry"), a dormant entity in the U.K. that disposed of its generation and other operating assets. Due to a debt agreement, no material financial or operating decisions can be made without the banks' consent, and the Company does not control Barry. As of March 31, 2025 and December 31, 2024, other long-term liabilities included $42 million and $41 million, respectively, related to this debt agreement. Barry is reported in the Energy Infrastructure SBU reportable segment.

8. OBLIGATIONS

Recourse Debt — Recourse debt represents debt that the Parent Company has an obligation to settle. This can be debt issued directly by the Parent Company or debt issued by a subsidiary under which the Parent Company has explicit commitments such as guarantees, indemnities, letters of credit, or agreements to settle if the subsidiary defaults.

Senior Notes due 2032 — In March 2025, the Company issued $800 million aggregate principal of 5.80% senior notes due in 2032. The Company used the proceeds from this issuance to purchase via tender offer a portion of its 3.30% senior notes due in 2025. As a result of the latter transaction, the Company recognized a gain on extinguishment of debt of $2 million.

Commercial Paper Program — In March 2023, the Company established a commercial paper program under which the Company may issue unsecured commercial paper notes (the “Notes”) up to a maximum aggregate face amount of $750 million outstanding at any time. In April 2025, the Company executed agreements to increase the maximum aggregate face amount to $1.5 billion outstanding at any time. The maturities of the Notes may vary but will not exceed 397 days from the date of issuance. The proceeds of the Notes will be used for general corporate purposes. The Notes will be sold on customary terms in the U.S. commercial paper market on a private placement basis. The commercial paper program is backed by the Company's $1.8 billion in revolving credit facilities, and the Company cannot issue commercial paper in an aggregate amount exceeding the then available capacity under its revolving credit facilities. For the three months ended March 31, 2025, the Company borrowed approximately $6.8 billion and repaid approximately $6.5 billion under the commercial paper program, with average daily outstanding borrowings of $217 million. As of March 31, 2025, the Company had $255 million outstanding borrowings under the commercial paper program with a weighted average interest rate of 4.94%. The Notes are classified as current.

Revolving Credit Facilities — In December 2024, AES executed a $300 million senior unsecured revolving credit facility, maturing in December 2026. The aggregate commitment under its previously existing revolving credit facility is $1.5 billion and matures in August 2027. As of March 31, 2025, AES had no outstanding drawings under either of its revolving credit facilities.

Non-Recourse Debt — Non-recourse debt represents debt issued by one of our subsidiaries and is only required to be repaid solely from the subsidiary's assets. Repayments of the loans, and interest thereon, is secured solely by the capital stock, physical assets, contracts, and cash flows of that subsidiary, and the Parent Company is not otherwise liable for such debt. Non-recourse debt balances on the Condensed Consolidated Balance Sheet includes $773 million of current and $11.2 billion of noncurrent non-recourse debt related to VIEs as of March 31, 2025.

During the three months ended March 31, 2025, the Company’s following subsidiaries had significant debt issuances (in millions):

Subsidiary	Issuances [1]
AES Puerto Rico Solar	$ 669
AES Andes	450

[1] These amounts do not include revolving credit facility activity at the Company’s subsidiaries.

AES Puerto Rico Solar — The Marahu project, 70% owned by AES, is currently constructing the Salinas and Jobos renewables projects in Puerto Rico, including both solar and energy storage facilities. In October 2024, the Marahu project obtained a loan guarantee for $861 million from the U.S. Department of Energy, and began drawing on the loan in the first quarter of 2025. As of March 31, 2025, there were $659 million in outstanding borrowings, maturing in 2049. The remainder of the loan will be drawn upon as required to fund construction costs.

AES Andes — In March 2025, AES Andes issued $400 million aggregate principal of 6.25% senior notes due in 2032. The net proceeds from the issuance were used to redeem the remaining $228 million aggregate principal of its 6.35% junior subordinated notes due in 2079 and to repay other existing indebtedness. As a result of the latter transaction, the Company recognized a loss on extinguishment of debt of $3 million.

In March 2024, AES Andes issued $500 million aggregate principal of 6.30% senior unsecured notes due in 2029. The net proceeds from the issuance were used to purchase via tender offer $100 million and $43 million aggregate principal of its 6.35% and 5.00% notes due in 2079 and 2025, respectively, and repay other existing indebtedness.

AES Clean Energy — In December 2024, Bellefield 2 Seller, LLC executed a construction, tax equity bridge, and letter of credit financing agreement for commitments of up to $1.7 billion. As of March 31, 2025, there were $526 million in borrowings under the facilities at an interest rate of 4.30%, maturing in 2026.

In December 2023, Bellefield Portfolio Seller, LLC and Bellefield 1 Finco, LLC, subsidiaries of AES Clean Energy Development, executed a construction, tax equity bridge, and letter of credit financing agreement for commitments of up to $2.4 billion due in 2026. As of March 31, 2025, there was $1.6 billion in outstanding borrowings under the facilities, and the net proceeds were used primarily to repay existing indebtedness and to fund development of renewables projects.

AES Clean Energy Development, AES Renewable Holdings, and sPower, an equity method investment, collectively referred to as the Issuers, entered into a Master Indenture agreement in 2022 whereby long-term notes will be issued from time to time to finance or refinance operating wind, solar, and energy storage projects that are owned by the Issuers. Each of the Issuers is considered a “Co-Issuer” and will be jointly and severally liable with each other Co-Issuer for all obligations under the facility. The aggregate carrying amount of notes at AES Clean Energy Development and AES Renewable Holdings was $1.4 billion as of March 31, 2025.

AES Clean Energy Development, AES Renewable Holdings, and sPower, collectively referred to as the Borrowers, executed two Credit Agreements for revolving credit facilities in 2021 and subsequent amendments in the following years for aggregate commitments of $3.8 billion with maturity dates in May 2027 and June 2028. Each of the Borrowers is considered a “Co-Borrower” and will be jointly and severally liable with each other Co-Borrower for all obligations under the facilities. As a result of increases in commitments used and net of repayments, AES Clean Energy Development and AES Renewable Holdings recorded, in aggregate, an increase in liabilities of $444 million in 2025, resulting in total commitments used under the revolving credit facilities, as of March 31, 2025, of $3.4 billion. As of March 31, 2025, the aggregate commitments used under the revolving credit facilities for the Co-Borrowers was $3.4 billion.

AES Puerto Rico — On June 1, 2023, AES Puerto Rico was unable to pay principal and interest obligations on its Series A Bond Loans due to insufficient funds resulting from financial difficulties at the business. AES Puerto Rico signed forbearance and standstill agreements with its noteholders in July 2023 because of the insufficiency of funds to meet these obligations. On March 5, 2024, AES Puerto Rico and its noteholders executed a financial restructuring, under which the $156 million (including interest) of 6.625% Series A Bond Loans due 2026 was exchanged for $112 million of 6.625% senior secured bonds due January 2028 and $44 million of preferred shares in AES Puerto Rico. The preferred shares bear interest at 3.125% and contain an option whereby AES may call the preferred shares to be converted into 99.9% of the ordinary shares of AES Puerto Rico between December 30, 2025 and December 30, 2027, or would have the option to settle the preferred shares in cash. The noteholders also provided a $23 million bridge loan due March 2026 bearing interest at prime plus 4%. AES Puerto Rico is required to make mandatory prepayments through cash sweeps based on excess cash (as defined in the loan agreements) available from operations on the bridge loan, senior secured bonds, and preferred shares interest. The financial restructuring was accounted for as a troubled debt restructuring in accordance with ASC 470-60, “*Troubled Debt Restructurings by Debtors”* as AES Puerto Rico was experiencing financial difficulties and the lenders granted a concession. No gain has been recognized as a result of this transaction. As of March 31, 2025, cash settlement of the preferred shares is contingent, as the amounts would not be required to be settled in cash if the option to settle the preferred shares with common shares is exercised.

AES Indiana — In March 2024, AES Indiana issued $650 million aggregate principal of 5.70% First Mortgage Bonds due April 2054. The net proceeds from this issuance were used to repay existing indebtedness, including its unsecured $300 million term loan due in November 2024 and amounts outstanding under its $350 million revolving credit agreement maturing in December 2027, and for general corporate purposes at AES Indiana.

In March 2024, IPALCO issued $400 million aggregate principal of 5.75% senior secured notes due April 2034. In April 2024, the net proceeds from this issuance, together with cash on hand, were used to redeem the outstanding $405 million of IPALCO's 3.70% senior secured notes due in September 2024.

Non-Recourse Debt Covenants, Restrictions, and Defaults — The terms of the Company's non-recourse debt include certain financial and nonfinancial covenants. These covenants are limited to subsidiary activity and vary among the subsidiaries. These covenants may include, but are not limited to, maintenance of certain reserves and financial ratios, minimum levels of working capital, and limitations on incurring additional indebtedness.

As of March 31, 2025 and December 31, 2024, approximately $512 million and $147 million, respectively, of restricted cash was maintained in accordance with certain covenants of the non-recourse debt agreements. Of these amounts, $444 million and $79 million, respectively, were included within *Restricted cash* and $68 million and $68 million, respectively, were included within *Debt service reserves and other deposits* in the accompanying Condensed Consolidated Balance Sheets. As of March 31, 2025 and December 31, 2024, approximately $143 million and $155 million, respectively, of the restricted cash balances were for collateral held to cover potential liability for current and future insurance claims being assumed by AGIC, AES' captive insurance company. Of total restricted cash and debt service reserves of $813 million, $580 million related to VIEs as of March 31, 2025.

Various lender and governmental provisions restrict the ability of certain of the Company's subsidiaries to transfer their net assets to the Parent Company. Such restricted net assets of subsidiaries amounted to approximately $822 million at March 31, 2025.

The following table summarizes the Company's subsidiary non-recourse debt in default (in millions) as of March 31, 2025. Due to the defaults, these amounts are included in the current portion of non-recourse debt unless otherwise indicated:

Subsidiary	Primary Nature of Default	Debt in Default	Net Assets (Liabilities)
AES Dominican Renewable Energy [1]	Covenant	$ 353	$ 105
AES Puerto Rico	Payment	150	(198)
AES Ilumina (Puerto Rico)	Covenant	22	8
AES Jordan Solar	Covenant	6	12
Total		$ 531	

[1] On February 6, 2025, AES Dominican Renewable Energy failed to comply with a covenant on its debt, resulting in a technical default. AES Dominican Renewable Energy is classified as held-for-sale as of March 31, 2025, therefore the associated non-recourse debt is classified in *Current held-for-sale liabilities* on the Condensed Consolidated Balance Sheets.

AES Puerto Rico is in payment default on its long-term debt and preferred shares due to failure to implement the cash sweep mechanism in accordance with the terms of the loan agreements. AES Puerto Rico is working with the noteholders to resolve this matter. All other subsidiary defaults listed are not payment defaults, but are instead technical defaults triggered by failure to comply with covenants or other requirements contained in the non-recourse debt documents of the applicable subsidiary.

AES Mexico Generation Holdings (TEG and TEP) — In December 2024, AES Mexico Generation Holdings executed an amendment to the original credit agreement with its noteholders, obtaining waivers for prior covenant default events through June 30, 2025. As of March 31, 2025, the AES Mexico Generation Holdings debt balance of $129 million was not in default.

The AES Corporation's recourse debt agreements include cross-default clauses that will trigger if a subsidiary provides 20% or more of the Parent Company's total cash distributions from businesses for the four most recently completed fiscal quarters and has an outstanding principal in excess of $200 million in default. As of March 31, 2025, the Company's subsidiaries had no defaults which resulted in a cross-default under the recourse debt of the Parent Company. In the event the Parent Company is not in compliance with the financial covenants of its revolving credit facilities, restricted payments will be limited to regular quarterly shareholder dividends at the then-prevailing rate. Payment defaults and bankruptcy defaults would preclude the making of any restricted payments.

Supplier Financing Arrangements

With some purchases, the Company enters into supplier financing arrangements with the goal of securing improved payment terms. The Company confirms supplier invoices to an intermediary financial institution who will pay the supplier directly or reimburse the Company for payments made to the supplier. These arrangements are included in *Supplier financing arrangements* on the Condensed Consolidated Balance Sheets in *Current liabilities* as the amounts are all due in less than a year; the related interest expense is recorded on the Condensed Consolidated Statements of Operations within *Interest expense*.

The Company had total outstanding balances of $605 million as of March 31, 2025. These agreements ranged from less than $1 million to $75 million with a weighted average interest rate of 6.54%. Of the amounts outstanding under supplier financing arrangements as of March 31, 2025, $416 million were guaranteed, including $301 million guaranteed by the Parent Company and $115 million guaranteed by subsidiaries.

The Company had total outstanding balances of $917 million as of December 31, 2024. These agreements ranged from less than $1 million to $69 million with a weighted average interest rate of 6.83%. Of the amounts outstanding under supplier financing arrangements as of December 31, 2024, $616 million were guaranteed, including $245 million guaranteed by the Parent Company and $371 million guaranteed by subsidiaries.

9. COMMITMENTS AND CONTINGENCIES

Parent Guarantees, Letters of Credit, and Commitments — In connection with certain project financings (including tax equity transactions), acquisitions and dispositions, power purchases, EPC contracts, and other agreements, the Parent Company has expressly undertaken limited obligations and commitments, most of which will only be effective or will be terminated upon the occurrence of future events. In the normal course of business, the Parent Company has entered into various agreements, mainly guarantees and letters of credit, to provide financial or performance assurance to third parties on behalf of AES businesses. These agreements are entered into primarily to support or enhance the creditworthiness otherwise achieved by a business on a stand-alone basis, thereby facilitating the availability of sufficient credit to accomplish their intended business purposes. Most of the contingent obligations relate to future performance commitments which the Company or its businesses expect to fulfill within the normal course of business. The expiration dates of these guarantees vary from less than 1 year to no more than 32 years.

The following table summarizes the Parent Company's contingent contractual obligations as of March 31, 2025. Amounts presented in the following table represent the Parent Company's current undiscounted exposure to guarantees and the range of maximum undiscounted potential exposure per individual agreement. The maximum exposure is not reduced by the amounts, if any, that could be recovered under the recourse or collateralization provisions in the guarantees.

Contingent Contractual Obligations	Maximum Exposure (in millions)	Number of Agreements	Maximum Exposure Range for Each Agreement (in millions)
Guarantees and commitments	$ 4,322	97	<$1 — 1,110
Letters of credit under bilateral agreements	324	7	$11 — 88
Letters of credit under the unsecured credit facilities	107	25	<$1 — 30
Letters of credit under the revolving credit facilities	19	9	<$1 — 4
Surety bonds	2	2	<$1 — 1
Total	$ 4,774	140	

During the three months ended March 31, 2025, the Company paid letter of credit fees ranging from 1% to 3% per annum on the outstanding amounts of letters of credit.

Subsidiary Guarantees and Letters of Credit — In connection with certain project financings (including tax equity transactions), acquisitions and dispositions, power purchases, EPC contracts, and other agreements, certain of the Company's subsidiaries have expressly undertaken limited obligations and commitments, most of which will only be effective or will be terminated upon the occurrence of future events, or are customary payment guarantees for amounts due under existing contracts in the normal course of business. These contingent contractual obligations are issued at the subsidiary level and are non-recourse to the Parent Company. As of March 31, 2025, the maximum undiscounted potential exposure to guarantees and letters of credit issued by our subsidiaries was $5.4 billion, including $1.9 billion of customary payment guarantees under EPC contracts and other agreements, $1.4 billion of letters of credit outstanding, $1.2 billion of surety bonds and other guarantees issued by insurance companies, and $828 million of tax equity financing related guarantees.

Contingencies

Environmental — The Company periodically reviews its obligations as they relate to compliance with environmental laws, including site restoration and remediation. For the periods ended March 31, 2025 and December 31, 2024, the Company recognized liabilities of $1 million and $2 million for projected environmental remediation costs, respectively. These amounts are reported on the Condensed Consolidated Balance Sheets within *Accrued and other liabilities* and *Other noncurrent liabilities*. Due to the uncertainties associated with environmental assessment and remediation activities, future costs of compliance or remediation could be higher or lower than the amount currently accrued. Moreover, where no liability has been recognized, it is reasonably possible that the Company may be required to incur remediation costs or make expenditures in amounts that could be material but could not be estimated as of March 31, 2025. Unasserted claims are not included in the range of potential losses related to environmental matters until it is probable that a claim will be asserted and there is a reasonable possibility that the outcome will be unfavorable. In aggregate, the Company estimates the range of potential losses related to environmental matters, where estimable, to be between $1 million and $5 million. The amounts considered reasonably possible do not include amounts accrued as discussed above.

Litigation — The Company is involved in certain claims, suits and legal proceedings in the normal course of business. The Company accrues for litigation and claims when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. The Company has recognized aggregate liabilities for all claims of approximately $24 million and $5 million as of March 31, 2025 and December 31, 2024, respectively. These amounts are reported on the Condensed Consolidated Balance Sheets within *Accrued and other liabilities* and *Other noncurrent liabilities*. A significant portion of these accrued liabilities relate to regulatory matters and commercial disputes in international jurisdictions. There can be no assurance that these accrued liabilities will be adequate to cover all existing and future claims or that we will have the liquidity to pay such claims as they arise.

Where no accrued liability has been recognized, it is reasonably possible that some matters could be decided unfavorably to the Company and could require the Company to pay damages or make expenditures in amounts that could be material but could not be estimated as of March 31, 2025. The material contingencies where a loss is reasonably possible primarily include disputes with offtakers, suppliers and EPC contractors; alleged breaches of contract; alleged violation of laws and regulations; income tax and non-income tax matters with tax authorities; and regulatory matters. In aggregate, the Company estimates the range of potential losses, where estimable, related to these reasonably possible material contingencies to be between $174 million and $223 million. Included in this range is a reasonably possible legal contingency for environmental remediation costs related to AES Sul, a business the Company disposed of in 2016, estimated to be approximately R$15 million to R$60 million ($3 million to $10 million). The amounts considered reasonably possible do not include the amounts accrued, as discussed above. These material contingencies do not include income tax-related contingencies which are considered part of our uncertain tax positions.

10. LEASES

LESSOR — The Company has operating leases for certain generation contracts that contain provisions to provide capacity to a customer, which is a stand-ready obligation to deliver energy when required by the customer. Capacity obligations are generally considered lease elements as they cover the majority of available output from a facility. The allocation of contract payments between the lease and non-lease elements is made at the inception of the lease. Lease receipts from such contracts are recognized as lease revenue on a straight-line basis over the lease term, whereas variable lease receipts are recognized when earned.

The following table presents lease revenue from operating leases in which the Company is the lessor, recognized in *Revenue* on the Condensed Consolidated Statements of Operations for the periods indicated (in millions):

	Three Months Ended March 31,	
Operating Lease Revenue	**2025**	**2024**
Non-variable lease revenue	$ 76	$ 102
Variable lease revenue	15	13
Total lease revenue	$ 91	$ 115

The following table presents the underlying gross assets and accumulated depreciation of operating leases included in *Property, plant and equipment, net* on the Condensed Consolidated Balance Sheets as of the dates indicated (in millions):

Property, Plant and Equipment, Net	March 31, 2025	December 31, 2024
Gross assets	$ 2,119	$ 1,085
Less: Accumulated depreciation	(240)	(218)
Net assets	$ 1,879	$ 867

The option to extend or terminate a lease is based on customary early termination provisions in the contract, such as payment defaults, bankruptcy, or lack of performance on energy delivery. The Company has not recognized any early terminations as of March 31, 2025. Certain leases may provide for variable lease payments based on usage or index-based (e.g., the U.S. Consumer Price Index) adjustments to lease payments.

The following table shows the future lease receipts as of March 31, 2025 for the remainder of 2025 through 2029 and thereafter (in millions):

	Future Cash Receipts for	
	Sales-Type Leases	Operating Leases
2025	$ 33	$ 223
2026	44	136
2027	44	65
2028	44	—
2029	44	—
Thereafter	602	1
Total	$ 811	$ 425
Less: Imputed interest	(362)	
Present value of total lease receipts	$ 449	

Battery Storage Lease Arrangements — The Company constructs and operates projects consisting only of a stand-alone BESS facility, as well as projects that pair a BESS with solar energy systems. These projects allow more flexibility on when to provide energy to the grid. The Company will enter into PPAs for the full output of the facility that allow customers the ability to determine when to charge and discharge the BESS. Generally, these arrangements include both lease and non-lease elements under ASC 842, with the BESS component typically constituting a sales-type lease.

The following table presents variable lease revenue, interest income, and gains (losses) on commencement of sales-type leases in which the Company is the lessor, for the periods indicated (in millions):

	Three Months Ended March 31,	
Sales-Type Leases	2025	2024
Variable lease revenue	$ 1	$ 1
Interest income	6	4
Net gains (losses) on commencement of sales-types leases [1]	(9)	5

[1] Gains and losses are recognized in *Other income* and *Other expense*, respectively, in the Condensed Consolidated Statement of Operations. See Note 15—*Other Income and Expense* for further information.

11. REDEEMABLE STOCK OF SUBSIDIARIES

Noncontrolling interests with redemption features that are not solely within the control of the issuer are classified as temporary equity and are included in *Redeemable stock of subsidiaries* on the Condensed Consolidated Balance Sheets. Generally, these instruments are initially measured at fair value and are subsequently adjusted for income and dividends allocated to the noncontrolling interest. Subsequent measurement varies depending on whether the instrument is probable of becoming redeemable. For those securities that are currently redeemable or where it is probable that the instrument will become redeemable, any changes from the carrying value to redemption value are recognized in temporary equity against *Retained earnings* or *Additional paid-in capital* in the absence of retained earnings. When the instrument is not probable of becoming redeemable, no adjustment to the carrying value is recognized.

The following table is a reconciliation of changes in redeemable stock of subsidiaries for the periods indicated (in millions):

	Three Months Ended March 31,	
	2025	2024
Balance at the beginning of the period	$ 938	$ 1,464
Net income (loss)	30	(89)
Other comprehensive income	—	35
Adjustments to redemption value of redeemable stock of subsidiaries	—	6
Reclassification of redeemable stock of subsidiaries to noncontrolling interests	(38)	—
Distributions to holders of redeemable stock of subsidiaries	(31)	(14)
Contributions from holders of redeemable stock of subsidiaries	—	26
Sales of redeemable stock of subsidiaries	—	74
Balance at the end of the period	$ 899	$ 1,502

The following table summarizes the Company's redeemable stock of subsidiaries balances as of the dates indicated (in millions):

	March 31, 2025	December 31, 2024
IPALCO common stock	$ 836	$ 835
AES Clean Energy tax equity partnerships	63	65
AES Indiana Pike County BESS tax equity partnership	—	38
Total redeemable stock of subsidiaries	$ 899	$ 938

AES Clean Energy Tax Equity Partnerships — The majority of solar projects in the U.S. have been financed with tax equity structures, in which tax equity investors receive a portion of the economic attributes of the facilities, including tax attributes, that vary over the life of the projects. The substance of such arrangements is that of a preferred structure, whereby tax equity investors are granted preferential returns in the form of significant earnings and tax allocations from the partnership, until a specified internal rate of return is achieved.

In some cases, these agreements contain certain partnership rights, though not currently in effect, that may enable the tax equity investor to exit in the future. As a result, the noncontrolling ownership interest is considered temporary equity. Some of these tax equity partnership agreements have redemption features dependent upon the passage of time, therefore the noncontrolling ownership interests are probable of becoming redeemable. As of March 31, 2025, the carrying values of these noncontrolling ownership interests exceeded the redemption values, therefore no adjustments to the carrying values were necessary. Certain other tax equity partnership agreements have redemption features contingent upon the underlying assets achieving agreed-upon project milestones. The Company has concluded it is probable that these projects will reach the specified milestones, therefore the noncontrolling ownership interests are not probable of becoming redeemable and subsequent adjustments to the carrying value were not required.

During the three months ended March 31, 2024, AES Clean Energy, through multiple transactions, sold noncontrolling interests in project companies to tax equity investors, resulting in increases to *Redeemable stock of subsidiaries* of $74 million, net of transaction costs. AES Clean Energy is reported in the Renewables SBU reportable segment.

AES Indiana Pike County BESS — The redemption feature of the tax equity partnership agreement was contingent upon the underlying assets being placed in service by a guaranteed date. In March 2025, the Pike County BESS project was placed in service, resulting in the expiration of the redemption feature. As a result, the noncontrolling ownership interest of $38 million was reclassified from *Redeemable stock of subsidiaries* to *Noncontrolling interests* on the Condensed Consolidated Balance Sheets. AES Indiana is reported in the Utilities SBU reportable segment.

12. EQUITY

Equity Units

In March 2021, the Company issued 10,430,500 Equity Units with a total notional value of $1,043 million. Each Equity Unit had a stated amount of $100 and was initially issued as a Corporate Unit, consisting of a forward stock purchase contract ("2024 Purchase Contracts") and a 10% undivided beneficial ownership interest in one share of 0% Series A Cumulative Perpetual Convertible Preferred Stock, issued without par and with a liquidation preference of $1,000 per share ("Series A Preferred Stock").

The Company concluded that the Equity Units should be accounted for as one unit of account based on the economic linkage between the 2024 Purchase Contracts and the Series A Preferred Stock, as well as the Company's assessment of the applicable accounting guidance relating to combining freestanding instruments. The Equity Units represent mandatorily convertible preferred stock. Accordingly, the shares associated with the combined instrument were reflected in diluted earnings per share using the if-converted method.

In conjunction with the issuance of the Equity Units, the Company received approximately $1 billion in proceeds, net of underwriting costs and commissions, before offering expenses. The proceeds for the issuance of 1,043,050 shares were attributed to the Series A Preferred Stock for $838 million and $205 million for the present value of the quarterly payments due to holders of the 2024 Purchase Contracts ("Contract Adjustment Payments"). The proceeds were used for the development of the AES renewables businesses, U.S. utility businesses, LNG infrastructure, and for other developments determined by management.

The Series A Preferred Stock did not bear any dividends and the liquidation preference of the convertible preferred stock did not accrete. The Series A Preferred Stock had no maturity date and would remain outstanding unless converted by holders or redeemed by the Company. Holders of the preferred shares had limited voting rights. The Series A Preferred Stock was pledged as collateral to support holders' purchase obligations under the 2024 Purchase Contracts, which obligated the holders to purchase, on February 15, 2024, for a price of $100 in cash, a maximum number of 57,467,883 shares of the Company's common stock (subject to customary anti-dilution adjustments). The initial settlement rate determining the number of shares that each holder must purchase could not exceed the maximum settlement rate and was determined over a market value averaging period preceding February 15, 2024. The initial maximum settlement rate of 3.864 was calculated using an initial reference price of $25.88, equal to the last reported sale price of the Company's common stock on March 4, 2021. On February 15, 2024, the Series A Preferred Stock was tendered to satisfy the 2024 Purchase Contract's settlement price and the Corporate Units were converted into shares of the Company's common stock at the maximum settlement rate of 3.8859, equivalent to a reference price of $25.73. The Series A Preferred Stock was canceled and 40,531,845 shares of AES common stock were issued upon conversion.

The Company paid Contract Adjustment Payments to the holders of the 2024 Purchase Contracts at a rate of 6.875% per annum, payable quarterly in arrears on February 15, May 15, August 15, and November 15, commencing on May 15, 2021. The $205 million present value of the Contract Adjustment Payments at inception reduced the Series A Preferred Stock. As each quarterly Contract Adjustment Payment was made, the related liability was reduced and the difference between the cash payment and the present value accreted to interest expense, approximately $5 million over the three-year term. The final Contract Adjustment Payments were made on February 15, 2024.

Equity Transactions with Noncontrolling Interests

AES Clean Energy Tax Equity Partnerships — The majority of solar projects in the U.S. have been financed with tax equity structures, in which tax equity investors receive a portion of the economic attributes of the facilities, including tax attributes, that vary over the life of the projects. The substance of such arrangements is that of a preferred structure, whereby tax equity investors are granted preferential returns in the form of significant earnings and tax allocations from the partnership, until a specified internal rate of return is achieved.

During the three months ended March 31, 2025, AES Renewable Holdings sold a noncontrolling interest in the Rexford project company to a tax equity investor, resulting in an increase to NCI of $82 million. AES Renewable Holdings is reported in the Renewables SBU reportable segment.

AES Indiana Pike County BESS — In March 2025, as a result of the Pike County BESS project being placed in service, the noncontrolling ownership interest of $38 million was reclassified from *Redeemable stock of subsidiaries* to *Noncontrolling interests* on the Condensed Consolidated Balance Sheets. See Note 11—*Redeemable Stock of Subsidiaries* for further information. Subsequently, AES Indiana received an additional $150 million from the tax equity investor, resulting in an increase to NCI. AES Indiana is reported in the Utilities SBU reportable segment.

Chile Renovables — Under its renewables partnership agreement with Global Infrastructure Management, LLC ("GIP"), AES Andes will contribute a specified pipeline of renewables development projects to Chile Renovables as the projects reach commercial operations, and GIP may make additional contributions to maintain its 49% ownership interest. In February 2024, AES Andes completed the sale of Mesamávida to Chile Renovables for $40 million, resulting in an increase to NCI of $53 million and a decrease to additional paid-in capital of $13 million.

In December 2023, Chile Renovables issued $275 million of preferred shares to GIP, the proceeds of which are being used to fund the development of an additional pipeline of renewables projects. Under the terms of the operating agreement, GIP receives an escalating specified internal rate of return up until the point the projects reach commercial operations. As each project reaches commercial operations, the preferred shares convert to common stock and GIP may make additional contributions to maintain its 49% ownership interest. In February 2025, the Andes Solar 2a BESS project reached commercial operations. The preferred shares were converted to common stock and GIP made additional contributions of $14 million, resulting in an increase to NCI of $17 million and a decrease to additional paid-in capital of $3 million.

As the Company maintained control after each of these transactions, Chile Renovables continues to be consolidated by the Company within the Renewables SBU reportable segment.

AES Renewable Holdings — In December 2023, AES Renewable Holdings issued preferred shares in a portfolio of operating assets ("OpCo 1"). Under the terms of the operating agreement, the preferred shareholder will receive cash distributions disproportionate to its ownership interest in OpCo 1 until a specified internal rate of return is reached. AES Renewable Holdings is reported in the Renewables SBU reportable segment.

Cochrane — In September 2020, AES Andes issued preferred shares in Cochrane, a coal-fired plant in Chile. Under the terms of the operating agreement, preferred shareholders have the right to receive an annual amount of $12 million from any dividends or distributions of capital, until reaching their original investment plus a specified rate of return. Cochrane is reported in the Energy Infrastructure SBU reportable segment.

The following table summarizes the net income (loss) attributable to The AES Corporation and all transfers (to) from noncontrolling interests for the periods indicated (in millions):

	Three Months Ended March 31,	
	2025	2024
Net income attributable to The AES Corporation	$ 46	$ 432
Transfers (to) from noncontrolling interest:		
Increase (decrease) in The AES Corporation's paid-in capital for sale of subsidiary shares	(15)	1
Change from net income attributable to The AES Corporation and transfers (to) from noncontrolling interests	$ 31	$ 433

Accumulated Other Comprehensive Loss — The following table summarizes the changes in AOCL by component, net of tax and NCI, for the three months ended March 31, 2025 (in millions):

	Foreign currency translation adjustments, net	Change in fair value of derivatives, net	Pension adjustments, net	Change in fair value option liabilities, net	Total
Balance at the beginning of the period	$ (1,282)	$ 537	$ (24)	$ 3	$ (766)
Other comprehensive income (loss) before reclassifications	30	(98)	1	—	(67)
Amount reclassified to earnings	—	(15)	—	—	(15)
Other comprehensive income (loss)	30	(113)	1	—	(82)
Balance at the end of the period	$ (1,252)	$ 424	$ (23)	$ 3	$ (848)

Reclassifications out of AOCL are presented in the following table. The Company's accounting policy for releasing the income tax effects from AOCL occurs on a portfolio basis. Amounts for the periods indicated are in millions and those in parentheses indicate debits to the Condensed Consolidated Statements of Operations:

	Three Months Ended March 31,	
AOCL Components	2025	2024
Change in fair value of derivatives, net		
Non-regulated cost of sales	1	(1)
Interest expense	16	1
Foreign currency transaction losses	3	1
Income (loss) from continuing operations before taxes and equity in earnings of affiliates	20	1
Income tax benefit (expense)	(6)	—
Net equity in losses of affiliates	—	1
Net income (loss)	14	2
Less: Net loss attributable to noncontrolling interests and redeemable stock of subsidiaries	1	—
Net income (loss) attributable to The AES Corporation	$ 15	$ 2

Common Stock Dividends — The Parent Company paid dividends of $0.17595 per outstanding share to its common stockholders during the first quarter of 2025 for dividends declared in December 2024.

On February 20, 2025, the Board of Directors declared a quarterly common stock dividend of $0.17595 per share payable on May 15, 2025, to shareholders of record at the close of business on May 1, 2025.

13. SEGMENTS

The segment reporting structure uses the Company's management reporting structure as its foundation to reflect how the Company manages the businesses internally. The management reporting structure is composed of four SBUs, mainly organized by technology, led by our President and Chief Executive Officer, who is our Chief Operating Decision Maker. Using the accounting guidance on segment reporting, the Company determined that its four operating segments are aligned with its four reportable segments corresponding to its SBUs.

- *Renewables* — Solar, wind, energy storage, and hydro generation facilities;
- *Utilities* — AES Indiana, AES Ohio, and AES El Salvador regulated utilities and their generation facilities;
- *Energy Infrastructure* — Natural gas, LNG, coal, pet coke, diesel, and oil generation facilities; and
- *New Energy Technologies* — Investments in Fluence, Uplight, Maximo, and other new and innovative energy technology businesses.

Prior to the first quarter of 2025, our businesses in Chile (which had a mix of generation sources, including renewables, that were pooled to service our existing PPAs initially entered into for sale of the output of the coal plants) were reported in the Energy Infrastructure SBU. After the sale or disconnection of a significant portion of AES Andes' coal plants and the expiration of its coal-indexed contracts with regulated customers at the end of 2024, the results of our businesses in Chile, excluding the two remaining coal plants, are now reported as part of the Renewables SBU in financial information regularly reviewed by the Chief Operating Decision Maker. The results of the two remaining coal plants in Chile, Angamos and Cochrane, remain within the Energy Infrastructure SBU. As the composition of the segments has changed in the first quarter of 2025, the segment information for prior comparative periods has been retrospectively revised to reflect AES Andes' renewables partnership with GIP, Chile Renovables, which is separable from the rest of the AES Andes portfolio, as part of the Renewables SBU. We determined that there was no separately identifiable financial information for the other renewables in the AES Andes portfolio as they were servicing the same coal-indexed PPAs as the coal facilities prior to 2025, therefore the rest of the renewables portfolio at AES Andes is presented within the Energy Infrastructure SBU in the 2024 segment information presented. Revenue and Adjusted EBITDA for AES Andes that are presented within the Energy Infrastructure SBU in historical periods and within the Renewables SBU in 2025 were $203 million and $22 million, respectively, during the first quarter of 2025.

Our Renewables, Utilities, and Energy Infrastructure SBUs participate in our generation business line, in which we own and/or operate power plants to generate and sell power to customers, such as utilities, industrial users, and other intermediaries. Our Utilities SBU participates in our utilities business line, in which we own and/or operate utilities to generate or purchase, distribute, transmit, and sell electricity to end-user customers in the residential, commercial, industrial, and governmental sectors within a defined service area. In certain circumstances, our utilities also generate and sell electricity on the wholesale market. Our New Energy Technologies SBU includes investments in new and innovative technologies to support leading-edge greener energy solutions.

Included in "Corporate and Other" are the results of AES Global Insurance Company, LLC ("AGIC"), AES' captive insurance company; corporate overhead costs which are not directly associated with the operations of our four reportable segments; and certain intercompany charges such as self-insurance premiums which are fully eliminated in consolidation.

The Company uses Adjusted EBITDA as its primary segment performance measure. Adjusted EBITDA, a non-GAAP measure, is defined by the Company as earnings before interest income and expense, taxes, depreciation, amortization, and accretion of AROs, adjusted for the impact of NCI and interest, taxes, depreciation, amortization, and accretion of AROs of our equity affiliates, and adding back interest income recognized under service concession arrangements; excluding gains or losses of both consolidated entities and entities accounted for under the equity method due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits, and costs associated with dispositions and acquisitions of business interests, including early plant closures, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring; and (f) costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts.

The Company has concluded Adjusted EBITDA better reflects the underlying business performance of the Company and is the most relevant measure considered in the Company's internal evaluation of the financial performance of its segments. Additionally, given its large number of businesses and overall complexity, the Company concluded that Adjusted EBITDA is a more transparent measure that better assists investors in determining which businesses have the greatest impact on the Company's results.

Revenue and Adjusted EBITDA are presented before inter-segment eliminations, which includes the effect of intercompany transactions with other segments except for charges for certain management fees and the write-off of intercompany balances, as applicable. All intra-segment activity has been eliminated within the segment. Inter-segment activity has been eliminated within the total consolidated results.

The following tables present financial information by segment for the periods indicated (in millions):

	Three Months Ended March 31, 2025				
	Renewables SBU	Utilities SBU	Energy Infrastructure SBU	New Energy Technologies SBU	Total
Revenue	$ 666	$ 1,009	$ 1,320	$ —	$ 2,995
Corporate and other					36
Eliminations					(105)
Total Revenue					$ 2,926
Less:					
Total cost of sales excluding depreciation, amortization, and accretion of AROs [1]	466	730	1,050	(1)	
Other segment items [2]	39	56	16	26	
Segment Adjusted EBITDA	$ 161	$ 223	$ 254	$ (25)	$ 613
Reconciliation to income from continuing operations before taxes					
Corporate and other					(24)
Eliminations					2
Interest expense					(342)
Interest income					69
Depreciation, amortization, and accretion of AROs					(337)
Adjusted for:					
Noncontrolling interests and redeemable stock of subsidiaries					134
Income tax expense (benefit), interest expense (income), and depreciation, amortization, and accretion of AROs from equity affiliates					(36)
Interest income recognized under service concession arrangements					(15)
Unrealized derivative and equity securities gains					1
Unrealized foreign currency losses					7
Disposition/acquisition losses					(41)
Impairment losses					(33)
Loss on extinguishment of debt					(8)
Restructuring costs					(46)
Income from continuing operations before taxes					$ (56)

[1] Segment-level total cost of sales excluding depreciation, amortization, and accretion of AROs is considered regularly provided to the chief operating decision maker. Total cost of sales excluding depreciation, amortization, and accretion of AROs includes items such as fuel cost, electricity purchases, transmission charges, supplies, salaries and wages, consulting costs, IT costs, market fees, insurance, and lease expense.

[2] Other segment items for each reportable segment includes:

Renewables SBU — business development costs, miscellaneous gains and losses in *Other income* and *Other expense*, realized foreign currency gains and losses, earnings from equity affiliates, and adjustment for noncontrolling interest expense.

Utilities SBU — miscellaneous gains and losses in *Other income* and *Other expense*, earnings from equity affiliates, and adjustment for noncontrolling interest expense.

Energy Infrastructure SBU — business development costs, miscellaneous gains and losses in *Other income* and *Other expense*, realized foreign currency gains and losses, earnings from equity affiliates, and adjustment for noncontrolling interest expense.

New Energy Technologies SBU — earnings from equity affiliates, and miscellaneous gains and losses in *Other income* and *Other expense*.

	Three Months Ended March 31, 2024				
	Renewables SBU	Utilities SBU	Energy Infrastructure SBU	New Energy Technologies SBU	Total
Revenue	$ 643	$ 873	$ 1,609	$ —	$ 3,125
Corporate and other					33
Eliminations					(73)
Total Revenue					$ 3,085
Less:					
Total cost of sales excluding depreciation, amortization, and accretion of AROs [1]	459	642	1,132	1	
Other segment items [2]	73	49	121	16

Income from continuing operations before taxes					$ 262

(1) Segment-level total cost of sales excluding depreciation, amortization, and accretion of AROs is considered regularly provided to the chief operating decision maker. Total cost of sales excluding depreciation, amortization, and accretion of AROs includes items such as fuel cost, electricity purchases, transmission charges, supplies, salaries and wages, consulting costs, IT costs, market fees, insurance, and lease expense.

(2) Other segment items for each reportable segment includes:

Renewables SBU — business development costs, miscellaneous gains and losses in *Other income* and *Other expense*, realized foreign currency gains and losses, earnings from equity affiliates, and adjustment for noncontrolling interest expense.

Utilities SBU — miscellaneous gains and losses in *Other income* and *Other expense*, earnings from equity affiliates, and adjustment for noncontrolling interest expense.

Energy Infrastructure SBU — business development costs, miscellaneous gains and losses in *Other income* and *Other expense*, realized foreign currency gains and losses, earnings from equity affiliates, and adjustment for noncontrolling interest expense.

New Energy Technologies SBU — earnings from equity affiliates, and miscellaneous gains and losses in *Other income* and *Other expense*.

The Company uses long-lived assets as its measure of segment assets. Long-lived assets include amounts recorded in *Property, plant and equipment, net* and right-of-use assets for operating leases recorded in *Other noncurrent assets* on the Condensed Consolidated Balance Sheets.

Long-Lived Assets	March 31, 2025	December 31, 2024
Renewables SBU	$ 20,576	$ 19,151
Utilities SBU	8,658	8,535

14. REVENUE

The following table presents our revenue from contracts with customers and other revenue for the periods indicated (in millions):

	Three Months Ended March 31, 2025					
	Renewables SBU	Utilities SBU	Energy Infrastructure SBU	New Energy Technologies SBU	Corporate, Other and Eliminations	Total
Non-Regulated Revenue						
Revenue from contracts with customers	$ 620	$ 23	$ 1,222	$ —	$ (69)	$ 1,796
Other non-regulated revenue [1]	46	1	98	—	—	145
Total non-regulated revenue	666	24	1,320	—	(69)	1,941
Regulated Revenue						
Revenue from contracts with customers	—	976	—	—	—	976
Other regulated revenue	—	9	—	—	—	9
Total regulated revenue	—	985	—	—	—	985
Total revenue	$ 666	$ 1,009	$ 1,320	$ —	$ (69)	$ 2,926

	Three Months Ended March 31, 2024					
	Renewables SBU	Utilities SBU	Energy Infrastructure SBU	New Energy Technologies SBU	Corporate, Other and Eliminations	Total
Non-Regulated Revenue						
Revenue from contracts with customers	$ 594	$ 19	$ 1,402	$ —	$ (40)	$ 1,975
Other non-regulated revenue [1]	49	1	207	—	—	257
Total non-regulated revenue	643	20	1,609	—	(40)	2,232
Regulated Revenue						
Revenue from contracts with customers	—	847	—	—	—	847
Other regulated revenue	—	6	—	—	—	6
Total regulated revenue	—	853	—	—	—	853
Total revenue	$ 643	$ 873	$ 1,609	$ —	$ (40)	$ 3,085

[1] Other non-regulated revenue primarily includes lease and derivative revenue not accounted for under ASC 606.

Contract Balances — The timing of revenue recognition, billings, and cash collections results in accounts receivable and contract liabilities. The contract liabilities from contracts with customers were $243 million and $237 million as of March 31, 2025 and December 31, 2024, respectively.

During the three months ended March 31, 2025 and 2024, we recognized revenue of $7 million and $46 million, respectively, that was included in the corresponding contract liability balance at the beginning of the periods.

In June 2023, the Company closed on an agreement to terminate the PPA for the Warrior Run coal-fired power plant for total consideration of $357 million, to be paid by the offtaker through the end of the previous contract term in January 2030. Under the termination agreement, the plant continued providing capacity through May 2024. The

termination represented a contract modification under which the discounted termination payments, as well as a pre-existing contract liability, were recognized as revenue on a straight-line basis over the remaining performance obligation period for approximately $32 million per month. On February 1, 2024, the Company executed a receivable sale agreement to transfer all of its rights, title, and interest in the remaining future cash flows under this agreement. At the time of execution, the transaction was considered a sale of future revenue under U.S. GAAP, and as such, the net proceeds of $273 million were recorded as debt. Upon completion of the remaining performance obligation in May 2024, the corresponding receivable balance of $267 million, net of valuation allowance of $7 million, and the remaining debt balance of $260 million were derecognized upon accounting for the transaction as a sale of receivables.

A significant financing arrangement exists for our Mong Duong plant in Vietnam. The plant was constructed under a build, operate, and transfer contract and will be transferred to the Vietnamese government after the completion of a 25 year PPA. The performance obligation to construct the facility was substantially completed in 2015. Contract consideration related to the construction, but not yet collected through the 25 year PPA, was reflected on the Condensed Consolidated Balance Sheet. As of March 31, 2025 and December 31, 2024, Mong Duong met the held-for-sale criteria and the loan receivable balance of $934 million and $963 million, net of CECL reserves of $23 million and $23 million, respectively, was classified in held-for-sale assets.

Remaining Performance Obligations — The transaction price allocated to remaining performance obligations represents future consideration for unsatisfied (or partially unsatisfied) performance obligations at the end of the reporting period. As of March 31, 2025, the aggregate amount of transaction price allocated to remaining performance obligations was $7 million, primarily consisting of fixed consideration for the sale of renewable energy credits in long-term contracts in the U.S. We expect to recognize revenue of approximately $1 million per year between 2025 and 2029 and the remainder thereafter.

15. OTHER INCOME AND EXPENSE

Other income generally includes gains on insurance recoveries in excess of property damage, gains on asset sales and liability extinguishments, favorable judgments on contingencies, allowance for funds used during construction, gains on contingent consideration remeasurement, and other income from miscellaneous transactions. Other expense generally includes losses on asset sales and dispositions, losses on legal contingencies, losses on remeasurement of contingent consideration, losses at commencement of sales-type leases, and losses from other miscellaneous transactions. The components are summarized as follows (in millions):

		Three Months Ended March 31,	
		2025	2024
Other Income	Gain on remeasurement of contingent consideration [1]	$ 1	$ 11
	AFUDC (US Utilities)	1	3
	Contract termination	—	5
	Gain on commencement of sales-type leases	—	5
	Insurance proceeds	—	5
	Gain on sale and disposal of assets	—	2
	Other income	5	4
	Total other income	$ 7	$ 35
Other Expense	Loss on remeasurement of contingent consideration [1]	$ 39	$ 5
	Loss on commencement of sales-type leases [2]	9	—
	Loss on sale and disposal of assets	3	4
	Costs related to troubled debt restructuring [3]	—	19
	Allowance for other receivables [4]	—	6
	Other	1	4
	Total other expense	$ 52	$ 38

(1) Primarily related to certain remeasurements of contingent consideration on projects acquired at AES Clean Energy.

(2) Related to losses recognized at commencement of sales-type leases at AES Renewable Holdings. See Note 10—*Leases* for further information.

(3) Related to legal expenses and other direct costs associated with the troubled debt restructuring at AES Puerto Rico. See Note 8—*Obligations* for further information.

(4) Related to a valuation allowance on receivables classified as held-for-sale at Warrior Run as of March 31, 2024. See Note 14—*Revenue* for further information.

16. ASSET IMPAIRMENT EXPENSE

The following table presents our asset impairment expense for the periods indicated (in millions):

	Three Months Ended March 31,	
	2025	2024
AES Clean Energy Development Projects (ACED)	$ 31	$ 7
Mong Duong	17	37
Other	1	2
Total	$ 49	$ 46

AES Clean Energy Development Projects — AES Clean Energy Development has a pipeline of U.S. renewables projects that are in various stages of development and construction. In some cases, if development efforts are not successful, the Company may abandon a particular project, writing off all the intangible assets and capitalized development costs incurred. The fair value of each abandoned project with no salvage value is determined to be zero as there are no future projected cash flows. The Company recognized $31 million and $7 million of pre-tax asset impairment expense related to the write-off of projects that were determined to be no longer viable during three months ended March 31, 2025 and 2024, respectively. AES Clean Energy Development is reported in the Renewables SBU reportable segment.

Mong Duong — In November 2023, the Company entered into an agreement to sell its entire 51% ownership interest in Mong Duong 2, a coal-fired plant in Vietnam, and 51% equity interest in Mong Duong Finance Holdings B.V., an SPV accounted for as an equity affiliate (collectively "Mong Duong"), and as of March 31, 2025, Mong Duong continued to be classified as held-for-sale. The carrying amount of the Mong Duong disposal group in subsequent periods exceeded the expected sales proceeds and as a result, the Company recognized pre-tax impairment expense of $17 million and $37 million during the three months ended March 31, 2025 and 2024, respectively. See Note 18—*Held-for-Sale and Dispositions* for further information. Mong Duong is reported in the Energy Infrastructure SBU reportable segment.

17. INCOME TAXES

The Company’s provision for income taxes is based on the estimated annual effective tax rate, plus discrete items. The effective tax rates for the three months ended March 31, 2025 and 2024 were (77)% and (6)%, respectively. The difference between the Company’s effective tax rates for the 2025 and 2024 periods and the U.S. statutory tax rate of 21% related primarily to foreign tax rate differentials, the impacts of foreign currency fluctuations at certain foreign subsidiaries, nondeductible expenses, valuation allowance, the impacts of U.S. investment tax credits (“ITCs”), and noncontrolling interest in our U.S. subsidiaries.

For the three months ended March 31, 2025, the Company recorded approximately $26 million of discrete tax expense resulting from allocations of losses to tax equity investors on renewables projects.

For the three months ended March 31, 2024, the Company recognized discrete tax benefit of approximately $56 million related to U.S. capital losses associated with the restructuring of a foreign holding company. The Company also recognized approximately $15 million of discrete tax expense resulting from allocations of losses to tax equity investors on renewables projects.

18. HELD-FOR-SALE AND DISPOSITIONS

Held-for-Sale

Dominican Republic Renewables — In December 2024, the Company entered into an agreement to sell 50% of its interests in AES DR Renewable Holding and its subsidiaries (collectively "Dominican Republic Renewables"), whose main objective is the operation and administration of energy generation assets from primary energy resources. After completion of the sale, the Company will retain a 50% ownership in Dominican Republic Renewables, which will be accounted for as an equity method investment. The sale is expected to close in the second quarter of 2025. As a result, Dominican Republic Renewables was classified as held-for-sale but did not meet the criteria to be reported as discontinued operations. On a consolidated basis, the carrying value of the disposal group held-for-sale as of March 31, 2025 was $116 million. Since the fair value less costs to sell exceeded the carrying value, no impairment was recorded. As of March 31, 2025, the significant assets and liabilities of Dominican Republic Renewables were property, plant and equipment and debt of $434 million and $350 million, respectively. Dominican Republic Renewables is reported in the Renewables SBU reportable segment.

Mong Duong — In November 2023, the Company entered into an agreement to sell its entire 51% ownership interest in Mong Duong 2, a coal-fired plant in Vietnam, and 51% equity interest in Mong Duong Finance Holdings B.V., an SPV accounted for as an equity affiliate (collectively "Mong Duong"). The sale is subject to regulatory approval and is expected to close by early 2026. As a result, Mong Duong was classified as held-for-sale but did not meet the criteria to be reported as discontinued operations. Since the carrying value exceeded the fair value less cost to sell, the Company recognized pre-tax impairment expense of $17 million during the three months ended March 31, 2025. On a consolidated basis, after impairment, the carrying value of the disposal group held-for-sale as of March 31, 2025 was $367 million. As of March 31, 2025, the significant assets and liabilities of Mong Duong were long-term financing receivables and debt of $934 million and $525 million, respectively. See Note 16—*Asset Impairment Expense* and Note 14—*Revenue* for further information. Mong Duong is reported in the Energy Infrastructure SBU reportable segment.

Excluding any impairment charges, pre-tax income (loss) and pre-tax income (loss) attributable to AES of businesses held-for-sale as of March 31, 2025 was as follows for the periods indicated (in millions):

	Three Months Ended March 31,	
(in millions)	2025	2024
Pre-tax income (loss) of businesses held-for-sale:		
Mong Duong	$ 26	$ 23
Dominican Republic Renewables	6	(1)
Total pre-tax income of businesses held-for-sale	$ 32	$ 22
Pre-tax income (loss) attributable to AES of businesses held-for-sale:		
Mong Duong	$ 12	$ 10
Dominican Republic Renewables	4	(1)
Total pre-tax income attributable to AES of of businesses held-for-sale	$ 16	$ 9

Dispositions

Ventanas — In January 2025, the Company completed the sale of its 100% ownership interest in Empresa Electrica Ventanas SpA and Nucleo SpA (collectively “Ventanas”), owner of a coal-fired energy generation facility in Chile, for $5 million. An immaterial loss on sale was recognized for the three months ended March 31, 2025 as a result of this transaction. The sale did not meet the criteria to be reported as discontinued operations. Prior to its sale, Ventanas was reported in the Energy Infrastructure SBU reportable segment.

Jordan — In March 2024, the Company completed the sale of approximately 26% ownership interest in the Amman East and IPP4 generation plants for a sale price of $58 million. After adjusting for dividends received since the execution of the sale and purchase agreement, the Company received a net cash payment of $45 million. The transaction resulted in a pre-tax loss on sale of $10 million, reported in *Gain (loss) on disposal and sale of business interests* on the Condensed Consolidated Statements of Operations. After completion of the sale, the Company retained 10% ownership interest in each of the businesses. The fair value of the retained interest was measured using the market approach and the businesses were deconsolidated and accounted for as equity method investments. Amman East and IPP4 are reported in the Energy Infrastructure SBU reportable segment.

19. ACQUISITIONS

Hoosier Wind — In August 2023, the Company, through its subsidiary AES Indiana, filed for IURC issuance of a Certificate of Public Convenience and Necessity approving the acquisition of 100% of the interests in Hoosier Wind Project, LLC, which is an existing 106 MW wind facility located in Benton County, Indiana. IURC approval was received on January 24, 2024, and the transaction closed on February 29, 2024. The transaction was accounted for as an asset acquisition. Of the total consideration transferred of $93 million, including transaction costs, approximately $49 million was allocated to the identifiable assets acquired on a relative fair value basis, primarily consisting of tangible wind farm assets and typical working capital items. The remaining consideration was allocated to the termination of the pre-existing PPA between AES Indiana and the Hoosier Wind Project, estimated using a discounted cash flow valuation methodology, which was deferred as a long-term regulatory asset resulting from AES Indiana regulatory approval to recover associated costs. Hoosier Wind is reported in the Utilities SBU reportable segment.

20. EARNINGS PER SHARE

Basic and diluted earnings per share are based on the weighted average number of shares of common stock and potential common stock outstanding during the period. Potential common stock, for purposes of determining

diluted earnings per share, includes the effects of dilutive RSUs, stock options, and equity units. The effect of such potential common stock is computed using the treasury stock method for RSUs and stock options, and is computed using the if-converted method for equity units.

The following table is a reconciliation of the numerator and denominator of the basic and diluted earnings per share computation for income from continuing operations for the three months ended March 31, 2025 and 2024, where income represents the numerator and weighted average shares represent the denominator.

Three Months Ended March 31, (in millions, except per share data)	2025			2024		
	Income	Shares	$ per Share	Income	Shares	$ per Share
BASIC EARNINGS PER SHARE						
Income from continuing operations attributable to The AES Corporation common stockholders	$ 46	711	$ 0.07	$ 432	690	$ 0.63
Less: Increase in redemption value of redeemable stock of subsidiaries	—		—	(6)		(0.01)
Income (loss) available to The AES Corporation common stockholders	$ 46	711	$ 0.07	$ 426	690	$ 0.62
EFFECT OF DILUTIVE SECURITIES						
Restricted stock units	—	2	—	—	2	—
Equity units	—	—	—	—	20	(0.02)
DILUTED EARNINGS PER SHARE	$ 46	713	$ 0.07	$ 426	712	$ 0.60

The calculation of diluted earnings per share excluded 3 million and 2 million outstanding stock awards for the three months ended March 31, 2025 and March 31, 2024, respectively, which would be anti-dilutive. These stock awards could potentially dilute basic earnings per share in the future.

For the three months ended March 31, 2024, income from continuing operations available to AES common stockholders included a $6 million adjustment related to the increase of the carrying value of redeemable stock of subsidiaries at AES Clean Energy Development, as a result of a non-fair value redemption feature. The Company has elected to administer the entire non-fair value redemption adjustment consistent with the treatment of dividends in the earnings per share calculation. While the adjustment reduced net income available to AES common stockholders and earnings per share, it did not impact *Net income* in the Condensed Consolidated Statement of Operations.

As described in Note 12—*Equity*, the Company issued 10,430,500 Equity Units in March 2021 with a total notional value of $1,043 million. Each Equity Unit had a stated amount of $100 and was initially issued as a Corporate Unit, consisting of a 2024 Purchase Contract and a 10% undivided beneficial ownership interest in one share of Series A Preferred Stock. The conversion rate was initially 31.5428 shares of common stock per one share of Series A Preferred Stock, which was equivalent to an initial conversion price of approximately $31.70 per share of common stock. The Series A Preferred Stock and the 2024 Purchase Contracts were accounted for as one unit of account. In calculating diluted EPS, the Company has applied the if-converted method to determine the impact of the forward purchase feature and considered if there are incremental shares that should be included related to the Series A Preferred conversion value. On February 15, 2024, the Series A Preferred Stock was tendered to satisfy the 2024 Purchase Contract's settlement price and the Corporate Units were converted into shares of the Company's common stock at a settlement rate of 3.8859, equivalent to a reference price of $25.73. The Series A Preferred Stock was canceled upon conversion.

21. RESTRUCTURING

In February 2025, the Company approved and initiated a restructuring program to streamline our organization given the significantly lower number of countries that we operate in. Additionally, we are right sizing our development company to focus on executing on the backlog and pursuing larger but fewer projects to better serve our core customers. During the first quarter of 2025, the Company recognized pre-tax restructuring charges of $48 million related to employee severance costs, of which $40 million was classified within *Cost of sales* and $8 million was classified as *General and administrative expenses* on the Condensed Consolidated Statements of Operations. Of this $48 million, $17 million was recognized at the Energy Infrastructure SBU, $16 million at the Renewables SBU, $5 million at the Utilities SBU, and $10 million at Corporate and Other.

The Company made cash payments of $19 million during the first quarter of 2025, including $3 million of termination benefits previously accrued for in the projected pension benefit obligation. As of March 31, 2025, $33 million of pre-tax restructuring charges were reflected within *Accrued and other liabilities* on the Condensed Consolidated Balance Sheets.

22. SUBSEQUENT EVENTS

AES Global Insurance — On April 30, 2025, the Company sold minority interests in AES Global Insurance Company, LLC (“AGIC”), AES’ captive insurance company, and AGIC Holdings, LLC (together with AGIC, the “AGIC Companies”) in exchange for $450 million in total proceeds for Class B units representing 17.5% and 18.0%, respectively, of each entity’s total outstanding units, for a combined ownership (directly and indirectly) of AGIC’s total outstanding units of 32.4% by the Class B member. The Company continues to own Class A units for the remaining economic interest in the AGIC Companies. The Class B units provide for target distribution amounts for the Class B member, with a call option for AES for years 2030 through 2035 at pre-agreed prices. Dividend payments in excess of the required rates of return will decrease the applicable redemption price.

As part of the transaction, it is required that either (i) the AGIC Companies achieve a minimum distribution target to the Class B member ranging from $145.5 million to $198.5 million over pre-defined periods of time ranging from 3 to 5 years (the “distribution period”) or (ii) AGIC achieves an average cash basis quarterly net income threshold for the period comprising the relevant distribution period and the four quarters immediately prior to the start of such distribution period. AES can make disproportionate distributions to the Class B member to meet the minimum distribution target for the distribution period. If, at the end of a distribution period, (1) such cash basis net income threshold is not met and (2) the minimum distribution target for such distribution period is not achieved, AES would be required to address the shortfall by issuing AES common stock (“Shortfall Stock”) to AGIC for the net difference between actual and targeted distributions. Certain of these distributions are subject to regulatory and the AGIC Companies Board’s approval.

As part of the quarterly diluted earnings per share calculation, AES will evaluate whether (1) average cash basis quarterly net income in a given quarter exceeds the threshold or (2) aggregate distributions made to the investor for the related distribution period exceed such target distribution amount. If either condition is met, no Shortfall Stock will be included in the diluted earnings per share calculation. Average cash basis quarterly net income for the four quarters prior to the start of the first distribution period was 56% above the threshold.

AES Ohio — On April 4, 2025, DPL LLC (formerly known as DPL Inc.) consummated the transactions contemplated by a Purchase and Sale Agreement with Astrid Holdings LP ("Investor"), a wholly-owned subsidiary of CDPQ, dated as of September 13, 2024, pursuant to which DPL LLC agreed to sell to Investor an aggregate indirect equity interest in AES Ohio of approximately 30%, with total proceeds to DPL of approximately $544 million. AES Ohio is reported in the Utilities SBU reportable segment.

Cochrane — On April 14, 2025, the Company accepted an offer to acquire the remaining 40% equity interest in Empresa Electrica Cochrane SpA (“Cochrane”) from a third-party investor. Once this transaction is completed, AES’ ownership in Cochrane will increase to 96.7%. This transaction is expected to close during the second quarter of 2025 and will be accounted for as an equity transaction with no gain or loss recognized in the consolidated statement of operations. Cochrane is reported in the Energy Infrastructure SBU reportable segment.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The condensed consolidated financial statements included in Item 1.—*Financial Statements* of this Form 10-Q and the discussions contained herein should be read in conjunction with our 2024 Form 10-K.

Forward-Looking Information

The following discussion may contain forward-looking statements regarding us, our business, prospects and our results of operations, that are subject to certain risks and uncertainties posed by many factors and events that could cause our actual business, prospects and results of operations to differ materially from those that may be anticipated by such forward-looking statements. These statements include, but are not limited to, statements regarding management's intents, beliefs, and current expectations and typically contain, but are not limited to, the terms "anticipate," "potential," "expect," "forecast," "target," "will," "would," "intend," "believe," "project," "estimate," "plan," and similar words. Forward-looking statements are not intended to be a guarantee of future results, but instead constitute current expectations based on reasonable assumptions. Factors that could cause or contribute to such differences include, but are not limited to, those described in Item 1A.—*Risk Factors* of this Form 10-Q, Item 1A.—*Risk Factors* and Item 7.—*Management's Discussion and Analysis of Financial Condition and Results of Operations* of our 2024 Form 10-K and subsequent filings with the SEC.

Readers are cautioned not to place undue reliance on these forward-looking statements which speak only as of the date of this report. We undertake no obligation to revise any forward-looking statements in order to reflect events or circumstances that may subsequently arise. If we do update one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements. Readers are urged to carefully review and consider the various disclosures made by us in this report and in our other reports filed with the SEC that advise of the risks and factors that may affect our business.

Overview of Our Business

We are a diversified power generation and utility company organized into the following four SBUs, mainly organized by technology: **Renewables** (solar, wind, energy storage, and hydro), **Utilities** (AES Indiana, AES Ohio, and AES El Salvador), **Energy Infrastructure** (natural gas, LNG, coal, pet coke, diesel, and oil), and **New Energy Technologies** (investments in Fluence, Uplight, Maximo, and other initiatives). Prior to the first quarter of 2025, our businesses in Chile (which have a mix of generation sources, including renewables, that were pooled to service our existing PPAs) were reported in the Energy Infrastructure SBU. After the sale or disconnection of a significant portion of AES Andes' coal plants and the expiration of its coal-indexed contracts with regulated customers at the end of 2024, the results of our businesses in Chile, excluding the two remaining coal plants, are now reported as part of the Renewables SBU. The results of the two remaining coal plants in Chile, Angamos and Cochrane, remain within the Energy Infrastructure SBU. For additional information regarding our business, see Item 1.—*Business* of our 2024 Form 10-K.

We have two lines of business: generation and utilities. Our Renewables, Utilities, and Energy Infrastructure SBUs participate in our first business line, generation, in which we own and/or operate power plants to generate and sell power to customers, such as utilities, industrial users, and other intermediaries. Our Utilities SBU participates in our second business line, utilities, in which we own and/or operate utilities to generate or purchase, distribute, transmit, and sell electricity to end-user customers in the residential, commercial, industrial, and governmental sectors within a defined service area. In certain circumstances, our utilities also generate and sell electricity on the wholesale market. Our New Energy Technologies SBU includes investments in new and innovative technologies to support leading-edge greener energy solutions.

Executive Summary

Compared with last year, first quarter net income decreased $351 million, from net income of $278 million to a net loss of $73 million. This decrease is the result of higher prior year revenues from the monetization of the Warrior Run coal plant PPA, one-time costs due to organizational restructuring, and a gain in the prior year on dilution of our interest in Uplight; partially offset by higher contributions from the Utilities and Renewables SBUs.

Adjusted EBITDA, a non-GAAP measure, decreased $49 million, from $640 million to $591 million, driven by lower contributions from the Energy Infrastructure SBU primarily due to higher prior year revenues from the monetization of the Warrior Run coal plant PPA. This was partially offset by higher margins at the Utilities SBU, higher revenues from renewables projects placed in service, and better hydrology.

Adjusted EBITDA with Tax Attributes, a non-GAAP measure, decreased $91 million, from $868 million to $777

million primarily due to the drivers above, as well as lower realized tax attributes driven by timing of tax attribute recognition.

Compared with last year, first quarter diluted earnings per share from continuing operations decreased $0.53, from $0.60 to $0.07. This decrease is mainly driven by lower earnings at the Energy Infrastructure SBU primarily due to higher prior year revenues from the monetization of the Warrior Run coal plant PPA, lower realized tax attributes, a gain in the prior year on dilution of our interest in Uplight, and one-time costs due to organizational restructuring. This was partially offset by higher contributions at the Utilities SBU due to higher margins and realized tax attributes related to the Pike County energy storage project.

Adjusted EPS, a non-GAAP measure, decreased $0.23 from $0.50 to $0.27, mainly driven by lower realized tax attributes due to timing of tax attribute recognition, and lower contributions at the Energy Infrastructure SBU primarily due to higher prior year revenues from the monetization of the Warrior Run coal plant PPA, partially offset by higher contributions at the Utilities SBU.

Accelerating the future of energy, together.

Business Overview

147 Generation Facilities	6 Utility Companies
32,738 Gross MW	32,688 GWH [2]

Three Months Ended March 31,	2025	2024
Diluted earnings per share	$ 0.07	$ 0.60
Adjusted EPS [1]	0.27	0.50

Operating Margin (in millions)

Net Income (Loss) (in millions)

Adjusted EBITDA [1] (in millions)

Operating Cash Flow (in millions)

Key events in 2025

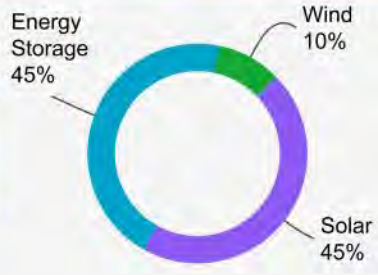
- Completed the construction of 643 MW of energy storage and solar
- Signed or awarded long-term PPAs for 443 MW of solar and energy storage
- Received final regulatory approval for the 170 MW Crossvine solar-plus-storage project at AES Indiana
- With the sale of a minority stake in our global insurance company, AGIC, for $450 million, achieved full year 2025 asset sale proceeds target of $400 to $500 million
- To fund the substantial growth at AES Ohio, closed on the sale of an approximate 30% indirect equity interest to a wholly-owned subsidiary of CDPQ

Strategic outlook

- Backlog of 11.7 GW of projects under signed long-term PPAs
- On track to add 3.2 GW of new projects to operating portfolio in 2025
- On track to sign 14-17 GW of renewables under new long-term PPAs in 2023-2025

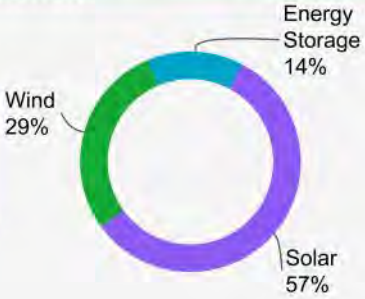
Under construction

5,281 MW



Contracted renewable backlog not yet under construction

6,412 MW



(1) Non-GAAP measure. See Item 2.—*Management's Discussion and Analysis of Financial Condition and Results of Operations—SBU Performance Analysis—Non-GAAP Measures* for reconciliation and definition.

(2) GWh sold in 2024.

Overview of Strategic Performance

AES is leading the industry's transition to clean energy by investing in renewables, utilities, and technology businesses.

- Our PPA backlog, which consists of projects with signed contracts, but which are not yet operational, is 11.7 GW, including 5.3 GW under construction. Since our fourth quarter 2024 earnings call in February 2025, we:
  - Completed the construction of 643 MW of energy storage and solar, and expect to add a total of 3.2 GW to our operating portfolio by year-end 2025; and
  - Signed or were awarded new long-term PPAs for 443 MW of solar and energy storage.
- Received final regulatory approval for the 170 MW Crossvine solar-plus-storage project at AES Indiana, which is expected to come online in 2027.
- With the sale of a minority stake in our global insurance company, AGIC, for $450 million, achieved full year 2025 asset sale proceeds target of $400 to $500 million.
- To fund the substantial growth at AES Ohio, closed on the sale of an approximate 30% indirect equity interest to a wholly-owned subsidiary of CDPQ, with subsequent upgrade in credit ratings at AES Ohio.

Review of Consolidated Results of Operations (Unaudited)

Components of Revenue, Cost of Sales, and Operating Margin — Revenue includes revenue earned from the sale of energy from our utilities and the production and sale of energy from our generation plants, which are classified as regulated and non-regulated, respectively, on the Condensed Consolidated Statements of Operations. Revenue also includes the gains or losses on derivatives associated with the sale of electricity.

Cost of sales includes costs incurred directly by the businesses in the ordinary course of business. Examples

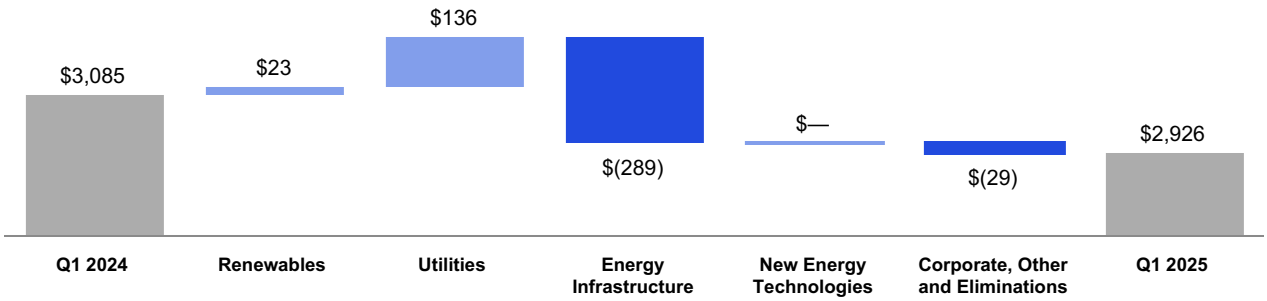
include electricity and fuel purchases, operations and maintenance costs, depreciation and amortization expenses, bad debt expense and recoveries, and general administrative and support costs (including employee-related costs directly associated with the operations of the business). Cost of sales also includes the gains or losses on derivatives associated with the purchase of electricity or fuel.

Operating margin is defined as revenue less cost of sales.

Consolidated Revenue and Operating Margin

Three Months Ended March 31, 2025

Revenue
(in millions)



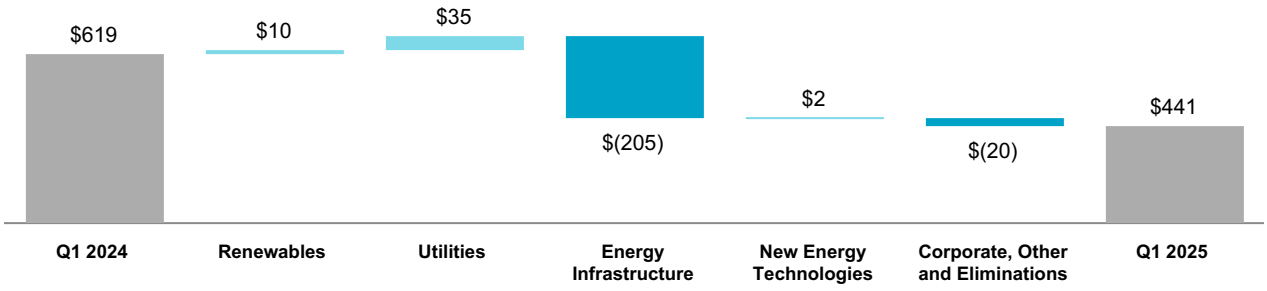
Consolidated Revenue — Revenue decreased $159 million, or 5%, for the three months ended March 31, 2025, compared to the three months ended March 31, 2024, driven by:

- $289 million at Energy Infrastructure driven by $239 million of prior year revenue related to the AES Andes portfolio, which is reported in the Renewables SBU beginning in 2025 following the sale and expiration of certain coal-related assets and contracts; $96 million of prior year revenues from the monetization of the Warrior Run coal plant PPA, $91 million due to prior year unrealized and realized derivative gains, and $23 million due to the impact of the selldown of Amman East and IPP4 in Jordan; partially offset by $82 million higher CO_2 purchases passed through due to higher production, $32 million higher gas prices and transportation costs passed through to the offtaker, and $30 million higher generation due to dispatch and tariff adjustment in Argentina.

This unfavorable impact was partially offset by increases of:

- $136 million at Utilities mainly driven by a $111 million increase in transmission, distribution, and rider revenues mainly due to higher rates, and $34 million due to higher net retail demand mainly driven by favorable weather; partially offset by $20 million of lower Fuel Adjustment Charge rider revenue; and
- $23 million at Renewables mainly driven by a $203 million increase due to the results of AES Andes moving to Renewables in 2025 as described above, net of a current year decrease in regulated contract sales, and $50 million due to new projects in service; partially offset by $170 million impact from the sale of AES Brasil and $50 million net lower spot sales and prices, mainly at Colombia.

Operating Margin
(in millions)



Consolidated Operating Margin — Operating margin decreased $178 million, or 29%, for the three months

ended March 31, 2025, compared to the three months ended March 31, 2024, driven by:

- $205 million at Energy Infrastructure mainly driven by $96 million higher prior year revenues from the monetization of the Warrior Run coal plant PPA, $71 million due to prior year unrealized derivative gains as part of our commercial hedging strategy, $22 million of prior year operating margin related to the AES Andes portfolio, which is reported in the Renewables SBU beginning in 2025 following the sale and expiration of certain coal-related assets and contracts, and $17 million of one-time costs due to restructuring; and
- $20 million at Corporate, Other and Eliminations mainly driven by higher people and IT costs, including allocation of costs to the businesses.

These unfavorable impacts were partially offset by increases of:

- $35 million at Utilities primarily driven by $43 million due to higher retail rates as a result of the 2024 Base Rate Order, including the impact of certain riders now included in the base rate, $20 million due to higher demand primarily from the impact of weather, and a $13 million increase in transmission and rider revenues; partially offset by a $13 million increase in depreciation expense from additional assets placed in service, an $8 million decrease due to the impact of planned outages, $8 million higher expected credit losses, and $7 million higher property taxes; and
- $10 million at Renewables mainly driven by a $36 million increase related to higher generation in Panama as a result of better hydrological conditions, $35 million positive impact from new businesses, and $22 million impact of the results of AES Andes moving to Renewables in 2025, as described above. These positive impacts were partially offset by a $36 million increase in fixed costs primarily related to an accelerated growth plan, a $32 million impact from the sale of AES Brasil, and $16 million of one-time costs due to restructuring.

See Item 2.—*Management's Discussion and Analysis of Financial Condition and Results of Operations—SBU Performance Analysis* of this Form 10-Q for additional discussion and analysis of operating results for each SBU.

Consolidated Results of Operations — Other

General and administrative expenses

General and administrative expenses increased $2 million, or 3%, to $77 million for the three months ended March 31, 2025, compared to $75 million for the three months ended March 31, 2024, mainly due to $8 million of one-time restructuring costs, partially offset by $3 million lower professional fees and $2 million lower other people costs.

Interest expense

Interest expense decreased $15 million, or 4%, to $342 million for the three months ended March 31, 2025, compared to $357 million for the three months ended March 31, 2024. This decrease is primarily due to a $61 million impact from the sale of AES Brasil in October 2024; partially offset by increased borrowings at the Renewables SBU and lower capitalized interest.

Interest capitalized during development and construction decreased $41 million to $116 million for the three months ended March 31, 2025, compared to $157 million for the three months ended March 31, 2024, primarily due to fewer projects in development at the Renewables SBU.

Interest income

Interest income decreased $36 million, or 34%, to $69 million for the three months ended March 31, 2025, compared to $105 million for the three months ended March 31, 2024, primarily due to a $24 million decrease at the Energy Infrastructure SBU primarily due to lower short-term investments at lower rates, and a $13 million impact from the sale of AES Brasil in October 2024.

Other income and expense

Other income decreased $28 million, or 80%, to $7 million for the three months ended March 31, 2025, compared to $35 million for the three months ended March 31, 2024, mainly due to a $10 million decrease in gains on remeasurement of contingent consideration at AES Clean Energy, and the prior year impacts of a $5 million gain on commencement of a sales-type lease on land, $5 million in insurance proceeds primarily related to property damage at AES Andes, and a $5 million gain on contract termination.

Other expense increased $14 million, or 37%, to $52 million for the three months ended March 31, 2025, compared to $38 million for the three months ended March 31, 2024, mainly due to a $34 million increase in losses on remeasurement of contingent consideration primarily on projects acquired at AES Clean Energy and $9 million in losses on commencement of sales-type leases at AES Renewable Holdings; partially offset by a $19 million loss recognized in the prior year related to legal expenses and other direct costs associated with the troubled debt restructuring at AES Puerto Rico, and a $6 million valuation allowance recorded in the prior year on receivables classified as held-for-sale at Warrior Run.

See Note 15—*Other Income and Expense* included in Item 1.—*Financial Statements* of this Form 10-Q for further information.

Gain (loss) on disposal and sale of business interests

Loss on disposal and sale of business interests was $1 million for the three months ended March 31, 2025 compared to a gain of $43 million for three months ended March 31, 2024. This was primarily due to a $52 million gain in the prior year on dilution of AES' ownership interest in Uplight as a result of the AutoGrid acquisition, partially offset by a $10 million loss in the prior year on the selldown of Amman East and IPP4 in Jordan, which are now accounted for as equity method investments.

See Note 7—*Investments in and Advances to Affiliates* and Note 18—*Held-for-Sale and Dispositions* for further information.

Asset impairment expense

Asset impairment expense increased $3 million, or 7%, to $49 million for the three months ended March 31, 2025, compared to $46 million for the three months ended March 31, 2024. This increase was due to higher impairment expense of $24 million at AES Clean Energy Development related to the write-off of capitalized development costs for projects that were determined to be no longer viable. This was partially offset by lower impairment expense of $20 million associated with the held-for-sale classification of Mong Duong.

See Note 16—*Asset Impairment Expense* included in Item 1.—*Financial Statements* of this Form 10-Q for further information.

Foreign currency transaction losses

	Three Months Ended March 31,	
(in millions)	2025	2024
Chile	$ (11)	$ (6)
Other	1	(2)
Total [1]	$ (10)	$ (8)

[1] Includes losses of $3 million and gains of $18 million on foreign currency derivative contracts for the three months ended March 31, 2025 and 2024, respectively.

The Company recognized net foreign currency transaction losses of $10 million for the three months ended March 31, 2025, primarily driven by unrealized losses due to depreciation of the Chilean peso.

The Company recognized net foreign currency transaction losses of $8 million for the three months ended March 31, 2024, primarily driven by realized losses on receivables denominated in the Chilean peso.

Income tax benefit (expense)

Income tax expense was $17 million for the three months ended March 31, 2025, compared to income tax benefit of $16 million for the three months ended March 31, 2024. The Company's effective tax rates were (77)% and (6)% for the three months ended March 31, 2025 and 2024, respectively. The current quarter effective tax rate was impacted by tax expense resulting from allocations of losses to tax equity investors on renewables projects, as well as the impacts associated with ITCs.

The prior year effective tax rate was benefited by the restructuring of a foreign holding company, as well as the impacts associated with ITCs. Further, the prior year effective tax rate was impacted by tax expense resulting from allocations of losses to tax equity investors on renewables projects.

Our effective tax rate reflects the tax effect of significant operations outside the U.S., which are generally taxed at rates different than the U.S. statutory rate of 21%. Furthermore, our foreign earnings may be subjected to incremental U.S. taxation under the GILTI rules and incremental foreign taxation under Pillar 2. A future proportionate change in the composition of income before income taxes from foreign and domestic tax jurisdictions

could impact our periodic effective tax rate.

Net equity in losses of affiliates

Net equity in losses of affiliates increased $19 million to $34 million for the three months ended March 31, 2025, compared to $15 million for the three months ended March 31, 2024. This increase was primarily driven by lower earnings from sPower of $14 million, mainly due to lower earnings from renewables projects that came online; and a $9 million decrease in earnings from Fluence driven by a decrease in the volume of BESS products fulfilled due to timing of customer schedules, higher sales and marketing expenses, and foreign currency losses.

See Note 7—*Investments in and Advances to Affiliates* included in Item 1.—*Financial Statements* of this Form 10-Q for further information.

Net loss attributable to noncontrolling interests and redeemable stock of subsidiaries

Net loss attributable to noncontrolling interests and redeemable stock of subsidiaries decreased $35 million to $119 million for the three months ended March 31, 2025, compared to $154 million for the three months ended March 31, 2024. This decrease was primarily due to lower allocation of losses to tax equity investors on renewables projects placed in service of $35 million.

Net income attributable to The AES Corporation

Net income attributable to The AES Corporation decreased $386 million to $46 million for the three months ended March 31, 2025, compared to $432 million for the three months ended March 31, 2024. This decrease was primarily due to:

- Lower margins from the Energy Infrastructure SBU of $193 million, excluding one-time restructuring costs, primarily due to higher prior year revenues from the monetization of the Warrior Run coal plant PPA and prior year unrealized gains on power swaps;
- Prior year gain on dilution of our interest in Uplight of $52 million;
- One-time restructuring costs of $46 million;
- Higher interest expense and lower interest income in the current year of $36 million;
- Lower contributions from renewables projects placed in service in the current year of $35 million; and
- Higher net equity in losses of affiliates of $18 million, primarily related to lower earnings from renewables projects that came online at sPower.

These decreases were partially offset by higher margins from the Utilities SBU of $28 million, excluding one-time restructuring costs, primarily due to higher rates as a result of the 2024 Base Rate Order at AES Indiana and higher demand due to weather.

SBU Performance Analysis

Non-GAAP Measures

EBITDA, Adjusted EBITDA, Adjusted EBITDA with Tax Attributes, Adjusted PTC, and Adjusted EPS are non-GAAP supplemental measures that are used by management and external users of our condensed consolidated financial statements such as investors, industry analysts, and lenders.

During the first quarter of 2025, the Company updated the definitions of Adjusted EBITDA, Adjusted PTC, and Adjusted EPS to exclude costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts. These restructuring initiatives to streamline our organization and right-size our development company would result in significant incremental costs above normal operations, and the inclusion of such costs would result in a lack of comparability in our results of operations and could be misleading to investors. We believe excluding these costs associated with a major restructuring initiative better reflects the underlying business performance of the Company.

For the year ended December 31, 2024, the Company updated the definitions of EBITDA and Adjusted EBITDA to include accretion of AROs in the *depreciation and amortization* add-back. We believe excluding accretion of AROs from these metrics better reflects the underlying business performance of the Company and is aligned with the metrics of our industry peers. For comparability and consistency, all prior period EBITDA and Adjusted EBITDA measures have been recast to conform to the current presentation. The impact of this update resulted in an

increase to Adjusted EBITDA of $5 million for the three months ended March 31, 2024.

During the first quarter of 2024, the Company updated the definitions of Adjusted EBITDA, Adjusted PTC, and Adjusted EPS add-back (a) *unrealized gains or losses related to derivative transactions and equity securities* to include financial assets and liabilities measured using the fair value option, and updated add-back (e) *gains, losses, and costs due to the early retirement of debt* to include troubled debt restructuring. We believe excluding these gains or losses better reflects the underlying business performance of the Company. The Company also removed the adjustment for net gains at Angamos, one of our businesses in the Energy Infrastructure SBU, associated with the early contract terminations with Minera Escondida and Minera Spence. As this adjustment was specific to certain contract terminations that occurred in 2020, we believe removing this adjustment from our non-GAAP definitions provides simplification and clarity for our investors. There were no such impacts in 2024.

EBITDA, Adjusted EBITDA and Adjusted EBITDA with Tax Attributes

We define EBITDA as earnings before interest income and expense, taxes, depreciation, amortization, and accretion of AROs. We define Adjusted EBITDA as EBITDA adjusted for the impact of NCI and interest, taxes, depreciation, amortization, and accretion of AROs of our equity affiliates, adding back interest income recognized under service concession arrangements, and excluding gains or losses of both consolidated entities and entities accounted for under the equity method due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits and costs associated with dispositions and acquisitions of business interests, including early plant closures, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring; and (f) costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts.

In addition to the revenue and cost of sales reflected in Operating Margin, Adjusted EBITDA includes the other components of our Consolidated Statement of Operations, such as *general and administrative expenses* in Corporate and Other as well as business development costs, *other expense* and *other income, realized foreign currency transaction gains and losses,* and *net equity in earnings (losses) of affiliates*.

We further define Adjusted EBITDA with Tax Attributes as Adjusted EBITDA, adding back the pre-tax effect of Production Tax Credits (“PTCs”), Investment Tax Credits (“ITCs”), and depreciation tax deductions allocated to tax equity investors, as well as the tax benefit recorded from tax credits retained or transferred to third parties.

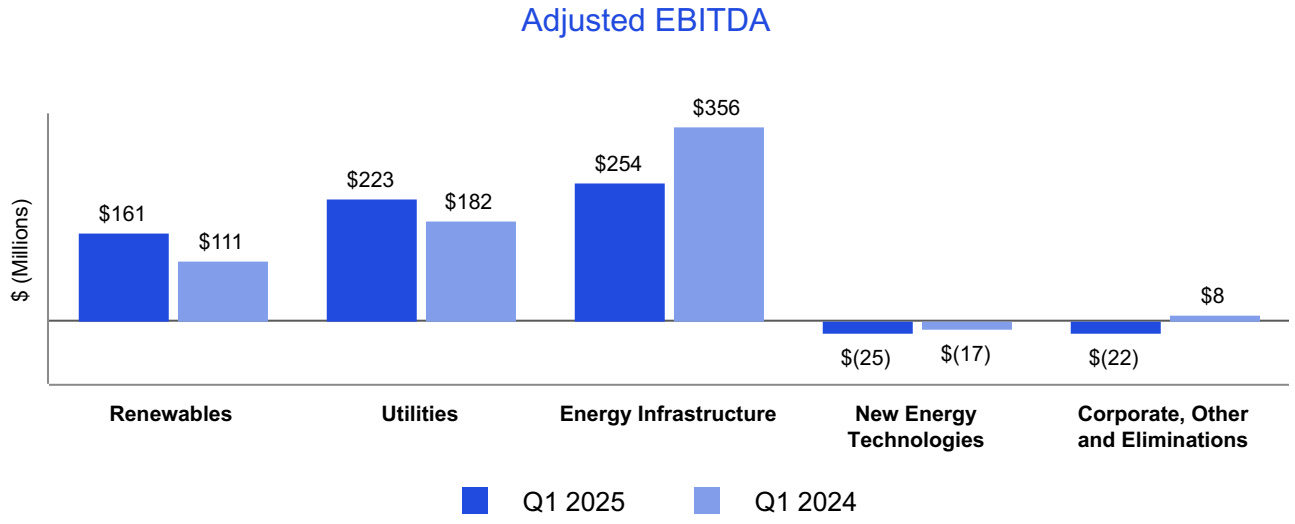
The GAAP measure most comparable to EBITDA, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes is *Net income*. We believe that EBITDA, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes better reflect the underlying business performance of the Company. Adjusted EBITDA is the most relevant measure considered in the Company’s internal evaluation of the financial performance of its segments. Factors in this determination include the variability due to unrealized gains or losses pertaining to derivative transactions, equity securities, or financial assets and liabilities remeasurement, unrealized foreign currency gains or losses, losses due to impairments, strategic decisions to dispose of or acquire business interests, retire debt, or implement restructuring initiatives, and the variability of allocations of earnings to tax equity investors, which affect results in a given period or periods. In addition, each of these metrics represents the business performance of the Company before the application of statutory income tax rates and tax adjustments, including the effects of tax planning, corresponding to the various jurisdictions in which the Company operates. Given its large number of businesses and overall complexity, the Company concluded that Adjusted EBITDA is a more transparent measure than *Net income* that better assists investors in determining which businesses have the greatest impact on the Company’s results.

EBITDA, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes should not be construed as alternatives to *Net income*, which is determined in accordance with GAAP.

Reconciliation of Adjusted EBITDA and Adjusted EBITDA with Tax Attributes (in millions)	Three Months Ended March 31, 2025	2024
Net income	$ (73)	$ 278
Income tax expense	17	(16)
Interest expense	342	357
Interest income	(69)	(105)
Depreciation, amortization, and accretion of AROs	337	318
EBITDA	$ 554	$ 832
Less: Adjustment for noncontrolling interests and redeemable stock of subsidiaries [1]	(134)	(164)
Less: Income tax expense (benefit), interest expense (income) and depreciation, amortization, and accretion of AROs from equity affiliates	36	34
Interest income recognized under service concession arrangements	15	17
Unrealized derivatives, equity securities, and financial assets and liabilities gains	(1)	(85)
Unrealized foreign currency gains	(7)	(9)
Disposition/acquisition losses (gains)	41	(43)
Impairment losses	33	26
Loss on extinguishment of debt and troubled debt restructuring	8	32
Restructuring costs	46	—
Adjusted EBITDA [1]	$ 591	$ 640
Tax attributes	186	228
Adjusted EBITDA with Tax Attributes [2]	$ 777	$ 868

(1) The allocation of earnings and losses to tax equity investors from both consolidated entities and equity affiliates is removed from Adjusted EBITDA. NCI also excludes amounts allocated to preferred shareholders during the construction phase before a project becomes operational, as this is akin to a financing arrangement.

(2) Adjusted EBITDA with Tax Attributes includes the impact of the share of the ITCs, PTCs, and depreciation deductions allocated to tax equity investors under the HLBV accounting method and recognized as *Net loss (income) attributable to noncontrolling interests and redeemable stock of subsidiaries* on the Condensed Consolidated Statements of Operations. It also includes the tax benefit recorded from tax credits retained or transferred to third parties. The tax attributes are related to the Renewables and Utilities SBUs.



Adjusted PTC

We define Adjusted PTC as pre-tax income from continuing operations attributable to The AES Corporation excluding gains or losses of the consolidated entity due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits, and costs associated with dispositions and acquisitions of business interests, including early plant closures, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring; and (f) costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts. Adjusted PTC also includes net equity in earnings of affiliates on an after-tax basis adjusted for the same gains or losses excluded from consolidated entities.

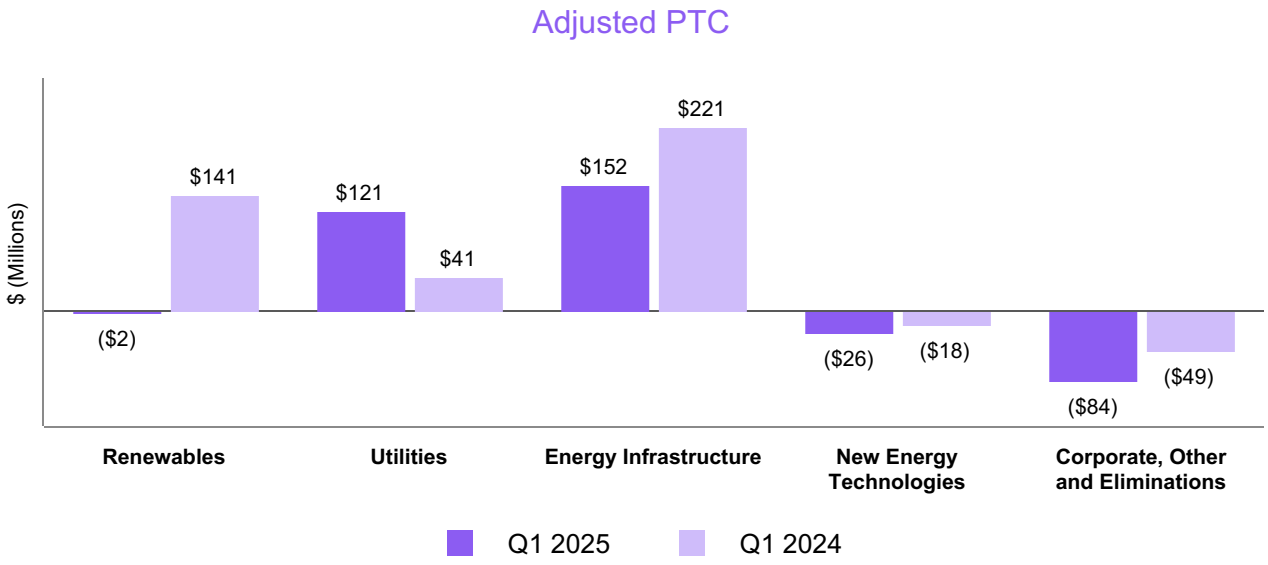
Adjusted PTC reflects the impact of NCI and excludes the items specified in the definition above. In addition to

the revenue and cost of sales reflected in Operating Margin, Adjusted PTC includes the other components of our Consolidated Statement of Operations, such as *general and administrative expenses* in Corporate and Other as well as business development costs, *interest expense* and *interest income, other expense* and *other income, realized foreign currency transaction gains and losses,* and *net equity in earnings (losses) of affiliates*.

The GAAP measure most comparable to Adjusted PTC is *Income from continuing operations attributable to The AES Corporation*. We believe that Adjusted PTC better reflects the underlying business performance of the Company and is a relevant measure considered in the Company's internal evaluation of the financial performance of its segments. Factors in this determination include the variability due to unrealized gains or losses pertaining to derivative transactions, equity securities, or financial assets and liabilities remeasurement, unrealized foreign currency gains or losses, losses due to impairments, strategic decisions to dispose of or acquire business interests, retire debt, or implement restructuring initiatives, which affect results in a given period or periods. In addition, Adjusted PTC represents the business performance of the Company before the application of statutory income tax rates and tax adjustments, including the effects of tax planning, corresponding to the various jurisdictions in which the Company operates. Given its large number of businesses and complexity, the Company concluded that Adjusted PTC is a more transparent measure than *Income from continuing operations attributable to The AES Corporation* that better assists investors in determining which businesses have the greatest impact on the Company's results.

Adjusted PTC should not be construed as an alternative to *Income from continuing operations attributable to The AES Corporation*, which is determined in accordance with GAAP.

	Three Months Ended March 31,	
Reconciliation of Adjusted PTC (in millions)	**2025**	**2024**
Income from continuing operations, net of tax, attributable to The AES Corporation	$ 46	$ 432
Income tax benefit from continuing operations attributable to The AES Corporation	(4)	(19)
Pre-tax contribution	42	413
Unrealized derivatives, equity securities, and financial assets and liabilities gains	(5)	(85)
Unrealized foreign currency gains	(7)	(9)
Disposition/acquisition losses (gains)	42	(43)
Impairment losses	33	26
Loss on extinguishment of debt and troubled debt restructuring	10	34
Restructuring costs	46	—
Adjusted PTC	$ 161	$ 336



Adjusted EPS

We define Adjusted EPS as diluted earnings per share from continuing operations excluding gains or losses of both consolidated entities and entities accounted for under the equity method due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits and costs associated with dispositions and acquisitions of business interests, including early plant closures, and the tax impact from the repatriation of sales proceeds, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring; and (f) costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts.

The GAAP measure most comparable to Adjusted EPS is *Diluted earnings per share from continuing operations*. We believe that Adjusted EPS better reflects the underlying business performance of the Company and is considered in the Company's internal evaluation of financial performance. Factors in this determination include the variability due to unrealized gains or losses pertaining to derivative transactions, equity securities, or financial assets and liabilities remeasurement, unrealized foreign currency gains or losses, losses due to impairments, strategic decisions to dispose of or acquire business interests, retire debt, or implement restructuring initiatives, which affect results in a given period or periods.

Adjusted EPS should not be construed as an alternative to *Diluted earnings per share from continuing operations*, which is determined in accordance with GAAP.

The Company reported diluted earnings per share of $0.60 for the three months ended March 31, 2024. For purposes of measuring earnings per share under U.S. GAAP, income available to AES common stockholders is reduced by increases in the carrying amount of redeemable stock of subsidiaries to redemption value. While the adjustment reduced earnings per share, it did not impact *Net income* on the Condensed Consolidated Statement of Operations. For purposes of computing Adjusted EPS, the Company excluded the adjustment to redemption value from the numerator. The table below reconciles the income available to AES common stockholders used in GAAP diluted earnings per share to the income from continuing operations used in calculating the non-GAAP measure of Adjusted EPS.

Reconciliation of Numerator Used for Adjusted EPS	**Three Months Ended March 31, 2024**		
(in millions, except per share data)	**Income**	**Shares**	**$ per Share**
GAAP DILUTED EARNINGS PER SHARE			
Income available to The AES Corporation common stockholders	$ 426	712	$ 0.60
Add back: Adjustment to redemption value of redeemable stock of subsidiaries	6	—	0.01
NON-GAAP DILUTED EARNINGS PER SHARE	$ 432	712	$ 0.61

Reconciliation of Adjusted EPS	**Three Months Ended March 31,**			
	2025		**2024**	
Diluted earnings per share from continuing operations	$ 0.07		$ 0.61	
Unrealized derivatives, equity securities, and financial assets and liabilities gains	(0.01)		(0.12)	(1)
Unrealized foreign currency gains	(0.01)		(0.01)	
Disposition/acquisition losses (gains)	0.06	(2)	(0.06)	(3)
Impairment losses	0.05	(4)	0.04	(5)
Loss on extinguishment of debt and troubled debt restructuring	0.01		0.04	(6)
Restructuring costs	0.06	(7)	—	
Less: Net income tax expense (benefit)	0.04	(8)	—	
Adjusted EPS	$ 0.27		$ 0.50	

(1) Amount primarily relates to net unrealized derivative gains at the Energy Infrastructure SBU of $68 million, or $0.10 per share.

(2) Amount primarily relates to losses on contingent consideration at AES Clean Energy of $28 million, or $0.04 per share, and day-one losses on commencement of sales-type leases at AES Renewable Holdings of $9 million, or $0.01 per share.

(3) Amount primarily relates to gain on dilution of ownership in Uplight due to its acquisition of AutoGrid of $52 million, or $0.07 per share, partially offset by the loss on partial sale of our ownership interest in Amman East and IPP4 in Jordan of $10 million, or $0.01 per share.

(4) Amount primarily relates to impairments at AES Clean Energy Development projects of $25 million, or $0.03 per share, and Mong Duong of $9 million, or $0.01 per share.

(5) Amount primarily relates to impairment at Mong Duong of $19 million, or $0.03 per share.

(6) Amount primarily relates to costs incurred due to troubled debt restructuring at Puerto Rico of $19 million, or $0.03 per share.

(7) Amount primarily relates to severance costs associated with the Company-wide restructuring program.

(8) Amount primarily relates to income tax expense associated with severance costs related to the Company-wide restructuring program of $10 million, or $0.01 per share, losses on contingent consideration at AES Clean Energy of $8 million, or $0.01 per share, and impairment at AES Clean Energy Development projects of $7 million, or $0.01 per share.

Renewables SBU

The following table summarizes Operating Margin, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes (in millions) for the periods indicated:

	Three Months Ended March 31,			
	2025	2024	$ Change	% Change
Operating Margin	$ 73	$ 63	$ 10	16%
Adjusted EBITDA [1]	161	111	50	45%
Adjusted EBITDA with Tax Attributes [1]	289	337	(48)	-14%

[1] A non-GAAP financial measure. See *SBU Performance Analysis—Non-GAAP Measures* for definition.

Operating Margin for the three months ended March 31, 2025 increased $10 million. This increase was primarily driven by a $36 million increase related to higher generation in Panama as a result of better hydrological conditions, $35 million positive impact from new businesses, and $22 million of prior year operating margin related to the AES Andes portfolio, which is reported in the Renewables SBU beginning in 2025 following the sale and expiration of certain coal-related assets and contracts. These positive impacts were partially offset by a $36 million increase in fixed costs primarily related to an accelerated growth plan, a $32 million impact from the sale of AES Brasil, and $16 million of one-time costs due to restructuring.

Adjusted EBITDA for the three months ended March 31, 2025 increased $50 million, primarily due to the drivers mentioned above, adjusted for NCI, unrealized derivatives, restructuring costs, and depreciation.

Adjusted EBITDA with Tax Attributes for the three months ended March 31, 2025 decreased $48 million, primarily driven by lower tax attributes realized in the current year due to timing of tax attribute recognition, partially offset by the increase in Adjusted EBITDA explained above. During the three months ended March 31, 2025 and 2024, we realized $128 million and $226 million, respectively, from tax attributes earned by our U.S. renewables business.

Utilities SBU

The following table summarizes Operating Margin, Adjusted EBITDA, Adjusted EBITDA with Tax Attributes, and Adjusted PTC (in millions) for the periods indicated:

	Three Months Ended March 31,			
	2025	2024	$ Change	% Change
Operating Margin	$ 155	$ 120	$ 35	29%
Adjusted EBITDA [1]	223	182	41	23%
Adjusted EBITDA with Tax Attributes [1]	281	184	97	53%
Adjusted PTC [1] [2]	121	41	80	NM

[1] A non-GAAP financial measure. See *SBU Performance Analysis—Non-GAAP Measures* for definition.

[2] Adjusted PTC remains a key metric used by management for analyzing our businesses in the utilities industry.

Operating Margin for the three months ended March 31, 2025 increased $35 million, driven primarily by $43 million due to higher retail rates as a result of the 2024 Base Rate Order, including the impact of certain riders now included in base rate; $20 million resulting from higher demand due to the impact of weather; and a $13 million increase in transmission and rider revenues. These increases are partially offset by a $13 million increase in depreciation expense from additional assets placed in service, higher amortization of regulatory assets, and changes in depreciation rates as a result of the 2024 Base Rate Order; an $8 million decrease due to the impact of planned outages; an $8 million decrease due to higher credit losses; and a $7 million decrease due to higher property taxes driven by higher assessed values.

Adjusted EBITDA for the three months ended March 31, 2025 increased $41 million, primarily due to the drivers above, adjusted for NCI, depreciation, and restructuring costs.

Adjusted EBITDA with Tax Attributes increased $97 million, mainly driven by the drivers above, as well as a $56 million increase in realized tax attributes, primarily related to the Pike County BESS project in the current year.

Adjusted PTC for the three months ended March 31, 2025 increased $80 million due to the drivers above, offset by higher depreciation expense.

Energy Infrastructure SBU

The following table summarizes Operating Margin and Adjusted EBITDA (in millions) for the periods indicated:

	Three Months Ended March 31,			
	2025	2024	$ Change	% Change
Operating Margin	$ 189	$ 394	$ (205)	-52%
Adjusted EBITDA [1]	254	356	(102)	-29%

[1] A non-GAAP financial measure. See *SBU Performance Analysis—Non-GAAP Measures* for definition.

Operating Margin for the three months ended March 31, 2025 decreased $205 million, driven by $96 million higher prior year revenues from the monetization of the Warrior Run coal plant PPA, $71 million due to prior year unrealized derivative gains as part of our commercial hedging strategy, $22 million of prior year operating margin at AES Andes, which is reported in the Renewables SBU beginning in 2025, and $17 million of one-time costs due to restructuring.

Adjusted EBITDA for the three months ended March 31, 2025 decreased $102 million, primarily due to the drivers above adjusted for NCI, unrealized derivatives, and restructuring costs.

New Energy Technologies SBU

The following table summarizes Operating Margin and Adjusted EBITDA (in millions) for the periods indicated:

	Three Months Ended March 31,			
	2025	2024	$ Change	% Change
Operating Margin	$ —	$ (2)	$ 2	100%
Adjusted EBITDA [1]	(25)	(17)	(8)	-47%

[1] A non-GAAP financial measure. See *SBU Performance Analysis—Non-GAAP Measures* for definition.

Operating Margin for the three months ended March 31, 2025 increased $2 million, with no material drivers.

Adjusted EBITDA for the three months ended March 31, 2025 decreased $8 million, primarily due to higher net losses at Fluence. The increased losses were mainly driven by a decline in sales, reflecting lower volumes fulfilled due to the timing of customer schedules.

Key Trends and Uncertainties

During 2025 and beyond, we expect to face the following challenges at certain of our businesses. Management expects that improved operating performance at certain businesses, growth from new businesses, and global cost reduction initiatives may lessen or offset their impact. If these favorable effects do not occur, or if the challenges described below and elsewhere in this section impact us more significantly than we currently anticipate, or if volatile foreign currencies and commodities move more unfavorably, then these adverse factors (or other adverse factors unknown to us) may have a material impact on our operating margin, net income attributable to The AES Corporation, and cash flows. We continue to monitor our operations and address challenges as they arise. For the risk factors related to our business, see Item 1.—*Business* and Item 1A.—*Risk Factors* of our 2024 Form 10-K.

Operational

Trade Restrictions and Supply Chain — In April 2022, the U.S. Department of Commerce ("Commerce") initiated an investigation into whether imports into the U.S. of solar cells and panels from Cambodia, Malaysia, Thailand, and Vietnam ("Southeast Asia") were circumventing antidumping and countervailing duty ("AD/CVD") orders on solar cells and panels from China. In August 2023, Commerce rendered final affirmative findings of circumvention with respect to all four countries, which resulted in the imposition of AD and CVD duties on certain imported cells and panels from Southeast Asia. Commerce's determination and related matters remain the subject of ongoing litigation.

In 2024, Commerce and the U.S. International Trade Commission ("USITC") initiated new AD/CVD investigations on solar cells and panels imported from Southeast Asia. On April 18, 2025, Commerce rendered final affirmative AD/CVD determinations with respect to all four countries. The ITC's final determination is expected to be announced May 20, 2025. A final affirmative determination by the ITC would result in the issuance of new AD/CVD orders in early June 2025. We do not expect a final affirmative AD/CVD determination by ITC to have a negative impact on our business.

Separately, the U.S. maintains a global safeguard tariff (currently 14% ad valorem) on solar cells and modules pursuant to the Section 201 Safeguard Action on crystalline silicon photovoltaic products, which became effective in February 2018. On June 21, 2024, President Biden issued Proclamation 10779, revoking the exclusion of bifacial panels from safeguard relief previously proclaimed in Proclamation 10339, and reinstating the tariff on bifacial panels under the Section 201 Safeguard Action, subject to certain qualifications. These global tariffs are expected to expire in February 2026.

The U.S. also maintains Section 301 tariffs on certain Chinese made lithium-ion batteries and related components utilized for energy storage systems, with such tariff currently set at 7.5% and increasing to 25% effective January 1, 2026. There is also an ongoing AD/CVD investigation with respect to exports by China of natural and synthetic graphite used to make lithium-ion battery anode material. Any determinations or orders arising from such investigation could result in price increases.

Additionally, the Uyghur Forced Labor Prevention Act (“UFLPA”) seeks to block the import of products made with forced labor in certain areas of China, at any point in the supply chain, and may lead to certain suppliers being blocked from importing solar cells and panels into the U.S. While this has impacted the U.S. market, AES has managed this issue without significant impact to our projects. Further forced labor designations of entities under the UFLPA may impact our suppliers’ ability or willingness to meet their contractual agreements or to continue to supply cells or panels into the U.S. market on terms that we deem satisfactory.

The Trump Administration has threatened or imposed tariffs on a wide range of countries and products. On February 10, 2025, President Trump signed Executive Orders modifying existing Section 232 tariffs on steel and aluminum imports to expand their scope of applicability and imposing 25% tariffs on both products. At this time, we do not expect the modifications to tariffs on steel and aluminum to have a material impact on our business.

On February 1, 2025, President Trump issued an Executive Order declaring a national emergency under the International Emergency Economic Powers Act (“IEEPA”) and imposing a 10% additional tariff on imports from China, effective February 4, 2025. Effective March 4, 2025, this tariff was increased to 20%.

On April 2, 2025, President Trump issued an Executive Order pursuant to IEEPA imposing an indefinite, baseline reciprocal 10% tariff on almost all goods imported into the U.S., effective April 5, 2025, and individualized higher IEEPA tariffs (11% to 50%) starting April 9, 2025 on goods originating from 57 countries with trade surpluses with the U.S. On April 9, 2025, the U.S. government issued a further Executive Order increasing the IEEPA reciprocal tariff on China to 125% effective April 10, 2025. Concurrently, the U.S. government announced a temporary suspension of the country-specific reciprocal tariff measures targeting most U.S. trading partners for a 90-day period, or until July 9, 2025.

During the 90-day suspension, many countries have been seeking to reach bilateral trade agreements with the U.S. and the ultimate outcome of any reciprocal or other tariffs with these countries is uncertain.

We expect the tariffs on imports from China will increase overall costs for materials and parts that are imported to build and maintain renewable energy plants for the U.S. industry. However, AES has already shifted its supply chain outside of China for the vast majority of final products used to build and maintain renewable energy plants in the U.S. and we expect limited impact to projects scheduled to become operational in 2025 through 2027 due to the recently announced tariffs on China.

The impact of new tariffs, reciprocal tariffs, or Commerce investigations, the impact of any additional adverse Commerce determinations or other tariff disputes or litigation, the impact of the UFLPA, potential future disruptions to the renewable energy supply chain and their effect on AES’ U.S. project development and construction activities remain uncertain. AES will continue to monitor developments and take prudent steps towards maintaining a robust supply chain for our renewable energy projects. To that end, we have accelerated imports into the U.S. and increased our contracting for U.S. domestically manufactured solar panels, batteries, wind turbines, trackers, and other equipment, significantly mitigating the potential impacts from reciprocal tariffs or other tariffs.

More specifically, we have contracted and imported into the U.S. all of the solar panels that are necessary to complete our U.S. backlog of solar projects scheduled to finish construction and become operational in 2025. For our U.S backlog of solar projects scheduled to finish construction and become operational in 2026 or 2027, we have contracted for all of our panel supply needs, with the majority of such panels being manufactured in the U.S. and most of the remaining panels have already been imported into the U.S.

Additionally, we have contracted and imported into the U.S. all the batteries needed for our U.S. energy storage projects scheduled to be completed in 2025.

For our backlog of storage projects scheduled to finish construction and become operational in 2026 or 2027, we have contracted for approximately 80% of our battery needs, with almost all of such batteries coming from U.S. or Korean suppliers. We are also well advanced in contracting U.S. domestically manufactured battery modules to support the remainder of our U.S. energy storage growth through 2027.

For our U.S. backlog of wind projects scheduled to be completed in 2025 through 2026, we have contracted and received delivery of all turbines, and for our 2027 backlog of U.S. wind projects, we are fully contracted with U.S. suppliers.

Operational Sensitivity to Dry Hydrological Conditions — Our hydroelectric generation facilities are sensitive to changes in the weather, particularly the level of water inflows into generation facilities. Dry hydrological conditions in Panama, Colombia, and Chile can present challenges for our businesses in these markets. Low inflows can result in low reservoir levels, reduced generation output, and subsequently possible increased prices for electricity. If our hydroelectric generation facilities cannot generate sufficient energy to meet contractual arrangements, we may need to purchase energy to fulfill our obligations, which could have an adverse impact on AES. As mitigation, AES has invested in thermal, wind, and solar generation assets, which have a complementary profile to hydroelectric plants. These plants are expected to have increased generation in low hydrology scenarios, offsetting possible impacts described from hydro assets.

According to the National Oceanic and Atmospheric Administration ("NOAA"), weather conditions are currently transitioning from weak La Niña conditions to ENSO-neutral. The ENSO forecast indicates a high probability (91%) for ENSO-neutral conditions forming March-May 2025, and these conditions are favored to continue through September-November 2025.

Inflows during the first quarter of the year have been relatively stable across the region, reflecting the influence of, and transition to, ENSO-neutral condition. In Panama, overall system inflows have been only slightly below historical average conditions, except for the Bayano reservoir, which registered above-average hydrology conditions. Higher hydrology may result in energy surpluses after covering the contracted hydro positions, available to be sold in the spot market.

In Colombia, hydrological conditions were generally aligned with seasonal expectations and historical average conditions, supporting steady flows into key reservoirs and reducing the risk of extreme droughts or floods typically associated with El Niño or La Niña.

In Chile, the primary driver for AES' hydro assets is snowpack volumes and winter rains, mainly in the central regions. Over the first quarter of 2025, precipitation and snowpack accumulation was within the range of historical averages.

The exact behavior pattern and strength of weather transitions (from/to La Niña or El Niño) is unknown and therefore the impacts could vary from those described above, and may include impacts to our businesses beyond hydrology, including with respect to power generation from other renewable sources of energy and demand. Even if rainfall and water inflows remain in line with historical averages, in some cases, market prices and generation above or below the average could present due to a variety of factors related to demand, market dynamics, or regulatory impacts. Impacts may be material to our results of operations.

Macroeconomic and Political

During the past few years, some countries where our subsidiaries conduct business have experienced macroeconomic and political changes. In the event these trends continue, there could be an adverse impact on our businesses.

Inflation Reduction Act and U.S. Renewable Energy Tax Credits — The U.S. Inflation Reduction Act of 2022 (the "IRA") includes provisions that benefit the U.S. clean energy industry, including increases, extensions, direct transfers, and/or new tax credits for onshore and offshore wind, solar, storage, and hydrogen projects. The extension of the solar investment tax credits ("ITCs") and production tax credits ("PTCs"), as well as higher credits available for projects that satisfy wage and apprenticeship requirements, has increased demand for our renewables products.

Our U.S. renewables business has a backlog of approximately 7.6 GW and a 53 GW pipeline that we intend to utilize to continue to grow our business, and these changes in tax policy are supportive of this strategy. We account for U.S. renewables projects according to U.S. GAAP, which, when partnering with tax-equity investors to monetize tax benefits, utilizes the HLBV method. This method recognizes the tax-credit value that is transferred to tax equity investors at the time of its creation, which for projects utilizing the investment tax credit begins in the quarter the

project is placed in service. For projects utilizing the production tax credit, this value is recognized over 10 years as the facility produces energy.

The IRA also allows us to directly transfer investment tax credits to unrelated tax credit buyers. We account for the transfer proceeds as tax benefit throughout the year the renewables project is placed in service.

In 2024, we realized $1,313 million of earnings from Tax Attributes, comprised of $1,293 million from the Renewables SBU and $20 million from the Utilities SBU. In 2025, we expect an increase in Tax Attributes earned throughout the year by our U.S. renewables business in line with the growth in that business. For the three months ended March 31, 2025, we recognized $186 million in tax attributes.

The implementation of the IRA requires substantial guidance from the U.S. Department of Treasury and other government agencies. Some of the guidance and rulemaking enacted under the Biden Administration could be changed or modified by the Trump Administration, creating uncertainty with respect to implementation of the IRA. Also, the Trump Administration has issued Executive Orders that pause certain funding allocated to projects under the Infrastructure Investment and Jobs Act (IIJA) and the IRA during a 90-day review process. As they currently stand, these Executive Orders do not impact the tax credits under the IRA.

It remains uncertain whether Congress will modify or repeal the IRA in connection with the budget reconciliation process or otherwise. While we have taken significant measures to protect against the impact of changes to the IRA, including by implementing a program to ensure our backlog of U.S. renewables projects satisfy IRS safe harbor requirements for qualifying for the ITCs and PTCs, the impacts from any modifications or repeal of the IRA may be material to our results of operations.

Global Tax — The macroeconomic and political environments in the U.S. and in some countries where our subsidiaries conduct business have changed in recent years. This could result in significant impacts to future tax law. In the U.S., the IRA includes a 15% corporate alternative minimum tax (“CAMT”) based on adjusted financial statement income. In September 2024, the IRS released proposed regulations on the 15% CAMT. The impact to the Company in 2025 is not expected to be material.

The Netherlands, Bulgaria, and Vietnam adopted legislation to implement Pillar 2 effective as of January 1, 2024. We will continue to monitor the issuance of draft legislation in other non-EU countries where the Company operates that are considering Pillar 2 amendments and new interpretive guidance.

Inflation — In the markets in which we operate, there have been higher rates of inflation recently. While most of our contracts in our international businesses that are denominated in a currency other than the U.S. dollar are indexed to inflation, in general, our U.S.-based generation contracts are not indexed to inflation. If inflation continues to increase in our markets, it may increase our expenses that we may not be able to pass through to customers. It may also increase the costs of some of our development projects that could negatively impact their competitiveness. Our utility businesses do allow for recovering of operations and maintenance costs through the regulatory process, which may have timing impacts on recovery.

Interest Rates — In the U.S. and other markets in which we operate, there has been a rise in interest rates since 2021, and interest rates are expected to remain volatile in the near term.

As discussed in Item 3.—*Quantitative and Qualitative Disclosures about Market Risk,* although most of our existing corporate and subsidiary debt is at fixed rates, an increase in interest rates can have several impacts on our business. For any existing debt under floating rate structures and any future debt refinancings, rising interest rates will increase future financing costs. In most cases in which we have floating rate debt, our revenues serving this debt are indexed to inflation, which helps mitigate the impact of rising rates. For future debt refinancings, AES actively manages a hedging program to reduce uncertainty and exposure to future interest rates. For new business, higher interest rates increase the financing costs for new projects under development and which have not yet secured financing.

AES typically seeks to incorporate expected financing costs into our new PPA pricing such that we maintain our target investment returns, but higher financing costs may negatively impact our returns or the competitiveness of some of our development projects. Additionally, we typically seek to enter into interest rate hedges shortly after signing PPAs to mitigate the risk of rising interest rates prior to securing long-term financing.

Argentina — In July 2024, the Argentine government enacted Law 27,742, known as Ley Bases, declaring a one-year public emergency in administrative, economic, financial, and energy matters. It grants the President delegated powers and initiates broad state reforms to deregulate the economy, including labor reform, the Incentive Regime for Large Investments, modifications to non-income tax measures, and the privatization of state-owned

energy companies. Additionally, the Ministry of Energy issued Resolution 150/2024, repealing certain regulations from previous years that involved excessive state and CAMMESA intervention in the Wholesale Electricity Market ("MEM").

On January 28, 2025, the Energy Secretariat issued Resolution 21/2025 to reform the MEM and is intended to ensure secure energy supply and stable consumer costs.

On April 11, 2025, the Central Bank of Argentina started a new economic program supported by a $20 billion agreement with the International Monetary Fund. Of this amount, $15 billion will be available in 2025. The key points of the program include (a) a removal of exchange restrictions for individuals and (b) foreign shareholders can distribute profits starting from 2025 and deadlines for foreign trade payments are relaxed.

These changes may have a profound impact on the sector, influencing our operations and financial results. It is not yet possible to predict the impact of these regulations in our consolidated results of operations, cash flows, and financial condition.

Puerto Rico — As discussed in Item 7.—*Management's Discussion and Analysis of Financial Condition and Results of Operations—Key Trends and Uncertainties* of the 2024 Form 10-K, our subsidiaries in Puerto Rico have long-term PPAs with state-owned PREPA, which has been facing economic challenges that could result in a material adverse effect on our business in Puerto Rico. Despite the Title III protection, PREPA has been making substantially all of its payments to the generators in line with historical payment patterns.

The Puerto Rico Oversight, Management, and Economic Stability Act ("PROMESA") was enacted to create a structure for exercising federal oversight over the fiscal affairs of U.S. territories and created procedures for adjusting debt accumulated by the Puerto Rico government and, potentially, other territories ("Title III"). PROMESA also expedites the approval of key energy projects and other critical projects in Puerto Rico.

PROMESA allowed for the establishment of an Oversight Board with broad powers of budgetary and financial control over Puerto Rico. The Oversight Board filed for bankruptcy on behalf of PREPA under Title III in July 2017. As a result of the bankruptcy filing, AES Ilumina's non-recourse debt of $22 million continues to be in technical default and is classified as current as of March 31, 2025.

In 2022, a mediation commenced to resolve the PREPA Title III case. On March 19, 2025, the judge presiding over the case entered an order to permit the filing of an amended plan of adjustment and litigation of specific issues, including administrative expense claim by non-settling bondholders. The stay of plan confirmation and bondholder rights-related litigation was extended without a termination date, and the non-settling bondholders' motion to lift the stay was denied. The PROMESA oversight board filed an amended plan of adjustment and disclosure statement for PREPA on March 28, 2025. On April 25, 2025, the Oversight Board filed a status report seeking to extend the mediation period for six months through October 31, 2025.

Considering the information available as of the date hereof, management believes the carrying amount of our long-lived assets in Puerto Rico of $751 million is recoverable as of March 31, 2025.

Decarbonization Initiatives

Our strategy involves shifting towards clean energy platforms, including renewable energy, energy storage, LNG, and modernized grids. It is designed to position us for continued growth while reducing our carbon intensity and to be in support of our mission of accelerating the future of energy, together. We have made significant progress on our exit of coal generation, and by year-end 2025, we intend to have exited the substantial majority of our coal facilities that we owned in 2022. Due to a number of factors, including grid and market dynamics, we will continue to work towards exiting coal in the limited markets where we have coal generation. We currently anticipate these efforts will continue beyond 2027. We expect to further reduce the carbon intensity of our operations as we add more long-term contracted renewables to the grid each year.

In addition, initiatives have been announced by regulators, including in Chile, Puerto Rico, Bulgaria, and offtakers in recent years, with the intention of reducing GHG emissions generated by the energy industry. In parallel, the shift towards renewables has caused certain customers to migrate to other low-carbon energy solutions and this trend may continue.

Although we cannot currently estimate the financial impact of these decarbonization initiatives, new legislative or regulatory programs further restricting carbon emissions or other initiatives to voluntarily exit coal generation could require material capital expenditures, result in a reduction of the estimated useful life of certain coal facilities, or have other material adverse effects on our financial results.

For further information about the risks associated with decarbonization initiatives, see Item 1A.—*Risk Factors —Concerns about GHG emissions and the potential risks associated with climate change have led to increased regulation and other actions that could impact our businesses* included in the 2024 Form 10-K.

Regulatory

FERC, RTOs, and Interconnection Prioritization — On February 11, 2025, FERC approved PJM's request for a one-time change in its interconnection process to expedite the interconnection of a limited number of high-capacity resources to support near-term resource adequacy and grid reliability. This change to PJM's interconnection process is not expected to impact the PJM projects already in our backlog since they have received interconnection approvals. However, it will likely create uncertainty and delays in the time for interconnection approvals for our development pipeline of renewables projects in PJM. Other RTOs are considering similar proposals to expedite interconnection approvals for certain high-capacity resources. See Item 1A.—*Risk Factors - Our development projects are subject to substantial uncertainties* included in the 2024 Form 10-K for further details.

U.S. Executive Orders — A recent Executive Order has required a review of all federal onshore wind leasing and federal permitting practices. In executing this order, the Department of Interior and other agencies have paused federal permitting for all wind projects on federal lands and private lands with a federal nexus. Our U.S. renewables projects are developed primarily on private land and are designed in a manner that minimizes the potential of a federal nexus. At this time, we do not expect this Order to have a significant impact on our business.

AES Maritza PPA Review — DG Comp is conducting a preliminary review of whether AES Maritza's PPA with NEK is compliant with the European Union's State Aid rules. No formal investigation has been launched by DG Comp to date. AES Maritza has previously engaged in discussions with the DG Comp case team and the Government of Bulgaria ("GoB") to attempt to reach a negotiated resolution of the DG Comp's review ("PPA Discussions"). There are no active PPA Discussions at present but those discussions could resume at any time. The PPA continues to remain in place. However, there can be no assurance that, in the context of DG Comp's preliminary review or any future PPA Discussions, the other parties will not seek a prompt termination of the PPA.

We do not believe termination of the PPA is justified. Nevertheless, the PPA Discussions involved a range of potential outcomes, including but not limited to the termination of the PPA and payment of some level of compensation to AES Maritza. Any negotiated resolution would be subject to mutually acceptable terms, lender consent, and DG Comp approval. At this time, we cannot predict whether and when the PPA Discussions might resume or the outcome of any such discussions. Nor can we predict how DG Comp might resolve its review if the PPA Discussions do not resume or if any such discussions fail to result in an agreement concerning the agency's review. AES Maritza believes that its PPA is legal and in compliance with all applicable laws, and it will take all actions necessary to protect its interests, whether through negotiated agreement or otherwise. However, there can be no assurance that this matter will be resolved favorably; if it is not, there could be a material adverse effect on the Company's financial condition, results of operations, and cash flows. As of March 31, 2025, the carrying value of our long-lived assets at Maritza is $318 million.

AES Ohio Smart Grid Phase 2 Filing — In February 2024, AES Ohio filed a Smart Grid Phase 2 with the PUCO proposing a ten-year investment plan to begin after Smart Grid Phase 1 ends. On September 13, 2024, AES Ohio reached a settlement with the PUCO Staff and other parties on the pending Smart Grid Phase 2 Application. The Settlement will provide for a four-year plan to invest $241 million of capital and $19 million of operations and maintenance expense related to grid modernization, support of Distributed Energy Resources and Economic Development, and an enhanced Telecommunications network. These costs will be recovered through the existing Investment Infrastructure Rider. An evidentiary hearing was held on October 29, 2024, and we expect an order from PUCO by the second quarter of 2025, prior to the end of Smart Grid Phase 1.

AES Ohio Distribution Rate Case — On November 29, 2024, AES Ohio filed a new distribution rate case with the PUCO. The investments reflected in the distribution rate case include investments to enhance the safety, reliability, and resilience of the distribution system. Among other matters, the application requests: (i) an increase to its annual distribution revenue requirement of $235 million, which incorporates certain investments that are currently recovered through the Distribution Investment Rider; (ii) a return on equity of 10.95% and a cost of long-term debt of 4.49% on a distribution rate base of $1.3 billion and based on a capital structure of 53.87% equity and 46.13% long-term debt; and (iii) a date certain of September 30, 2024 and a test period of June 1, 2024 – May 31, 2025. The rate case application also includes a proposal for increased tree-trimming expenses. AES Ohio proposed an evidentiary

hearing to be held beginning June 2, 2025; however, the PUCO has not yet established a procedural schedule for the proceeding.

AES Ohio Legislation — On April 30, 2025, the Ohio legislature passed new energy legislation (HB 15) that will be sent to the Governor for signature or veto. As passed by the state legislature, the legislation would allow Ohio's electric utilities to file three-year forecasted base distribution rate cases, which would replace electric security plans and associated recovery riders. Among other provisions, the legislation would also eliminate the Legacy Generation Resource Rider, which allows for recovery of net OVEC costs and revenues. As of March 31, 2025, AES Ohio's Legacy Generation Resource Rider regulatory asset balance was $9.7 million which we would continue to collect, in an amount based, among other things, on customer usage and rates through the effective date of the legislation, if signed by the Governor. Changes to the regulatory framework from this legislation, including not recovering any remaining regulatory asset balance amount or future net OVEC costs and revenue, could be material to our results of operations, financial condition, and cash flows.

Foreign Exchange Rates

We operate in multiple countries and as such are subject to volatility in exchange rates at varying degrees at the subsidiary level and between our functional currency, the USD, and currencies of the countries in which we operate.

The overall economic climate in Argentina has deteriorated, resulting in volatility and increased the risk that a further significant devaluation of the Argentine peso against the USD, similar to the devaluations experienced by the country in 2018, 2019, and 2023, may occur. A continued trend of peso devaluation could result in increased inflation, a deterioration of the country’s risk profile, and other adverse macroeconomic effects that could significantly impact our results of operations. For additional information, refer to Item 3.—*Quantitative and Qualitative Disclosures About Market Risk*.

Impairments and Realizability

Long-lived Assets and Current Assets Held-for-Sale — During the three months ended March 31, 2025, the Company recognized asset impairment expense of $49 million. See Note 16—*Asset Impairment Expense* included in Item 1.—*Financial Statements* of this Form 10-Q for further information. After recognizing this impairment expense, the carrying value of long-lived assets and current assets held-for-sale that were assessed for impairment totaled $490 million at March 31, 2025.

Events or changes in circumstances that may necessitate recoverability tests and potential impairments of long-lived assets may include, but are not limited to, adverse changes in the regulatory environment, unfavorable changes in power prices or fuel costs, increased competition due to additional capacity in the grid, technological advancements, declining trends in demand, evolving industry expectations to transition away from fossil fuel sources for generation, or an expectation it is more likely than not the asset will be disposed of before the end of its estimated useful life.

Tax Asset Realizability — Certain AES Chilean businesses have recorded net deferred tax assets ("DTA") of $237 million relating primarily to net operating loss carryforwards, which are not subject to expiration. Their realization is dependent on generating sufficient taxable income. At this time, management believes it is more likely than not that all of the DTA will be realized; however, it could be reduced by way of valuation allowance in the near term if estimates of future taxable income are reduced.

Environmental

The Company is subject to numerous environmental laws and regulations in the jurisdictions in which it operates. The Company faces certain risks and uncertainties related to these environmental laws and regulations, including existing and potential GHG legislation or regulations, and actual or potential laws and regulations pertaining to water discharges, waste management (including disposal of coal combustion residuals) and certain air emissions, such as SO_2, NO_x, particulate matter, mercury, and other hazardous air pollutants, and species and habitat protections. Such risks and uncertainties could result in increased capital expenditures or other compliance costs which could have a material adverse effect on certain of our U.S. or international subsidiaries and our consolidated results of operations. For further information about these risks, see Item 1A.—*Risk Factors—Our operations are subject to significant government regulation and could be adversely affected by changes in the law or regulatory schemes; Several of our businesses are subject to potentially significant remediation expenses, enforcement initiatives, private party lawsuits and reputational risk associated with CCR; Our businesses are subject to stringent environmental laws, rules and regulations;* and *Concerns about GHG emissions and the*

potential risks associated with climate change have led to increased regulation and other actions that could impact our businesses included in the 2024 Form 10-K.

CSAPR — CSAPR addresses the “good neighbor” provision of the CAA, which prohibits sources within each state from emitting any air pollutant in an amount which will contribute significantly to any other state’s nonattainment, or interference with maintenance of, any NAAQS. The CSAPR required significant reductions in SO_2 and NO_x emissions from power plants in many states in which subsidiaries of the Company operate. The Company is required to comply with the CSAPR in certain states, including Indiana and Maryland. The CSAPR is implemented, in part, through a market-based program under which compliance may be achievable through the acquisition and use of emissions allowances created by the EPA. The Company complies with CSAPR through operation of existing controls and purchases of allowances on the open market, as needed.

In October 2016, the EPA published a final rule to update the CSAPR to address the 2008 ozone NAAQS (“CSAPR Update Rule”). The CSAPR Update Rule found that NO_x ozone season emissions in 22 states (including Indiana and Maryland) affected the ability of downwind states to attain and maintain the 2008 ozone NAAQS, and, accordingly, the EPA issued federal implementation plans that both updated existing CSAPR NO_x ozone season emission budgets for electric generating units within these states and implemented these budgets through modifications to the CSAPR NO_x ozone season allowance trading program. Implementation started in the 2017 ozone season (May-September 2017). Affected facilities receive fewer ozone season NO_x allowances in 2017 and later, possibly resulting in the need to purchase additional allowances. Following legal challenges to the CSAPR Update Rule, on April 30, 2021, the EPA issued the Revised CSAPR Update Rule. The Revised CSAPR Update Rule required affected EGUs within certain states (including Indiana and Maryland) to participate in a new trading program, the CSAPR NO_x Ozone Season Group 3 trading program. These affected EGUs received fewer NO_x Ozone Season allowances beginning in 2021.

On June 5, 2023, the EPA published a final Federal Implementation Plan ("FIP") to address air quality impacts with respect to the 2015 Ozone NAAQS. The rule establishes a revised CSAPR NO_x Ozone Season Group 3 trading program for 22 states, including Indiana and Maryland, and became effective during 2023. The FIP also includes enhancements to the revised Group 3 trading program, which include a dynamic budget setting process beginning in 2026, annual recalibration of the allowance bank to reflect changes to affected sources, a daily backstop emissions rate limit for certain coal-fired electric generating units beginning in 2024, and a secondary emissions limit prohibiting certain emissions associated with state assurance levels. It is too early to determine the impact of the final FIP, but it may result in the need to purchase additional allowances or make operational adjustments. On June 27, 2024, the U.S. Supreme Court issued an order granting a stay of the EPA’s 2023 FIP pending resolution of legal challenges to the FIP.

While the Company's additional CSAPR compliance costs to date have been immaterial, the future availability of and cost to purchase allowances to meet the emission reduction requirements is uncertain at this time, but it could be material.

Mercury and Air Toxics Standard — In April 2012, the EPA’s rule to establish maximum achievable control technology standards for hazardous air pollutants regulated under the CAA emitted from coal and oil-fired electric utilities, known as “MATS”, became effective and AES facilities implemented measures to comply, as applicable. In June 2015, the U.S. Supreme Court remanded MATS to the D.C. Circuit due to the EPA’s failure to consider costs before deciding to regulate power plants under Section 112 of the CAA and subsequently remanded MATS to the EPA without vacatur. On May 22, 2020, the EPA published a final finding that it is not “appropriate and necessary” to regulate hazardous air pollutant emissions from coal- and oil-fired electric generating units (“EGUs”) (reversing its prior 2016 finding), but that the EPA would not remove the source category from the CAA Section 112(c) list of source categories and would not change the MATS requirements. On March 6, 2023, the EPA published a final rule to revoke its May 2020 finding and reaffirm its 2016 finding that it is appropriate and necessary to regulate these emissions. On April 24, 2023, the EPA published a proposed rule, the MATS Risk and Technology Review (“RTR”) Rule to lower certain emissions limits and revise certain other aspects of MATS. On May 7, 2024, the EPA published a final rule to revise MATS for coal and oil-fired EGUs. The final rule became effective on July 8, 2024. The final rule lowers certain emissions limits and revises certain other aspects of MATS. The MATS RTR Rule is subject to legal challenges. On October 4, 2024, the U.S. Supreme Court denied emergency stay applications.

Further rulemakings and/or proceedings are possible; however, in the meantime, MATS remains in effect. We currently cannot predict the outcome of the regulatory or judicial process, or its impact, if any, on our MATS compliance planning or ultimate costs.

Climate Change Regulation — The final NSPS for CO_2 emissions from new, modified, and reconstructed

fossil-fuel-fired power plants were published in the *Federal Register* on October 23, 2015. Several states and industry groups challenged the NSPS for CO_2 in the D.C. Circuit Court. On December 20, 2018, the EPA published proposed revisions to the final NSPS for new, modified, and reconstructed coal-fired electric utility steam generating units. The EPA proposed that the Best System of Emissions Reduction ("BSER") for these units is highly efficient generation that would be equivalent to supercritical steam conditions for larger units and sub-critical steam conditions for smaller units, and not partial carbon capture and sequestration ("CCS"), which had been the BSER for these units in the 2015 final NSPS. The EPA did not include revisions for natural-gas combined cycle or simple cycle units in the December 20, 2018 proposal. Challenges to the GHG NSPS remain held in abeyance at this time. On May 23, 2023, the EPA published a proposed rule that would establish CO_2 emissions limits for certain new fossil-fuel fired stationary combustion turbines that commence construction or are modified after May 23, 2023. On May 9, 2024, the EPA published the final NSPS requiring carbon capture and sequestration for new and reconstructed baseload stationary combustion turbines, among other requirements. The EPA did not finalize revisions to the NSPS for newly constructed or reconstructed coal-fired electric utility steam generating units as proposed in 2018.

On July 8, 2019, the EPA published the final Affordable Clean Energy ("ACE") Rule which would have established CO_2 emission rules for existing power plants under CAA Section 111(d) and would have replaced the EPA's 2015 Clean Power Plan Rule ("CPP"). However, on January 19, 2021, the D.C. Circuit vacated and remanded the ACE Rule. Subsequently, on June 30, 2022, the Supreme Court reversed the judgment of the D.C. Circuit Court and remanded for further proceedings consistent with its opinion holding that the "generation shifting" approach in the CPP exceeded the authority granted to the EPA by Congress under Section 111(d) of the CAA. As a result of the June 30, 2022 Supreme Court decision, on October 27, 2022, the D.C. Circuit issued a partial mandate, holding pending challenges to the ACE Rule in abeyance while the EPA developed a replacement rule. On May 23, 2023, the EPA published a proposed rule that would vacate the ACE Rule and proposed New Source Performance Standards ("NSPSs") that would establish emissions guidelines in the form of CO_2 emissions limitations for certain existing electric generating units ("EGUs") and would require states to develop State Plans that establish standards of performance for such EGUs that are at least as stringent as the EPA's emissions guidelines. Depending on various EGU-specific factors, the bases of proposed emissions guidelines range from routine methods of operation to carbon capture and sequestration or co-firing low-GHG hydrogen starting in the 2030s. On May 9, 2024, the EPA published the final rule regulating GHGs from existing EGUs pursuant to Section 111(d) of the Clean Air Act and effective on July 8, 2024. Existing EGUs are those that were constructed prior to January 8, 2014. Depending on various EGU-specific factors, the bases of emissions guidelines for natural gas-fired units include the use of uniform fuels and routine methods of operation and maintenance and the bases of emissions guidelines for coal-fired units include 40% natural gas co-firing or carbon capture and sequestration with 90% capture of CO_2 depending on the date that coal operations cease. Specific standards for performance for EGUs will be established through a State Plan (or a Federal Plan if a state were to not submit an approvable plan). The May 2024 rule is subject to legal challenges. On October 16, 2024, the U.S. Supreme Court denied emergency stay applications. The impact of the rules, the results of further proceedings, and potential future greenhouse gas emissions regulations remain uncertain but could be material.

Waste Management — On October 19, 2015, an EPA rule regulating CCR under the Resource Conservation and Recovery Act as nonhazardous solid waste became effective. The rule established nationally applicable minimum criteria for the disposal of CCR in new and currently operating landfills and surface impoundments, including location restrictions, design and operating criteria, groundwater monitoring, corrective action and closure requirements, and post-closure care. The primary enforcement mechanisms under this regulation would be actions commenced by the states and private lawsuits. On December 16, 2016, the Water Infrastructure Improvements for the Nation Act ("WIIN Act") was signed into law. This includes provisions to implement the CCR rule through a state permitting program, or if the state chooses not to participate, a possible federal permit program. If this rule is finalized before Indiana or Puerto Rico establishes a state-level CCR permit program, AES CCR units in those locations could eventually be required to apply for a federal CCR permit from the EPA. The EPA has indicated that it will implement a phased approach to amending the CCR Rule, which is ongoing. On August 28, 2020, the EPA published final amendments to the CCR Rule titled "A Holistic Approach to Closure Part A: Deadline to Initiate Closure," that, among other amendments, required certain CCR units to cease waste receipt and initiate closure by April 11, 2021. The CCR Part A Rule also allowed for extensions of the April 11, 2021 deadline if the EPA determines certain criteria are met. Facilities seeking such an extension were required to submit a demonstration to the EPA by November 30, 2020. On January 11, 2022, the EPA released the first in a series of proposed determinations regarding CCR Part A Rule demonstrations and compliance-related letters notifying certain other facilities of their compliance obligations under the federal CCR regulations. The determinations and letters include interpretations regarding implementation of the CCR Rule. On April 8, 2022, petitions for review were filed challenging these EPA actions. The petitions are consolidated in *Electric Energy, Inc. v. EPA.* On June 28, 2024, the

D.C. Circuit dismissed the challenges. It is too early to determine the direct or indirect impact of these letters or any determinations that may be made.

On May 18, 2023, the EPA published a proposed rule that would expand the scope of CCR units regulated by the CCR Rule to include inactive surface impoundments at inactive generating facilities as well as additional inactive and closed landfills and certain other accumulations of CCR. On May 8, 2024, the EPA published final revisions to the CCR rule which are effective on November 8, 2024. The final revisions expand the scope of CCR units regulated by the CCR rule to include legacy surface impoundments, inactive surface impoundments, and CCR management units. It is too early to determine the potential impact.

On February 20, 2020, the EPA published a proposed rule to establish a federal CCR permit program that would operate in states without approved CCR permit programs. If this rule is finalized before Indiana establishes a final state-level CCR permit program, AES Indiana could eventually be required to apply for a federal CCR permit from the EPA. On December 21, 2022, the Indiana Department of Environmental Management (“IDEM”) published in the Indiana Register a Second Notice of Comment Period for its proposed CCR rulemaking which would include regulation of CCR through a state permitting program. On August 7, 2024, in response to changes to Indiana statute, as well as comments received during the Second Notice of Comment Period, IDEM published a Continuation of the Second Notice of Comment Period for proposed amendments to the draft rule language for a State CCR Permitting Program.

The CCR rule, current or proposed amendments to or interpretations of the CCR rule, the results of groundwater monitoring data, or the outcome of CCR-related litigation could have a material impact on our business, financial condition, and results of operations. AES Indiana would seek recovery of any resulting expenditures; however, there is no guarantee we would be successful in this regard.

Cooling Water Intake — The Company's facilities are subject to a variety of rules governing water use and discharge. In particular, the Company's U.S. facilities are subject to the CWA Section 316(b) rule issued by the EPA effective in 2014 that seeks to protect fish and other aquatic organisms drawn into cooling water systems at power plants and other facilities. These standards require affected facilities to choose among seven BTA options to reduce fish impingement. In addition, certain facilities must conduct studies to assist permitting authorities to determine whether and what site-specific controls, if any, would be required to reduce entrainment of aquatic organisms. It is possible that this process, which includes permitting and public input, could result in the need to install closed-cycle cooling systems (closed-cycle cooling towers) or other technology. Finally, the standards require that new units added to an existing facility to increase generation capacity are required to reduce both impingement and entrainment. It is not yet possible to predict the total impacts of this final rule at this time, including any challenges to such final rule and the outcome of any such challenges. However, if additional capital expenditures are necessary, they could be material.

Certain AES Southland OTC units were required to be retired to provide interconnection capacity and/or emissions credits prior to startup of new (air cooled) generating units, and the remaining AES OTC generating units in California have been or will be shut down and permanently retired by the applicable OTC Policy compliance dates for the respective units. The SWRCB OTC Policy currently requires the shutdown and permanent retirement of the remaining OTC generating units at AES Huntington Beach, LLC and AES Alamitos, LLC by December 31, 2026, as extended in support of grid reliability. This extension compliance date is contingent upon the facilities participating in the Strategic Reserve established by AB 205.

Power plants are required to comply with the more stringent of state or federal requirements. At present, the California state requirements are more stringent and have earlier compliance dates than the federal EPA requirements, and are therefore applicable to the Company's California assets. The Company anticipates that compliance with CWA Section 316(b) regulations and associated costs could have a material impact on our consolidated financial condition or results of operations.

Water Discharges — In June 2015, the EPA and the U.S. Army Corps of Engineers ("the Agencies") published a rule defining federal jurisdiction over waters of the U.S., known as the "Waters of the U.S." (“WOTUS”) rule. WOTUS defines the geographic reach and authority of the Agencies to regulate streams, wetlands, and other water bodies under the CWA. There have been multiple Supreme Court decisions and dueling regulatory definitions over the past several years concerning the proper standard for how to properly determine whether a wetland or stream that is not navigable is considered a WOTUS. On May 25, 2023, the U.S. Supreme Court rendered a decision (“Decision”) in the case of *Sackett v. Environmental Protection Agency*, addressing the definition of WOTUS with regards to the CWA. This decision provides a clear standard that substantially restricts the Agencies' ability to regulate certain types of wetlands and streams. Specifically, under this decision, wetlands that do not have a continuous surface connection with traditional interstate navigable water are not federally jurisdictional.

On September 8, 2023, the Agencies published final rule amendments in the Federal Register to amend the final "Revised Definition of 'Waters of the United States'" rule. This final rule conforms the definition to the definition adopted in the Decision. The Agencies have amended key aspects of the regulatory text to conform the rule to the Decision. On March 12, 2025, the Agencies issued a joint guidance memorandum for implementing "continuous surface connection" consistent with the Decision and related issues. The Federal Register notice was published on March 24, 2025 outlining a process to gather recommendations for implementation of WOTUS. It is too early to determine whether the outcome of litigation or current or future revisions to rules interpreting federal jurisdiction over WOTUS may have a material impact on our business, financial condition, or results of operations.

In November 2015, the EPA published its final ELG rule to reduce toxic pollutants discharged into waters of the U.S. by steam-electric power plants through technology applications. These effluent limitations for existing and new sources include dry handling of fly ash, closed-loop or dry handling of bottom ash, and more stringent effluent limitations for flue gas desulfurization wastewater. AES Indiana Petersburg has installed a dry bottom ash handling system in response to the CCR rule and wastewater treatment systems in response to the NPDES permits in advance of the ELG compliance date. Other U.S. businesses already include dry handling of fly ash and bottom ash and do not generate flue gas desulfurization wastewater. Following the 2019 U.S. Court of Appeals vacatur and remand of portions of the 2015 ELG rule related to leachate and legacy water, on March 29, 2023, the EPA published a proposed rule revising the 2020 Reconsideration Rule. On May 9, 2024, the EPA published a final rule which became effective on July 8, 2024. The final rule established more stringent best available technology limits for flue gas desulfurization wastewater, bottom ash transport water, and combustion residual leachate and established a new set of definitions and new limits for combustion residual leachate and legacy wastewater. The May 2024 rule is subject to legal challenges. On October 10, 2024, the Eighth Circuit Court denied stay applications. It is too early to determine whether any outcome of litigation or current or future revisions to the ELG rule might have a material impact on our business, financial condition, and results of operations.

U.S. Executive Actions Affecting Environmental Regulations — On January 20, 2025, President Trump issued an Executive Order directing Agencies to, among other tasks, review regulations issued under the prior administration to determine whether they should be suspended, revised, or rescinded. President Trump also issued a Memorandum directing agencies to refrain from proposing or issuing any rules until the current administration has reviewed and approved those rules. In accordance with these and other Executive Orders, on March 12, 2025, the EPA released a list of environmental regulations that will be targeted for reconsideration and other deregulatory action. These and other actions, including other Executive Orders and directives from the administration, may have an impact on regulations and permitting processes that may affect our business, financial condition, or results of operations.

Capital Resources and Liquidity

Overview

As of March 31, 2025, the Company had unrestricted cash and cash equivalents of $1.8 billion, of which $151 million was held at the Parent Company and qualified holding companies. The Company had $64 million in short-term investments, held primarily at subsidiaries, and restricted cash and debt service reserves of $813 million. The Company also had non-recourse and recourse aggregate principal amounts of debt outstanding of $24 billion and $6 billion, respectively. Of the $3 billion of our current non-recourse debt, $2.8 billion was presented as such because it is due in the next twelve months and $178 million relates to debt considered in default. AES Puerto Rico is in payment default. All other defaults are not payment defaults but are instead technical defaults triggered by failure to comply with covenants or other requirements contained in the non-recourse debt documents. Additionally, on February 6, 2025, AES Dominican Renewable Energy failed to comply with a covenant on its debt of $353 million, resulting in a technical default. AES Dominican Renewable Energy is classified as held-for-sale as of March 31, 2025, therefore the associated non-recourse debt is classified in *Current held-for-sale liabilities* on the Condensed Consolidated Balance Sheet. See Note 8—*Obligations* and Note 18—*Held-For-Sale and Dispositions* in Item 1.—*Financial Statements* of this Form 10-Q for additional detail. As of March 31, 2025, the Company also had $605 million outstanding related to supplier financing arrangements.

We expect current maturities of non-recourse debt, recourse debt, and amounts due under supplier financing arrangements to be repaid from net cash provided by operating activities of the subsidiary to which the liability relates, through opportunistic refinancing activity, or some combination thereof. We have $1.2 billion in recourse debt which matures within the next twelve months, including $255 million in outstanding borrowings under the commercial paper program. Furthermore, we have $416 million due under supplier financing arrangements that have a guarantee, $301 million guaranteed by the Parent Company and $115 million guaranteed by subsidiaries.

From time to time, we may elect to repurchase our outstanding debt through cash purchases, privately negotiated transactions, or otherwise when management believes that such securities are attractively priced. Such repurchases, if any, will depend on prevailing market conditions, our liquidity requirements, and other factors. The amounts involved in any such repurchases may be material.

We rely mainly on long-term debt obligations to fund our construction activities. We have, to the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and investments required to construct and acquire our electric power plants, distribution companies, and related assets. Our non-recourse financing is designed to limit cross-default risk to the Parent Company or other subsidiaries and affiliates. Our non-recourse long-term debt is a combination of fixed and variable interest rate instruments. Debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. In certain cases, the currency is matched through the use of derivative instruments. The majority of our non-recourse debt is funded by international commercial banks, with debt capacity supplemented by multilaterals and local regional banks.

Given our long-term debt obligations, the Company is subject to interest rate risk on debt balances that accrue interest at variable rates. When possible, the Company will borrow funds at fixed interest rates or hedge its variable rate debt to fix its interest costs on such obligations. In addition, the Company has historically tried to maintain at least 70% of its consolidated long-term obligations at fixed interest rates, including fixing the interest rate through the use of interest rate swaps. These efforts apply to the notional amount of the swaps compared to the amount of related underlying debt. Additionally, commercial paper issuances are short-term in nature and subject the Parent Company to interest rate risk at the time of refinancing the paper. On a consolidated basis, of the Company's $30.3 billion of total gross debt outstanding as of March 31, 2025, approximately $9.4 billion accrues interest at variable rates. The Company actively hedges its current and expected variable rate exposure through a combination of currently effective and forward starting interest rate swaps. As of March 31, 2025, the total maximum outstanding amount of hedges protecting the company against variable rate exposure was $8.3 billion. These hedges generally provide economic protection through the entire expected life of the projects, regardless of the type of debt issued to finance construction or refinance the projects in the future.

In addition to utilizing non-recourse debt at a subsidiary level when available, the Parent Company provides a portion, or in certain instances all, of the remaining long-term financing or credit required to fund development, construction, or acquisition of a particular project. These investments have generally taken the form of equity investments or intercompany loans, which are subordinated to the project's non-recourse loans. We generally obtain the funds for these investments from our cash flows from operations, proceeds from the sales of assets and/or the proceeds from our issuances of debt, common stock, and other securities. Similarly, in certain of our businesses, the Parent Company may provide financial guarantees or other credit support for the benefit of counterparties who have entered into contracts for the purchase or sale of electricity, equipment, or other services with our subsidiaries or lenders. In such circumstances, if a business defaults on its payment or supply obligation, the Parent Company will be responsible for the business' obligations up to the amount provided for in the relevant guarantee or other credit support. As of March 31, 2025, the Parent Company had provided outstanding financial and performance-related guarantees or other credit support commitments to or for the benefit of our businesses, which were limited by the terms of the agreements, of approximately $4.3 billion in aggregate (excluding those collateralized by letters of credit and other obligations discussed below).

Some counterparties may be unwilling to accept our general unsecured commitments to provide credit support. Accordingly, with respect to both new and existing commitments, the Parent Company may be required to provide some other form of assurance, such as a letter of credit, to backstop or replace our credit support. The Parent Company may not be able to provide adequate assurances to such counterparties. To the extent we are required and able to provide letters of credit or other collateral to such counterparties, this will reduce the amount of credit available to us to meet our other liquidity needs. As of March 31, 2025, we had $324 million in letters of credit under bilateral agreements, $107 million in letters of credit outstanding provided under our unsecured credit facilities, and $19 million in letters of credit outstanding provided under our revolving credit facilities. These letters of credit operate to guarantee performance relating to certain project development and construction activities and business operations. During the quarter ended March 31, 2025, the Company paid letter of credit fees ranging from 1% to 3% per annum on the outstanding amounts.

Additionally, in connection with certain project financings, some of the Company's subsidiaries have expressly undertaken limited obligations and commitments. These contingent contractual obligations are issued at the subsidiary level and are non-recourse to the Parent Company. As of March 31, 2025, the maximum undiscounted potential exposure to guarantees and letters of credit issued by our subsidiaries was $5.4 billion, including $1.9 billion of customary payment guarantees under EPC contracts and other agreements, $1.4 billion of letters of credit

outstanding, $1.2 billion of surety bonds and other guarantees issued by insurance companies, and $828 million of tax equity financing related guarantees.

We expect to continue to seek, where possible, non-recourse debt financing in connection with the assets or businesses that we or our affiliates may develop, construct, or acquire. However, depending on local and global market conditions and the unique characteristics of individual businesses, non-recourse debt may not be available on economically attractive terms or at all. If we decide not to provide any additional funding or credit support to a subsidiary project that is under construction or has near-term debt payment obligations and that subsidiary is unable to obtain additional non-recourse debt, such subsidiary may become insolvent, and we may lose our investment in that subsidiary. Additionally, if any of our subsidiaries lose a significant customer, the subsidiary may need to withdraw from a project or restructure the non-recourse debt financing. If we or the subsidiary choose not to proceed with a project or are unable to successfully complete a restructuring of the non-recourse debt, we may lose our investment in that subsidiary.

Many of our subsidiaries depend on timely and continued access to capital markets to manage their liquidity needs. The inability to raise capital on favorable terms, to refinance existing indebtedness, or to fund operations and other commitments during times of political or economic uncertainty may have material adverse effects on the financial condition and results of operations of those subsidiaries. In addition, changes in the timing of tariff increases or delays in the regulatory determinations under the relevant concessions could affect the cash flows and results of operations of our businesses.

Long-Term Receivables

As of March 31, 2025, the Company had approximately $106 million of gross accounts receivable classified as *Other noncurrent assets*. These noncurrent receivables mostly consist of accounts receivable in the U.S. and Chile that, pursuant to amended agreements or government resolutions, have collection periods that extend beyond March 31, 2026, or one year from the latest balance sheet date. Noncurrent receivables in the U.S. pertain primarily to the sale of the Redondo Beach land. Noncurrent receivables in Chile pertain primarily to payment deferrals granted to mining customers as part of our green blend agreements. See Note 5—*Financing Receivables* in Item 1. —*Financial Statements* of this Form 10-Q for further information.

As of March 31, 2025, the Company had $934 million of loans receivable related to the Mong Duong facility in Vietnam, which was constructed under a build, operate, and transfer contract. This loan receivable represents contract consideration related to the construction of the facility, which was substantially completed in 2015, and will be collected over the 25-year term of the plant's PPA. As of March 31, 2025, Mong Duong met the held-for-sale criteria and the loan receivable balance, net of CECL reserves of $23 million, was classified in *Current held-for-sale assets*. See Note 14—*Revenue* in Item 1.—*Financial Statements* of this Form 10-Q for further information.

Cash Sources and Uses

The primary sources of cash for the Company in the three months ended March 31, 2025 were debt financings, cash flows from operating activities, purchases under supplier financing arrangements, and sales to noncontrolling interests. The primary uses of cash in the three months ended March 31, 2025 were repayments of debt, capital expenditures, and repayments of obligations under supplier financing arrangements.

The primary sources of cash for the Company in the three months ended March 31, 2024 were debt financings, purchases under supplier financing arrangements, and cash flows from operating activities. The primary uses of cash in the three months ended March 31, 2024 were capital expenditures, repayments of debt, and repayments of obligations under supplier financing arrangements.

A summary of cash-based activities is as follows (in millions):

	Three Months Ended March 31,	
Cash Sources:	**2025**	**2024**
Issuance of non-recourse debt	$ 1,293	$ 2,131
Borrowings under the revolving credit facilities	1,187	1,741
Issuance of recourse debt	800	—
Net cash provided by operating activities	545	287
Purchases under supplier financing arrangements	317	486
Commercial paper borrowings (repayments), net	255	719
Sales to noncontrolling interests	245	125
Sale of short-term investments	33	141
Other	78	133
Total Cash Sources	$ 4,753	$ 5,763
Cash Uses:		
Capital expenditures [1]	$ (1,254)	$ (2,148)
Repayments of recourse debt	(774)	—
Repayments of non-recourse debt	(759)	(915)
Repayments of obligations under supplier financing arrangements	(628)	(516)
Repayments under revolving credit facilities	(451)	(1,037)
Dividends paid on AES common stock	(125)	(116)
Purchase of short-term investments	(18)	(144)
Other	(217)	(322)
Total Cash Uses	$ (4,226)	$ (5,198)
Net increase in Cash, Cash Equivalents, and Restricted Cash	$ 527	$ 565

[1] Includes interest capitalized on development and construction of $124 million and $157 million for the three months ended March 31, 2025 and 2024, respectively. Of the total capitalized, $118 million and $154 million, respectively, are related to recourse and non-recourse debt interest payments. The remaining capitalized interest is primarily related to supplier financing arrangements.

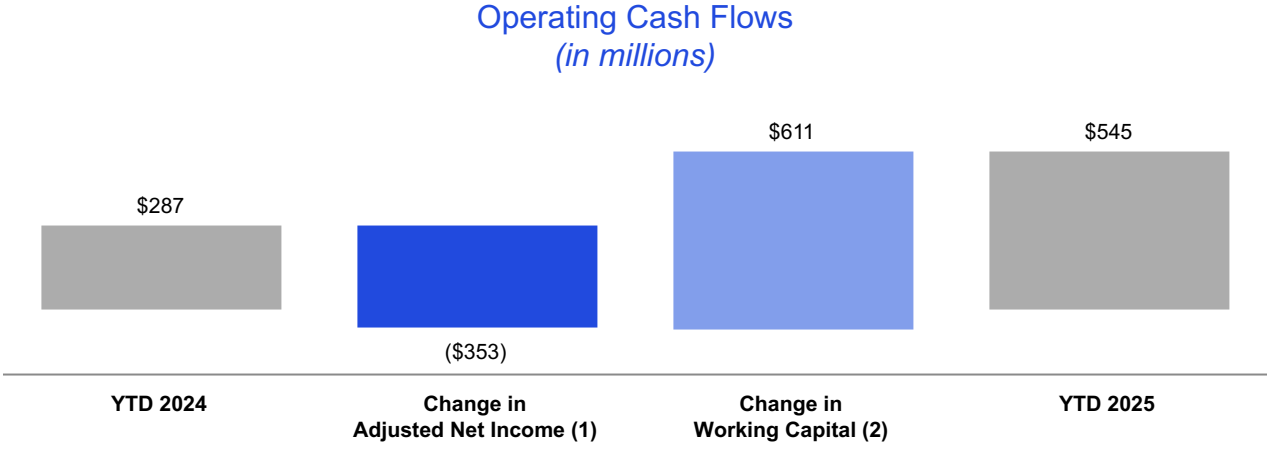
Consolidated Cash Flows

The following table reflects the changes in operating, investing, and financing cash flows for the comparative three-month period (in millions):

	Three Months Ended March 31,		
Cash flows provided by (used in):	**2025**	**2024**	**$ Change**
Operating activities	$ 545	$ 287	$ 258
Investing activities	(1,282)	(2,386)	1,104
Financing activities	1,317	2,606	(1,289)

Operating Activities

Net cash provided by operating activities increased $258 million for the three months ended March 31, 2025, compared to the three months ended March 31, 2024.



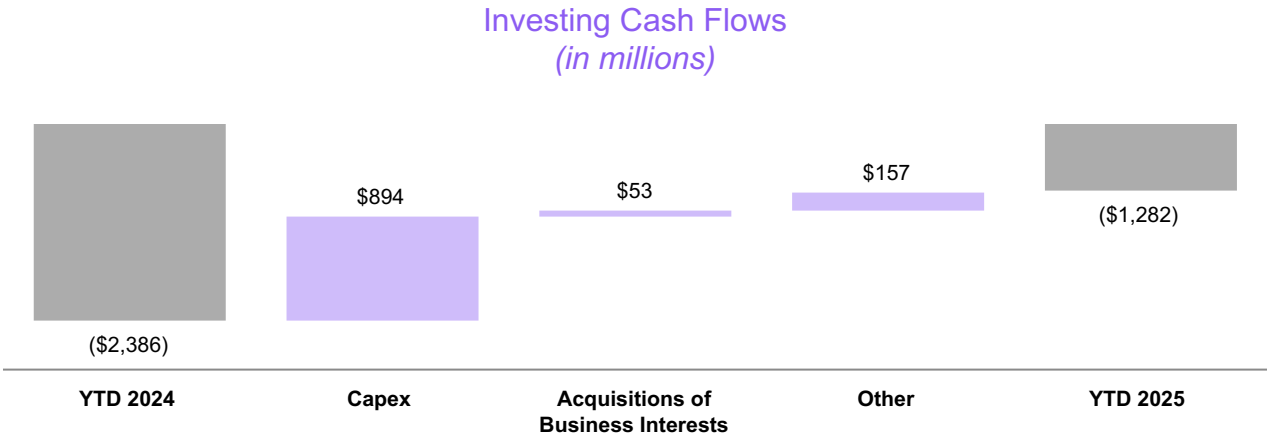
[1] The change in adjusted net income is defined as the variance in *net income*, net of the total *adjustments to net income* as shown on the Condensed Consolidated Statements of Cash Flows in Item 1.—*Financial Statements* of this Form 10-Q.

[2] The change in working capital is defined as the variance in total *changes in operating assets and liabilities* as shown on the Condensed Consolidated Statements of Cash Flows in Item 1.—*Financial Statements* of this Form 10-Q.

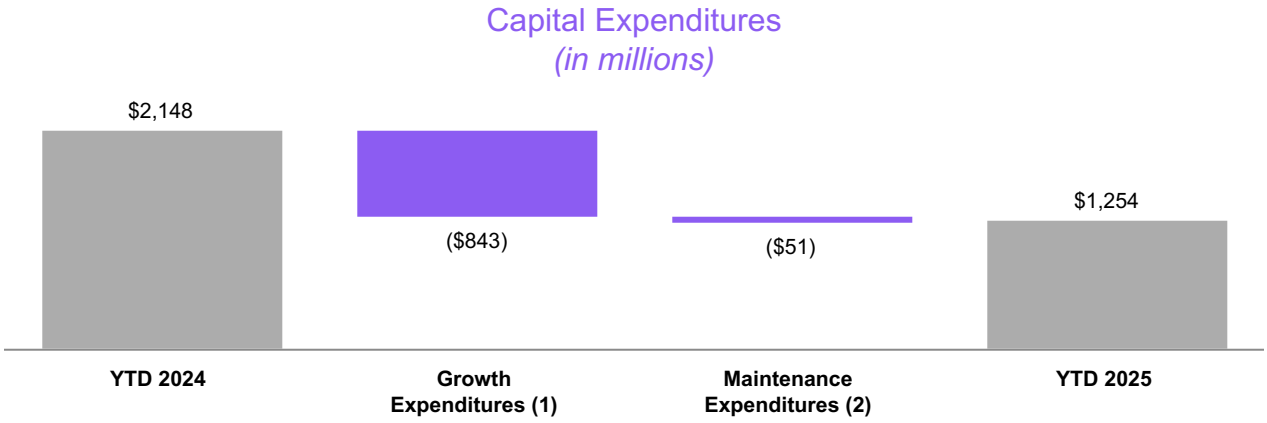
- Adjusted net income decreased $353 million, primarily due to lower margin at our Energy Infrastructure SBU and a decrease in interest income; partially offset by higher margin at our Utilities and Renewables SBUs and a decrease in cash paid for interest.
- Change in working capital increased $611 million, primarily due to a decrease in prepaid expense and other assets due to the timing of collection of tax credit transfer proceeds and the prior period change in receivables at Warrior Run; a decrease in receivables and increase in payables due to timing of collections and billings.

Investing Activities

Net cash used in investing activities decreased $1.1 billion for the three months ended March 31, 2025, compared to the three months ended March 31, 2024.



- Acquisitions of business interests decreased $53 million, primarily due to the prior year acquisition of Hoosier Wind.
- Capital expenditures decreased $894 million, discussed further below.



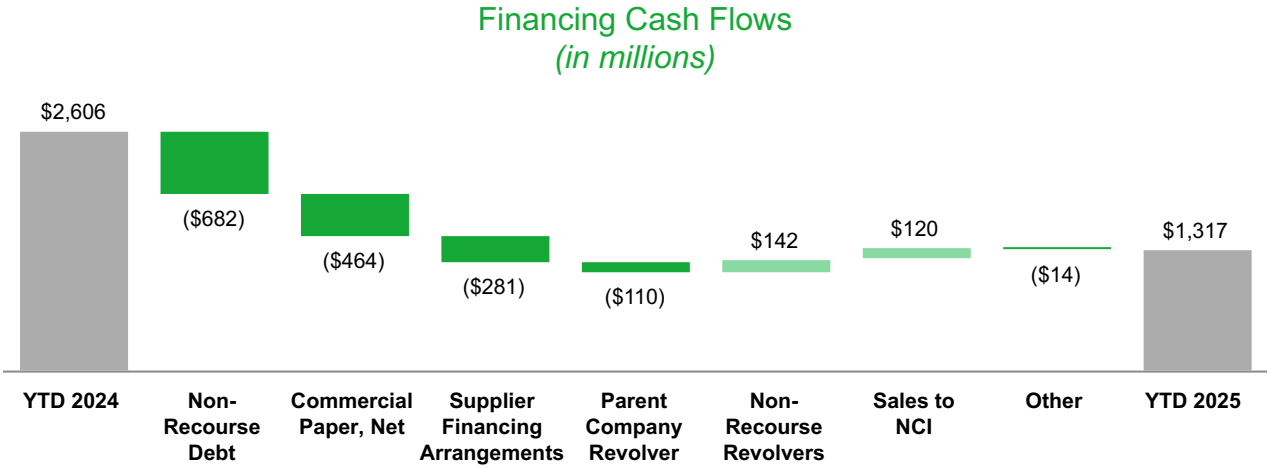
(1) Growth expenditures generally include expenditures related to development projects in construction, expenditures that increase capacity of a facility beyond the original design, and investments in general load growth or system modernization.

(2) Maintenance expenditures generally include expenditures that are necessary to maintain regular operations or net maximum capacity of a facility.

- Growth expenditures decreased $843 million, primarily driven by a decrease in expenditures for U.S. renewables projects compared to the prior year.
- Maintenance expenditures decreased $51 million, primarily driven by a $27 million decrease at AES Indiana due to the timing of maintenance, and a $19 million decrease due to the sale of AES Brasil in October 2024.

Financing Activities

Net cash provided by financing activities decreased $1.3 billion for the three months ended March 31, 2025, compared to the three months ended March 31, 2024.



See Notes 1—*Financial Statement Presentation*, 8—*Obligations, and* 12—*Equity* in Item 1.—*Financial Statements* of this Form 10-Q for more information regarding significant transactions.

- The 682 million impact from non-recourse debt transactions is mainly due to $1.4 billion of higher net borrowings at the Energy Infrastructure and Utilities SBUs in the prior year, which included $273 million related to the sale of future revenue at Warrior Run which was recorded as non-recourse debt; partially offset by $705 million of higher net borrowings at the Renewables SBU in the current year.
- The $464 million impact from commercial paper and $110 million impact from the Parent Company revolver are due to higher net borrowings in the prior year.
- The $281 million impact from supplier financing arrangements is primarily due to higher net cash outflows at the Renewables SBU.
- The $142 million impact from non-recourse revolvers is primarily due to $129 million of higher net repayments at the Energy Infrastructure SBU in the prior year and $80 million of higher net borrowings at the Renewables SBU in the current year, partially offset by $68 million of higher net borrowings at the Utilities SBU in the prior year.
- The $120 million impact from sales to noncontrolling interests is primarily due to $150 million at AES Indiana from the sale of ownership in the Pike County BESS project to a tax equity investor, partially offset by a $26 million decrease in sales under the Chile Renovables partnership with GIP.

Parent Company Liquidity

The following discussion is included as a useful measure of the liquidity available to The AES Corporation, or the Parent Company, given the non-recourse nature of most of our indebtedness. Parent Company Liquidity, as outlined below, is a non-GAAP measure and should not be construed as an alternative to *Cash and cash equivalents,* which is determined in accordance with GAAP. Parent Company Liquidity may differ from similarly titled measures used by other companies. The principal sources of liquidity at the Parent Company level are dividends and other distributions from our subsidiaries, including refinancing proceeds; proceeds from debt and equity financings at the Parent Company level, including availability under our revolving credit facilities and commercial paper program; and proceeds from asset sales. The Parent Company credit facilities and commercial paper program are generally used for short-term cash needs to bridge the timing of distributions from subsidiaries. Cash requirements at the Parent Company level are primarily to fund interest and principal repayments of debt, construction commitments, other equity commitments, acquisitions, taxes, Parent Company overhead and development costs, and dividends on common stock.

The Company defines Parent Company Liquidity as cash available to the Parent Company, including cash at qualified holding companies, plus available borrowings under our existing credit facilities and commercial paper program. The cash held at qualified holding companies represents cash sent to subsidiaries of the Company domiciled outside of the U.S. Such subsidiaries have no contractual restrictions on their ability to send cash to the

Parent Company. Parent Company Liquidity is reconciled to its most directly comparable GAAP financial measure, *Cash and cash equivalents*, at the periods indicated as follows (in millions):

	March 31, 2025	December 31, 2024
Consolidated cash and cash equivalents	$ 1,753	$ 1,524
Less: Cash and cash equivalents at subsidiaries	(1,602)	(1,259)
Parent Company and qualified holding companies' cash and cash equivalents	151	265
Commitments under the Parent Company credit facilities	1,800	1,800
Less: Letters of credit under the credit facilities	(19)	(18)
Less: Borrowings under the commercial paper program	(255)	—
Borrowings available under the Parent Company credit facilities	1,526	1,782
Total Parent Company Liquidity	$ 1,677	$ 2,047

The Parent Company paid dividends of $0.17595 per outstanding share to its common stockholders during the first quarter of 2025 for dividends declared in December 2024. While we intend to continue payment of dividends and believe we will have sufficient liquidity to do so, we can provide no assurance that we will continue to pay dividends, or if continued, the amount of such dividends.

Recourse Debt

Our total recourse debt was $6 billion and $5.7 billion as of March 31, 2025 and December 31, 2024, respectively. See Note 8—*Obligations* in Item 1.—*Financial Statements* of this Form 10-Q and Note 12—*Obligations* in Item 8.—*Financial Statements and Supplementary Data* of our 2024 Form 10-K for additional detail.

We believe that our sources of liquidity will be adequate to meet our needs for the foreseeable future. This belief is based on a number of material assumptions, including, without limitation, assumptions about our ability to access the capital markets, the operating and financial performance of our subsidiaries, currency exchange rates, power market pool prices, and the ability of our subsidiaries to pay dividends. In addition, our subsidiaries' ability to declare and pay cash dividends to us (at the Parent Company level) is subject to certain limitations contained in loans, governmental provisions and other agreements. We can provide no assurance that these sources will be available when needed or that the actual cash requirements will not be greater than anticipated. We have met our interim needs for shorter-term and working capital financing at the Parent Company level with our revolving credit facility and commercial paper program. See Item 1A.—*Risk Factors—The AES Corporation's ability to make payments on its outstanding indebtedness is dependent upon the receipt of funds from our subsidiaries* of the Company's 2024 Form 10-K for additional information.

Various debt instruments at the Parent Company level, including our revolving credit facilities and commercial paper program, contain certain restrictive covenants. The covenants provide for, among other items, limitations on other indebtedness, liens, investments and guarantees; limitations on dividends, stock repurchases and other equity transactions; restrictions and limitations on mergers and acquisitions, sales of assets, leases, transactions with affiliates and off-balance sheet and derivative arrangements; maintenance of certain financial ratios; and financial and other reporting requirements. As of March 31, 2025, we were in compliance with these covenants at the Parent Company level.

Non-Recourse Debt

While the lenders under our non-recourse debt financings generally do not have direct recourse to the Parent Company, defaults thereunder can still have important consequences for our results of operations and liquidity, including, without limitation:

- reducing our cash flows as the subsidiary will typically be prohibited from distributing cash to the Parent Company during the time period of any default;
- triggering our obligation to make payments under any financial guarantee, letter of credit, or other credit support we have provided to or on behalf of such subsidiary;
- causing us to record a loss in the event the lender forecloses on the assets; and
- triggering defaults in our outstanding debt at the Parent Company.

For example, our revolving credit facilities and outstanding debt securities at the Parent Company include events of default for certain bankruptcy-related events involving material subsidiaries. In addition, our revolving credit agreement at the Parent Company includes events of default related to payment defaults and accelerations of outstanding debt of material subsidiaries.

Some of our subsidiaries are currently in default with respect to all or a portion of their outstanding indebtedness. The total non-recourse debt classified as current in the accompanying Condensed Consolidated Balance Sheets amounts to $3 billion. The portion of current debt related to such defaults was $178 million at March 31, 2025, all of which was non-recourse debt related to three subsidiaries: AES Puerto Rico, AES Ilumina, and AES Jordan Solar. AES Puerto Rico is in payment default. All other defaults are not payment defaults, but are instead technical defaults triggered by failure to comply with other covenants or other conditions contained in the non-recourse debt documents. Additionally, on February 6, 2025, AES Dominican Renewable Energy failed to comply with a covenant on its debt of $353 million, resulting in a technical default. AES Dominican Renewable Energy is classified as held-for-sale as of March 31, 2025, therefore the associated non-recourse debt is classified in *Current held-for-sale liabilities* on the Condensed Consolidated Balance Sheet. See Note 8—*Obligations* and Note 18—*Held-For-Sale and Dispositions* in Item 1.—*Financial Statements* of this Form 10-Q for additional detail.

None of the subsidiaries that are currently in default are subsidiaries that met the applicable definition of materiality under the Parent Company's debt agreements as of March 31, 2025, in order for such defaults to trigger an event of default or permit acceleration under the Parent Company's indebtedness. However, as a result of additional dispositions of assets, other significant reductions in asset carrying values or other matters in the future that may impact our financial position and results of operations or the financial position of the individual subsidiary, it is possible that one or more of these subsidiaries could fall within the definition of a "material subsidiary" and thereby trigger an event of default and possible acceleration of the indebtedness under the Parent Company's outstanding debt securities. A material subsidiary is defined in the Parent Company's revolving credit agreement as any business that contributed 20% or more of the Parent Company's total cash distributions from businesses for the four most recently ended fiscal quarters. As of March 31, 2025, none of the defaults listed above resulted in a cross-default under the recourse debt of the Parent Company. Furthermore, none of the non-recourse debt in default listed above is guaranteed by the Parent Company.

Critical Accounting Policies and Estimates

The condensed consolidated financial statements of AES are prepared in conformity with U.S. GAAP, which requires the use of estimates, judgments, and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the periods presented.

The Company's significant accounting policies are described in Note 1—*General and Summary of Significant Accounting Policies* of our 2024 Form 10-K. The Company's critical accounting estimates are described in Item 7.—*Management's Discussion and Analysis of Financial Condition and Results of Operations* in the 2024 Form 10-K. An accounting estimate is considered critical if the estimate requires management to make an assumption about matters that were highly uncertain at the time the estimate was made, if different estimates reasonably could have been used, or if changes in the estimate that would have a material impact on the Company's financial condition or results of operations are reasonably likely to occur from period to period. Management believes that the accounting estimates employed are appropriate and resulting balances are reasonable; however, actual results could differ from the original estimates, requiring adjustments to these balances in future periods. The Company has reviewed and determined that these remain as critical accounting policies as of and for the three months ended March 31, 2025.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Overview Regarding Market Risks

Our businesses are exposed to, and proactively manage, market risk. Market risk is the potential loss that may result from market changes associated with AES power generation or with existing or forecasted financial or commodity transactions. Our primary market risk exposure is to the price of commodities, particularly electricity, natural gas, coal, and environmental credits. AES is also exposed to fluctuations in interest rates and foreign currency exchange rates associated primarily with outstanding and expected future issuances and borrowing, and from investments in foreign subsidiaries and affiliates. We enter into various transactions, including derivatives, in order to hedge our exposure to these market risks.

The disclosures presented in this Item 3 are based upon a number of assumptions; actual effects may differ. The safe harbor provided in Section 27A of the Securities Act of 1933 and Section 21E of the Exchange Act shall apply to the disclosures contained in this Item 3. For further information regarding market risk, see Item 1A.—*Risk Factors*, *Fluctuations in currency exchange rates may impact our financial results and position; Wholesale power prices may experience significant volatility in our markets which could impact our operations and opportunities for*

future growth; We may not be adequately hedged against our exposure to changes in commodity prices or interest rates; and *Certain of our businesses are sensitive to variations in weather and hydrology* of the 2024 Form 10-K.

Commodity Price Risk

Although we prefer to hedge our exposure to the impact of market fluctuations in the price of commodities, some of our generation businesses operate under short-term sales, have contracted electricity obligations greater than supply, or operate under contract sales that leave an unhedged exposure on some of our capacity or through imperfect fuel pass-throughs. These businesses subject our operational results to the volatility of prices for electricity, fuels, and environmental credits in competitive markets. In addition, our businesses are exposed to lower electricity prices due to increased competition, including from renewable sources such as wind and solar, because of lower costs of entry and lower variable costs. We employ risk management strategies to hedge our financial performance against these effects. The implementation of these strategies can involve the use of physical and financial commodity contracts, futures, swaps, and options. We have some natural offsets across our businesses such that low commodity prices may benefit certain businesses and be a cost to others. Exposures are not perfectly linear or symmetric. The sensitivities are affected by a number of local or indirect market factors. Examples of these factors include hydrology, local energy market supply/demand balances, regional fuel supply issues, regional competition, bidding strategies, and regulatory interventions such as price caps. Volume variation also affects our commodity exposure. The volume sold under contracts or retail concessions can vary based on weather and economic conditions, resulting in a higher or lower volume of sales in spot markets. Thermal unit availability and hydrology can affect the generation output available for sale and can affect the marginal unit setting power prices.

As of March 31, 2025, we project pre-tax earnings exposure on a 10% increase in commodity prices to be less than a $5 million gain for power, less than a $5 million gain for gas, and less than a $5 million loss for coal. The sensitivities are calculated using industry-standard valuation techniques to revalue all transactions (physical and financial commodity transactions) in the portfolio for a change in the underlying prices the transactions are exposed to and excludes correlation effects, including those due to renewable resource availability. The models reference market prices of commodities across future periods and associated volatility of these market prices. Prices and volatilities are predominantly based on observable market prices.

Exposures at individual businesses will change as new contracts or financial hedges are executed, and our sensitivity to changes in commodity prices generally increases in later years with reduced hedge levels at some of our businesses.

In the Energy Infrastructure SBU, the generation businesses are largely contracted, but may have residual risk to the extent contracts are not perfectly indexed to the business drivers. In California, our Southland once-through cooling generation units (“Legacy Assets”) in Long Beach and Huntington Beach have been extended to operate through 2026 under capacity contracts with the State as part of the Strategic Reserve program. Our facility in Redondo Beach has been retired effective January 1, 2024. Our ability to operate the Long Beach facility at full capacity through 2025 was approved under Tentative Time Schedule Order coverage in November 2023. Approval to operate Long Beach through 2026 will be subject to review with State Agencies. Our Southland combined cycle gas turbine (Southland Energy) units benefit from higher power and lower gas prices, depending on the contracted or hedge position. The AES Andes business in Chile owns assets in the central and northern regions of the country and has a portfolio of contract sales in both. A significant portion of our PPAs through 2025 include mechanisms of indexation that adjust the price of energy based on fluctuations in the price of coal, with an index defined by the National Energy Commission based on the physical coal imports for the energy system. This mechanism mitigates exposures to changes in the price of fuel. The increasing share of renewable energy in Chile's power market may reduce reliance on thermal units and impact power price volatility, which could impact our cost to serve certain unregulated PPAs. In the Dominican Republic, we own natural gas plants contracted under a portfolio of contract sales, and both contract and spot prices may move with commodity prices through 2024. Our thermal asset in Panama has PPAs with distribution companies which matches the term of the LNG supply agreement of such thermal assets. New entrants into the Panama thermal generation market could impact the dispatch of existing generation, requiring purchases in the spot market to satisfy the PPA obligations. Contract levels do not always match our generation availability or needs, and our assets may be sellers of spot prices in excess of contract levels or a net buyer in the spot market to satisfy contract obligations, which could impact existing fuel supply commitments. Our assets operating in Vietnam and Bulgaria have minimal exposure to commodity price risk as they have no or minor merchant exposure and fuel is subject to a pass-through mechanism.

In the Renewables SBU, our businesses have commodity exposure on unhedged volumes and resource volatility and benefit from higher power prices, where generation exceeds contracted levels. In Colombia, we operate under a shorter-term sales strategy with spot market exposure for uncontracted volumes. Because we own

hydroelectric assets there, contracts are not indexed to fuel. Our Renewables businesses in Panama are highly contracted under financial and load-following PPA-type structures, exposing the business to hydrology-based variance. To the extent hydrological inflows are greater than or less than the contract volumes, the business will be sensitive to changes in spot power prices which may be driven by oil and natural gas prices in some time periods.

Foreign Exchange Rate Risk

We operate in multiple countries and as such are subject to volatility in exchange rates at varying degrees at the subsidiary level and between our functional currency, the USD, and currencies of the countries in which we operate.

In the normal course of business, we are exposed to foreign currency risk and other foreign operations risks that arise from investments in foreign subsidiaries and affiliates. A key component of these risks stems from the fact that some of our foreign subsidiaries and affiliates utilize currencies other than our consolidated reporting currency, the USD. Additionally, certain of our foreign subsidiaries and affiliates have entered into monetary obligations in USD or currencies other than their own functional currencies. Certain of our foreign subsidiaries calculate and pay taxes in currencies other than their own functional currency. We have varying degrees of exposure to changes in the exchange rate between the USD and the following currencies: Argentine peso, Chilean peso, Colombian peso, Dominican peso, Euro, and Mexican peso. Our exposure to certain of these currencies may be material. These subsidiaries and affiliates attempt to limit potential foreign exchange exposure by entering into revenue contracts that adjust to changes in foreign exchange rates. We also use foreign currency forwards, swaps, and options where possible to manage our risk related to certain foreign currency fluctuations.

AES enters into foreign currency hedges to protect economic value of the business and minimize the impact of foreign exchange rate fluctuations to AES' portfolio. While protecting cash flows, the hedging strategy is also designed to reduce forward-looking earnings foreign exchange volatility. Due to variation of timing and amount between cash distributions and earnings exposure, the hedge impact may not fully cover the earnings exposure on a realized basis, which could result in greater volatility in earnings.

AES has unhedged forward-looking earnings which are exposed to foreign exchange deterioration risk from the Argentine peso that could be material. As of March 31, 2025, assuming a 10% USD appreciation, cash distributions attributable to foreign subsidiaries in the Colombian peso, Euro, and Argentine peso may be exposed to exchange rate movements, with a total potential loss of less than $10 million.

These numbers have been produced by applying a one-time 10% USD appreciation to forecasted exposed cash distributions for 2025 coming from the respective subsidiaries exposed to the currencies listed above, net of the impact of outstanding hedges and holding all other variables constant. The numbers presented above are net of any transactional gains or losses. These sensitivities may change in the future as new hedges are executed or existing hedges are unwound. Additionally, updates to the forecasted cash distributions exposed to foreign exchange risk may result in further modification. The sensitivities presented do not capture the impacts of any administrative market restrictions or currency inconvertibility.

Interest Rate Risks

We are exposed to risk resulting from changes in interest rates primarily because of our current and expected future issuance of debt and borrowing.

Decisions on the fixed-floating debt mix are made to be consistent with the risk factors faced by individual businesses or plants. Depending on whether a plant’s capacity payments or revenue stream is fixed or varies with inflation, we partially hedge against interest rate fluctuations by arranging fixed-rate or variable-rate financing. In certain cases, particularly for non-recourse financing, we execute interest rate swap, cap, and floor agreements to effectively fix or limit the interest rate exposure on the underlying financing. Most of our interest rate risk is related to non-recourse financings at our businesses.

As of March 31, 2025, the portfolio’s 2025 pre-tax earnings exposure to a one-time 100-basis-point increase in interest rates for our Argentine peso, Chilean peso, Colombian peso, Euro, and USD denominated debt would be less than $15 million on interest expense for the debt denominated in these currencies. These amounts do not take into account the historical correlation between these interest rates.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports that the Company files or submits under the Exchange Act, is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), as appropriate, to allow timely decisions regarding required disclosures.

The Company, under the supervision and with the participation of its management, including the Company’s CEO and CFO, evaluated the effectiveness of its “disclosure controls and procedures,” as such term is defined in Rule 13a-15(e) under the Exchange Act, as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on that evaluation, our CEO and CFO concluded that, as of March 31, 2025, our disclosure controls and procedures were not effective due to the material weakness in our internal control over financial reporting described below.

As previously reported in our Annual Report on Form 10-K for the year ended December 31, 2024, management identified that we did not design effective controls over the review of the disposition of AES Brasil, a complex non-routine transaction; specifically due to the use of incomplete data in the estimation of the fair value of the net assets of AES Brasil, which was used in calculation of the impairment expense after AES Brasil was classified as held-for-sale in Q2 2024.

Notwithstanding the identified material weakness, our CEO and CFO have concluded that our unaudited condensed consolidated financial statements contained in this Quarterly Report on Form 10-Q fairly present, in all material respects, our financial position, results of operations, and cash flows for the periods presented and such financial statements are presented in conformity with GAAP.

Remediation Efforts and Status

During the first quarter of 2025, management began implementing measures designed to remediate the material weakness. The remediation actions that management began implementing include: (i) policy updates detailing steps to perform in an impairment analysis of complex ownership structures, (ii) detailed instructions on considerations to be included in the fair value estimations, (iii) updates to held-for-sale and discontinued operations policies, and (iv) training to impacted personnel.

As of the date of the filing of this Quarterly Report on Form 10-Q, our management believes we have made progress toward remediating the underlying causes of the material weakness. We believe these actions will remediate the forgoing material weakness. The material weakness will not be considered remediated, however, until the applicable controls operate and management has concluded, through testing, that the controls are operating effectively. Management expects these remediation efforts to be completed by June 30, 2025.

Changes in Internal Controls over Financial Reporting

Other than the remediation efforts described above, there were no changes that occurred during the fiscal quarter covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II: OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is involved in certain claims, suits and legal proceedings in the normal course of business. The Company has accrued for litigation and claims when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. The Company believes, based upon information it currently possesses and taking into account established reserves for estimated liabilities and its insurance coverage, that the ultimate outcome of these proceedings and actions is unlikely to have a material adverse effect on the Company's condensed consolidated financial statements. It is reasonably possible, however, that some matters could be decided unfavorably to the Company and could require the Company to pay damages or make expenditures in amounts that could be material, but cannot be estimated as of March 31, 2025. Pursuant to SEC amendments Item 103 of SEC Regulation S-K, AES' policy is to disclose environmental legal proceedings to which a governmental authority is a party if such proceedings are reasonably expected to result in monetary sanctions of greater than or equal to $1 million.

In December 2001, Grid Corporation of Odisha ("GRIDCO") served a notice to arbitrate pursuant to the Indian Arbitration and Conciliation Act of 1996 on the Company, AES Orissa Distribution Private Limited ("AES ODPL"), and Jyoti Structures ("Jyoti") pursuant to the terms of the shareholders agreement between GRIDCO, the Company, AES ODPL, Jyoti and the Central Electricity Supply Company of Orissa Ltd. ("CESCO"), an affiliate of the Company. In the arbitration, GRIDCO asserted that a comfort letter issued by the Company in connection with the Company's indirect investment in CESCO obligates the Company to provide additional financial support to cover all of CESCO's financial obligations to GRIDCO. GRIDCO appeared to be seeking approximately $189 million in damages, plus undisclosed penalties and interest, but a detailed alleged damage analysis was not filed by GRIDCO. The Company counterclaimed against GRIDCO for damages. In June 2007, a 2-to-1 majority of the arbitral tribunal rendered its award rejecting GRIDCO's claims and holding that none of the respondents, the Company, AES ODPL, or Jyoti, had any liability to GRIDCO. The respondents' counterclaims were also rejected. A majority of the tribunal later awarded the respondents, including the Company, some of their costs relating to the arbitration. GRIDCO filed challenges of the tribunal's awards with the local Indian court. GRIDCO's challenge of the costs award has been dismissed by the court, but its challenge of the liability award remains pending. A hearing on the liability award has not taken place to date. The Company believes that it has meritorious defenses to the claims asserted against it and will defend itself vigorously in these proceedings; however, there can be no assurances that it will be successful in its efforts.

Pursuant to their environmental audit, AES Sul and AES Florestal discovered 200 barrels of solid creosote waste and other contaminants at a pole factory that AES Florestal had been operating. The conclusion of the audit was that a prior operator of the pole factory, Companhia Estadual de Energia ("CEEE"), had been using those contaminants to treat the poles that were manufactured at the factory. On their initiative, AES Sul and AES Florestal communicated with Brazilian authorities and CEEE about the adoption of containment and remediation measures. In March 2008, the State Attorney of the state of Rio Grande do Sul, Brazil filed a public civil action against AES Sul, AES Florestal and CEEE seeking an order requiring the companies to mitigate the contaminated area located on the grounds of the pole factory and an indemnity payment of approximately R$6 million ($1 million). In October 2011, the State Attorney filed a request for an injunction ordering the defendant companies to contain and remove the contamination immediately. The court granted injunctive relief on October 18, 2011, but determined that only CEEE was required to perform the removal work. In May 2012, CEEE began the removal work in compliance with the injunction. The case is now awaiting judgment. The removal and remediation costs are estimated to be approximately R$15 million to R$60 million ($3 million to $10 million), and there could be additional costs which cannot be estimated at this time. In June 2016, the Company sold AES Sul to CPFL Energia S.A. and as part of the sale, AES Guaiba, a holding company of AES Sul, retained the potential liability relating to this matter. The Company believes that there are meritorious defenses to the claims asserted against it and will defend itself vigorously in these proceedings; however, there can be no assurances that it will be successful in its efforts.

In September 2015, AES Southland Development, LLC and AES Redondo Beach, LLC filed a lawsuit against the California Coastal Commission (the "CCC") over the CCC's determination that the site of AES Redondo Beach included approximately 5.93 acres of CCC-jurisdictional wetlands. The CCC has asserted that AES Redondo Beach has improperly installed and operated water pumps affecting the alleged wetlands in violation of the California Coastal Act and Redondo Beach Local Coastal Program ("LCP"). Potential outcomes of the CCC determination could include an order requiring AES Redondo Beach to perform a restoration and/or pay fines or penalties. AES Redondo Beach believes that it has meritorious arguments concerning the underlying CCC determination, but there can be no assurances that it will be successful. On March 27, 2020, AES Redondo Beach, LLC sold the site to an unaffiliated third-party purchaser that assumed the obligations contained within these proceedings. On May 26, 2020, CCC staff sent AES an NOV directing AES to discontinue any operation of the water pumps in the alleged

wetlands and to submit a Coastal Development Permit ("CDP") application for the removal of the water pumps within the alleged wetlands. The NOV also directed AES to submit technical analysis regarding additional water pumps located within onsite electrical vaults and, if necessary, a CDP application for their continued operation. With respect to the vault pumps, AES provided the CCC, with the requested analysis, and the CCC has not required further action. With respect to the pumps in the alleged wetlands, AES locked out those pumps to prevent further operation and submitted the CDP to the permitting authority, the City of Redondo Beach (the "City"), with respect to AES' plans to disable or remove the pumps. On October 14, 2020, the City deemed the CDP application to be complete and indicated a public hearing will be required. AES submitted all required information and waited for the City to continue processing the application. In December 2023, the City indicated it would continue processing the CDP application. AES will vigorously defend its interests with regard to the NOV, but we cannot predict the outcome of the matter at this time. However, settlements and litigated outcomes of Coastal Act and LCP claims alleged against other companies have required them to pay significant civil penalties and undertake remedial measures.

In October 2015, AES Indiana received an NOV alleging violations of the Clean Air Act ("CAA"), the Indiana State Implementation Plan ("SIP"), and the Title V operating permit related to alleged particulate and opacity violations at Petersburg Station Unit 3. In addition, in February 2016, AES Indiana received an NOV from the EPA alleging violations of New Source Review and other CAA regulations, the Indiana SIP, and the Title V operating permit at Petersburg Station. On August 31, 2020, AES Indiana reached a settlement with the EPA, the DOJ and the Indiana Department of Environmental Management ("IDEM"), resolving these purported violations of the CAA at Petersburg Station. The settlement agreement, in the form of a proposed judicial consent decree, was approved and entered by the U.S. District Court for the Southern District of Indiana on March 23, 2021, and includes, among other items, the following requirements: annual caps on NO_x and SO_2 emissions and more stringent emissions limits than AES Indiana's current Title V air permit; payment of civil penalties totaling $1.5 million; a $5 million environmental mitigation project consisting of the construction and operation of a new, non-emitting source of generation at the site; expenditure of $0.3 million on a state-only environmentally beneficial project to preserve local, ecologically-significant lands; and retirement of Units 1 and 2 prior to July 1, 2023.

In December 2018, a lawsuit was filed in Dominican Republic civil court against the Company, AES Puerto Rico, and three other AES affiliates. The lawsuit purports to be brought on behalf of over 100 Dominican claimants, living and deceased, and appears to seek relief relating to CCRs that were delivered to the Dominican Republic in 2004. The lawsuit generally alleges that the CCRs caused personal injuries and deaths and demands $476 million in alleged damages. The lawsuit does not identify, or provide any supporting information concerning, the alleged injuries of the claimants individually. Nor does the lawsuit provide any information supporting the demand for damages or explaining how the quantum was derived. Preliminary hearings have taken place. The relevant AES companies believe that they have meritorious defenses to the claims asserted against them and will defend themselves vigorously in this proceeding; however, there can be no assurances that they will be successful in their efforts.

In February 2019, a separate lawsuit was filed in Dominican Republic civil court against the Company, AES Puerto Rico, two other AES affiliates, and an unaffiliated company and its principal. Subsequently, the claimants withdrew the lawsuit with respect to AES Puerto Rico. The lawsuit remains pending against the other AES defendants ("AES Defendants") and the unaffiliated defendants. The lawsuit purports to be brought on behalf of over 200 Dominican claimants, living and deceased, and appears to seek relief relating to CCRs that were delivered to the Dominican Republic in 2003 and 2004. The lawsuit generally alleges that the CCRs caused personal injuries and deaths and demands over $900 million in alleged damages. The lawsuit does not identify, or provide any supporting information concerning, the alleged injuries of the claimants individually, nor does the lawsuit provide any information supporting the demand for damages or explaining how the quantum was derived. In August 2020, at the request of the relevant AES companies, the case was transferred to a different civil court, namely, the Civil Court of La Vega ("CFI"). In May 2024, the CFI dismissed the entire case due to the expiry of the statute of limitations. Later in 2024, the claimants appealed the dismissal to the relevant intermediate appellate court. The claimants are attempting to formally serve the appeal on all defendants. The AES Defendants believe that they have meritorious defenses to the claims asserted against them and will defend themselves vigorously in this proceeding; however, there can be no assurances that they will be successful in their efforts.

In October 2019, the Superintendency of the Environment (the "SMA") notified AES Andes of certain alleged breaches associated with the environmental permit of the Ventanas Complex, initiating a sanctioning process through Exempt Resolution N° 1 / ROL D-129-2019. The alleged charges include exceeding generation limits, failing to reduce emissions during episodes of poor air quality, exceeding limits on discharges to the sea, and exceeding noise limits. AES Andes has submitted a proposed "Compliance Program" to the SMA for the Ventanas Complex. The latest version of this Compliance Program was submitted on May 26, 2021. On December 30, 2021, the Compliance Program was approved by the SMA. However, an ex officio action was brought by the SMA due to

alleged exceedances of generation limits, which would require the Company to reduce SO_2, NO_X and PM emissions in order to achieve the emissions offset established in the Compliance Program. On January 6, 2022, AES Andes filed a reposition with the SMA seeking modification of the means for compliance with the ex officio action. On January 17, 2023, the SMA approved street paving measures, or alternatively a program providing heaters for community members, as the means to satisfy the air emissions offsets in the approved Compliance Plan. The cost of the proposed Compliance Program is approximately $10.8 million and is in the execution stage. Fines are possible if the SMA determines there is an unsatisfactory execution of the Compliance Program. On April 21, 2023, the SMA notified AES Andes of a resolution alleging an additional “serious” non-compliance of the Ventanas Complex failing to reduce emissions during episodes of poor air quality. On May 24, 2023, AES Andes submitted disclaimers to the SMA in response to this resolution. On May 10, 2024, the Company was notified of a fine for $180,515. On June 3, 2024, the Company appealed this fine to the Environmental Court. The Company believes that it has meritorious defenses and will continue to assert them vigorously in this dispute; however, there can be no assurances that it will be successful.

In March 2020, Mexico’s Comisión Federal de Electricidad (“CFE”) served an arbitration demand upon AES Mérida III. CFE alleged that AES Mérida was in breach of a power and capacity purchase agreement (“Contract”) between the two parties, even though the allegations relate to CFE’s own failure to provide fuel within the specifications of the Contract. CFE sought to recover approximately $200 million in payments made to AES Mérida under the Contract, plus approximately $480 million in alleged damages for having to acquire power from alternative sources in the Yucatan Peninsula. AES Mérida filed an answer denying liability to CFE and asserted a counterclaim for damages due to CFE’s breach of its obligations. The evidentiary hearing took place in November 2021. Closing arguments were heard in May 2022. In November 2022, the arbitration Tribunal issued its decision in the case, rejecting CFE’s claims for damages and awarding AES Mérida a net amount of damages on AES Mérida’s counterclaims ("Award"). There were proceedings in the Mexican courts concerning AES Mérida's attempt to enforce the Award and CFE's attempt to challenge the Award. In April 2025, AES Mérida and CFE finalized a settlement agreement resolving this dispute.

On May 12, 2021, the Mexican Federal Attorney for Environmental Protection (the “Authority”) initiated an environmental audit at the TEP thermal generating facility. On January 20, 2023, TEP was notified of the resolution issued by the Authority, which alleges breaches of air emission regulations, including the failure to submit reports. The resolution imposes a fine of $27,615,140 pesos (approximately $1.3 million). On March 3, 2023, the facility filed a nullity judgment to challenge such resolution, which has been admitted by the local judge with an injunction granted against execution of the proposed fine during the course of the underlying proceedings. However, the local tax authority rejected receiving the bond that is required to guarantee the injunction, and as a result, on September 18, 2023, TEP filed a complaint seeking to compel the tax authority to accept the bond and recognize the validity of the injunction. The Specialized Chamber has not issued a response to the complaint, despite the fact that the Company has taken several legal actions to try to expedite the proceedings. The Company believes that it has meritorious defenses to the claims asserted against it and will defend itself vigorously in these proceedings; however, there can be no assurances that it will be successful in its efforts.

In February 2022, a lawsuit was filed in Dominican Republic civil court against the Company. The lawsuit purports to be brought on behalf of over 425 Dominican claimants, living and deceased, and appears to seek relief relating to CCRs that were delivered to the Dominican Republic in 2003 and 2004. The lawsuit generally alleges that the CCRs caused personal injuries and deaths and demands over $600 million in alleged damages. The lawsuit does not identify or provide any supporting information concerning the alleged injuries of the claimants individually. Nor does the lawsuit provide any information supporting the demand for damages or explaining how the quantum was derived. In February 2024, at the request of the Company, the Dominican Supreme Court of Justice transferred the case to a different civil court, namely, the Civil Court of La Vega. The claimants’ attempt to recuse the presiding judge has been rejected by the relevant Dominican appellate court. The Company believes that it has meritorious defenses to the claims asserted against it and will defend itself vigorously in this proceeding; however, there can be no assurances that it will be successful in its efforts.

On January 26, 2023, the SMA notified Alto Maipo SpA of four alleged charges relating to the Alto Maipo facility, all of which are categorized by the SMA as “serious.” The alleged charges include untimely completion of intake works and insufficient capture by the provisional works, irrigation water outlet and canal contemplated by an agreement with local communities; non-compliance with the details of the forest management plans and intervention in unauthorized areas; construction of a road in a restricted paleontological area; and unlawful moving of fauna. On February 16, 2023, the Alto Maipo project submitted an initial compliance program to the SMA, which has undergone observations by the SMA and interested third parties, and been resubmitted by the project. On December 9, 2024 the SMA rejected the latest version of the Compliance Program. On December 16, 2024, Alto Maipo submitted a petition for reconsideration. If appeals are unsuccessful, the imposition of fines are possible.

In May 2024, the Chilean competition agency (the Fiscalía Nacional Económica or "FNE") opened an investigation regarding AES Andes's declarations with respect to coal prices and coal blends used to generate electricity in Chile. The investigation was prompted by a confidential complaint filed in December 2023, which has not been disclosed to AES Andes. In general terms, the investigation seeks to determine whether the facts alleged in the complaint could be considered as an abuse of a dominant position by AES Andes. The investigation is at a very early stage; AES Andes has responded to all of the FNE's information requests received to date. The FNE will independently conduct the investigation and will ultimately decide whether to dismiss the matter or initiate a judicial proceeding on the allegations in the confidential complaint. These types of investigations in Chile commonly last for years. AES Andes does not believe that it has violated any competition laws. Further, if the FNE ever initiates a judicial proceeding on this matter, AES Andes will defend itself vigorously. Given the early nature of this investigation, we are unable to estimate any potential impact of the investigation or its eventual outcome on our business, financial condition or results of operations.

In April 2025, an alleged shareholder of Fluence Energy, Inc. ("Fluence") filed a putative securities class action in the U.S. District Court for the Eastern District of Virginia against Fluence and certain of Fluence's officers and directors (the "Individual Fluence Defendants" and, together with Fluence, the "Fluence Defendants"). The complaint in the case also named the Company and AES Grid Stability, LLC as defendants (together, the "AES Defendants"). The plaintiff seeks to pursue claims on behalf of a putative class of all purchasers of Fluence Class A common stock between October 28, 2021 and February 10, 2025. The plaintiff alleges that the Fluence Defendants made allegedly false or misleading statements in violation of Section 10(b) of the Securities Exchange Act of 1934 (the "Exchange Act"), as well as Rule 10b-5 promulgated thereunder. In addition, the plaintiff asserts claims against the Individual Fluence Defendants and the AES Defendants as alleged "control persons" under Section 20(a) of the Exchange Act. The AES Defendants believe that they have meritorious defenses to the claims asserted against them and will defend themselves vigorously in this lawsuit; however, there can be no assurances that they will be successful in their efforts.

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors disclosed in Item 1A.—*Risk Factors* of our 2024 Form 10-K. Additional risks and uncertainties also may adversely affect our business and operations, including those discussed in Item 2.—*Management's Discussion and Analysis of Financial Condition and Results of Operations* in this Form 10-Q.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Issuer Purchases of Equity Securities

The following table provides information relating to our purchases of AES Common Stock during the first quarter of fiscal year 2025:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares That May Yet Be Purchased Under the Plans or Programs [1]
January 1 — January 31	—	$ —	—	$ 264,000,000
February 1 — February 28	—	—	—	264,000,000
March 1 — March 31	—	—	—	264,000,000
Total	—	—	—	$ 264,000,000

(1) On July 7, 2010, The AES Corporation announced that its Board of Directors approved a common stock repurchase program under which the Company may purchase up to $500 million of shares of its outstanding common stock, depending on cash availability, market conditions, and other factors. The original authorization was set to expire on December 31, 2010, however, in December 2010, the Board authorized an extension of the stock repurchase program. The current program does not have a predetermined expiration date. Repurchases under this program may be made using a variety of methods, which may include open market repurchases, purchases by contract (including, without limitation, accelerated stock repurchase programs or 10b5-1 plans), and/or privately negotiated transactions. No repurchases were made under this program during the first quarter of 2025. As of March 31, 2025, $264 million remained available for purchase under this authorization.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

Trading Arrangements

None of the Company's directors or "officers," as defined in Rule 16a-1(f) of the Exchange Act, adopted, modified, or terminated a "Rule 10b5-1 trading arrangement" or a "non-Rule 10b5-1 trading arrangement," as each term is defined in Item 408 of Regulation S-K, during the Company's fiscal quarter ended March 31, 2025.

ITEM 6. EXHIBITS

4.1	Twenty-Ninth Supplemental Indenture, dated March 20, 2025, between The AES Corporation and Deutsche Bank Trust Company Americas, as Trustee, incorporated herein by reference to Exhibit 4.1 of the Company's Form 8-K filed on March 20, 2025.
31.1	Rule 13a-14(a)/15d-14(a) Certification of Andrés Gluski (filed herewith).
31.2	Rule 13a-14(a)/15d-14(a) Certification of Stephen Coughlin (filed herewith).
32.1	Section 1350 Certification of Andrés Gluski (filed herewith).
32.2	Section 1350 Certification of Stephen Coughlin (filed herewith).
101	The AES Corporation Quarterly Report on Form 10-Q for the quarter ended March 31, 2025, formatted in Inline XBRL (Inline Extensible Business Reporting Language): (i) the Cover Page, (ii) Condensed Consolidated Balance Sheets, (iii) Condensed Consolidated Statements of Operations, (iv) Condensed Consolidated Statements of Comprehensive Income (Loss), (v) Condensed Consolidated Statements of Changes in Equity, (vi) Condensed Consolidated Statements of Cash Flows, and (vii) Notes to Condensed Consolidated Financial Statements. The instance document does not appear in the Interactive Data File because its XBRL tags are embedded within the Inline XBRL document.
104	Cover Page Interactive Data File (formatted as Inline XBRL and contained in Exhibit 101).

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

THE AES CORPORATION

Glossary of Terms

The following terms and acronyms appear in the text of this report and have the definitions indicated below:

2024 Base Rate Order	The order issued in April 2024 by the IURC authorizing AES Indiana to, among other things, increase its basic rates and charges by $71 million annually
Adjusted EBITDA	Adjusted earnings before interest income and expense, taxes, depreciation and amortization, a non-GAAP measure of operating performance
Adjusted EBITDA with Tax Attributes	Adjusted earnings before interest income and expense, taxes, depreciation and amortization, adding back the pre-tax effect of Production Tax Credits, Investment Tax Credits and depreciation tax deductions allocated to tax equity investors, a non-GAAP measure
Adjusted EPS	Adjusted Earnings Per Share, a non-GAAP measure
Adjusted PTC	Adjusted Pre-tax Contribution, a non-GAAP measure of operating performance
AES	The Parent Company and its subsidiaries and affiliates
AES Andes	AES Andes S.A., formerly AES Gener
AES Brasil	AES Brasil Operações S.A., formerly branded as AES Tietê
AES Clean Energy Development	AES Clean Energy Development, LLC
AES Indiana	Indianapolis Power & Light Company, formerly branded as IPL. AES Indiana is wholly-owned by IPALCO
AES Ohio	The Dayton Power & Light Company, formerly branded as DP&L. For the periods covered by this report, AES Ohio was wholly-owned by DPL. Beginning in April 2025, CDPQ owns an aggregate indirect equity interest in AES Ohio of approximately 30%.
AES Renewable Holdings	AES Renewable Holdings, LLC, formerly branded as AES Distributed Energy
AFUDC	Allowance for Funds Used During Construction
AGIC	AES Global Insurance Company, AES' captive insurance company
AOCL	Accumulated Other Comprehensive Loss
ASC	Accounting Standards Codification
ASU	Accounting Standards Update
CAA	United States Clean Air Act
CCR	Coal Combustion Residuals, which includes bottom ash, fly ash, and air pollution control wastes generated at coal-fired generation plant sites
CECL	Current Expected Credit Loss
CDPQ	Caisse de dépôt et placement du Québec
CO_2	Carbon Dioxide
CSAPR	Cross-State Air Pollution Rule
CWA	U.S. Clean Water Act
DG Comp	Directorate-General for Competition
DIR	Distribution Investment Rider - established in ESP 4 to recover certain distribution capital investments placed in service beginning June 30, 2020, and subject to increasing annual revenue limits and other terms. The annual revenue limit for 2025 is $49.4 million.
DPL	DPL LLC and its consolidated subsidiaries. On April 3, 2025, DPL Inc. converted its form of business organization from an Ohio corporation to an Ohio limited liability company. Upon the conversion, DPL Inc. changed its name to DPL LLC. References to DPL are to DPL Inc. before April 3, 2025, and DPL LLC on and after April 3, 2025.
EBITDA	Earnings before interest income and expense, taxes, depreciation, amortization, and accretion of AROs, a non-GAAP measure of operating performance
ECCRA	Environmental Compliance Cost Recovery Adjustment
ENSO	El Niño-Southern Oscillation
EPA	United States Environmental Protection Agency
EPC	Engineering, Procurement and Construction
ESP	Electric Security Plan
EU	European Union
FASB	Financial Accounting Standards Board
Fluence	Fluence Energy, Inc and its subsidiaries, including Fluence Energy, LLC, which was previously our joint venture with Siemens (NASDAQ: FLNC)
GAAP	Generally Accepted Accounting Principles in the United States
GHG	Greenhouse Gas
GILTI	Global Intangible Low Taxed Income
GW	Gigawatts
GWh	Gigawatt Hours
HLBV	Hypothetical Liquidation at Book Value
IPALCO	IPALCO Enterprises, Inc. CDPQ owns direct and indirect interests in IPALCO of approximately 30%.
ITC	Investment Tax Credit
IURC	Indiana Utility Regulatory Commission
LNG	Liquid Natural Gas
MMBtu	Million British Thermal Units
MW	Megawatts
MWh	Megawatt Hours
NAAQS	National Ambient Air Quality Standards
NCI	Noncontrolling Interest
NCTI	Net CFC Tested Income

NEK	Natsionalna Elektricheska Kompania (state-owned electricity public supplier in Bulgaria)
NM	Not Meaningful
NOV	Notice of Violation
NO_X	Nitrogen Oxide
NPDES	National Pollutant Discharge Elimination System
OVEC	Ohio Valley Electric Corporation, an electric generating company in which AES Ohio has a 4.9% interest
Parent Company	The AES Corporation
Pet Coke	Petroleum Coke
PPA	Power Purchase Agreement
PREPA	Puerto Rico Electric Power Authority
PUCO	The Public Utilities Commission of Ohio
RSU	Restricted Stock Unit
SBU	Strategic Business Unit
SIN	National Interconnection System (in Colombia)
SEC	United States Securities and Exchange Commission
SO_2	Sulfur Dioxide
TDSIC	Transmission, Distribution, and Storage System Improvement Charge
TEG	Termoeléctrica del Golfo, S. de R.L. de C.V.
TEP	Termoeléctrica Peñoles, S. de R.L. de C.V.
U.S.	United States
USD	United States Dollar
VIE	Variable Interest Entity

PART I: FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS

Notes to Condensed Consolidated Financial Statements

For the Three and Six Months Ended June 30, 2025 and 2024

(Unaudited)

1. FINANCIAL STATEMENT PRESENTATION

Consolidation — In this Quarterly Report, the terms “AES,” “the Company,” “us,” or “we” refer to the consolidated entity, including its subsidiaries and affiliates. The terms “The AES Corporation” or “the Parent Company” refer only to the publicly held holding company, The AES Corporation, excluding its subsidiaries and affiliates. Furthermore, VIEs in which the Company has an ownership interest and is the primary beneficiary, thus controlling the VIE, have been consolidated. Certain consolidated VIEs have arrangements which may require the Company to contribute additional equity totaling $1.7 billion. Such contributions are generally contingent upon the underlying asset achieving specific project milestones. Investments in entities where the Company has the ability to exercise significant influence, but not control, are accounted for using the equity method of accounting, except for our investment in Alto Maipo, for which we have elected the fair value option as permitted under ASC 825. All intercompany transactions and balances are eliminated in consolidation.

Interim Financial Presentation — The accompanying unaudited condensed consolidated financial statements and footnotes have been prepared in accordance with GAAP, as contained in the FASB ASC, for interim financial information and Article 10 of Regulation S-X issued by the SEC. Accordingly, they do not include all the information and footnotes required by GAAP for annual fiscal reporting periods. In the opinion of management, the interim financial information includes all adjustments of a normal recurring nature necessary for a fair presentation of the results of operations, financial position, comprehensive income, changes in equity, and cash flows. The results of operations for the three and six months ended June 30, 2025 are not necessarily indicative of expected results for the year ending December 31, 2025. The accompanying condensed consolidated financial statements are unaudited and should be read in conjunction with the 2024 audited consolidated financial statements and notes thereto, which are included in the 2024 Form 10-K filed with the SEC on March 11, 2025 (the “2024 Form 10-K”).

Revision of Prior Period Condensed Consolidated Financial Statements — In connection with the preparation of our 2024 consolidated financial statements, the Company determined that we used incomplete data in the estimation of the fair value of net assets of AES Brasil which caused an overstatement of the impairment expense recorded in the second and third quarters of 2024. As a result, the Company restated the previously issued unaudited quarterly financial information for the second quarter of 2024 presented in this Form 10-Q. For additional information and quantification of prior period restatement impacts, refer to the 2024 audited consolidated financial statements and notes thereto, which are included in our 2024 Form 10-K.

Cash, Cash Equivalents, and Restricted Cash — The following table provides a summary of cash, cash equivalents, and restricted cash amounts reported on the Condensed Consolidated Balance Sheets that reconcile to the total of such amounts as shown on the Condensed Consolidated Statements of Cash Flows (in millions):

	June 30, 2025	December 31, 2024
Cash and cash equivalents	$ 1,350	$ 1,524
Restricted cash	763	437
Debt service reserves and other deposits	88	78
Cash, Cash Equivalents, and Restricted Cash	$ 2,201	$ 2,039

Tax Credit Transferability — The U.S Inflation Reduction Act of 2022 (the “IRA”) allows us to directly transfer investment tax credits (“ITCs”) to unrelated tax credit buyers. The Company accounts for tax credits that it will retain or transfer under ASC 740—*Income Taxes*, as a reduction in income tax expense by either including the expected amount of the tax credit to be claimed or the cash to be received when transferred, respectively, in the calculation of its annual effective tax rate throughout the year the renewables project is placed in service. The estimated tax credits are updated on a quarterly basis, with the year-end calculation including only the tax credits that are associated with projects placed in service, comprising credits claimed or transferred during the year. In assessing realizability for credits to be transferred, the Company includes cash it anticipates receiving in establishing any valuation allowance and establishes a valuation allowance equal to its best estimate of any discount on the transfer. The receipt of cash from the transfer of tax credits is treated as an operating cash inflow on the Condensed Consolidated Statements of Cash Flows.

During the six months ended June 30, 2025, the Company executed agreements to transfer ITCs directly to third parties for $354 million. Of this amount, $142 million was allocated to AES and will be recognized ratably as an

income tax benefit throughout the year and $212 million was allocated to noncontrolling interests and treated as a contribution from noncontrolling interest holders. The Company received cash proceeds from these tax credit transfers of $309 million during the six months ended June 30, 2025 and recorded a receivable in *Other current assets* on the Condensed Consolidated Balance Sheets for the remaining $45 million. The Company is contractually obligated to distribute the remaining $45 million in proceeds to the noncontrolling interest holder, and therefore recorded a corresponding payable in *Accrued and other liabilities.* In addition, during the six months ended June 30, 2025, the Company received cash proceeds of $75 million related to a tax credit transfer agreement which was executed in 2024.

During the six months ended June 30, 2024, the Company executed an agreement to transfer an ITC directly to a third party for $103 million. Of this amount, $51 million and $26 million was allocated to AES and recorded as an income tax benefit in 2024 and 2023, respectively, and $26 million was allocated to noncontrolling interests and treated as a contribution from noncontrolling interest holders. The Company received cash proceeds from this tax credit transfer of $103 million during the six months ended June 30, 2024.

New Accounting Pronouncements Adopted in 2025 — The Company assessed all accounting pronouncements adopted in 2025 and determined they were either not applicable or did not have a material impact on the Company's condensed consolidated financial statements.

New Accounting Pronouncements Issued But Not Yet Effective — The following table provides a brief description of recent accounting pronouncements that could have a material impact on the Company's condensed consolidated financial statements once adopted. Accounting pronouncements not listed below were assessed and determined to be either not applicable or are expected to have no material impact on the Company's condensed consolidated financial statements.

New Accounting Standards Issued But Not Yet Effective

ASU Number and Name	Description	Date of Adoption	Effect on the financial statements upon adoption
2023-09 Income Taxes (Topic 740): Improvements to Income Tax Disclosures	The amendments in this Update require that public business entities on an annual basis (1) disclose specific categories in the rate reconciliation and (2) provide additional information for reconciling items that meet a quantitative threshold. Furthermore, companies are required to disclose a disaggregated amount of income taxes paid at a federal, state, and foreign level as well as a breakdown of income taxes paid in a jurisdiction that comprises 5% of a company's total income taxes paid. Lastly, this ASU requires that companies disclose income (loss) from continuing operations before income tax at a domestic and foreign level and that companies disclose income tax expense from continuing operations on a federal, state, and foreign level.	The amendments in this Update are effective for fiscal years beginning after December 15, 2024.	The Company is currently evaluating the impact of adopting the standard on its consolidated financial statements. This ASU only affects annual disclosures, which will be provided when the amendment becomes effective.
2024-03: Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures (Subtopic 220-40)	The amendments in this Update require disclosure, in the notes to financial statements, of specified information about certain costs and expenses. The amendments require that at each interim and annual reporting period an entity: 1. Disclose the amounts of (a) purchases of inventory, (b) employee compensation, (c) depreciation, (d) intangible asset amortization, and (e) depreciation, depletion, and amortization recognized as part of oil- and gas-producing activities (DD&A) (or other amounts of depletion expense) included in each relevant expense caption. A relevant expense caption is an expense caption presented on the face of the income statement within continuing operations that contains any of the expense categories listed in (a)–(e). 2. Include certain amounts that are already required to be disclosed under current generally accepted accounting principles (GAAP) in the same disclosure as the other disaggregation requirements. 3. Disclose a qualitative description of the amounts remaining in relevant expense captions that are not separately disaggregated quantitatively. 4. Disclose the total amount of selling expenses and, in annual reporting periods, an entity's definition of selling expenses.	The date for each amendment in this Update is effective for fiscal years beginning after December 15, 2026, and interim reporting periods beginning after December 15, 2027. Early adoption is permitted.	The Company is currently evaluating the impact of adopting the standard on its consolidated financial statements. This ASU only affects disclosures, which will be provided when the amendment becomes effective.
2024-04: Debt—Debt with Conversion and Other Options (Subtopic 470-20)	The amendments in this Update clarify the requirements for determining whether certain settlements of convertible debt instruments should be accounted for as an induced conversion.	The date for each amendment in this Update is effective beginning after December 15, 2025, and interim reporting periods within those annual reporting periods.	The Company is currently evaluating the impact of adopting the standard on its consolidated financial statements.

2. INVENTORY

The following table summarizes the Company's inventory balances as of the dates indicated (in millions):

	June 30, 2025	December 31, 2024
Spare parts and supplies	$ 384	$ 347
Fuel and other raw materials	263	246
Total	$ 647	$ 593

3. FAIR VALUE

The fair value of current financial assets and liabilities, debt service reserves, and other deposits approximate their reported carrying amounts. The estimated fair values of the Company's assets and liabilities have been determined using available market information. Because these amounts are estimates and based on hypothetical transactions to sell assets or transfer liabilities, the use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. For further information on our valuation techniques and policies, see Note 5—*Fair Value* in Item 8.—*Financial Statements and Supplementary Data* of our 2024 Form 10-K.

Recurring Measurements

The following table presents, by level within the fair value hierarchy, the Company's financial assets and liabilities that were measured at fair value on a recurring basis as of the dates indicated (in millions). For the Company's investments in marketable debt securities, the security classes presented were determined based on the nature and risk of the security and are consistent with how the Company manages, monitors, and measures its marketable securities:

	June 30, 2025				December 31, 2024			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Assets								
DEBT SECURITIES:								
Available-for-sale:								
Certificates of deposit	$ —	$ 2	$ —	$ 2	$ —	$ 4	$ —	$ 4
Government debt securities	—	1	—	1	—	4	—	4
Total debt securities	—	3	—	3	—	8	—	8
EQUITY SECURITIES:								
Mutual funds	53	—	—	53	51	—	—	51
Common stock	1	—	—	1	4	—	—	4
Total equity securities	54	—	—	54	55	—	—	55
DERIVATIVES:								
Interest rate derivatives	—	183	—	183	—	349	—	349
Foreign currency derivatives	—	10	35	45	—	9	52	61
Commodity derivatives	158	58	4	220	193	80	5	278
Total derivatives — assets [1]	158	251	39	448	193	438	57	688
TOTAL ASSETS	$ 212	$ 254	$ 39	$ 505	$ 248	$ 446	$ 57	$ 751
Liabilities								
Contingent consideration [2]	$ —	$ —	$ 144	$ 144	$ —	$ —	$ 145	$ 145
DERIVATIVES:								
Interest rate derivatives	—	76	—	76	—	14	1	15
Foreign currency derivatives	—	25	—	25	—	18	—	18
Commodity derivatives	197	31	26	254	185	44	26	255
Total derivatives — liabilities [1]	197	132	26	355	185	76	27	288
TOTAL LIABILITIES	$ 197	$ 132	$ 170	$ 499	$ 185	$ 76	$ 172	$ 433

[1] Includes $3 million of derivative assets reported in *Current held-for-sale assets* and $3 million of derivative liabilities reported in *Current held-for-sale liabilities* on the Condensed Consolidated Balance Sheets related to Dominican Republic Renewables as of December 31, 2024.

[2] The level 3 contingent consideration is mainly related to the acquisition of Bellefield in June 2023.

As of June 30, 2025, all available-for-sale debt securities had stated maturities within one year. For the three and six months ended June 30, 2025, no impairments of marketable securities were recognized in earnings or other comprehensive income (loss). Credit-related impairments are recognized as an allowance with a corresponding impact recognized as a credit loss in *Other expense*. Gains and losses on sales of investments are determined using the specific identification method. The following table presents gross proceeds from the sale of available-for-sale securities for the periods indicated (in millions):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2025	2024	2025	2024
Gross proceeds from sale of available-for-sale securities	$ 1	$ 375	$ 4	$ 494

The Company accounts for equity securities without readily determinable fair values using the measurement alternative in accordance with ASC 321. These securities are measured at cost minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for the identical or similar investments of the same issuer. As of December 31, 2024, the carrying amount of equity securities accounted for using the measurement alternative was $62 million, inclusive of $22 million of cumulative upward adjustments recorded in *Other income* in prior years to reflect observable price changes for our investment in 5B Holdings Ptd. Ltd. (“5B”). During the three months ended June 30, 2025, the Company recorded a $48 million downward adjustment to our investment in 5B in *Other expense* due to an observable price change resulting from a transaction between 5B and a third-party. As a result, the carrying amount of equity securities accounted for using the measurement alternative as of June 30, 2025 was $19 million.

The following tables present a reconciliation of assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three and six months ended June 30, 2025 and 2024 (derivative balances are presented net), in millions. Transfers between Level 3 and Level 2 principally result from changes in the significance of unobservable inputs used to calculate the credit valuation adjustment.

	Derivative Assets and Liabilities				
Three Months Ended June 30, 2025	Interest Rate	Foreign Currency	Commodity	Contingent Consideration	Total
Balance at April 1, 2025	$ (2)	$ 43	$ 2	$ (173)	$ (130)

Transfers of assets (liabilities), net into Level 3	—	—	(1)	—	(1)
Transfers of assets, net out of Level 3	1	—	—	—	1
Balance at June 30, 2025	$ —	$ 35	$ (22)	$ (144)	$ (131)
Total losses for the period included in earnings attributable to the change in unrealized gains (losses) relating to assets and liabilities held at the end of the period	$ —	$ (12)	$ —	$ (18)	$ (30)

	Derivative Assets and Liabilities				
Six Months Ended June 30, 2024	Interest Rate	Foreign Currency	Commodity	Contingent Consideration	Total
Balance at January 1, 2024	$ (4)	$ 59	$ (110)	$ (165)	$ (220)
Total realized and unrealized gains (losses):					
Included in earnings	—	14	4	5	23
Included in other comprehensive income (loss) — derivative activity	2	5	32	—	39
Included in regulatory (assets) liabilities	—	—	5	—	5
Acquisitions	—	—	—	(14)	(14)
Settlements	—	(18)	(2)	12	(8)
Balance at June 30, 2024	(2)	60	(71)	(162)	(175)
Total gains for the period included in earnings attributable to the change in unrealized gains (losses) relating to assets and liabilities held at the end of the period	$ —	$ —	$ 6	$ 5	$ 11

The following table summarizes the significant unobservable inputs used to value Level 3 derivative assets (liabilities) as of June 30, 2025 (in millions, except range amounts):

Type of Derivative	Fair Value	Unobservable Input	Amount or Range (Average)
Foreign currency:			
Argentine peso	$ 35	Argentine peso to USD currency exchange rate after one year	1,210 to 1,520 (1,384)
Commodity:			
CAISO energy swap	(2)	Forward CAISO energy prices per MWh after 2031	$13.45 to $132.30 ($68.56)
MISO energy swap	(25)	Forward MISO energy prices per MWh after 2031	$22.42 to $75.68 ($43.07)
Other	5		
Total	$ 13		

For the Argentine peso foreign currency derivatives, increases (decreases) in the estimate of the above exchange rate would increase (decrease) the value of the derivative. For the CAISO and MISO energy swap, increases (decreases) in the estimate above would decrease (increase) the value of the derivative.

Contingent consideration is primarily related to future milestone payments associated with acquisitions of renewables development projects. The estimated fair value of contingent consideration is determined using probability-weighted discounted cash flows based on internal forecasts, which are considered Level 3 inputs. Changes in Level 3 inputs, particularly changes in the probability of achieving development milestones, could result in material changes to the fair value of the contingent consideration and could materially impact the amount of expense or income recorded each reporting period. Contingent consideration is updated quarterly with any prospective changes in fair value recorded through earnings. Gains and losses on the remeasurement of contingent consideration are recognized in *Other income* and *Other expense*, respectively, on the Condensed Consolidated Statements of Operations.

Nonrecurring Measurements

The Company measures fair value using the applicable fair value measurement guidance. Impairment expense, shown as pre-tax loss below, is measured by comparing the fair value at the evaluation date to the then-latest available carrying amount and is included in *Asset impairment reversals (expense)* on the Condensed Consolidated Statements of Operations. The following table summarizes our major categories of asset groups measured at fair value on a nonrecurring basis and their level within the fair value hierarchy (in millions):

Six Months Ended June 30, 2025	Measurement Date	Carrying Amount [1]	Fair Value			Pre-tax Loss
			Level 1	Level 2	Level 3	
Held-for-sale businesses: [2]						
Mong Duong [3]	3/31/2025	$ 383	$ —	$ 371	$ —	$ 17

Six Months Ended June 30, 2024	Measurement Date	Carrying Amount [1]	Fair Value			Pre-tax Loss
			Level 1	Level 2	Level 3	
Held-for-sale businesses: [2]						
Mong Duong	3/31/2024	$ 450	$ —	$ 413	$ —	$ 37
AES Brasil [4]	5/15/2024	1,577	—	1,565	—	25
Mong Duong [3]	6/30/2024	390	—	389	—	6

(1) Represents the carrying values of the asset groups at the dates of measurement, before fair value adjustment.

(2) See Note 18—*Held-for-Sale and Dispositions* for further information.

(3) The pre-tax loss recognized was calculated using the fair value of the Mong Duong disposal group less costs to sell of $5 million.

(4) The pre-tax loss recognized was calculated using the fair value of the AES Brasil disposal group less costs to sell of $13 million. A subsequent impairment analysis was performed as of June 30, 2024 and no additional impairment was identified.

Mong Duong — During the six months ended June 30, 2025, the Company recognized a $243 million increase in the carrying value of the Mong Duong asset group due to the derecognition of a $239 million valuation allowance on the loan receivable accounted for under ASC 310, which had been recognized in *Asset impairment expense* between December 31, 2023 and March 31, 2025 while Mong Duong was classified as held-for-sale, and the elimination of $4 million in net estimated costs to sell from the measurement of the asset group. Upon reclassification out of held-for-sale, the loan receivable was remeasured at amortized cost and individual non-loan assets were remeasured at the lower of (i) carrying value before Mong Duong was classified as held for sale, adjusted for any depreciation expense or impairment losses that would have been recognized had the asset been continuously classified as held and used, or (ii) fair value at the date of the subsequent determination that held-for-sale criteria was no longer met. See Note 16—*Asset Impairment Expense* for further information.

AES Clean Energy Development Projects — On a quarterly basis, the Company reviews the status of development projects to identify projects that are no longer viable and will be abandoned. The fair value of each abandoned project with no salvage value is determined to be zero as there are no future projected cash flows, resulting in a full write-off of the carrying value of project development intangibles and capitalized development costs incurred.

The Company recognized $117 million and $14 million of pre-tax asset impairment expense related to AES Clean Energy Development Projects during the six months ended June 30, 2025 and 2024, respectively. See Note 16—*Asset Impairment Expense* for further information.

Financial Instruments Not Measured at Fair Value in the Condensed Consolidated Balance Sheets

The following table presents (in millions) the carrying amount, fair value, and fair value hierarchy of the Company's financial assets and liabilities that are not measured at fair value in the Condensed Consolidated Balance Sheets as of the dates indicated, but for which fair value is disclosed:

		June 30, 2025				
		Carrying Amount	Fair Value			
			Total	Level 1	Level 2	Level 3
Assets:	Financing receivables [1]	$ 893	$ 1,007	$ —	$ —	$ 1,007
Liabilities:	Non-recourse debt	23,865	24,525	—	22,035	2,490
	Recourse debt	5,792	4,735	—	4,735	—

		December 31, 2024				
		Carrying Amount	Fair Value			
			Total	Level 1	Level 2	Level 3
Assets:	Financing receivables [1]	$ 87	$ 171	$ —	$ —	$ 171
Liabilities:	Non-recourse debt	22,743	23,066	—	20,981	2,085
	Recourse debt	5,704	4,538	—	4,538	—

[1] These amounts primarily relate to the sale of the Redondo Beach land, payment deferrals granted to mining customers as part of our green blend agreements in Chile, fair value of the Argentine FONINVEMEM receivables, and as of June 30, 2025, the Mong Duong loan receivable. These are included in *Other noncurrent assets* and *Loan receivable* in the accompanying Condensed Consolidated Balance Sheets. See Note 5—*Financing Receivables* for further information.

4. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

For further information on the Company's derivative and hedge accounting policies, see Note 1—*General and Summary of Significant Accounting Policies—Derivatives and Hedging Activities* of Item 8.—*Financial Statements and Supplementary Data* in the 2024 Form 10-K.

Volume of Activity — The following tables present the Company's maximum notional (in millions) over the remaining contractual period by type of derivative as of June 30, 2025, and the dates through which the maturities for each type of derivative range:

Interest Rate and Foreign Currency Derivatives	Maximum Notional Translated to USD	Latest Maturity [1]
Interest rate	$ 11,441	2058
Foreign currency:		
Colombian peso	180	2027
Euro	153	2026
Chilean peso	141	2028
Mexican peso	77	2026

Commodity Derivatives	Maximum Notional	Latest Maturity
Natural Gas (in MMBtu)	260	2029
Power (in MWhs) [2]	65	2040
Coal (in Metric Tons)	4	2028

[1] Maturity dates are consistent for both designated and non-designated positions.

[2] Includes one contract designated as a cash flow hedge with a final maturity date in 2038.

Accounting and Reporting — *Assets and Liabilities* — The following tables present the fair value of the Company's derivative assets and liabilities as of the dates indicated (in millions):

Fair Value	June 30, 2025			December 31, 2024		
Assets	Designated	Not Designated	Total	Designated	Not Designated	Total
Interest rate derivatives	$ 181	$ 2	$ 183	$ 349	$ —	$ 349
Foreign currency derivatives	11	34	45	16	45	61
Commodity derivatives	—	220	220	4	274	278
Total assets [1]	$ 192	$ 256	$ 448	$ 369	$ 319	$ 688
Liabilities						
Interest rate derivatives	$ 76	$ —	$ 76	$ 15	$ —	$ 15
Foreign currency derivatives	4	21	25	10	8	18
Commodity derivatives	27	227	254	29	226	255
Total liabilities [1]	$ 107	$ 248	$ 355	$ 54	$ 234	$ 288

	June 30, 2025		December 31, 2024	
Fair Value	Assets	Liabilities	Assets	Liabilities
Current	$ 302	$ 199	$ 369	$ 170
Noncurrent	146	156	319	118
Total [1]	$ 448	$ 355	$ 688	$ 288

(1) Includes $3 million of derivative assets reported in *Current held-for-sale assets* and $3 million of derivative liabilities reported in *Current held-for-sale liabilities* on the Condensed Consolidated Balance Sheets related to Dominican Republic Renewables as of December 31, 2024.

Earnings and Other Comprehensive Income (Loss) — The following table presents the pre-tax gains (losses) recognized in AOCL and earnings related to all derivative instruments for the periods indicated (in millions):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2025	2024	2025	2024
Cash flow hedges				
Gains (losses) recognized in AOCL				
Interest rate derivatives	$ (19)	$ 115	$ (185)	$ 340
Foreign currency derivatives	3	(1)	7	(10)
Commodity derivatives	(30)	—	—	28
Total	$ (46)	$ 114	$ (178)	$ 358
Gains (losses) reclassified from AOCL into earnings				
Interest rate derivatives — Interest expense	$ (6)	$ (31)	$ 9	$ (30)
Foreign currency derivatives — Foreign currency transaction gains (losses)	2	1	5	2
Commodity derivatives — Cost of sales—Non-Regulated	1	—	3	—
Total	$ (3)	$ (30)	$ 17	$ (28)
Gains (losses) on fair value hedging relationships				
Cross-currency derivatives				
Derivatives designated as hedging instruments	$ —	$ 50	$ —	$ (6)
Hedged items	—	(48)	—	(5)
Total	$ —	$ 2	$ —	$ (11)
Gains reclassified from AOCL to earnings due to change in forecast	$ —	$ 11	$ 8	$ 11
Gain (losses) recognized in earnings related to				
Not designated as hedging instruments:				
Interest rate derivatives — Interest expense	$ —	$ 1	$ —	$ 1
Foreign currency derivatives — Foreign currency transaction gains (losses)	(7)	45	(9)	58
Commodity derivatives — Revenue—Non-Regulated	(62)	17	(39)	112
Commodity derivatives — Cost of sales—Non-Regulated	(9)	(15)	(14)	(19)
Total	$ (78)	$ 48	$ (62)	$ 152

Reclassifications from AOCL to earnings are forecasted to decrease pre-tax income from continuing operations by $9 million for the twelve months ended June 30, 2026, primarily related to interest rate derivatives.

5. FINANCING RECEIVABLES

Receivables with contractual maturities of greater than one year are considered financing receivables. The following table presents long-term financing receivables, excluding lease receivables and amounts classified as held-for-sale, by country as of the dates indicated (in millions):

	June 30, 2025			December 31, 2024		
	Gross Receivable	Allowance	Net Receivable	Gross Receivable	Allowance	Net Receivable
Vietnam	$ 820	$ 20	$ 800	$ —	$ —	$ —
Chile	53	—	53	45	—	45
U.S.	49	17	32	48	15	33
Other	8	—	8	9	—	9
Total	$ 930	$ 37	$ 893	$ 102	$ 15	$ 87

Vietnam — AES has recorded loan receivables of $905 million as of June 30, 2025 pertaining to our Mong Duong plant in Vietnam. The plant was constructed under a build, operate, and transfer contract and sold to the Vietnamese government, while we remain the operator for the duration of the 25-year PPA. Mong Duong was reclassified from held-for-sale to held and used as of May 31, 2025 and therefore $105 million was classified in *Other current assets*, and $800 million in *Loan receivable* on the Condensed Consolidated Balance Sheet as of June 30, 2025. See Note 14—*Revenue* and Note 18—*Held-For-Sale and Dispositions* for further information.

Chile — AES Andes has recorded receivables pertaining to revenues recognized on regulated energy contracts that were impacted by the Stabilization Funds created by the Chilean government in October 2019, August 2022, and April 2024, in conjunction with the Tariff Stabilization Laws. Historically, the government updated the prices for these contracts every six months to reflect the contracts' indexation to exchange rates and commodities prices. The Tariff Stabilization Laws do not allow the pass-through of these contractual indexation updates to customers beyond the pricing in effect at July 1, 2019, until new lower-cost renewables contracts are

incorporated to supply regulated contracts. Consequently, costs incurred in excess of the July 1, 2019 price are accumulated and borne by generators. AES Andes aimed to reduce its exposure through the sale of receivables.

Through different agreements and programs, as of June 30, 2025, AES Andes sold and collected $151 million and $228 million related to agreements executed in August 2023 and October 2024 to sell up to $227 million and $254 million of receivables pursuant to the Stabilization Funds, respectively. In April 2025, AES Andes sold and collected the remaining $11 million of receivables pursuant to the Stabilization Funds. Additionally, $47 million of payment deferrals granted to mining customers as part of our green blend agreements were recorded as financing receivables included in *Other noncurrent assets* at June 30, 2025.

U.S. — AES has recorded non-current receivables pertaining to the sale of the Redondo Beach land. The anticipated collection period extends beyond June 30, 2026.

6. ALLOWANCE FOR CREDIT LOSSES

The following table represents the rollforward of the allowance for credit losses for the periods indicated (in millions):

Six Months Ended June 30, 2025	Accounts Receivable	Argentina Receivables	Other [1]	Total
CECL reserve balance at beginning of period	$ 52	$ 5	$ 39	$ 96
Current period provision	27	—	2	29
Write-offs charged against allowance	(25)	—	—	(25)
Recoveries collected	—	—	(1)	(1)
Foreign exchange	—	(1)	—	(1)
CECL reserve balance at end of period	$ 54	$ 4	$ 40	$ 98

Six Months Ended June 30, 2024	Accounts Receivable	Argentina Receivables	Other [2]	Total
CECL reserve balance at beginning of period	$ 15	$ 7	$ 42	$ 64
Current period provision	10	—	4	14
Write-offs charged against allowance	(4)	—	(7)	(11)
Recoveries collected	1	1	(1)	1
Foreign exchange	—	(1)	(2)	(3)
CECL reserve balance at end of period	$ 22	$ 7	$ 36	$ 65

[1] Primarily relates to credit losses allowances on financing receivables as of June 30, 2025. See Note 5—*Financing Receivables* for further information.

[2] Primarily relates to credit losses allowance classified in *Current held-for-sale assets* and *Noncurrent held-for-sale assets* on the Condensed Consolidated Balance Sheet as of June 30, 2024.

Beginning in 2024 and continuing into 2025, the current period provision and allowance for credit losses on customer accounts receivable has increased due to a temporary pause of customer disconnections and certain collection efforts and write-off processes after the implementation of customer billing system upgrades at our utilities in 2023 and 2024. This has resulted in higher past due customer receivables as of June 30, 2025. AES Indiana and AES Ohio reinstituted customer disconnections and write-off processes in March and June 2025, respectively. As a result, $24 million of the $25 million in write-offs charged against allowance for the six months ended June 30, 2025 were related to AES Indiana.

7. INVESTMENTS IN AND ADVANCES TO AFFILIATES

Summarized Financial Information — The following table summarizes financial information of the Company's 50%-or-less-owned affiliates and majority-owned unconsolidated subsidiaries that are accounted for using the equity method (in millions):

	50%-or-less Owned Affiliates		Majority-Owned Unconsolidated Subsidiaries	
Six Months Ended June 30,	2025	2024	2025	2024
Revenue	$ 1,220	$ 1,366	$ —	$ 1
Operating income (loss)	3	5	(1)	—
Net loss	(165)	(114)	(1)	—
Net loss attributable to affiliates	(170)	(45)	(1)	—

Dominican Republic Renewables — In June 2025, the Company completed the sale of 50% of its interests in AES DR Renewables Holdings, S.L. and its subsidiaries (collectively “Dominican Republic Renewables”) for $103 million and received cash proceeds for the sale of $100 million in July 2025. The Company retained a 50% ownership interest in Dominican Republic Renewables after the sale. However, the Company’s ownership in Dominican Republic Renewables is held through AES Hispanola Holdings II BV, a 65%-owned consolidated subsidiary, resulting in an AES effective ownership of 33%. The business was deconsolidated and accounted for as an equity method investment and is considered a related party. The Company recorded its retained interest in Dominican Republic Renewables at fair value of $103 million, using the market approach. See Note 18—*Held-for-Sale and Dispositions* for further information. Dominican Republic Renewables is reported in the Renewables SBU reportable segment.

Jordan — In March 2024, the Company completed the sale of approximately 26% ownership interest in Amman East and IPP4 for a sale price of $58 million. After adjusting for dividends received since the execution of the sale and purchase agreement, the Company received a net cash payment of $45 million. After completion of the sale, the Company retained 10% ownership interest in each of the businesses, which are accounted for as equity method investments. See Note 18—*Held-for-Sale and Dispositions* for further information. Amman East and IPP4 are reported in the Energy Infrastructure SBU reportable segment.

Uplight — In February 2024, Uplight acquired AutoGrid, a market leader in the Virtual Power Plant space, from Schneider Electric. As part of the transaction, Schneider contributed an additional $40 million to Uplight, and Uplight issued approximately 91 million additional common units to Schneider as consideration for the acquisition. No incremental investment was required from AES or any other investor. As a result, AES' 29% ownership interest in Uplight was diluted to 25%. The transaction was accounted for as a partial disposition in which AES recognized a gain of $52 million in *Gain on disposal and sale of business interests* upon remeasurement. As the Company still does not control but has significant influence over Uplight after the transaction, it continues to be accounted for as an equity method investment and is reported in the New Energy Technologies SBU reportable segment.

Alto Maipo — The Company holds a 99% ownership interest in Alto Maipo SpA (“Alto Maipo”), a hydroelectric plant in Chile. In May 2022, Alto Maipo emerged from bankruptcy in accordance with Chapter 11 of the U.S. Bankruptcy Code. Alto Maipo, as restructured, is considered a VIE. As the Company lacks the power to make significant decisions, it does not meet the criteria to be considered the primary beneficiary of Alto Maipo and therefore does not consolidate the entity. The Company has elected the fair value option to account for its investment in Alto Maipo as management believes this approach will better reflect the economics of its equity interest. As of both June 30, 2025 and December 31, 2024, the fair value was insignificant. Alto Maipo is reported in the Renewables SBU reportable segment.

Barry — The Company holds a 100% ownership interest in AES Barry Ltd. ("Barry"), a dormant entity in the U.K. that disposed of its generation and other operating assets. Due to a debt agreement, no material financial or operating decisions can be made without the banks' consent, and the Company does not control Barry. As of June 30, 2025 and December 31, 2024, other long-term liabilities included $45 million and $41 million, respectively, related to this debt agreement. Barry is reported in the Energy Infrastructure SBU reportable segment.

8. OBLIGATIONS

Recourse Debt — Recourse debt represents debt that the Parent Company has an obligation to settle. This can be debt issued directly by the Parent Company or debt issued by a subsidiary under which the Parent Company has explicit commitments such as guarantees, indemnities, letters of credit, or agreements to settle if the subsidiary defaults.

Senior Unsecured Term Loan due June 2026 — In June 2025, the Company executed a $500 million senior unsecured term loan agreement, maturing in June 2026. As of June 30, 2025, AES had no outstanding drawings under the facility.

Senior Notes due 2032 — In March 2025, the Company issued $800 million aggregate principal of 5.80% senior notes due in 2032. The Company used the proceeds from this issuance to purchase via tender offer a portion of its 3.30% senior notes due in 2025. As a result of the latter transaction, the Company recognized a gain on extinguishment of debt of $2 million.

Subordinated Notes due 2055 — In May 2024, the Company issued $950 million aggregate principal of 7.60% fixed-to-fixed reset rate subordinated notes due in January 2055. AES allocates the net proceeds from this offering to one or more eligible green projects, which may include the development or redevelopment of such projects. Pending such allocation, the net proceeds from the offering are used for general corporate purposes.

Commercial Paper Program — In March 2023, the Company established a commercial paper program under which the Company may issue unsecured commercial paper notes (the “Notes”) up to a maximum aggregate face amount of $750 million outstanding at any time. In April 2025, the Company executed agreements to increase the maximum aggregate face amount to $1.5 billion outstanding at any time. The maturities of the Notes may vary but will not exceed 397 days from the date of issuance. The proceeds of the Notes will be used for general corporate purposes. The Notes will be sold on customary terms in the U.S. commercial paper market on a private placement basis. The commercial paper program is backed by the Company's $1.8 billion in revolving credit facilities, and the Company cannot issue commercial paper in an aggregate amount exceeding the then available capacity under its revolving credit facilities. For the six months ended June 30, 2025, the Company borrowed approximately $22 billion and repaid approximately $21.9 billion under the commercial paper program, with average daily outstanding borrowings of $334 million. As of June 30, 2025, the Company had $67 million outstanding borrowings under the commercial paper program with a weighted average interest rate of 4.81%. The Notes are classified as current.

Revolving Credit Facilities — In December 2024, AES executed a $300 million senior unsecured revolving credit facility, maturing in December 2026. The aggregate commitment under its previously existing revolving credit facility is $1.5 billion and matures in August 2027. As of June 30, 2025, AES had no outstanding drawings under either of its revolving credit facilities.

Non-Recourse Debt — Non-recourse debt represents debt issued by one of our subsidiaries and is only required to be repaid solely from the subsidiary's assets. Repayments of the loans, and interest thereon, is secured solely by the capital stock, physical assets, contracts, and cash flows of that subsidiary, and the Parent Company is not otherwise liable for such debt. Non-recourse debt balances on the Condensed Consolidated Balance Sheet includes $1.3 billion of current and $12.3 billion of noncurrent non-recourse debt related to VIEs as of June 30, 2025.

During the six months ended June 30, 2025, the Company’s following subsidiaries had significant debt issuances (in millions):

Subsidiary	Issuances [1]
AES Clean Energy	$ 976
AES Puerto Rico Solar	669
AES Andes	520

[1] These amounts do not include revolving credit facility activity at the Company’s subsidiaries.

AES Puerto Rico Solar — The Marahu project, 70% owned by AES, is currently constructing the Salinas and Jobos renewables projects in Puerto Rico, including both solar and energy storage facilities. In October 2024, the Marahu project obtained a loan guarantee for $861 million from the U.S. Department of Energy, and began drawing on the loan in the first quarter of 2025. As of June 30, 2025, there were $667 million in outstanding borrowings, maturing in 2049. The remainder of the loan will be drawn upon as required to fund construction costs.

AES Andes — In March 2025, AES Andes issued $400 million aggregate principal of 6.25% senior notes due in 2032. The net proceeds from the issuance were used to redeem the remaining $228 million aggregate principal of its 6.35% junior subordinated notes due in 2079 and to repay other existing indebtedness. As a result of the latter transaction, the Company recognized a loss on extinguishment of debt of $3 million.

In March 2024, AES Andes issued $500 million aggregate principal of 6.30% senior unsecured notes due in 2029. The net proceeds from the issuance were used to purchase via tender offer $100 million and $43 million aggregate principal of its 6.35% and 5.00% notes due in 2079 and 2025, respectively, and repay other existing indebtedness.

In June 2024, AES Andes issued $530 million in Junior Subordinated Notes at 8.15%, due in 2055. The proceeds were used to repay its 7.125% notes due in 2079. As a result of this transaction, the Company recognized a loss on extinguishment of debt of $8 million.

AES Clean Energy — In December 2024, Bellefield 2 Seller, LLC executed a construction, tax equity bridge, and letter of credit financing agreement for commitments of up to $1.7 billion. As of June 30, 2025, there were $763 million in borrowings under the facilities at an interest rate of 4.30%, maturing in December 2026.

In December 2023, Bellefield Portfolio Seller, LLC and Bellefield 1 Finco, LLC, subsidiaries of AES Clean Energy Development, executed a construction, tax equity bridge, and letter of credit financing agreement for commitments of up to $2.4 billion due in 2026. As of June 30, 2025, there was $1.7 billion in outstanding borrowings under the facilities, and the net proceeds were used primarily to repay existing indebtedness and to fund development of renewables projects.

AES Clean Energy Development, AES Renewable Holdings, and sPower, an equity method investment, collectively referred to as the Issuers, entered into a Master Indenture agreement in 2022 whereby long-term notes will be issued from time to time to finance or refinance operating wind, solar, and energy storage projects that are owned by the Issuers. Each of the Issuers is considered a “Co-Issuer” and will be jointly and severally liable with each other Co-Issuer for all obligations under the facility. In May 2025, the Issuers issued $520 million of 6.70% notes due May 2050, resulting in an aggregate principal outstanding of $2.7 billion. As a result of the notes issued in 2025 and net of repayments, AES Clean Energy Development recorded, in aggregate, an increase in liabilities of $498 million, resulting in an aggregate carrying amount of notes of $1.9 billion as of June 30, 2025.

AES Clean Energy Development, AES Renewable Holdings, and sPower, collectively referred to as the Borrowers, executed two Credit Agreements for revolving credit facilities in 2021 and subsequent amendments in the following years for aggregate commitments of $3.6 billion with maturity dates in May and June 2028. Each of the Borrowers is considered a “Co-Borrower” and will be jointly and severally liable with each other Co-Borrower for all obligations under the facilities. As a result of increases in commitments used and net of repayments, AES Clean Energy Development and AES Renewable Holdings recorded, in aggregate, a decrease in liabilities of $231 million in 2025, resulting in total commitments used under the revolving credit facilities, as of June 30, 2025, of $2.7 billion. As of June 30, 2025, the aggregate commitments used under the revolving credit facilities for the Co-Borrowers was $2.9 billion.

AES Puerto Rico — On June 1, 2023, AES Puerto Rico was unable to pay principal and interest obligations on its Series A Bond Loans due to insufficient funds resulting from financial difficulties at the business. AES Puerto Rico signed forbearance and standstill agreements with its noteholders in July 2023 because of the insufficiency of funds to meet these obligations. On March 5, 2024, AES Puerto Rico and its noteholders executed a financial restructuring, under which the $156 million (including interest) of 6.625% Series A Bond Loans due 2026 was exchanged for $112 million of 6.625% senior secured bonds due January 2028 and $44 million of preferred shares in AES Puerto Rico. The preferred shares bear interest at 3.125% and contain an option whereby AES may call the preferred shares to be converted into 99.9% of the ordinary shares of AES Puerto Rico between December 30, 2025 and December 30, 2027, or would have the option to settle the preferred shares in cash. The noteholders also provided a $23 million bridge loan due March 2026 bearing interest at prime plus 4%. AES Puerto Rico is required to make mandatory prepayments through cash sweeps based on excess cash (as defined in the loan agreements) available from operations on the bridge loan, senior secured bonds, and preferred shares interest. The financial restructuring was accounted for as a troubled debt restructuring in accordance with ASC 470-60, “*Troubled Debt Restructurings by Debtors”* as AES Puerto Rico was experiencing financial difficulties and the lenders granted a concession. No gain has been recognized as a result of this transaction. As of June 30, 2025, cash settlement of the preferred shares is contingent, as the amounts would not be required to be settled in cash if the option to settle the preferred shares with common shares is exercised.

AES Indiana — In March 2024, AES Indiana issued $650 million aggregate principal of 5.70% First Mortgage Bonds due April 2054. The net proceeds from this issuance were used to repay existing indebtedness, including its unsecured $300 million term loan due in November 2024 and amounts outstanding under its $350 million revolving credit agreement maturing in December 2027, and for general corporate purposes at AES Indiana.

In March 2024, IPALCO issued $400 million aggregate principal of 5.75% senior secured notes due April 2034. In April 2024, the net proceeds from this issuance, together with cash on hand, were used to redeem the outstanding $405 million of IPALCO's 3.70% senior secured notes due in September 2024.

Non-Recourse Debt Covenants, Restrictions, and Defaults — The terms of the Company's non-recourse debt include certain financial and nonfinancial covenants. These covenants are limited to subsidiary activity and vary among the subsidiaries. These covenants may include, but are not limited to, maintenance of certain reserves and financial ratios, minimum levels of working capital, and limitations on incurring additional indebtedness.

As of June 30, 2025 and December 31, 2024, approximately $488 million and $147 million, respectively, of restricted cash was maintained in accordance with certain covenants of the non-recourse debt agreements. Of these amounts, $410 million and $79 million, respectively, were included within *Restricted cash* and $78 million and $68 million, respectively, were included within *Debt service reserves and other deposits* in the accompanying Condensed Consolidated Balance Sheets. As of June 30, 2025 and December 31, 2024, approximately $168 million and $155 million, respectively, of the restricted cash balances were for collateral held to cover potential liability for current and future insurance claims being assumed by AGIC, AES' captive insurance company. Of total restricted cash and debt service reserves of $851 million, $608 million related to VIEs as of June 30, 2025.

Various lender and governmental provisions restrict the ability of certain of the Company's subsidiaries to transfer their net assets to the Parent Company. Such restricted net assets of subsidiaries amounted to approximately $1.1 billion at June 30, 2025.

The following table summarizes the Company's subsidiary non-recourse debt in default (in millions) as of June 30, 2025. Due to the defaults, these amounts are included in the current portion of non-recourse debt unless otherwise indicated:

Subsidiary	Primary Nature of Default	Debt in Default	Net Assets (Liabilities)
AES Puerto Rico	Payment	$ 148	$ (188)
AES Ilumina (Puerto Rico)	Covenant	21	8
AES Jordan Solar	Covenant	6	13
Total		$ 175	

AES Puerto Rico is in payment default on its long-term debt and preferred shares due to failure to implement the cash sweep mechanism in accordance with the terms of the loan agreements. AES Puerto Rico is working with the noteholders to resolve this matter. All other subsidiary defaults listed are not payment defaults, but are instead technical defaults triggered by failure to comply with covenants or other requirements contained in the non-recourse debt documents of the applicable subsidiary.

AES Mexico Generation Holdings (TEG and TEP) — In December 2024, AES Mexico Generation Holdings executed an amendment to the original credit agreement with its noteholders that provided a full and complete waiver for all previous events of default for TEG and TEP and extended the waiver granted to June 30, 2025 to remain compliant. As of June 30, 2025, all requirements to remain in compliance with the debt covenant requirements were met. As such, the AES Mexico Generation Holdings debt balance of $129 million was not in default.

The AES Corporation's recourse debt agreements include cross-default clauses that will trigger if a subsidiary provides 20% or more of the Parent Company's total cash distributions from businesses for the four most recently completed fiscal quarters and has an outstanding principal in excess of $200 million in default. As of June 30, 2025, the Company's subsidiaries had no defaults which resulted in a cross-default under the recourse debt of the Parent Company. In the event the Parent Company is not in compliance with the financial covenants of its revolving credit facilities, restricted payments will be limited to regular quarterly shareholder dividends at the then-prevailing rate. Payment defaults and bankruptcy defaults would preclude the making of any restricted payments.

Supplier Financing Arrangements

With some purchases, the Company enters into supplier financing arrangements with the goal of securing improved payment terms. The Company confirms supplier invoices to an intermediary financial institution who will pay the supplier directly or reimburse the Company for payments made to the supplier. These arrangements are included in *Supplier financing arrangements* on the Condensed Consolidated Balance Sheets in *Current liabilities* as the amounts are all due in less than a year; the related interest expense is recorded on the Condensed Consolidated Statements of Operations within *Interest expense*.

The Company had total outstanding balances of $621 million as of June 30, 2025. These agreements ranged from less than $1 million to $47 million with a weighted average interest rate of 6.36%. Of the amounts outstanding under supplier financing arrangements as of June 30, 2025, $393 million were guaranteed, including $216 million guaranteed by the Parent Company and $177 million guaranteed by subsidiaries.

The Company had total outstanding balances of $917 million as of December 31, 2024. These agreements ranged from less than $1 million to $69 million with a weighted average interest rate of 6.83%. Of the amounts outstanding under supplier financing arrangements as of December 31, 2024, $616 million were guaranteed, including $245 million guaranteed by the Parent Company and $371 million guaranteed by subsidiaries.

9. COMMITMENTS AND CONTINGENCIES

Parent Guarantees, Letters of Credit, and Commitments — In connection with certain project financings (including tax equity transactions), acquisitions and dispositions, power purchases, EPC contracts, and other agreements, the Parent Company has expressly undertaken limited obligations and commitments, most of which will only be effective or will be terminated upon the occurrence of future events. In the normal course of business, the Parent Company has entered into various agreements, mainly guarantees and letters of credit, to provide financial or performance assurance to third parties on behalf of AES businesses. These agreements are entered into primarily to support or enhance the creditworthiness otherwise achieved by a business on a stand-alone basis, thereby facilitating the availability of sufficient credit to accomplish their intended business purposes. Most of the contingent obligations relate to future performance commitments which the Company or its businesses expect to fulfill within the normal course of business. The expiration dates of these guarantees vary from less than 1 year to no more than 31 years.

The following table summarizes the Parent Company's contingent contractual obligations as of June 30, 2025. Amounts presented in the following table represent the Parent Company's current undiscounted exposure to guarantees and the range of maximum undiscounted potential exposure per individual agreement. The maximum exposure is not reduced by the amounts, if any, that could be recovered under the recourse or collateralization provisions in the guarantees.

Contingent Contractual Obligations	Maximum Exposure (in millions)	Number of Agreements	Maximum Exposure Range for Each Agreement (in millions)
Guarantees and commitments	$ 4,725	101	<$1 — 1,110
Letters of credit under bilateral agreements	310	7	$11 — 88
Letters of credit under the unsecured credit facilities	163	11	<$1 — 60
Letters of credit under the revolving credit facilities	48	22	<$1 — 20
Surety bonds	2	2	<$1 — 1
Total	$ 5,248	143	

During the six months ended June 30, 2025, the Company paid letter of credit fees ranging from 1% to 3% per annum on the outstanding amounts of letters of credit.

Subsidiary Guarantees and Letters of Credit — In connection with certain project financings (including tax equity transactions), acquisitions and dispositions, power purchases, EPC contracts, and other agreements, certain of the Company's subsidiaries have expressly undertaken limited obligations and commitments, most of which will only be effective or will be terminated upon the occurrence of future events, or are customary payment guarantees for amounts due under existing contracts in the normal course of business. These contingent contractual obligations are issued at the subsidiary level and are non-recourse to the Parent Company. As of June 30, 2025, the maximum undiscounted potential exposure to guarantees and letters of credit issued by our subsidiaries was $5.6 billion, including $1.9 billion of customary payment guarantees under EPC contracts and other agreements, $1.6 billion of letters of credit outstanding, $1.3 billion of surety bonds and other guarantees issued by insurance companies, and $816 million of tax equity financing related guarantees.

Contingencies

Environmental — The Company periodically reviews its obligations as they relate to compliance with environmental laws, including site restoration and remediation. For the periods ended June 30, 2025 and December 31, 2024, the Company recognized liabilities of $1 million and $2 million for projected environmental remediation costs, respectively. These amounts are reported on the Condensed Consolidated Balance Sheets within *Accrued and other liabilities* and *Other noncurrent liabilities*. Due to the uncertainties associated with environmental assessment and remediation activities, future costs of compliance or remediation could be higher or lower than the amount currently accrued. Moreover, where no liability has been recognized, it is reasonably possible that the Company may be required to incur remediation costs or make expenditures in amounts that could be material but could not be estimated as of June 30, 2025. Unasserted claims are not included in the range of potential losses related to environmental matters until it is probable that a claim will be asserted and there is a reasonable possibility that the outcome will be unfavorable. In aggregate, the Company estimates the range of potential losses related to environmental matters, where estimable, to be between $1 million and $5 million. The amounts considered reasonably possible do not include amounts accrued as discussed above.

Litigation — The Company is involved in certain claims, suits and legal proceedings in the normal course of business. The Company accrues for litigation and claims when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. The Company has recognized aggregate liabilities for all claims of approximately $14 million and $5 million as of June 30, 2025 and December 31, 2024, respectively. These amounts are reported on the Condensed Consolidated Balance Sheets within *Accrued and other liabilities* and *Other noncurrent liabilities*. A significant portion of these accrued liabilities relate to regulatory matters and commercial disputes in international jurisdictions. There can be no assurance that these accrued liabilities will be adequate to cover all existing and future claims or that we will have the liquidity to pay such claims as they arise.

Where no accrued liability has been recognized, it is reasonably possible that some matters could be decided unfavorably to the Company and could require the Company to pay damages or make expenditures in amounts that could be material but could not be estimated as of June 30, 2025. The material contingencies where a loss is reasonably possible primarily include disputes with offtakers, suppliers and EPC contractors; alleged breaches of contract; alleged violation of laws and regulations; income tax and non-income tax matters with tax authorities; and regulatory matters. In aggregate, the Company estimates the range of potential losses, where estimable, related to these reasonably possible material contingencies to be between $194 million and $225 million. Included in this range is a reasonably possible legal contingency for environmental remediation costs related to AES Sul, a business the Company disposed of in 2016, estimated to be approximately R$15 million to R$60 million ($3 million to $11 million). The amounts considered reasonably possible do not include the amounts accrued, as discussed above. These material contingencies do not include income tax-related contingencies which are considered part of our uncertain tax positions.

10. LEASES

LESSOR — The Company has operating leases for certain generation contracts that contain provisions to provide capacity to a customer, which is a stand-ready obligation to deliver energy when required by the customer. Capacity obligations are generally considered lease elements as they cover the majority of available output from a facility. The allocation of contract payments between the lease and non-lease elements is made at the inception of the lease. Lease receipts from such contracts are recognized as lease revenue on a straight-line basis over the lease term, whereas variable lease receipts are recognized when earned.

The following table presents lease revenue from operating leases in which the Company is the lessor, recognized in *Revenue* on the Condensed Consolidated Statements of Operations for the periods indicated (in millions):

	Three Months Ended June 30,		Six Months Ended June 30,	
Operating Lease Revenue	**2025**	**2024**	**2025**	**2024**
Non-variable lease revenue	$ 81	$ 135	$ 157	$ 237
Variable lease revenue	28	18	43	31
Total lease revenue	$ 109	$ 153	$ 200	$ 268

The following table presents the underlying gross assets and accumulated depreciation of operating leases included in *Property, plant and equipment, net* on the Condensed Consolidated Balance Sheets as of the dates indicated (in millions):

Property, Plant and Equipment, Net	June 30, 2025	December 31, 2024
Gross assets	$ 2,208	$ 1,085
Less: Accumulated depreciation	(273)	(218)
Net assets	$ 1,935	$ 867

The option to extend or terminate a lease is based on customary early termination provisions in the contract, such as payment defaults, bankruptcy, or lack of performance on energy delivery. The Company has not recognized any early terminations as of June 30, 2025. Certain leases may provide for variable lease payments based on usage or index-based (e.g., the U.S. Consumer Price Index) adjustments to lease payments.

The following table shows the future lease receipts as of June 30, 2025 for the remainder of 2025 through 2029 and thereafter (in millions):

	Future Cash Receipts for	
	Sales-Type Leases	Operating Leases
2025	$ 26	$ 133
2026	49	144
2027	50	65
2028	50	—
2029	50	—
Thereafter	719	1
Total	$ 944	$ 343
Less: Imputed interest	(352)	
Present value of total lease receipts	$ 592	

Battery Storage Lease Arrangements — The Company constructs and operates projects consisting only of a stand-alone BESS facility, as well as projects that pair a BESS with solar energy systems. These projects allow more flexibility on when to provide energy to the grid. The Company will enter into PPAs for the full output of the facility that allow customers the ability to determine when to charge and discharge the BESS. Generally, these arrangements include both lease and non-lease elements under ASC 842, with the BESS component typically constituting a sales-type lease. Generally, losses recognized on the commencement of sales-type leases primarily relate to PPAs that contain no variable lease payments and the exclusion of the value of ITCs from the fair value of the renewable asset, which is used in the determination of the rate implicit in the lease. This results in a higher discount rate, reducing the lease receivable to an amount below the carrying value of the associated lease asset, and a resulting pre-tax loss on commencement.

The following table presents variable lease revenue, interest income, and gains (losses) on commencement of sales-type leases in which the Company is the lessor, for the periods indicated (in millions):

	Three Months Ended June 30,		Six Months Ended June 30,	
Sales-Type Leases	2025	2024	2025	2024
Variable lease revenue	$ —	$ —	$ 1	$ 1
Interest income	6	4	12	8
Net losses on commencement of sales-types leases [1]	(199)	(72)	(208)	(67)

[1] Gains and losses are recognized in *Other income* and *Other expense*, respectively, in the Condensed Consolidated Statement of Operations. See Note 15—*Other Income and Expense* for further information.

11. REDEEMABLE STOCK OF SUBSIDIARIES

Noncontrolling interests with redemption features that are not solely within the control of the issuer are classified as temporary equity and are included in *Redeemable stock of subsidiaries* on the Condensed Consolidated Balance Sheets. Generally, these instruments are initially measured at fair value and are subsequently adjusted for income and dividends allocated to the noncontrolling interest. Subsequent measurement varies depending on whether the instrument is probable of becoming redeemable. For those securities that are currently redeemable or where it is probable that the instrument will become redeemable, any changes from the carrying value to redemption value are recognized in temporary equity against *Retained earnings* or *Additional paid-in capital* in the absence of retained earnings. When the instrument is not probable of becoming redeemable, no adjustment to the carrying value is recognized.

The following table is a reconciliation of changes in redeemable stock of subsidiaries for the periods indicated (in millions):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2025	2024	2025	2024
Balance at the beginning of the period	$ 899	$ 1,502	$ 938	$ 1,464
Net income (loss)	3	(10)	33	(99)
Other comprehensive income	—	37	—	72
Adjustments to redemption value of redeemable stock of subsidiaries	10	(6)	10	—
Reclassification of redeemable stock of subsidiaries to noncontrolling interests	(18)	(670)	(56)	(670)
Distributions to holders of redeemable stock of subsidiaries	(10)	(11)	(41)	(25)
Contributions from holders of redeemable stock of subsidiaries	168	45	168	71
Sales of redeemable stock of subsidiaries	687	14	687	88
Issuance of preferred shares in subsidiaries	440	—	440	—
Balance at the end of the period	$ 2,179	$ 901	$ 2,179	$ 901

The following table summarizes the Company's redeemable stock of subsidiaries balances as of the dates indicated (in millions):

	June 30, 2025	December 31, 2024
IPALCO common stock	$ 958	$ 835
AES Ohio common stock	584	—
AES Global Insurance preferred stock	456	—
AES Clean Energy tax equity partnerships	181	65
AES Indiana Pike County BESS tax equity partnership	—	38
Total redeemable stock of subsidiaries	$ 2,179	$ 938

AES Global Insurance — On April 30, 2025, the Company sold minority interests in AES Global Insurance Company, LLC ("AGIC"), AES' captive insurance company, and AGIC Holdings, LLC (together with AGIC, the "AGIC Companies") in exchange for $450 million in total proceeds for Class B units representing 17.5% and 18.0%, respectively, of each entity's total outstanding units, for a combined ownership (directly and indirectly) of AGIC's total outstanding units of 32.4% by the Class B Member. The Company continues to own Class A units for the remaining economic interest in the AGIC Companies. The Class B units provide for target distribution amounts for the Class B Member, with a call option for AES for years 2030 through 2035 to redeem these units at pre-agreed redemption prices.

As the agreement contains certain redemption features that may require future redemption of the Class B units and are not solely in AES' control, the noncontrolling interest is considered temporary equity. The contractual target rate of return increases the redemption price on the Class B units and the annual distributions reduce the applicable redemption price. Annual dividends are subject to regulatory and the AGIC Companies Boards' approval. Through March 31, 2045, the AGIC Companies Boards will approve distributions to the Class B Member to the extent that there is sufficient cash generated from operations each annual period. After March 31, 2045, all dividends are discretionary if the Class B units remain outstanding. It is probable that the AGIC Companies' performance will generate sufficient cash to require distributions to be made to the Class B Member of an amount that would redeem the instrument after the call option period. Therefore, as of June 30, 2025, the noncontrolling interest is probable of becoming redeemable and the carrying value of the Class B units will be adjusted to equal the redemption value each reporting period. As of June 30, 2025, the redemption value of the noncontrolling ownership interest of $456 million exceeded the carrying value; as such, an adjustment of $10 million was recorded to *Redeemable stock of subsidiaries* on the Condensed Consolidated Balance Sheets to increase the carrying value to the Class B units' redemption value. The AGIC Companies are reported in Corporate and Other.

As part of the transaction, it is required that either (i) the AGIC Companies achieve a minimum distribution target to the Class B Member ranging from $146 million to $199 million over pre-defined periods of time ranging from three to five years (the "distribution period") or (ii) AGIC achieves an average cash basis quarterly net income threshold for the period comprising the relevant distribution period and the four quarters immediately prior to the start of such distribution period. AES can make disproportionate distributions to the Class B Member to meet the minimum distribution target for the distribution period. If, at the end of a distribution period, (1) such cash basis net income threshold is not met and (2) the minimum distribution target for such distribution period is not achieved, AES would be required to address the shortfall by issuing AES common stock ("Shortfall Stock") to AGIC for the net difference between actual and targeted distributions. Distributions of cash from the sale of Shortfall Stock are subject to regulatory approval and at the discretion of AES.

AES Ohio — On April 4, 2025, DPL sold an indirect equity interest in AES Ohio of approximately 30% to Astrid Holdings LP, a wholly-owned subsidiary of CDPQ, for total proceeds of approximately $544 million, resulting in an increase to *Redeemable stock of subsidiaries* of $538 million, net of transaction costs. The Company also recognized an increase to additional paid-in capital and a reduction to retained earnings of $188 million for the excess of the fair value of the shares over the share of the net assets sold. The agreement contains certain redemption features that, while not currently in effect, are not solely in AES' control. As a result, the noncontrolling ownership interest is considered temporary equity. The Company has concluded that the likelihood of an event that would allow CDPQ to redeem its interest under the terms of the shareholder agreement is not probable, but would require redemption at fair value. Therefore, as of June 30, 2025, the noncontrolling ownership interest is not probable of becoming redeemable and subsequent adjustments to the carrying value were not required. AES Ohio is reported in the Utilities SBU reportable segment.

AES Clean Energy Tax Equity Partnerships — The majority of solar projects in the U.S. have been financed with tax equity structures, in which tax equity investors receive a portion of the economic attributes of the facilities, including tax attributes, that vary over the life of the projects. The substance of such arrangements is that of a preferred structure, whereby tax equity investors are granted preferential returns in the form of significant earnings and tax allocations from the partnership, until a specified internal rate of return is achieved.

In some cases, these agreements contain certain partnership rights, though not currently in effect, that may enable the tax equity investor to exit in the future. As a result, the noncontrolling ownership interest is considered temporary equity. Some of these tax equity partnership agreements have redemption features dependent upon the passage of time, therefore the noncontrolling ownership interests are probable of becoming redeemable. As of June 30, 2025, the carrying values of these noncontrolling ownership interests exceeded the redemption values, therefore no adjustments to the carrying values were necessary. Certain other tax equity partnership agreements have redemption features contingent upon the underlying assets achieving agreed-upon project milestones. The Company has concluded it is probable that these projects will reach the specified milestones, therefore the noncontrolling ownership interests are not probable of becoming redeemable and subsequent adjustments to the carrying value were not required.

During the six months ended June 30, 2025 and 2024, AES Clean Energy, through multiple transactions, sold noncontrolling interests in project companies to tax equity investors, resulting in increases to *Redeemable stock of subsidiaries* of $149 million and $100 million, respectively, net of transaction costs.

During the six months ended June 30, 2025 and 2024, certain renewables development projects with redemption features were placed in service, resulting in the expiration of the redemption features. As a result, noncontrolling ownership interests of $18 million and $107 million, respectively, were reclassified from *Redeemable stock of subsidiaries* to *Noncontrolling interests* on the Condensed Consolidated Balance Sheets. AES Clean Energy is reported in the Renewables SBU reportable segment.

AES Indiana Pike County BESS — The redemption feature of the tax equity partnership agreement was contingent upon the underlying assets being placed in service by a guaranteed date. In March 2025, the Pike County BESS project was placed in service, resulting in the expiration of the redemption feature. As a result, the noncontrolling ownership interest of $38 million was reclassified from *Redeemable stock of subsidiaries* to *Noncontrolling interests* on the Condensed Consolidated Balance Sheets. AES Indiana is reported in the Utilities SBU reportable segment.

AES Clean Energy Development — As part of the formation of AES Clean Energy Development in February 2021, the noncontrolling interest partner received certain partnership rights that would enable them to exit in the future. As a result, the noncontrolling ownership interest was considered temporary equity. In May 2024, these redemption features expired without being exercised and the noncontrolling ownership interest of $563 million was reclassified from *Redeemable stock of subsidiaries* to *Noncontrolling interests* on the Condensed Consolidated Balance Sheets. AES Clean Energy Development is reported in the Renewables SBU reportable segment.

12. EQUITY

Equity Units

In March 2021, the Company issued 10,430,500 Equity Units with a total notional value of $1,043 million. Each Equity Unit had a stated amount of $100 and was initially issued as a Corporate Unit, consisting of a forward stock purchase contract ("2024 Purchase Contracts") and a 10% undivided beneficial ownership interest in one share of 0% Series A Cumulative Perpetual Convertible Preferred Stock, issued without par and with a liquidation preference of $1,000 per share ("Series A Preferred Stock").

The Company concluded that the Equity Units should be accounted for as one unit of account based on the economic linkage between the 2024 Purchase Contracts and the Series A Preferred Stock, as well as the Company's assessment of the applicable accounting guidance relating to combining freestanding instruments. The Equity Units represent mandatorily convertible preferred stock. Accordingly, the shares associated with the combined instrument were reflected in diluted earnings per share using the if-converted method.

In conjunction with the issuance of the Equity Units, the Company received approximately $1 billion in proceeds, net of underwriting costs and commissions, before offering expenses. The proceeds for the issuance of 1,043,050 shares were attributed to the Series A Preferred Stock for $838 million and $205 million for the present value of the quarterly payments due to holders of the 2024 Purchase Contracts ("Contract Adjustment Payments"). The proceeds were used for the development of the AES renewables businesses, U.S. utility businesses, LNG infrastructure, and for other developments determined by management.

The Series A Preferred Stock did not bear any dividends and the liquidation preference of the convertible preferred stock did not accrete. The Series A Preferred Stock had no maturity date and would remain outstanding unless converted by holders or redeemed by the Company. Holders of the preferred shares had limited voting rights. The Series A Preferred Stock was pledged as collateral to support holders' purchase obligations under the 2024 Purchase Contracts, which obligated the holders to purchase, on February 15, 2024, for a price of $100 in cash, a maximum number of 57,467,883 shares of the Company's common stock (subject to customary anti-dilution adjustments). The initial settlement rate determining the number of shares that each holder must purchase could not exceed the maximum settlement rate and was determined over a market value averaging period preceding February 15, 2024. The initial maximum settlement rate of 3.864 was calculated using an initial reference price of $25.88, equal to the last reported sale price of the Company's common stock on March 4, 2021. On February 15, 2024, the Series A Preferred Stock was tendered to satisfy the 2024 Purchase Contract's settlement price and the Corporate Units were converted into shares of the Company's common stock at the maximum settlement rate of 3.8859, equivalent to a reference price of $25.73. The Series A Preferred Stock was canceled and 40,531,845 shares of AES common stock were issued upon conversion.

The Company paid Contract Adjustment Payments to the holders of the 2024 Purchase Contracts at a rate of 6.875% per annum, payable quarterly in arrears on February 15, May 15, August 15, and November 15, commencing on May 15, 2021. The $205 million present value of the Contract Adjustment Payments at inception reduced the Series A Preferred Stock. As each quarterly Contract Adjustment Payment was made, the related liability was reduced and the difference between the cash payment and the present value accreted to interest expense, approximately $5 million over the three-year term. The final Contract Adjustment Payments were made on February 15, 2024.

Equity Transactions with Noncontrolling Interests

AES Clean Energy Tax Equity Partnerships — The majority of solar projects in the U.S. have been financed with tax equity structures, in which tax equity investors receive a portion of the economic attributes of the facilities, including tax attributes, that vary over the life of the projects. The substance of such arrangements is that of a preferred structure, whereby tax equity investors are granted preferential returns in the form of significant earnings and tax allocations from the partnership, until a specified internal rate of return is achieved.

During the six months ended June 30, 2025 and 2024, AES Clean Energy Development and AES Renewable Holdings, through multiple transactions, sold noncontrolling interests in project companies to tax equity investors, resulting in increases to NCI of $282 million, and $112 million, respectively. AES Clean Energy Development and AES Renewable Holdings are reported in the Renewables SBU reportable segment.

Cochrane — In May 2025, the Company acquired the remaining 40% of the common shares in Empresa Electrica Cochrane SpA ("Cochrane"), a coal-fired plant in Chile, from a third-party investor for $89 million, increasing AES' ownership in Cochrane to 96.7%. This transaction resulted in a $46 million decrease in Parent Company Stockholder's Equity due to a decrease in additional paid-in-capital of $29 million and a reclassification of accumulated other comprehensive losses from NCI to AOCL of $17 million. The preferred shares in Cochrane, previously issued by AES Andes in September 2020, remain outstanding. Under the terms of the operating agreement, preferred shareholders have the preferential right to receive distributions from the earnings or available distributable capital of Cochrane until reaching their original investment plus a specified rate of return. Cochrane is reported in the Energy Infrastructure SBU reportable segment.

AES Indiana Pike County BESS — In March 2025, as a result of the Pike County BESS project being placed in service, the noncontrolling ownership interest of $38 million was reclassified from *Redeemable stock of subsidiaries* to *Noncontrolling interests* on the Condensed Consolidated Balance Sheets. See Note 11—*Redeemable Stock of Subsidiaries* for further information. Subsequently, AES Indiana received an additional $150 million from the tax equity investor, resulting in an increase to NCI. AES Indiana is reported in the Utilities SBU reportable segment.

Hardy Hills Solar — In December 2023, AES Indiana sold a noncontrolling interest in the Hardy Hills solar project to a tax equity investor, resulting in a $79 million increase to NCI. In May 2024, the project reached commercial operations and AES Indiana received an additional $47 million from the tax equity investor. AES Indiana is reported in the Utilities SBU reportable segment.

AES Puerto Rico Solar — In May 2024, AES CFE Holding II entered into an agreement for the sale of a 30% ownership interest in the Marahu project for $35 million, resulting in an increase to NCI. As the Company maintained control after this transaction, AES Puerto Rico Solar continues to be consolidated by the Company within the Renewables SBU reportable segment.

Chile Renovables — Under its renewables partnership agreement with Global Infrastructure Management, LLC ("GIP"), AES Andes will contribute a specified pipeline of renewables development projects to Chile Renovables as the projects reach commercial operations, and GIP may make additional contributions to maintain its 49% ownership interest. In February 2024, AES Andes completed the sale of Mesamávida to Chile Renovables for $40 million, resulting in an increase to NCI of $51 million and a decrease to additional paid-in capital of $11 million.

In December 2023, Chile Renovables issued $275 million of preferred shares to GIP, the proceeds of which are being used to fund the development of an additional pipeline of renewables projects. Under the terms of the operating agreement, GIP receives an escalating specified internal rate of return up until the point the projects reach commercial operations. As each project reaches commercial operations, the preferred shares convert to common stock and GIP may make additional contributions to maintain its 49% ownership interest. In February 2025, the Andes Solar 2a BESS project reached commercial operations. The preferred shares were converted to common stock and GIP made additional contributions of $14 million, resulting in an increase to NCI of $17 million and a decrease to additional paid-in capital of $3 million.

As the Company maintained control after each of these transactions, Chile Renovables continues to be consolidated by the Company within the Renewables SBU reportable segment.

AES Renewable Holdings — In December 2023, AES Renewable Holdings issued preferred shares in a portfolio of operating assets ("OpCo 1"). Under the terms of the operating agreement, the preferred shareholder will receive cash distributions disproportionate to its ownership interest in OpCo 1 until a specified internal rate of return is reached. AES Renewable Holdings is reported in the Renewables SBU reportable segment.

The following table summarizes the net income (loss) attributable to The AES Corporation and all transfers (to) from noncontrolling interests for the periods indicated (in millions):

	Six Months Ended June 30,	
	2025	2024
Net income (loss) attributable to The AES Corporation	$ (49)	$ 708
Transfers (to) from noncontrolling interest:		
Increase (decrease) in The AES Corporation's paid-in capital for sale of subsidiary shares	184	(8)
Additional paid-in capital transferred to redeemable stock of subsidiaries [1]	(188)	—
Decrease in The AES Corporation's paid-in capital for acquisition of subsidiary shares	(26)	—
Net transfers to noncontrolling interest	(30)	(8)
Change from net income (loss) attributable to The AES Corporation and transfers (to) from noncontrolling interests	$ (79)	$ 700

[1] See Note 11—*Redeemable Stock of Subsidiaries* for further information on increase in paid-in capital transferred to redeemable stock of subsidiaries.

Accumulated Other Comprehensive Loss — The following table summarizes the changes in AOCL by component, net of tax and NCI, for the six months ended June 30, 2025 (in millions):

	Foreign currency translation adjustments, net	Change in fair value of derivatives, net	Pension adjustments, net	Change in fair value option liabilities, net	Total
Balance at the beginning of the period	$ (1,282)	$ 537	$ (24)	$ 3	$ (766)
Other comprehensive income (loss) before reclassifications	71	(119)	(4)	—	(52)
Amount reclassified to earnings	—	(9)	—	—	(9)
Other comprehensive income (loss)	71	(128)	(4)	—	(61)
Reclassification from NCI due to share sales and repurchases	—	(17)	8	—	(9)
Balance at the end of the period	$ (1,211)	$ 392	$ (20)	$ 3	$ (836)

Reclassifications out of AOCL are presented in the following table. The Company's accounting policy for releasing the income tax effects from AOCL occurs on a portfolio basis. Amounts for the periods indicated are in millions and those in parentheses indicate debits to the Condensed Consolidated Statements of Operations:

	Three Months Ended June 30,		Six Months Ended June 30,	
AOCL Components	2025	2024	2025	2024
Change in fair value of derivatives, net				
Non-regulated cost of sales	1	—	2	(1)
Interest expense	(6)	(31)	10	(30)
Foreign currency transaction gains (losses)	2	1	5	2
Income (loss) from continuing operations before taxes and equity in earnings of affiliates	(3)	(30)	17	(29)
Income tax benefit (expense)	(6)	7	(12)	7
Net equity in earnings (losses) of affiliates	—	—	—	1
Net income (loss)	(9)	(23)	5	(21)
Less: Net loss attributable to noncontrolling interests and redeemable stock of subsidiaries	3	4	4	4
Net income (loss) attributable to The AES Corporation	$ (6)	$ (19)	$ 9	$ (17)

Common Stock Dividends — The Parent Company paid dividends of $0.17595 per outstanding share to its common stockholders during the first and second quarters of 2025 for dividends declared in December 2024 and February 2025.

On July 10, 2025, the Board of Directors declared a quarterly common stock dividend of $0.17595 per share payable on August 15, 2025, to shareholders of record at the close of business on August 1, 2025.

13. SEGMENTS

The segment reporting structure uses the Company's management reporting structure as its foundation to reflect how the Company manages the businesses internally. The management reporting structure is composed of four SBUs, mainly organized by technology, led by our President and Chief Executive Officer, who is our Chief Operating Decision Maker. Using the accounting guidance on segment reporting, the Company determined that its four operating segments are aligned with its four reportable segments corresponding to its SBUs.

- *Renewables* — Solar, wind, energy storage, and hydro generation facilities;
- *Utilities* — AES Indiana, AES Ohio, and AES El Salvador regulated utilities and their generation facilities;
- *Energy Infrastructure* — Natural gas, LNG, coal, pet coke, diesel, and oil generation facilities; and
- *New Energy Technologies* — Investments in Fluence, Uplight, Maximo, and other new and innovative energy technology businesses.

Prior to the first quarter of 2025, our businesses in Chile (which had a mix of generation sources, including renewables, that were pooled to service our existing PPAs initially entered into for sale of the output of the coal plants) were reported in the Energy Infrastructure SBU. After the sale or disconnection of a significant portion of AES Andes' coal plants and the expiration of its coal-indexed contracts with regulated customers at the end of 2024, the results of our businesses in Chile, excluding the two remaining coal plants, are now reported as part of the Renewables SBU in financial information regularly reviewed by the Chief Operating Decision Maker. The results of the two remaining coal plants in Chile, Angamos and Cochrane, remain within the Energy Infrastructure SBU. As the composition of the segments changed in the first quarter of 2025, the segment information for prior comparative periods has been retrospectively revised to reflect AES Andes' renewables partnership with GIP, Chile Renovables, which is separable from the rest of the AES Andes portfolio, as part of the Renewables SBU. We determined that there was no separately identifiable financial information for the other renewables in the AES Andes portfolio as they were servicing the same coal-indexed PPAs as the coal facilities prior to 2025, therefore the rest of the renewables portfolio at AES Andes is presented within the Energy Infrastructure SBU in the 2024 segment information presented. Revenue and Adjusted EBITDA for AES Andes that are presented within the Energy Infrastructure SBU in historical periods and within the Renewables SBU in 2025 were $216 million and $12 million, respectively, during the three months ended June 30, 2025, and $419 million and $34 million, respectively, during the six months ended June 30, 2025.

Our Renewables, Utilities, and Energy Infrastructure SBUs participate in our generation business line, in which we own and/or operate power plants to generate and sell power to customers, such as utilities, industrial users, and other intermediaries. Our Utilities SBU participates in our utilities business line, in which we own and/or operate utilities to generate or purchase, distribute, transmit, and sell electricity to end-user customers in the residential, commercial, industrial, and governmental sectors within a defined service area. In certain circumstances, our utilities also generate and sell electricity on the wholesale market. Our New Energy Technologies SBU includes investments in new and innovative technologies to support leading-edge greener energy solutions.

Included in "Corporate and Other" are the results of AES Global Insurance Company, LLC ("AGIC"), AES' captive insurance company; corporate overhead costs which are not directly associated with the operations of our four reportable segments; and certain intercompany charges such as self-insurance premiums which are fully eliminated in consolidation.

The Company uses Adjusted EBITDA as its primary segment performance measure. Adjusted EBITDA, a non-GAAP measure, is defined by the Company as earnings before interest income and expense, taxes, depreciation, amortization, and accretion of AROs, adjusted for the impact of NCI and interest, taxes, depreciation, amortization, and accretion of AROs of our equity affiliates, and adding back interest income recognized under service concession arrangements; excluding gains or losses of both consolidated entities and entities accounted for under the equity method due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits, and costs associated with dispositions and acquisitions of business interests, including early plant closures, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring; and (f) costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts.

The Company has concluded Adjusted EBITDA better reflects the underlying business performance of the Company and is the most relevant measure considered in the Company's internal evaluation of the financial

performance of its segments. Additionally, given its large number of businesses and overall complexity, the Company concluded that Adjusted EBITDA is a more transparent measure that better assists investors in determining which businesses have the greatest impact on the Company's results.

Revenue and Adjusted EBITDA are presented before inter-segment eliminations, which includes the effect of intercompany transactions with other segments except for charges for certain management fees and the write-off of intercompany balances, as applicable. All intra-segment activity has been eliminated within the segment. Inter-segment activity has been eliminated within the total consolidated results.

The following tables present financial information by segment for the periods indicated (in millions):

	Three Months Ended June 30, 2025				
	Renewables SBU	Utilities SBU	Energy Infrastructure SBU	New Energy Technologies SBU	Total
Revenue	$ 644	$ 954	$ 1,306	$ —	$ 2,904

[1] Segment-level total cost of sales excluding depreciation, amortization, and accretion of AROs is considered regularly provided to the chief operating decision maker. Total cost of sales excluding depreciation, amortization, and accretion of AROs includes items such as fuel cost, electricity purchases, transmission charges, supplies, salaries and wages, consulting costs, IT costs, market fees, insurance, and lease expense.

[2] Other segment items for each reportable segment includes:

Renewables SBU — business development costs, miscellaneous gains and losses in *Other income* and *Other expense*, realized foreign currency gains and losses, earnings from equity affiliates, and adjustment for noncontrolling interest expense.

Utilities SBU — miscellaneous gains and losses in *Other income* and *Other expense*, earnings from equity affiliates, and adjustment for noncontrolling interest expense.

Energy Infrastructure SBU — business development costs, miscellaneous gains and losses in *Other income* and *Other expense*, realized foreign currency gains and losses, earnings from equity affiliates, and adjustment for noncontrolling interest expense.

New Energy Technologies SBU — earnings from equity affiliates, and miscellaneous gains and losses in *Other income* and *Other expense*.

The Company uses long-lived assets as its measure of segment assets. Long-lived assets include amounts recorded in *Property, plant and equipment, net* and right-of-use assets for operating leases recorded in *Other noncurrent assets* on the Condensed Consolidated Balance Sheets.

Long-Lived Assets	June 30, 2025	December 31, 2024

Total revenue	$ 1,262	$ 1,769	$ 3,071	$ —	$ (75)	$ 6,027

[1] Other non-regulated revenue primarily includes lease and derivative revenue not accounted for under ASC 606.

Contract Balances — The timing of revenue recognition, billings, and cash collections results in accounts receivable and contract liabilities. The contract liabilities from contracts with customers were $259 million and $237 million as of June 30, 2025 and December 31, 2024, respectively.

During the six months ended June 30, 2025 and 2024, we recognized revenue of $15 million and $70 million, respectively, that was included in the corresponding contract liability balance at the beginning of the periods.

In June 2023, the Company closed on an agreement to terminate the PPA for the Warrior Run coal-fired power plant for total consideration of $357 million, to be paid by the offtaker through the end of the previous contract term in January 2030. Under the termination agreement, the plant provided capacity through May 2024. The termination represented a contract modification under which the discounted termination payments, as well as a pre-existing contract liability, were recognized as revenue on a straight-line basis over the remaining performance obligation period for approximately $32 million per month. On February 1, 2024, the Company executed a receivable sale agreement to transfer all of its rights, title, and interest in the remaining future cash flows under this agreement. At the time of execution, the transaction was considered a sale of future revenue under U.S. GAAP, and as such, the net proceeds of $273 million were recorded as debt. Upon completion of the remaining performance obligation in May 2024, the corresponding receivable balance of $267 million, net of valuation allowance of $7 million, and the remaining debt balance of $260 million were derecognized upon accounting for the transaction as a sale of receivables.

A significant financing arrangement exists for our Mong Duong plant in Vietnam. The plant was constructed under a build, operate, and transfer contract and sold to the Vietnamese government, while we remain the operator for the duration of the 25-year PPA. The performance obligation to construct the facility was substantially completed in 2015. Contract consideration related to the construction, but not yet collected through the 25-year PPA, was reflected on the Condensed Consolidated Balance Sheet. As of December 31, 2024, Mong Duong met the held-for-sale criteria and the loan receivable balance of $963 million was classified in held-for-sale assets. As of June 30, 2025, Mong Duong no longer met the held-for-sale criteria. Of the loan receivable balance of $905 million, $105 million was classified in *Other current assets* and $800 million in *Loan receivable* on the Condensed Consolidated Balance Sheets. See Note 18—*Held-for-Sale and Dispositions* for further information.

Remaining Performance Obligations — The transaction price allocated to remaining performance obligations represents future consideration for unsatisfied (or partially unsatisfied) performance obligations at the end of the reporting period. As of June 30, 2025, the aggregate amount of transaction price allocated to remaining performance obligations was $7 million, primarily consisting of fixed consideration for the sale of renewable energy credits in long-term contracts in the U.S. We expect to recognize revenue of approximately $1 million per year between 2025 and 2029 and the remainder thereafter.

15. OTHER INCOME AND EXPENSE

Other income generally includes gains on insurance recoveries in excess of property damage, gains on asset sales and liability extinguishments, favorable judgments on contingencies, allowance for funds used during construction, gains on contingent consideration remeasurement, and other income from miscellaneous transactions. Other expense generally includes losses on asset sales and dispositions, losses on legal contingencies, losses on

remeasurement of contingent consideration, losses at commencement of sales-type leases, and losses from other miscellaneous transactions. The components are summarized as follows (in millions):

		Three Months Ended June 30,		Six Months Ended June 30,	
		2025	2024	2025	2024
Other Income	Gain on remeasurement of contingent consideration [1]	$ 23	$ 1	$ 24	$ 12
	Dividend income on investments	3	—	3	—
	Gain on sale and disposal of assets	1	1	1	3
	AFUDC (US Utilities)	—	3	1	6
	Contract termination	—	—	—	5
	Gain on commencement of sales-type leases	—	—	—	5
	Insurance proceeds	—	—	—	5
	Other income	4	16	9	20
	Total other income	$ 31	$ 21	$ 38	$ 56
Other Expense	Loss on commencement of sales-type leases [2]	$ 199	$ 72	$ 208	$ 72
	Loss on remeasurement of investment [3]	48	—	48	—
	Loss on remeasurement of contingent consideration [1]	3	1	42	6
	Loss on sale and disposal of assets	5	4	8	8
	Non-service pension and other postretirement costs	4	3	4	5
	Costs related to troubled debt restructuring [4]	—	1	—	20
	Other	36	3	37	11
	Total other expense	$ 295	$ 84	$ 347	$ 122

[1] Primarily related to certain remeasurements of contingent consideration on projects acquired at AES Clean Energy.

[2] Related to losses recognized at commencement of sales-type leases at AES Clean Energy and AES Renewable Holdings. See Note 10—*Leases* for further information.

[3] Related to the remeasurement of our existing investment in 5B, accounted for using the measurement alternative. See Note 3—*Fair Value* for further information.

[4] Related to legal expenses and other direct costs associated with the troubled debt restructuring at AES Puerto Rico. See Note 8—*Obligations* for further information.

16. ASSET IMPAIRMENT EXPENSE

The following table presents our asset impairment expense (reversals) for the periods indicated (in millions):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2025	2024	2025	2024
Mong Duong	$ (243)	$ 6	$ (226)	$ 43
AES Clean Energy Development Projects (ACED)	86	7	117	14
AES Brasil	—	25	—	25
Other	3	—	4	2
Total	$ (154)	$ 38	$ (105)	$ 84

Mong Duong — In November 2023, the Company entered into an agreement to sell its entire 51% ownership interest in Mong Duong 2, a coal-fired plant in Vietnam, and 51% equity interest in Mong Duong Finance Holdings B.V., an SPV accounted for as an equity affiliate (collectively "Mong Duong"). The carrying amount of the Mong Duong disposal group, which primarily consisted of our loan receivable from the sale of the power plant to the Vietnamese government, in subsequent periods exceeded the expected sales proceeds and as a result, the Company recognized pre-tax impairment expense of $43 million during the six months ended June 30, 2024, and $17 million during the three months ended March 31, 2025.

As of May 31, 2025, due to delays in closing the transaction and the pending expiration of the agreement in November 2025, the Company determined Mong Duong no longer met the held-for-sale criteria. As such, the Mong Duong asset group was reclassified as held and used. The loan receivable was remeasured at amortized cost and non-loan assets were each individually remeasured at the lower of (i) carrying value before being classified as held for sale, adjusted for any depreciation expense or impairment losses that would have been recognized had the assets been continuously classified as held and used, or (ii) fair value at the date of the subsequent determination that held-for-sale criteria was no longer met. As a result, the Company recorded a $243 million increase in the

carrying value of the Mong Duong asset group due to the derecognition of a $239 million valuation allowance on the loan receivable accounted for under ASC 310, which had been recognized in *Asset impairment expense* between December 31, 2023 and March 31, 2025 while Mong Duong was classified as held-for-sale, and the elimination of $4 million in net estimated costs to sell from the measurement of the asset group. See Note 18—*Held-for-Sale and Dispositions* for further information. Mong Duong is reported in the Energy Infrastructure SBU reportable segment.

AES Clean Energy Development Projects — AES Clean Energy Development has a pipeline of U.S. renewables projects that are in various stages of development and construction. In some cases, if development efforts are not successful, the Company may abandon a particular project, writing off all the intangible assets and capitalized development costs incurred. The fair value of each abandoned project with no salvage value is determined to be zero as there are no future projected cash flows. The Company recognized $117 million and $14 million of pre-tax asset impairment expense related to the write-off of projects that were determined to be no longer viable during the six months ended June 30, 2025 and 2024, respectively. Of the $86 million pre-tax asset impairment expense recorded during the three months ended June 30, 2025, $51 million was related to right sizing our development company as part of the restructuring program initiated in February 2025. See Note 21—*Restructuring* for further information. AES Clean Energy Development is reported in the Renewables SBU reportable segment.

AES Brasil — In May 2024, the Company entered into an agreement to sell its 47.3% controlling interest in AES Brasil, a 5.2 GW portfolio of renewable energy facilities. Upon meeting the held-for-sale criteria in May 2024, the Company performed an impairment analysis and determined that the carrying value of the disposal group of $1,577 million was greater than its fair value less costs to sell of $1,552 million. As a result, the Company recognized pre-tax impairment expense of $25 million. The sale of AES Brasil closed in October 2024. Prior to its sale, AES Brasil was reported in the Renewables SBU reportable segment.

17. INCOME TAXES

The Company's provision for income taxes is based on the estimated annual effective tax rate, plus discrete items. The effective tax rates for the three and six months ended June 30, 2025 were 428% and 1082%, respectively. The effective tax rate for the six months ended June 30, 2025 was not meaningful due to pretax book income being near breakeven. The effective tax rates for the three and six months ended June 30, 2024 were (30)% and (13)%, respectively. The difference between the Company's effective tax rates for the 2025 and 2024 periods and the U.S. statutory tax rate of 21% related primarily to foreign tax rate differentials, the impacts of foreign currency fluctuations at certain foreign subsidiaries, nondeductible expenses, valuation allowance, the impacts of U.S. investment tax credits ("ITCs"), and noncontrolling interest in our U.S. subsidiaries.

For the three and six months ended June 30, 2025, the Company recorded approximately $18 million and $44 million, respectively, of discrete tax expense resulting from allocations of losses to tax equity investors on renewables projects.

For the three and six months ended June 30, 2024, the Company recognized discrete tax expense of approximately $13 million and $28 million, respectively, resulting from allocations of losses to tax equity investors on renewables projects. Additionally, for the three and six months ended June 30, 2024, the Company recognized approximately $59 million of discrete tax benefit, net of valuation allowance, for tax over book investment basis differences related to the AES Brasil held-for-sale classification.

Further, for the six months ended June 30, 2024, the Company recognized discrete tax benefit of approximately $56 million related to U.S. capital losses associated with the restructuring of a foreign holding company.

18. HELD-FOR-SALE AND DISPOSITIONS

Held-for-Sale

JK Projects — In April 2025, the Company executed an agreement to contribute the Jemeiwaa Ka'I wind projects ("JK Projects") to two trusts. After closing the transaction, the Company will retain 51% ownership in the trusts, which will be accounted for as equity method investments. The transaction is expected to close in the third quarter of 2025. As a result, the JK Projects were classified as held-for-sale but did not meet the criteria to be reported as discontinued operations. Since the fair value exceeded the carrying value, no impairment was recorded. On a consolidated basis, the carrying value of the JK Projects as of June 30, 2025 was $31 million, including $19 million of intangible assets and $12 million of CWIP. The JK Projects are reported in the Renewables SBU reportable segment.

Mong Duong — In November 2023, the Company entered into an agreement to sell its entire 51% ownership interest in Mong Duong 2, a coal-fired plant in Vietnam, and 51% equity interest in Mong Duong Finance Holdings B.V., an SPV accounted for as an equity affiliate (collectively "Mong Duong"). As a result, Mong Duong was classified as held-for-sale but did not meet the criteria to be reported as discontinued operations. The sale is subject to regulatory approval and due to delays in closing the transaction and the pending expiration of the agreement in November 2025, the Company determined the sale is no longer probable and that Mong Duong no longer met the held-for-sale criteria as of May 31, 2025. As a result, the Company recorded an increase in the carrying value of the Mong Duong asset group primarily due to the derecognition of a $239 million valuation allowance on the loan receivable accounted for under ASC 310, which had been recognized in *Asset impairment expense* between December 31, 2023 and March 31, 2025 while Mong Duong was classified as held-for-sale. As of June 30, 2025, the significant assets and liabilities of Mong Duong were loan receivables of $905 million and debt of $467 million. See Note 16—*Asset Impairment Expense* for further information. Mong Duong is reported in the Energy Infrastructure SBU reportable segment.

Dispositions

Dominican Republic Renewables — In June 2025, the Company completed the sale of 50% of its interest in AES DR Renewables Holdings, S.L. and its subsidiaries (collectively “Dominican Republic Renewables”), whose main objective is the operation and administration of energy generation assets from primary energy resources. Of the sale price of $103 million, the Company received cash proceeds of $100 million in July 2025. The Company retained a 50% ownership interest in Dominican Republic Renewables after the sale and the business was deconsolidated and accounted for as an equity method investment. The transaction resulted in a pre-tax gain on sale of $70 million reported in *Gain on disposal and sale of business interests*, of which $37 million was related to remeasurement of the Company’s retained interest to its fair value. See Note 7—*Investments in and Advances to Affiliates* for further information. Dominican Republic Renewables is reported in the Renewables SBU reportable segment.

Ventanas — In January 2025, the Company completed the sale of its 100% ownership interest in Empresa Electrica Ventanas SpA and Nucleo SpA (collectively “Ventanas”), owner of a coal-fired energy generation facility in Chile, for $5 million. An immaterial loss on sale was recognized during the three months ended March 31, 2025 as a result of this transaction. The sale did not meet the criteria to be reported as discontinued operations. Prior to its sale, Ventanas was reported in the Energy Infrastructure SBU reportable segment.

Jordan — In March 2024, the Company completed the sale of approximately 26% ownership interest in the Amman East and IPP4 generation plants for a sale price of $58 million. After adjusting for dividends received since the execution of the sale and purchase agreement, the Company received a net cash payment of $45 million. The transaction resulted in a pre-tax loss on sale of $10 million, reported in *Gain on disposal and sale of business interests*. After completion of the sale, the Company retained 10% ownership interest in each of the businesses. The fair value of the retained interest was measured using the market approach and the businesses were deconsolidated and accounted for as equity method investments. Amman East and IPP4 are reported in the Energy Infrastructure SBU reportable segment.

19. ACQUISITIONS

Crossvine — On May 16, 2025, the Company completed the acquisition of 100% of the membership interests in Crossvine Solar 1, LLC, which is developing an 85 MW solar generation facility and an 85 MW battery storage project in Indiana, for total consideration of $78 million. The nature of the assets acquired is largely intangible, consisting mainly of a project development intangible valued at $64 million. The transaction was accounted for as an asset acquisition of a variable interest entity that did not meet the definition of a business. Crossvine is reported in the Utilities SBU reportable segment.

AES Clean Energy Solar Project Acquisitions — On April 4, 2025, the Company closed on the acquisition of 100% of the membership interests in Homer Solar Energy Center, LLC, Moraine Solar Energy Center, LLC, and Tracy Solar Energy Center, LLC, which hold early-stage development solar energy projects in New York, with a capacity of 303 MW. The total fair value of the consideration was $30 million, including contingent consideration of $8 million. The contingent consideration will be updated quarterly with any prospective changes in fair value recorded through earnings. The fair value of the consideration paid was attributed mainly to a project development intangible asset. The transaction was accounted for as an asset acquisition of variable interest entities that did not meet the definition of a business. AES Clean Energy is reported in the Renewables SBU reportable segment.

Madison and Birdseye — On April 5, 2024, the Company closed on the acquisition of 100% of the Madison solar project, a 63 MW construction-stage solar project in Virginia under contract with a 15-year virtual power purchase agreement (“VPPA”), and a pipeline of early-stage renewable energy development projects (“Birdseye”), to enhance its renewable energy portfolio. The transaction was accounted for as a business combination with a purchase price of $20 million paid in cash; therefore, the assets acquired and liabilities assumed at the acquisition date, primarily consisting of CWIP valued at $78 million and an off-market VPPA liability of $53 million, were recorded at their fair values. The Company recorded preliminary amounts for the purchase price allocation at the time of the acquisition, with no goodwill being recognized as a result of the acquisition in the second quarter of 2024. During the fourth quarter of 2024, the Company finalized the purchase price allocation and made measurement period adjustments to the fair value of the assets acquired, primarily due to the determination that the Madison solar project would qualify for an ITC based on studies performed subsequent to the acquisition date. Madison and Birdseye are reported in the Renewables SBU reportable segment.

Hoosier Wind — In August 2023, the Company, through its subsidiary AES Indiana, filed for IURC issuance of a Certificate of Public Convenience and Necessity approving the acquisition of 100% of the interests in Hoosier Wind Project, LLC, which is an existing 106 MW wind facility located in Benton County, Indiana. IURC approval was received on January 24, 2024, and the transaction closed on February 29, 2024. The transaction was accounted for as an asset acquisition. Of the total consideration transferred of $93 million, including transaction costs, approximately $49 million was allocated to the identifiable assets acquired on a relative fair value basis, primarily consisting of tangible wind farm assets and typical working capital items. The remaining consideration was allocated to the termination of the pre-existing PPA between AES Indiana and the Hoosier Wind Project, estimated using a discounted cash flow valuation methodology, which was deferred as a long-term regulatory asset resulting from AES Indiana regulatory approval to recover associated costs. Hoosier Wind is reported in the Utilities SBU reportable segment.

20. EARNINGS PER SHARE

Basic and diluted earnings per share are based on the weighted average number of shares of common stock and potential common stock outstanding during the period. Potential common stock, for purposes of determining diluted earnings per share, includes the effects of dilutive RSUs, stock options, and equity units. The effect of such potential common stock is computed using the treasury stock method for RSUs and stock options, and is computed using the if-converted method for equity units.

The following table is a reconciliation of the numerator and denominator of the basic and diluted earnings per share computation for income from continuing operations for the three and six months ended June 30, 2025 and 2024, where income represents the numerator and weighted average shares represent the denominator.

Three Months Ended June 30,	2025			2024		
(in millions, except per share data)	Loss	Shares	$ per Share	Income	Shares	$ per Share
BASIC EARNINGS PER SHARE

Adjustments to Redemption Value — For the three and six months ended June 30, 2025, income from continuing operations available to AES common stockholders included a $10 million adjustment related to the increase of the carrying value of redeemable stock of subsidiaries at the AGIC Companies, as discussed in Note 11 —*Redeemable Stock of Subsidiaries*.

For the three months ended June 30, 2024, income from continuing operations available to AES common stockholders included a $6 million adjustment related to the decrease of the carrying value of redeemable stock of subsidiaries at AES Clean Energy Development, as a result of a non-fair value redemption feature. This adjustment is a recovery of the amount previously reflected in the computation of earnings per share in the first quarter of 2024.

The Company has elected to administer these entire non-fair value redemption adjustments consistent with the treatment of dividends in the earnings per share calculation. While the adjustments impacted net income available to AES common stockholders and earnings per share, they did not impact *Net income* in the Condensed Consolidated Statement of Operations.

Anti-Dilutive Securities — The calculation of diluted earnings per share excluded 6 million outstanding stock awards for the three and six months ended June 30, 2025 because their impact would be anti-dilutive given the loss from continuing operations. Had the Company generated income, potential shares of common stock of 2 million related to the stock awards would have been included in weighted-average shares outstanding for both the three and six months ended June 30, 2025. The calculation of diluted earnings per share excluded 2 million outstanding stock awards for the both the three and six months ended June 30, 2024, which would be anti-dilutive. These stock awards could potentially dilute basic earnings per share in the future.

AES Global Insurance — As described in Note 11—*Redeemable Stock of Subsidiaries*, on April 30, 2025, the Company sold noncontrolling interests in the AGIC Companies. It is required that either (i) the AGIC Companies achieve a minimum distribution target to the Class B Member ranging from $146 million to $199 million over pre-defined periods of time ranging from three to five years (the “distribution period”) or (ii) AGIC achieves an average cash basis quarterly net income threshold for the period comprising the relevant distribution period and the four quarters immediately prior to the start of such distribution period. AES can make disproportionate distributions to the Class B Member to meet the minimum distribution target for the distribution period. If, at the end of a distribution period, (1) such cash basis net income threshold is not met and (2) the minimum distribution target for such distribution period is not achieved, AES would be required to address the shortfall by issuing AES common stock (“Shortfall Stock”) to AGIC for the net difference between actual and targeted distributions. If AES is required to issue Shortfall Stock, the amount will be based upon the number of shares multiplied by the then current share price to equal the net difference between actual and targeted distributions. Distributions of cash from the sale of Shortfall Stock are subject to regulatory approval and at the discretion of AES.

As part of the quarterly diluted earnings per share calculation, AES evaluates whether (1) average cash basis quarterly net income in a given quarter exceeds the threshold or (2) aggregate distributions made to the investor for the related distribution period exceed such target distribution amount. If either condition is met, no Shortfall Stock will be included in the diluted earnings per share calculation. As of June 30, 2025, the average cash basis quarterly net income condition was met and, therefore, no shares are included in diluted EPS for the three and six months then ended.

Equity Units — As described in Note 12—*Equity*, the Company issued 10,430,500 Equity Units in March 2021 with a total notional value of $1,043 million. Each Equity Unit had a stated amount of $100 and was initially issued as a Corporate Unit, consisting of a 2024 Purchase Contract and a 10% undivided beneficial ownership interest in one share of Series A Preferred Stock. The conversion rate was initially 31.5428 shares of common stock per one share of Series A Preferred Stock, which was equivalent to an initial conversion price of approximately $31.70 per share of common stock. The Series A Preferred Stock and the 2024 Purchase Contracts were accounted for as one unit of account. In calculating diluted EPS, the Company has applied the if-converted method to determine the impact of the forward purchase feature and considered if there are incremental shares that should be included related to the Series A Preferred conversion value. On February 15, 2024, the Series A Preferred Stock was tendered to satisfy the 2024 Purchase Contract's settlement price and the Corporate Units were converted into shares of the Company's common stock at a settlement rate of 3.8859, equivalent to a reference price of $25.73. The Series A Preferred Stock was canceled upon conversion.

21. RESTRUCTURING

In February 2025, the Company approved and initiated a restructuring program to streamline our organization given the significantly lower number of countries that we operate in. Additionally, we are right sizing our development company to focus on executing on the backlog and pursuing larger but fewer projects to better serve our core customers. Pre-tax restructuring charges related to employee severance costs were $4 million and $52 million for the three and six months ended June 30, 2025. Of the $52 million recognized for the six months ended June 30, 2025, $43 million was classified within *Cost of sales* and $9 million was classified as *General and administrative expenses* on the Condensed Consolidated Statements of Operations. For the six months ended June 30, 2025, $19 million was recognized at the Energy Infrastructure SBU, $17 million at the Renewables SBU, $5 million at the Utilities SBU, $1 million at the New Energy Technologies SBU, and $10 million at Corporate and Other.

The Company made cash payments of $36 million during the six months ended June 30, 2025, including $5 million of termination benefits previously accrued for in the projected pension benefit obligation. As of June 30, 2025, $22 million of pre-tax restructuring charges were reflected within *Accrued and other liabilities* on the Condensed Consolidated Balance Sheets.

In the second quarter of 2025, AES Clean Energy Development also recognized $51 million of pre-tax asset impairment expense as a result of the restructuring program. See Note 16—*Asset Impairment Expense* for further information. AES Clean Energy Development is reported in the Renewables SBU reportable segment.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The condensed consolidated financial statements included in Item 1.—*Financial Statements* of this Form 10-Q and the discussions contained herein should be read in conjunction with our 2024 Form 10-K.

Forward-Looking Information

The following discussion may contain forward-looking statements regarding us, our business, prospects and our results of operations, that are subject to certain risks and uncertainties posed by many factors and events that could cause our actual business, prospects and results of operations to differ materially from those that may be anticipated by such forward-looking statements. These statements include, but are not limited to, statements regarding management's intents, beliefs, and current expectations and typically contain, but are not limited to, the terms "anticipate," "potential," "expect," "forecast," "target," "will," "would," "intend," "believe," "project," "estimate," "plan," and similar words. Forward-looking statements are not intended to be a guarantee of future results, but instead constitute current expectations based on reasonable assumptions. Factors that could cause or contribute to such differences include, but are not limited to, those described in Item 1A.—*Risk Factors* of this Form 10-Q, Item 1A.—*Risk Factors* and Item 7.—*Management's Discussion and Analysis of Financial Condition and Results of Operations* of our 2024 Form 10-K and subsequent filings with the SEC.

Readers are cautioned not to place undue reliance on these forward-looking statements which speak only as of the date of this report. We undertake no obligation to revise any forward-looking statements in order to reflect events or circumstances that may subsequently arise. If we do update one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements. Readers are urged to carefully review and consider the various disclosures made by us in this report and in our other reports filed with the SEC that advise of the risks and factors that may affect our business.

Overview of Our Business

We are a diversified power generation and utility company organized into the following four SBUs, mainly organized by technology: **Renewables** (solar, wind, energy storage, and hydro), **Utilities** (AES Indiana, AES Ohio, and AES El Salvador), **Energy Infrastructure** (natural gas, LNG, coal, pet coke, diesel, and oil), and **New Energy Technologies** (investments in Fluence, Uplight, Maximo, and other initiatives). Prior to the first quarter of 2025, our businesses in Chile (which have a mix of generation sources, including renewables, that were pooled to service our existing PPAs) were reported in the Energy Infrastructure SBU. After the sale or disconnection of a significant portion of AES Andes' coal plants and the expiration of its coal-indexed contracts with regulated customers at the end of 2024, the results of our businesses in Chile, excluding the two remaining coal plants, are now reported as part of the Renewables SBU. The results of the two remaining coal plants in Chile, Angamos and Cochrane, remain within the Energy Infrastructure SBU. For additional information regarding our business, see Item 1.—*Business* of our 2024 Form 10-K.

We have two lines of business: generation and utilities. Our Renewables, Utilities, and Energy Infrastructure SBUs participate in our first business line, generation, in which we own and/or operate power plants to generate and sell power to customers, such as utilities, industrial users, and other intermediaries. Our Utilities SBU participates in our second business line, utilities, in which we own and/or operate utilities to generate or purchase, distribute, transmit, and sell electricity to end-user customers in the residential, commercial, industrial, and governmental sectors within a defined service area. In certain circumstances, our utilities also generate and sell electricity on the wholesale market. Our New Energy Technologies SBU includes investments in new and innovative technologies to support leading-edge greener energy solutions.

Executive Summary

Compared with last year, second quarter net income decreased $303 million, from $153 million to a net loss of $150 million. This decrease is primarily due to higher income tax expense, day-one losses on the commencement of sales type leases at AES Clean Energy Development, and lower earnings from the Energy Infrastructure SBU due to higher prior year revenues from the monetization of the Warrior Run coal plant PPA and prior year unrealized derivative gains; partially offset by the derecognition of a valuation allowance on the loan receivable upon reclassifying Mong Duong from held-for-sale to held and used, and higher contributions from renewables projects placed in service in the current year.

Adjusted EBITDA, a non-GAAP measure, increased $23 million, from $658 million to $681 million, driven by higher contributions from the Renewables SBU primarily due to higher revenues from renewables projects placed in service and prior year outages in Colombia. This was partially offset by the sale of AES Brasil, higher prior year revenues from the monetization of the Warrior Run coal plant PPA, and the impact of the selldown of AES Ohio in the Utilities SBU.

Adjusted EBITDA with Tax Attributes, a non-GAAP measure, increased $208 million, from $849 million to $1,057 million primarily due to higher realized tax attributes driven by more projects placed in service and higher income from tax credit transfers, as well as the drivers above.

Compared with last year, second quarter diluted earnings per share from continuing operations decreased $0.54, from $0.39 to a diluted loss of $0.15. This decrease is mainly driven by higher income tax expense, day-one losses on the commencement of sales-type leases at AES Clean Energy Development, and lower earnings at the Energy Infrastructure SBU primarily due to higher prior year revenues from the monetization of the Warrior Run coal plant PPA; partially offset by the derecognition of a valuation allowance on the loan receivable upon reclassifying Mong Duong from held-for-sale to held and used, and higher contributions from renewables projects placed in service in the current year.

Adjusted EPS, a non-GAAP measure, increased $0.13 from $0.38 to $0.51, mainly driven by a lower adjusted tax rate and higher contributions due to new renewables projects placed in service, partially offset by higher prior year revenues from the monetization of the Warrior Run coal plant PPA.

Compared with last year, net income for the six months ended June 30, 2025 decreased $654 million from $431 million to a net loss of $223 million. This decrease is primarily driven by lower earnings from the Energy Infrastructure SBU due to higher prior year revenues from the monetization of the Warrior Run coal plant PPA and unrealized derivative gains, higher income tax expense, higher day-one losses on the commencement of sales type leases at AES Clean Energy Development, and foreign currency translation gains in the prior year; partially offset by the derecognition of a valuation allowance on the loan receivable upon reclassifying Mong Duong from held-for-sale to held and used.

Adjusted EBITDA, a non-GAAP measure, decreased $26 million, from $1,298 million to $1,272 million, for the six months ended June 30, 2025, mainly driven by higher prior year revenues from the monetization of the Warrior Run coal plant PPA and the sale of AES Brasil; partially offset by higher revenues from new projects placed in service at the Renewables SBU, higher retail margin under the 2024 Base Rate Order at AES Indiana, and better hydrology.

Adjusted EBITDA with Tax Attributes, a non-GAAP measure, increased $117 million, from $1,717 million to $1,834 million, for the six months ended June 30, 2025, due to higher realized tax attributes driven by more projects placed in service and higher income from tax credit transfers, partially offset by the drivers above.

Compared with last year, diluted earnings per share from continuing operations for the six months ended June 30, 2025 decreased $1.07, from $0.99 to a diluted loss of $0.08. This decrease is mainly driven by lower earnings at the Energy Infrastructure SBU primarily due to higher prior year revenues from the monetization of the Warrior Run coal plant PPA, higher income tax expense, day-one losses on the commencement of sales-type leases at AES Clean Energy Development, foreign currency losses compared to prior year gains, higher net equity in losses of affiliates primarily related to higher prior year contributions from renewables projects that came online at sPower, higher interest expense, and lower interest income, partially offset by the derecognition of a valuation allowance on the loan receivable upon reclassifying Mong Duong from held-for-sale to held and used.

Adjusted EPS, a non-GAAP measure, decreased $0.11 from $0.89 to $0.78, for the six months ended June 30, 2025, mainly driven by lower realized tax attributes at the Renewables SBU due to timing of tax attribute recognition, and lower contributions at the Energy Infrastructure SBU primarily due to higher prior year revenues from the monetization of the Warrior Run coal plant PPA, partially offset by a lower adjusted tax rate and higher contributions at the Utilities SBU.

Accelerating the future of energy, together.

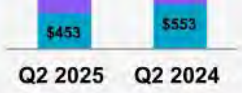
Operating Margin (in millions)



Net Income (in millions)

Adjusted EBITDA [1] (in millions)

Operating Cash Flow (in millions)

Key events in 2025

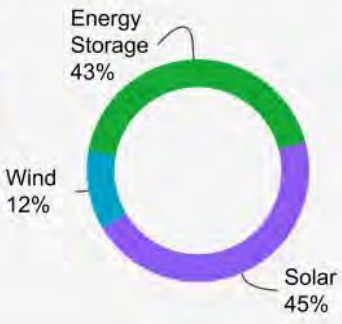
- Completed the construction of 1,862 MW of energy storage and solar
- Signed or awarded long-term PPAs for 2,008 MW of solar,wind and energy storage
- Received final regulatory approval for the 170 MW Crossvine solar-plus-storage project at AES Indiana
- With the sale of a minority stake in our global insurance company, AGIC, for $450 million, achieved full year 2025 asset sale proceeds target of $400 to $500 million
- To fund the substantial growth at AES Ohio, closed on the sale of an approximate 30% indirect equity interest to a wholly-owned subsidiary of CDPQ
- AES Indiana filed a petition for regulatory rate review with the IURC

Strategic outlook

- Backlog of 12.0 GW of projects under signed long-term PPAs
- On track to add 3.2 GW of new projects to operating portfolio in 2025
- On track to sign 14-17 GW of new renewables under new long-term PPAs in 2023-2025

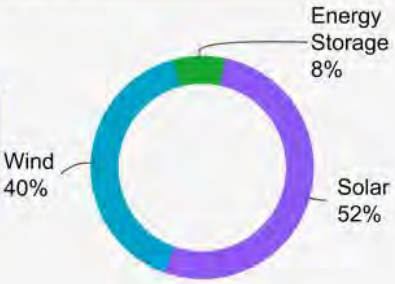
Under construction

5,225 MW



Contracted renewable backlog not yet under construction

6,816 MW



[1] Non-GAAP measure. See Item 2.—*Management's Discussion and Analysis of Financial Condition and Results of Operations—SBU Performance Analysis—Non-GAAP Measures* for reconciliation and definition.

[2] GWh sold in 2024.

Overview of Strategic Performance

AES is leading the industry's transition to clean energy by investing in renewables, utilities, and technology businesses.

- Our PPA backlog, which consists of projects with signed contracts, but which are not yet operational, is 12 GW, including 5.2 GW under construction. Since our first quarter 2025 earnings call in May 2025, we:
  - Completed the construction of 1.2 GW of energy storage and solar, for a total of 1.9 GW year-to-date, and we are on track to add a total of 3.2 GW to our operating portfolio by year-end 2025; and
  - Signed or were awarded new long-term PPAs for 1.6 GW, for a total of 2 GW year-to-date.
- In June 2025, AES Indiana filed a petition for regulatory rate review with the Indiana Utility Regulatory Commission (IURC).
  - This is AES Indiana's first rate case using a forward-looking test year, which will enable a more efficient investment program to best serve customers with cost-effective and reliable electricity service.

Components of Revenue, Cost of Sales, and Operating Margin — Revenue includes revenue earned from the sale of energy from our utilities and the production and sale of energy from our generation plants, which are classified as regulated and non-regulated, respectively, on the Condensed Consolidated Statements of Operations. Revenue also includes the gains or losses on derivatives associated with the sale of electricity.

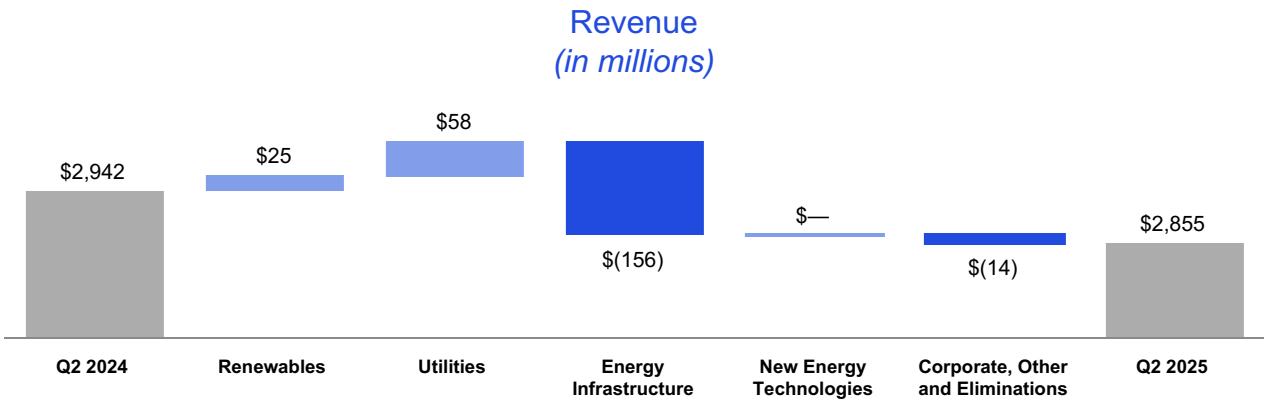
Cost of sales includes costs incurred directly by the businesses in the ordinary course of business. Examples

include electricity and fuel purchases, operations and maintenance costs, depreciation and amortization expenses, bad debt expense and recoveries, and general administrative and support costs (including employee-related costs directly associated with the operations of the business). Cost of sales also includes the gains or losses on derivatives associated with the purchase of electricity or fuel.

Operating margin is defined as revenue less cost of sales.

Consolidated Revenue and Operating Margin

Three Months Ended June 30, 2025



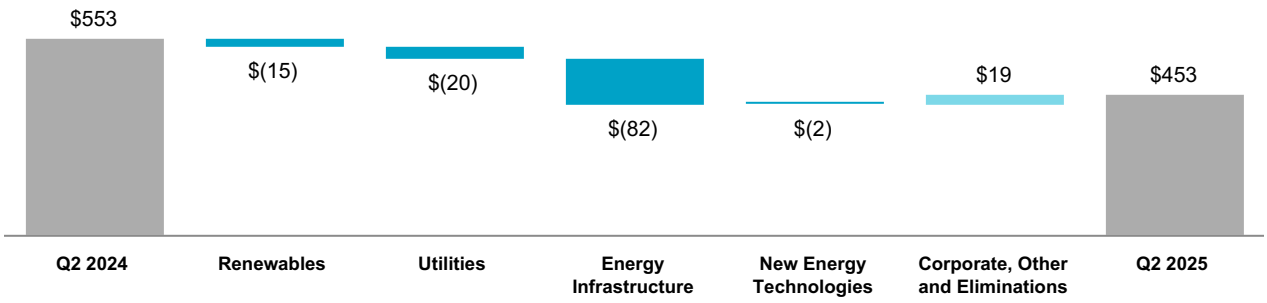
Consolidated Revenue — Revenue decreased $87 million, or 3%, for the three months ended June 30, 2025, compared to the three months ended June 30, 2024, driven by:

- $156 million at Energy Infrastructure driven by $232 million of prior year revenue related to the AES Andes portfolio, which is reported in the Renewables SBU beginning in 2025 following the sale and expiration of certain coal-related assets and contracts; $64 million of prior year revenues from the monetization of the Warrior Run coal plant PPA, and $40 million due to prior year unrealized and realized derivative gains; partially offset by $65 million higher fuel prices and transportation costs passed through to the offtaker, $60 million higher CO_2 purchases passed through due to higher production, $23 million of higher LNG sales and terminal fees, and $13 million due to higher availability in 2025; and
- $14 million at Corporate, Other and Eliminations mainly driven by higher eliminations of inter-segment revenue.

This unfavorable impact was partially offset by increases of:

- $58 million at Utilities mainly driven by an $87 million increase in transmission, distribution, and rider revenues mainly due to higher rates; partially offset by an $11 million decrease due to lower Fuel Adjustment Charge rider revenue and a $9 million decrease due to lower retail demand; and
- $25 million at Renewables mainly driven by a $216 million increase due to the results of AES Andes moving to Renewables in 2025 as described above, net of a current year decrease in regulated contract sales, and $72 million due to new projects in service; partially offset by $169 million impact from the sale of AES Brasil, a $43 million negative impact related to changes in mark-to-market of energy derivatives, and $39 million net lower spot sales and prices, mainly at Colombia.

Operating Margin
(in millions)



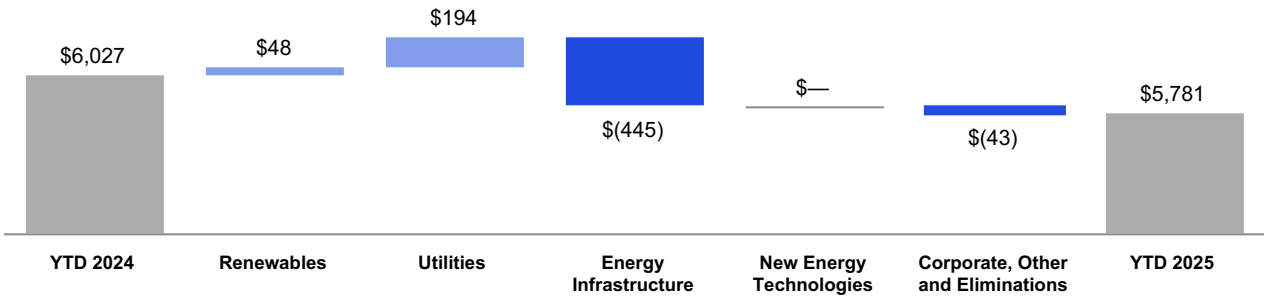
Consolidated Operating Margin — Operating margin decreased $100 million, or 18%, for the three months ended June 30, 2025, compared to the three months ended June 30, 2024, driven by:

- $82 million at Energy Infrastructure mainly driven by $64 million higher prior year revenues from the monetization of the Warrior Run coal plant PPA, $43 million due to prior year unrealized derivative gains as part of our commercial hedging strategy, and $22 million of lower generation due to dispatch; partially offset by an increase of $39 million driven by higher availability in 2025 due to lower maintenance;
- $20 million at Utilities primarily driven by a $13 million increase in depreciation expense from additional assets placed in service, a $9 million decrease due to the impact of planned outages, and $8 million resulting from lower demand due to the impact of weather; partially offset by an increase of $13 million due to higher retail rates as a result of the 2024 Base Rate Order; and
- $15 million at Renewables mainly driven by a $52 million impact from the sale of AES Brasil and a $43 million negative impact related to changes in mark-to-market of energy derivatives; partially offset by a $32 million positive impact from new businesses, a $25 million increase related to higher generation in Colombia as a result of increased availability and lower spot prices on energy purchases, and $17 million impact of lower fixed costs, including lower people costs after restructuring.

These unfavorable impacts were partially offset by an increase of $19 million at Corporate, Other and Eliminations mainly driven by higher premiums earned by AES' self-insurance company and higher charge-outs of IT and other costs to the businesses.

Six Months Ended June 30, 2025

Revenue
(in millions)

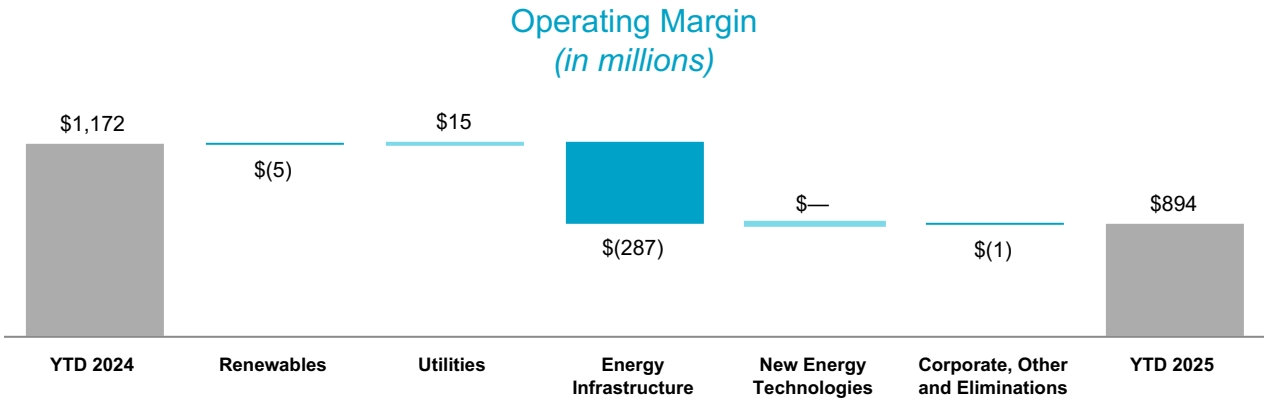


Consolidated Revenue — Revenue decreased $246 million, or 4%, for the six months ended June 30, 2025, compared to the six months ended June 30, 2024, driven by:

- $445 million at Energy Infrastructure primarily driven by $471 million of prior year revenue related to the AES Andes portfolio, which is reported in the Renewables SBU beginning in 2025 following the sale and expiration of certain coal-related assets and contracts; $171 million of prior year revenues from the monetization of the Warrior Run coal plant PPA, and $126 million due to prior year unrealized and realized derivative gains; partially offset by $142 million higher CO_2 purchases passed through due to higher production, $96 million higher fuel prices and transportation costs passed through to the offtaker, $37 million of higher LNG sales and terminal fees, and $35 million impact of foreign currency, primarily appreciation of the Mexican peso; and
- $43 million at Corporate, Other and Eliminations mainly driven by higher eliminations of inter-segment revenue.

These unfavorable impacts were partially offset by increases of:

- $194 million at Utilities mainly driven by a $205 million increase in transmission, distribution, rider, and wholesale revenues mainly due to higher rates, and $20 million due to higher net retail demand mainly driven by favorable weather; partially offset by $32 million of lower Fuel Adjustment Charge rider revenue; and
- $48 million at Renewables mainly driven by $419 million increase due to the results of AES Andes moving to Renewables in 2025 as described above, net of a current year decrease in regulated contract sales, and $122 million due to new projects in service; partially offset by $339 million impact from the sale of AES Brasil, $89 million due to net lower spot sales and prices, mainly at Colombia, and a $44 million negative impact related to changes in mark-to-market of energy derivatives.



Consolidated Operating Margin — Operating margin decreased $278 million, or 24%, for the six months ended June 30, 2025, compared to the six months ended June 30, 2024, driven by:

- $287 million at Energy Infrastructure mainly driven by $160 million higher prior year revenues from the monetization of the Warrior Run coal plant PPA, $114 million due to prior year unrealized derivative gains as part of our commercial hedging strategy, $22 million of prior year operating margin related to the AES Andes portfolio, which is reported in the Renewables SBU beginning in 2025 following the sale and expiration of certain coal-related assets and contracts, $19 million of one-time costs due to restructuring, and $17 million due to the prior year selldown of Amman East and IPP4 in Jordan; partially offset by $54 million driven by higher availability in 2025 due to lower maintenance; and
- $5 million at Renewables mainly driven by an $84 million impact from the sale of AES Brasil, a $43 million negative impact related to changes in mark-to-market of energy derivatives, a $19 million increase in fixed costs primarily related to an accelerated growth plan, and $17 million of one-time costs due to restructuring. These negative impacts were partially offset by a $67 million positive impact from new businesses, $36 million increase related to higher generation in Panama as a result of better hydrological conditions during the first quarter of 2025, $25 million increase in Colombia due to increased availability and lower spot prices on energy purchases, and $22 million impact of the results of AES Andes moving to Renewables in 2025, as described above.

These unfavorable impacts were partially offset by an increase of $15 million at Utilities mainly driven by $83 million due to higher retail rates as a result of the 2024 Base Rate Order, higher transmission and rider revenues, and higher demand due to the impact of weather; partially offset by a $22 million increase in depreciation expense from additional assets placed in service, a $17 million impact of planned outages, $15 million higher credit losses,

and a $15 million increase in fixed cost driven by higher property taxes and higher software costs.

See Item 2.—*Management's Discussion and Analysis of Financial Condition and Results of Operations—SBU Performance Analysis* of this Form 10-Q for additional discussion and analysis of operating results for each SBU.

Consolidated Results of Operations — Other

General and administrative expenses

General and administrative expenses decreased $17 million, or 26%, to $49 million for the three months ended June 30, 2025, compared to $66 million for the three months ended June 30, 2024, primarily reflecting a $21 million decrease in business development costs driven by the Company's restructuring program, partially offset by $5 million in higher professional fees.

General and administrative expenses decreased $15 million, or 11%, to $126 million for the six months ended June 30, 2025, compared to $141 million for the six months ended June 30, 2024, primarily reflecting a $22 million decrease in business development costs driven by the company's restructuring program, partially offset by $9 million of one-time restructuring-related charges.

Interest expense

Interest expense decreased $37 million, or 10%, to $352 million for the three months ended June 30, 2025, compared to $389 million for the three months ended June 30, 2024. This decrease is primarily due to a $63 million impact from the sale of AES Brasil in October 2024; partially offset by lower capitalized interest at the Renewables SBU due to fewer projects under construction, and a higher weighted average interest rate and debt balance at the Parent Company.

Interest expense decreased $52 million, or 7%, to $694 million for the six months ended June 30, 2025, compared to $746 million for the six months ended June 30, 2024. This decrease is primarily due to a $124 million impact from the sale of AES Brasil in October 2024 and lower debt balances at the Energy Infrastructure SBU; partially offset by lower capitalized interest at the Renewables SBU due to fewer projects under construction, and a higher weighted average interest rate and debt balance at the Parent Company.

Interest income

Interest income decreased $18 million, or 20%, to $70 million for the three months ended June 30, 2025, compared to $88 million for the three months ended June 30, 2024, primarily due to a $15 million impact from the sale of AES Brasil in October 2024.

Interest income decreased $54 million, or 28%, to $139 million for the six months ended June 30, 2025, compared to $193 million for the six months ended June 30, 2024, primarily due to a $28 million impact from the sale of AES Brasil in October 2024, and an $18 million decrease at Argentina due to lower short-term investments at lower rates.

Loss on extinguishment of debt

Loss on extinguishment of debt decreased $4 million, or 44%, to $5 million for the three months ended June 30, 2025, compared to $9 million for the three months ended June 30, 2024, primarily due to a prior year loss of $8 million due to a prepayment at AES Andes, partially offset by a $5 million current year loss related to a revolver amendment at AES Clean Energy.

Loss on extinguishment of debt increased $3 million, or 30%, to $13 million for the six months ended June 30, 2025, compared to $10 million for the six months ended June 30, 2024 primarily driven by a $5 million loss due to prepayment of senior notes at Mercury Chile and a $5 million loss related to a revolver amendment at AES Clean Energy, offset by an $8 million prior year loss due to prepayment at AES Andes.

See Note 8—*Obligations* included in Item 1.—*Financial Statements* of this Form 10-Q for further information.

Other income and expense

Other income increased $10 million, or 48%, to $31 million for the three months ended June 30, 2025, compared to $21 million for the three months ended June 30, 2024, mainly due to a $22 million increase in gains on remeasurement of contingent consideration at AES Clean Energy.

Other income decreased $18 million, or 32%, to $38 million for the six months ended June 30, 2025, compared to $56 million for the six months ended June 30, 2024, mainly due to the prior year impacts of a $5 million gain on

commencement of a sales-type lease on land, $5 million in insurance proceeds primarily related to property damage at AES Andes, and a $5 million gain on contract termination, as well as a $5 million decrease in AFUDC in the current year; partially offset by a $12 million increase in gains on remeasurement of contingent consideration at AES Clean Energy.

Other expense increased $211 million to $295 million for the three months ended June 30, 2025, compared to $84 million for the three months ended June 30, 2024, mainly due to a $127 million increase in losses on commencement of sales-type leases at AES Clean Energy and AES Renewable Holdings, and a $48 million loss on remeasurement of our investment in 5B, accounted for using the measurement alternative.

Other expense increased $225 million to $347 million for the six months ended June 30, 2025, compared to $122 million for the six months ended June 30, 2024, mainly due to an increase of $136 million in losses on commencement of sales-type leases at AES Clean Energy and AES Renewable Holdings, a $48 million loss on remeasurement of our investment in 5B, accounted for using the measurement alternative, and a $36 million increase in losses on remeasurement of contingent consideration primarily on projects acquired at AES Clean Energy; partially offset by a $20 million loss recognized in the prior year related to legal expenses and other direct costs associated with the troubled debt restructuring at AES Puerto Rico.

See Note 15—*Other Income and Expense* included in Item 1.—*Financial Statements* of this Form 10-Q for further information.

Gain on disposal and sale of business interests

Gain on disposal and sale of business interests increased $69 million to $70 million for the three months ended June 30, 2025 compared to $1 million for the three months ended June 30, 2024. This was primarily due to a $70 million gain on the selldown of Dominican Republic Renewables, which is now accounted for as an equity method investment.

Gain on disposal and sale of business interests increased $25 million, or 57%, to $69 million for the six months ended June 30, 2025 compared to $44 million for six months ended June 30, 2024. This was primarily due to a $70 million gain on the selldown of Dominican Republic Renewables and a $10 million loss in the prior year on the selldown of Amman East and IPP4 in Jordan, which are now accounted for as equity method investments. This was partially offset by a $52 million gain in the prior year on dilution of AES' ownership interest in Uplight as a result of the AutoGrid acquisition.

See Note 7—*Investments in and Advances to Affiliates* and Note 18—*Held-for-Sale and Dispositions* for further information.

Asset impairment reversals (expense)

Asset impairment expense decreased $192 million to a $154 million asset impairment reversal for the three months ended June 30, 2025, compared to a $38 million expense for the three months ended June 30, 2024. This decrease was primarily the result of a $243 million increase in the carrying value of the Mong Duong asset group due to the derecognition of a valuation allowance on the loan receivable accounted for under ASC 310 and the elimination of net estimated costs to sell upon reclassifying Mong Duong from held-for-sale to held and used; and prior year impairment expense of $25 million at AES Brasil associated with the held-for-sale classification. This was partially offset by higher impairment expense of $79 million at AES Clean Energy Development due to the write-off of project development intangibles and capitalized development costs for projects that were determined to be no longer viable, including $51 million in the current quarter due to the right sizing of our development company as part of the restructuring program initiated in February 2025.

Asset impairment expense decreased $189 million to a $105 million asset impairment reversal for the six months ended June 30, 2025, compared to an $84 million expense for the six months ended June 30, 2024. This decrease was primarily the result of a $243 million increase in the carrying value of the Mong Duong asset group due to the derecognition of a valuation allowance on the loan receivable accounted for under ASC 310 and the elimination of net estimated costs to sell upon reclassifying Mong Duong from held-for-sale to held and used; and lower impairment expense of $26 million and $25 million at Mong Duong and AES Brasil, respectively, associated with the held-for-sale classification. This was partially offset by higher impairment expense of $103 million at AES Clean Energy Development due to the write-off of project development intangibles and capitalized development costs for projects that were determined to be no longer viable, including $51 million in the current year due to the right sizing of our development company as part of the restructuring program initiated in February 2025.

See Note 16—*Asset Impairment Expense* and Note 21—*Restructuring* included in Item 1.—*Financial Statements* of this Form 10-Q for further information.

Foreign currency transaction gains (losses)

(in millions)	Three Months Ended June 30, 2025	Three Months Ended June 30, 2024	Six Months Ended June 30, 2025	Six Months Ended June 30, 2024
Chile	$ (8)	$ 2	$ (19)	$ (4)
Corporate	(10)	32	(12)	34
Argentina	(10)	1	(10)	—
Other	—	3	3	—
Total [1]	$ (28)	$ 38	$ (38)	$ 30

[1] Includes losses of $12 million and gains of $90 million on foreign currency derivative contracts for the three months ended June 30, 2025, and 2024, respectively, and losses of $14 million and gains of $109 million on foreign currency derivative contracts for the six months ended June 30, 2025,and 2024, respectively.

The Company recognized net foreign currency transaction losses of $28 million and $38 million for the three and six months ended June 30, 2025, respectively, primarily driven by unrealized losses due to the appreciation of the Chilean peso and unrealized losses on forwards and options in Euros.

The Company recognized net foreign currency transaction gains of $38 million for the three months ended June 30, 2024, primarily driven by unrealized gains on forwards and options denominated in the Brazilian real.

The Company recognized net foreign currency transaction gains of $30 million for the six months ended June 30, 2024, primarily driven by unrealized gains on forwards and options denominated in the Brazilian real; partially offset by realized losses on receivables denominated in the Chilean peso.

Other non-operating expense

Other non-operating expense was $10 million for the three and six months ended June 30, 2025 due to an other-than-temporary impairment of convertible notes at 5B as a result of an observable price change from a transaction between 5B and a third-party. There was no other non-operating expense for the three and six months ended June 30, 2024.

Income tax benefit (expense)

Income tax expense was $167 million for the three months ended June 30, 2025, compared to income tax benefit of $35 million for the three months ended June 30, 2024. The Company's effective tax rates were 428% and (30)% for the three months ended June 30, 2025 and 2024, respectively. This net change in the effective tax rate was largely due to the benefits associated with U.S. investment tax credits ("ITCs"), the impact of the reclassification of Mong Duong from held-for-sale to held and used in the current year, and by tax expense resulting from allocations of losses to tax equity investors on renewables projects. Further, the prior year effective tax rate was impacted by the AES Brasil held-for-sale reclassification.

Income tax expense was $184 million for the six months ended June 30, 2025, compared to income tax benefit of $51 million for the six months ended June 30, 2024. The Company's effective tax rates were 1082% and (13)% for the six months ended June 30, 2025 and 2024, respectively. The 2025 effective tax rate was not meaningful due to pretax book income being near breakeven. This net change in the effective tax rate was largely due to the benefits associated with ITCs, the impact of the reclassification of Mong Duong from held-for-sale to held and used, and tax expense resulting from allocations of losses to tax equity investors on renewables projects. Additionally, the 2024 effective tax rate was impacted by the restructuring of a foreign holding company, as well as the AES Brasil held-for-sale reclassification.

Our effective tax rate reflects the tax effect of significant operations outside the U.S., which are generally taxed at rates different than the U.S. statutory rate of 21%. Furthermore, our foreign earnings may be subjected to incremental U.S. taxation under the GILTI rules and incremental foreign taxation under Pillar 2. A future proportionate change in the composition of income before income taxes from foreign and domestic tax jurisdictions could impact our periodic effective tax rate.

Net equity in earnings (losses) of affiliates

Net equity in losses of affiliates increased $25 million to $22 million for the three months ended June 30, 2025, compared to gains of $3 million for the three months ended June 30, 2024. This increase was primarily driven by lower earnings from sPower of $20 million, mainly due to lower contributions from renewables projects that came online; and a $7 million decrease in earnings from Mesa La Paz driven by higher income tax expense at the affiliate.

Net equity in losses of affiliates increased $44 million to $56 million for the six months ended June 30, 2025,

compared to $12 million for the six months ended June 30, 2024. This increase was primarily driven by lower earnings from sPower of $33 million, mainly due to lower contributions from renewables projects that came online; and an $11 million decrease in earnings from Fluence driven by a decrease in the volume of BESS products fulfilled due to timing of customer schedules.

See Note 7—*Investments in and Advances to Affiliates* included in Item 1.—*Financial Statements* of this Form 10-Q for further information.

Net loss attributable to noncontrolling interests and redeemable stock of subsidiaries

Net loss attributable to noncontrolling interests and redeemable stock of subsidiaries decreased $68 million to $55 million for the three months ended June 30, 2025, compared to $123 million for the three months ended June 30, 2024. This decrease was primarily due to $123 million at Mong Duong mostly driven by the derecognition of a valuation allowance on a loan receivable accounted for under ASC 310 upon reclassifying Mong Duong from held-for-sale to held and used, $26 million related to the partial sale of Dominican Republic Renewables, and $15 million related to the sale of AES Brasil; partially offset by $50 million due to day-one losses on the commencement of sales-type leases at AES Clean Energy Development and higher allocation of losses to tax equity investors on projects placed in service at AES Renewable Holdings of $49 million.

Net loss attributable to noncontrolling interests and redeemable stock of subsidiaries decreased $103 million to $174 million for the six months ended June 30, 2025, compared to $277 million for the six months ended June 30, 2024. This decrease was primarily due to $133 million at Mong Duong mostly driven by the derecognition of a valuation allowance on the loan receivable accounted for under ASC 310 upon reclassifying Mong Duong from held-for-sale to held and used, $28 million related to the partial sale of Dominican Republic Renewables, $28 million related to the sale of AES Brasil, and a decrease of $16 million at AES Clean Energy and AES Renewable Holdings primarily attributable to lower allocation of losses to tax equity investors on projects placed in service; partially offset by higher allocation of losses to tax equity investors in the Pike County BESS project of $51 million, and $50 million due to day-one losses on the commencement of sales-type leases at AES Clean Energy Development.

Net income (loss) attributable to The AES Corporation

Net income attributable to The AES Corporation decreased $371 million to a $95 million loss for the three months ended June 30, 2025, compared to income of $276 million for the three months ended June 30, 2024. This decrease was primarily due to:

- Higher income tax expense of $216 million due to a higher effective tax rate;
- Day-one losses on the commencement of sales-type leases at AES Clean Energy Development of $149 million;
- Lower margins from the Energy Infrastructure SBU of $81 million primarily due to higher prior year revenues from the monetization of the Warrior Run coal plant PPA and prior year unrealized gains on power swaps;
- Higher impairments at AES Clean Energy of $59 million;
- Foreign currency translation losses of $27 million compared to prior year gains of $36 million primarily related to the depreciation of the Chilean peso and unrealized losses on forwards and options in Euros;
- Higher net equity in losses of affiliates of $25 million primarily related to lower contributions from renewables projects that came online at sPower; and
- Lower margins from the Utilities SBU of $23 million primarily related to higher depreciation due to additional assets placed in service and outages in the current year.

These decreases were partially offset by:

- Derecognition of a valuation allowance on the loan receivable accounted for under ASC 310 and the elimination of net estimated costs to sell from the measurement of the asset group upon reclassifying Mong Duong from held-for-sale to held and used of $127 million;
- Gain on sale of AES DR Renewables Holdings of $45 million; and
- Higher contributions from renewables projects placed in service in the current year of $28 million and higher margins from the Renewables SBU of $13 million due to prior year outages and increased revenue from projects placed in service.

Net income attributable to The AES Corporation decreased $757 million to a $49 million loss for the six months ended June 30, 2025, compared to income of $708 million for the six months ended June 30, 2024. This decrease was primarily due to:

- Lower margins from the Energy Infrastructure SBU of $272 million, excluding one-time restructuring costs, primarily due to higher prior year revenues from the monetization of the Warrior Run coal plant PPA and prior year unrealized gains on power swaps;
- Higher income tax expense of $231 million due to a higher effective tax rate;
- Higher day-one losses on the commencement of sales-type leases at AES Clean Energy Development of $149 million;
- Foreign currency translation losses of $37 million compared to prior year gains of $29 million primarily related to the depreciation of the Chilean peso and unrealized losses on forwards and options in Euros;
- One-time restructuring costs of $50 million;
- Higher interest expense of $13 million and lower interest income of $23 million in the current year; and
- Higher net equity in losses of affiliates of $44 million primarily related to lower contributions from renewables projects that came online at sPower.

These decreases were partially offset by $127 million related to an increase in the carrying value of the Mong Duong asset group primarily due to the derecognition of a valuation allowance on the loan receivable accounted for under ASC 310 upon reclassifying Mong Duong from held-for-sale to held and used.

SBU Performance Analysis

Non-GAAP Measures

EBITDA, Adjusted EBITDA, Adjusted EBITDA with Tax Attributes, Adjusted PTC, and Adjusted EPS are non-GAAP supplemental measures that are used by management and external users of our condensed consolidated financial statements such as investors, industry analysts, and lenders.

During the first quarter of 2025, the Company updated the definitions of Adjusted EBITDA, Adjusted PTC, and Adjusted EPS to exclude costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts. These restructuring initiatives to streamline our organization and right-size our development company would result in significant incremental costs above normal operations, and the inclusion of such costs would result in a lack of comparability in our results of operations and could be misleading to investors. We believe excluding these costs associated with a major restructuring initiative better reflects the underlying business performance of the Company.

For the year ended December 31, 2024, the Company updated the definitions of EBITDA and Adjusted EBITDA to include accretion of AROs in the *depreciation and amortization* add-back. We believe excluding accretion of AROs from these metrics better reflects the underlying business performance of the Company and is aligned with the metrics of our industry peers. For comparability and consistency, all prior period EBITDA and Adjusted EBITDA measures have been recast to conform to the current presentation. The impact of this update resulted in an increase to Adjusted EBITDA of $6 million and $11 million, respectively, for the three and six months ended June 30, 2024.

During the first quarter of 2024, the Company updated the definitions of Adjusted EBITDA, Adjusted PTC, and Adjusted EPS add-back (a) *unrealized gains or losses related to derivative transactions and equity securities* to include financial assets and liabilities measured using the fair value option, and updated add-back (e) *gains, losses, and costs due to the early retirement of debt* to include troubled debt restructuring. We believe excluding these

gains or losses better reflects the underlying business performance of the Company. The Company also removed the adjustment for net gains at Angamos, one of our businesses in the Energy Infrastructure SBU, associated with the early contract terminations with Minera Escondida and Minera Spence. As this adjustment was specific to certain contract terminations that occurred in 2020, we believe removing this adjustment from our non-GAAP definitions provides simplification and clarity for our investors. There were no such impacts in 2024.

EBITDA, Adjusted EBITDA and Adjusted EBITDA with Tax Attributes

We define EBITDA as earnings before interest income and expense, taxes, depreciation, amortization, and accretion of AROs. We define Adjusted EBITDA as EBITDA adjusted for the impact of NCI and interest, taxes, depreciation, amortization, and accretion of AROs of our equity affiliates, adding back interest income recognized under service concession arrangements, and excluding gains or losses of both consolidated entities and entities accounted for under the equity method due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits and costs associated with dispositions and acquisitions of business interests, including early plant closures, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring; and (f) costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts.

In addition to the revenue and cost of sales reflected in Operating Margin, Adjusted EBITDA includes the other components of our Consolidated Statement of Operations, such as *general and administrative expenses* in Corporate and Other as well as business development costs, *other expense* and *other income, realized foreign currency transaction gains and losses,* and *net equity in earnings (losses) of affiliates*.

We further define Adjusted EBITDA with Tax Attributes as Adjusted EBITDA, adding back the pre-tax effect of Production Tax Credits (“PTCs”), Investment Tax Credits (“ITCs”), and depreciation tax deductions allocated to tax equity investors, as well as the tax benefit recorded from tax credits retained or transferred to third parties.

The GAAP measure most comparable to EBITDA, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes is *Net income*. We believe that EBITDA, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes better reflect the underlying business performance of the Company. Adjusted EBITDA is the most relevant measure considered in the Company’s internal evaluation of the financial performance of its segments. Factors in this determination include the variability due to unrealized gains or losses pertaining to derivative transactions, equity securities, or financial assets and liabilities remeasurement, unrealized foreign currency gains or losses, losses due to impairments, strategic decisions to dispose of or acquire business interests, retire debt, or implement restructuring initiatives, and the variability of allocations of earnings to tax equity investors, which affect results in a given period or periods. In addition, each of these metrics represents the business performance of the Company before the application of statutory income tax rates and tax adjustments, including the effects of tax planning, corresponding to the various jurisdictions in which the Company operates. Given its large number of businesses and overall complexity, the Company concluded that Adjusted EBITDA is a more transparent measure than *Net income* that better assists investors in determining which businesses have the greatest impact on the Company’s results.

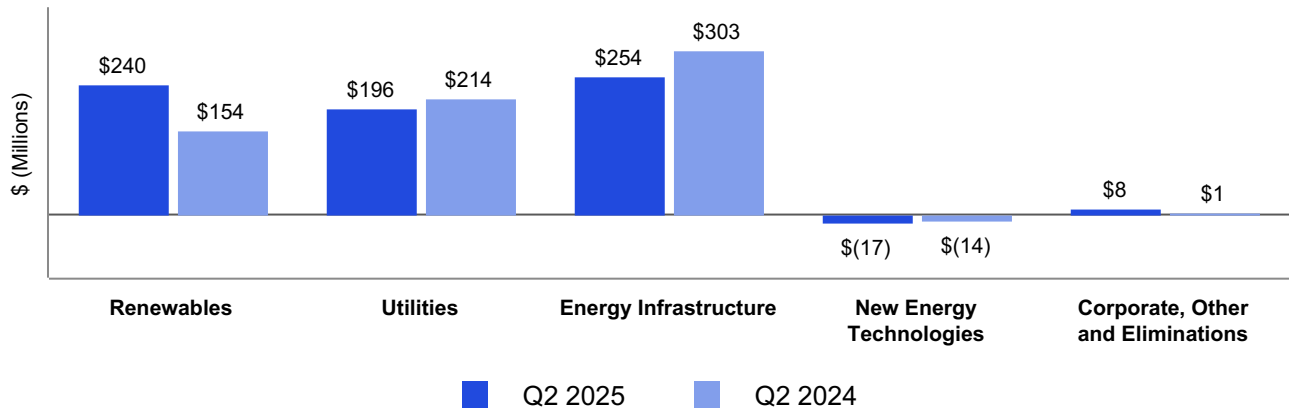
EBITDA, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes should not be construed as alternatives to *Net income*, which is determined in accordance with GAAP.

Reconciliation of Adjusted EBITDA and Adjusted EBITDA with Tax Attributes (in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2025	2024	2025	2024
Net income (loss)	$ (150)	$ 153	$ (223)	$ 431
Income tax expense (benefit)	167	(35)	184	(51)
Interest expense	352	389	694	746
Interest income	(70)	(88)	(139)	(193)
Depreciation, amortization, and accretion of AROs	354	315	691	633
EBITDA	$ 653	$ 734	$ 1,207	$ 1,566
Less: Adjustment for noncontrolling interests and redeemable stock of subsidiaries [1]	(253)	(182)	(387)	(346)
Less: Income tax expense (benefit), interest expense (income) and depreciation, amortization, and accretion of AROs from equity affiliates	45	28	81	62
Interest income recognized under service concession arrangements	14	16	29	33
Unrealized derivatives, equity securities, and financial assets and liabilities losses (gains)	133	(53)	132	(138)
Unrealized foreign currency losses (gains)	4	12	(3)	3
Disposition/acquisition losses	126	62	167	19
Impairment losses (reversals)	(87)	23	(54)	49
Loss on extinguishment of debt and troubled debt restructuring	4	18	12	50
Restructuring costs	42	—	88	—
Adjusted EBITDA [1]	$ 681	$ 658	$ 1,272	$ 1,298
Tax attributes	376	191	562	419
Adjusted EBITDA with Tax Attributes [2]	$ 1,057	$ 849	$ 1,834	$ 1,717

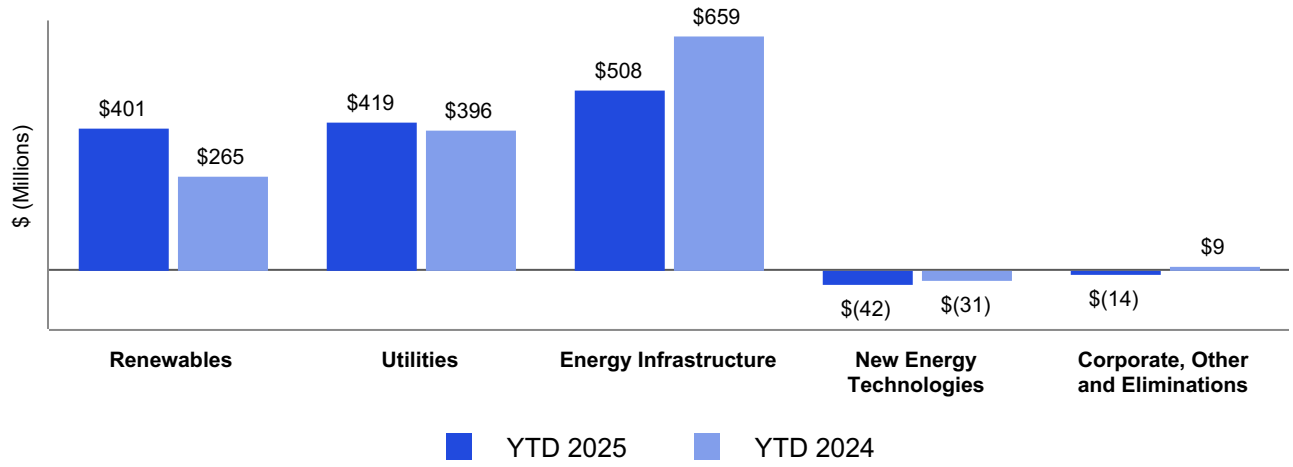
(1) The allocation of earnings and losses to tax equity investors from both consolidated entities and equity affiliates is removed from Adjusted EBITDA. NCI also excludes amounts allocated to preferred shareholders during the construction phase before a project becomes operational, as this is akin to a financing arrangement.

(2) Adjusted EBITDA with Tax Attributes includes the impact of the share of the ITCs, PTCs, and depreciation deductions allocated to tax equity investors under the HLBV accounting method and recognized as *Net loss (income) attributable to noncontrolling interests and redeemable stock of subsidiaries* on the Condensed Consolidated Statements of Operations. It also includes the tax benefit recorded from tax credits retained or transferred to third parties. The tax attributes are related to the Renewables and Utilities SBUs.

Adjusted EBITDA QTD



Adjusted EBITDA YTD



Adjusted PTC

We define Adjusted PTC as pre-tax income from continuing operations attributable to The AES Corporation excluding gains or losses of the consolidated entity due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits, and costs associated with dispositions and acquisitions of business interests, including early plant closures, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring; and (f) costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts. Adjusted PTC also includes net equity in earnings of affiliates on an after-tax basis adjusted for the same gains or losses excluded from consolidated entities.

Adjusted PTC reflects the impact of NCI and excludes the items specified in the definition above. In addition to the revenue and cost of sales reflected in Operating Margin, Adjusted PTC includes the other components of our Consolidated Statement of Operations, such as *general and administrative expenses* in Corporate and Other as well as business development costs, *interest expense* and *interest income, other expense* and *other income, realized foreign currency transaction gains and losses,* and *net equity in earnings (losses) of affiliates*.

The GAAP measure most comparable to Adjusted PTC is *Income from continuing operations attributable to The AES Corporation*. We believe that Adjusted PTC better reflects the underlying business performance of the Company and is a relevant measure considered in the Company's internal evaluation of the financial performance

of its segments. Factors in this determination include the variability due to unrealized gains or losses pertaining to derivative transactions, equity securities, or financial assets and liabilities remeasurement, unrealized foreign currency gains or losses, losses due to impairments, strategic decisions to dispose of or acquire business interests, retire debt, or implement restructuring initiatives, which affect results in a given period or periods. In addition, Adjusted PTC represents the business performance of the Company before the application of statutory income tax rates and tax adjustments, including the effects of tax planning, corresponding to the various jurisdictions in which the Company operates. Given its large number of businesses and complexity, the Company concluded that Adjusted PTC is a more transparent measure than *Income from continuing operations attributable to The AES Corporation* that better assists investors in determining which businesses have the greatest impact on the Company's results.

Adjusted PTC should not be construed as an alternative to *Income from continuing operations attributable to The AES Corporation*, which is determined in accordance with GAAP.

	Three Months Ended June 30,		Six Months Ended June 30,	
Reconciliation of Adjusted PTC (in millions)	**2025**	**2024**	**2025**	**2024**
Income (loss) from continuing operations, net of tax, attributable to The AES Corporation	$ (95)	$ 276	$ (49)	$ 708
Income tax expense (benefit) from continuing operations attributable to The AES Corporation	148	(67)	144	(86)

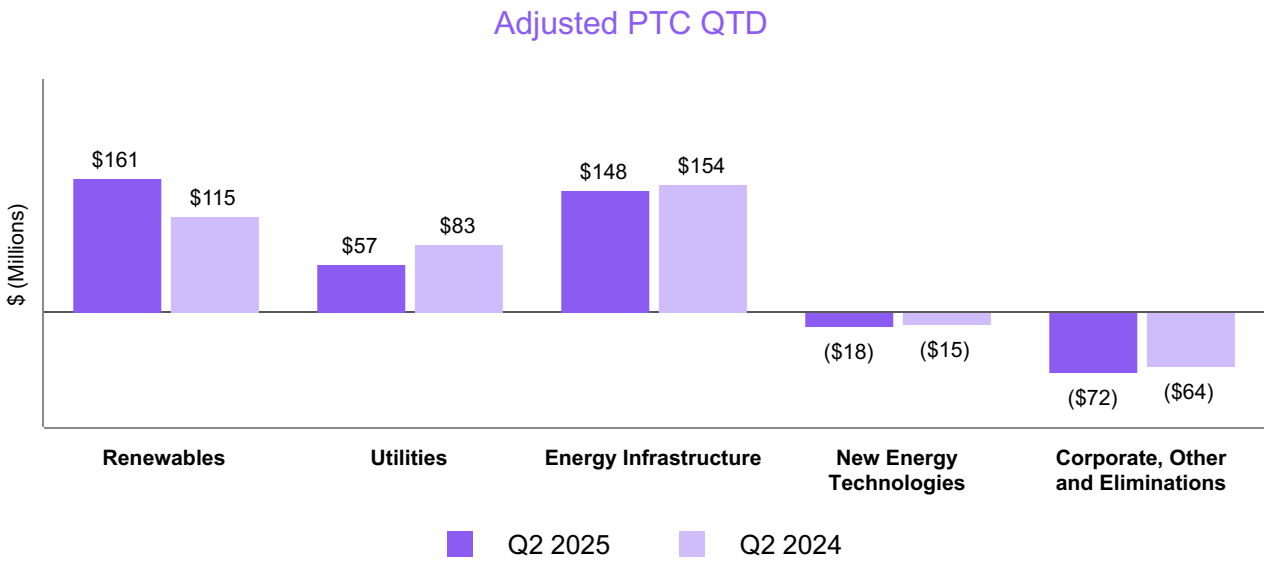
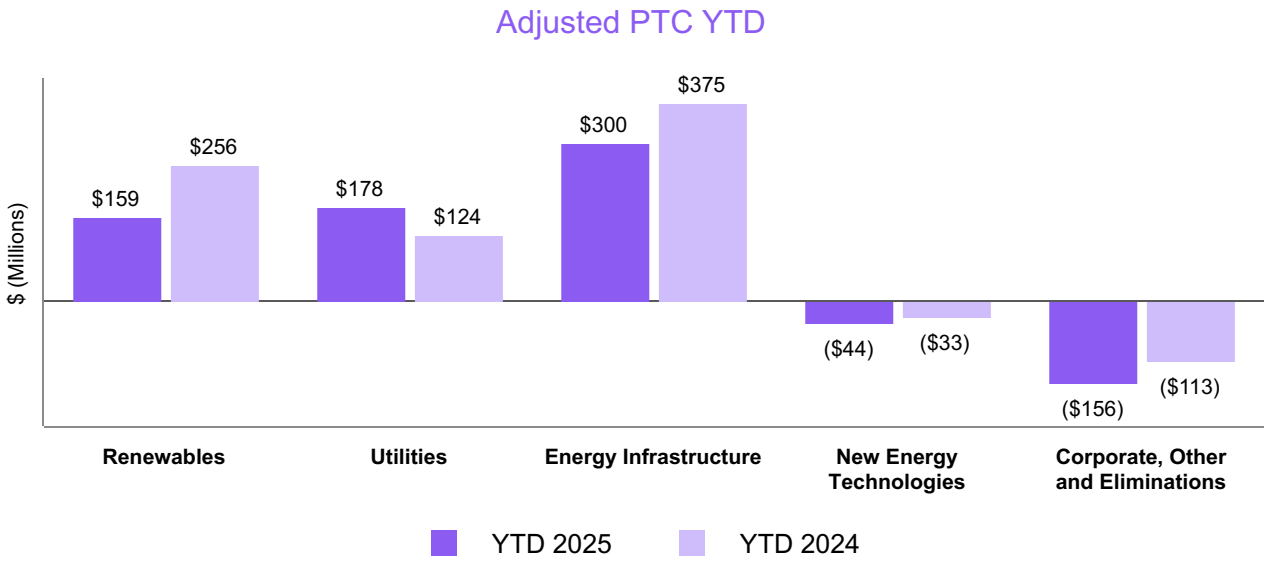
Adjusted PTC	$ 276	$ 273	$ 437	$ 609





Adjusted EPS

We define Adjusted EPS as diluted earnings per share from continuing operations excluding gains or losses of both consolidated entities and entities accounted for under the equity method due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits and costs associated with dispositions and acquisitions of business interests, including early plant closures, and the tax impact from the repatriation of sales proceeds, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring; and (f) costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts.

The GAAP measure most comparable to Adjusted EPS is *Diluted earnings per share from continuing operations*. We believe that Adjusted EPS better reflects the underlying business performance of the Company and is considered in the Company's internal evaluation of financial performance. Factors in this determination include the variability due to unrealized gains or losses pertaining to derivative transactions, equity securities, or financial assets and liabilities remeasurement, unrealized foreign currency gains or losses, losses due to impairments, strategic decisions to dispose of or acquire business interests, retire debt, or implement restructuring initiatives, which affect results in a given period or periods.

Adjusted EPS should not be construed as an alternative to *Diluted earnings per share from continuing operations*, which is determined in accordance with GAAP.

The Company reported diluted loss per share of $0.15 and $0.08 for the three and six months ended June 30, 2025, respectively. The Company reported diluted earnings per share of $0.39 and $0.99 for the three and six months ended June 30, 2024, respectively. For purposes of measuring earnings per share under U.S. GAAP, income available to AES common stockholders is reduced by increases in the carrying amount of redeemable stock of subsidiaries to redemption value and increased by decreases in the carrying amount to the extent they represent recoveries of amounts previously reflected in the computation of earnings per share. While the adjustment for the three and six months ended June 30, 2025 decreased earnings per share and the adjustment for the three months ended June 30, 2024 increased earnings per share, neither adjustment impacted *Net income* on the Condensed Consolidated Statement of Operations. For purposes of computing Adjusted EPS, the Company excluded the adjustment to redemption value from the numerator. The table below reconciles the income available to AES common stockholders used in GAAP diluted earnings per share to the income from continuing operations used in calculating the non-GAAP measure of Adjusted EPS.

Reconciliation of Numerator Used for Adjusted EPS	Three months ended June 30, 2025			Six months ended June 30, 2025		
(in millions, except per share data)	Loss	Shares	$ per Share	Loss	Shares	$ per Share
GAAP DILUTED LOSS PER SHARE						
Loss available to The AES Corporation common stockholders	$ (105)	712	$ (0.15)	$ (59)	712	$ (0.08)
Add back: Adjustment to redemption value of redeemable stock of subsidiaries	10	—	0.02	10	—	0.01
NON-GAAP DILUTED LOSS PER SHARE BEFORE EFFECT OF DILUTIVE SECURITIES	$ (95)	712	$ (0.13)	$ (49)	712	$ (0.07)
Restricted stock units	—	2	—	—	1	—
NON-GAAP DILUTED LOSS PER SHARE	$ (95)	714	$ (0.13)	$ (49)	713	$ (0.07)

Reconciliation of Numerator Used for Adjusted EPS	Three months ended June 30, 2024			Six months ended June 30, 2024		
(in millions, except per share data)	Income	Shares	$ per Share	Income	Shares	$ per Share
GAAP DILUTED EARNINGS PER SHARE						
Income available to The AES Corporation common stockholders	$ 282	713	$ 0.39	$ 708	713	$ 0.99
Add back: Adjustment to redemption value of redeemable stock of subsidiaries	(6)	—	—	—	—	—
NON-GAAP DILUTED EARNINGS PER SHARE	$ 276	713	$ 0.39	$ 708	713	$ 0.99

Reconciliation of Adjusted EPS	Three Months Ended June 30,		Six Months Ended June 30,	
	2025	2024	2025	2024
Diluted earnings (loss) per share from continuing operations	$ (0.13)	$ 0.39	$ (0.07)	$ 0.99
Unrealized derivatives, equity securities, and financial assets and liabilities losses (gains)	0.18 (1)	(0.07) (2)	0.19 (3)	(0.19) (4)
Unrealized foreign currency losses	—	0.01	—	—
Disposition/acquisition losses	0.18 (5)	0.08 (6)	0.23 (7)	0.03 (8)
Impairment losses (reversals)	(0.12) (9)	0.03 (10)	(0.08) (11)	0.08 (12)
Loss on extinguishment of debt and troubled debt restructuring	0.01	0.03 (13)	0.02	0.07 (14)
Restructuring costs	0.06 (15)	—	0.12 (16)	—
Less: Net income tax expense (benefit)	0.33 (17)	(0.09) (18)	0.37 (19)	(0.09) (18)
Adjusted EPS	$ 0.51	$ 0.38	$ 0.78	$ 0.89

1. Amount primarily relates to remeasurement of our investment in 5B of $48 million, or $0.07 per share, net unrealized derivative losses at the Energy Infrastructure SBU of $38 million, or $0.05 per share, and unrealized derivative losses on commodities at AES Clean Energy of $33 million, or $0.05 per share.
2. Amount primarily relates to unrealized gains on foreign currency derivatives at Corporate of $34 million, or $0.05 per share, and unrealized gains on cross currency swaps in Brazil of $25 million, or $0.03 per share.
3. Amount primarily relates to remeasurement of our investment in 5B of $48 million, or $0.07 per share, net unrealized derivative losses at the Energy Infrastructure SBU of $46 million, or $0.06 per share, and unrealized derivative losses on commodities at AES Clean Energy of $17 million, or $0.02 per share.
4. Amount primarily relates to net unrealized derivative gains at the Energy Infrastructure SBU of $59 million, or $0.08 per share, unrealized gains on foreign currency derivatives at Corporate of $37 million, or $0.05 per share, and unrealized gains on cross currency swaps in Brazil of $28 million, or $0.04 per share.
5. Amount primarily relates to day-one losses on commencement of sales-type leases at AES Clean Energy Development of $149 million, or $0.21 per share, partially offset by gain on sale of Dominican Republic Renewables of $45 million, or $0.06 per share.
6. Amount primarily relates to day-one losses at commencement of sales-type leases at AES Renewable Holdings of $63 million, or $0.09 per share.
7. Amount primarily relates to day-one losses on commencement of sales-type leases at AES Clean Energy Development of $149 million, or $0.21 per share, and AES Renewable Holdings of $9 million, or $0.01 per share, and losses on remeasurement of contingent consideration at AES Clean Energy of $12 million, or $0.02 per share, partially offset by gain on sale of Dominican Republic Renewables of $45 million, or $0.06 per share.
8. Amount primarily relates to day-one losses at commencement of sales-type leases at AES Renewable Holdings of $63 million, or $0.09 per share, and the loss on partial sale of our ownership interest in Amman East and IPP4 in Jordan of $10 million, or $0.01 per share, partially offset by a gain on dilution of ownership in Uplight due to its acquisition of AutoGrid of $52 million, or $0.07 per share.
9. Amount primarily relates to the derecognition of the valuation allowance on a loan receivable accounted for under ASC 310 and the elimination of estimated costs to sell at Mong Duong of $127 million, or $0.18 per share, after reclassification to held and used, partially offset by impairments at AES Clean Energy of $29 million, or $0.04 per share.
10. Amount primarily relates to impairment at AES Brasil of $12 million, or $0.02 per share.
11. Amount primarily relates to the derecognition of the valuation allowance on a loan receivable accounted for under ASC 310 and the elimination of estimated costs to sell at Mong Duong of $127 million, or $0.18 per share, after reclassification to held and used, partially offset by impairments at AES Clean Energy of $54 million, or $0.08 per share, and at Mong Duong of $9 million, or $0.01 per share.
12. Amount primarily relates to impairment at Mong Duong of $22 million, or $0.03 per share, and impairment at AES Brasil of $12 million, or $0.02 per share.
13. Amount primarily relates to losses incurred at AES Andes due to early retirement of debt of $16 million, or $0.02 per share.
14. Amount primarily relates to losses incurred at AES Andes due to early retirement of debt $29 million, or $0.04 per share, and costs incurred due to troubled debt restructuring at Puerto Rico of $20 million, or $0.03 per share.
15. Amount primarily relates to impairments at AES Clean Energy Development that were the result of the Company-wide restructuring program of $38 million, or $0.05 per share.
16. Amount primarily relates to severance costs associated with the Company-wide restructuring program of $50 million, or $0.07 per share, and impairments at AES Clean Energy Development that were the result of the Company's restructuring program of $38 million, or $0.05 per share.
17. Amount primarily relates to income tax expense associated with the day-one losses on commencement of sales-type leases at AES Clean Energy Development of $95 million, or $0.13 per share, impairments at AES Clean Energy Development of $50 million, or $0.07 per share, remeasurement and downward adjustment of our investment in 5B of $28 million, or $0.04 per share, the selldown of AES Ohio of $13 million, or $0.02 per share, and net unrealized derivative

losses at Integrated Energy of $18 million, or $0.03 per share.

18. Amount primarily relates to income tax benefits associated with the tax over book investment basis differences related to the AES Brasil held-for-sale classification of $59 million, or $0.08 per share, for the three and six months ended June 30, 2024.

19. Amount primarily relates to income tax expense associated with the day-one losses on commencement of sales-type leases at AES Clean Energy Development of $95 million, or $0.13 per share, impairments at AES Clean Energy Development of $57 million, or $0.08 per share, severance costs related to the Company-wide restructuring program of $23 million, or $0.03 per share, remeasurement and downward adjustment of our investment in 5B of $28 million, or $0.04 per share, net unrealized derivative losses at Integrated Energy of $19 million, or $0.03 per share, and the selldown of AES Ohio of $13 million, or $0.02 per share.

Renewables SBU

The following table summarizes Operating Margin, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes (in millions) for the periods indicated:

	Three Months Ended June 30,				Six Months Ended June 30,			
	2025	2024	$ Change	% Change	2025	2024	$ Change	% Change
Operating Margin	$ 85	$ 100	$ (15)	-15%	$ 158	$ 163	$ (5)	-3%
Adjusted EBITDA [1]	240	154	86	56%	401	265	136	51%
Adjusted EBITDA with Tax Attributes [1]	606	331	275	83%	895	668	227	34%

(1) A non-GAAP financial measure. See *SBU Performance Analysis—Non-GAAP Measures* for definition.

Operating Margin for the three months ended June 30, 2025 decreased $15 million. This decrease was primarily driven by a $52 million impact from the sale of AES Brasil, and $43 million negative impact related to changes in mark-to-market of energy derivatives. These negative impacts were partially offset by a $32 million positive impact from new businesses, a $25 million increase related to higher generation in Colombia as a result of increased availability and lower spot prices on energy purchases, and $17 million impact of lower fixed costs, including lower people costs after restructuring.

Adjusted EBITDA for the three months ended June 30, 2025 increased $86 million, primarily due to the drivers mentioned above, adjusted for NCI, unrealized derivatives, restructuring costs, and depreciation.

Adjusted EBITDA with Tax Attributes for the three months ended June 30, 2025 increased $275 million, primarily driven by higher tax attributes realized in the current year due to timing of tax attribute recognition, and the increase in Adjusted EBITDA explained above. During the three months ended June 30, 2025 and 2024, we realized $366 million and $177 million, respectively, from tax attributes earned by our U.S. renewables business.

Operating Margin for the six months ended June 30, 2025 decreased $5 million. This decrease was primarily driven by an $84 million impact from the sale of AES Brasil, a $43 million negative impact related to changes in mark-to-market of energy derivatives, a $19 million increase in fixed costs primarily related to an accelerated growth plan, and $17 million of one-time costs due to restructuring. These negative impacts were partially offset by a $67 million positive impact from new businesses, $36 million increase related to higher generation in Panama as a result of better hydrological conditions during the first quarter of 2025, $25 million increase in Colombia as a result of increased availability and lower spot prices on energy purchases, and $22 million impact of the results of AES Andes moving to Renewables in 2025.

Adjusted EBITDA for the six months ended June 30, 2025 increased $136 million, primarily due to the drivers mentioned above, adjusted for NCI, unrealized derivatives, restructuring costs, and depreciation.

Adjusted EBITDA with Tax Attributes for the six months ended June 30, 2025 increased $227 million, primarily driven by higher tax attributes realized in the current year due to timing of tax attribute recognition, and the increase in Adjusted EBITDA explained above. During the six months ended June 30, 2025 and 2024, we realized $494 million and $403 million, respectively, from tax attributes earned by our U.S. renewables business.

Utilities SBU

The following table summarizes Operating Margin, Adjusted EBITDA, Adjusted EBITDA with Tax Attributes, and Adjusted PTC (in millions) for the periods indicated:

	Three Months Ended June 30,				Six Months Ended June 30,			
	2025	2024	$ Change	% Change	2025	2024	$ Change	% Change
Operating Margin	$ 136	$ 156	$ (20)	-13%	$ 291	$ 276	$ 15	5%
Adjusted EBITDA [1]	196	214	(18)	-8%	419	396	23	6%
Adjusted EBITDA with Tax Attributes [1]	206	228	(22)	-10%	487	412	75	18%
Adjusted PTC [1] [2]	57	83	(26)	-31%	178	124	54	44%

(1) A non-GAAP financial measure. See *SBU Performance Analysis—Non-GAAP Measures* for definition.

(2) Adjusted PTC remains a key metric used by management for analyzing our businesses in the utilities industry.

Operating Margin for the three months ended June 30, 2025 decreased $20 million, mainly driven by $13 million increase in depreciation expense from additional assets placed in service, $9 million decrease due to the impact of planned outages, $8 million resulting from lower demand due to the impact of weather. These decreases are partially offset by $13 million due to higher retail rates as a result of the 2024 Base Rate Order.

Adjusted EBITDA for the three months ended June 30, 2025 decreased $18 million, primarily due to the drivers above, adjusted for NCI, including the impact of the AES Ohio selldown, and depreciation.

Adjusted EBITDA with Tax Attributes for the three months ended June 30, 2025 decreased $22 million, mainly driven by the drivers above, as well as a $4 million decrease in realized tax attributes, primarily related to the Hardy Hills solar project in the prior year.

Adjusted PTC for the three months ended June 30, 2025 decreased $26 million due to the drivers above.

Operating Margin for the six months ended June 30, 2025 increased $15 million, mainly driven by $83 million increase in margin driven by higher retail rates as a result of the 2024 Base Rate Order, including the impact of certain riders now included in base rate; increase in transmission and rider revenues; and favorable margin due to higher demand due to the impact of weather. These increases are partially offset by $22 million increase in depreciation expenses from additional assets placed in service, $17 million decrease due to the impact of planned outages, $15 million decrease due higher credit losses, and $15 million increase in fixed cost driven by higher income taxes driven by higher assessed values and increase in software cost.

Adjusted EBITDA for the six months ended June 30, 2025 increased $23 million, primarily due to the drivers above, adjusted for NCI, depreciation, and restructuring costs.

Adjusted EBITDA with Tax Attributes for the six months ended June 30, 2025 increased $75 million, mainly driven by the drivers above, as well as a $52 million increase in realized tax attributes, primarily related to the Pike County BESS project in the current year.

Adjusted PTC for the six months ended June 30, 2025 increased $54 million due to the drivers above, offset by higher depreciation expense.

Energy Infrastructure SBU

The following table summarizes Operating Margin and Adjusted EBITDA (in millions) for the periods indicated:

	Three Months Ended June 30,				Six Months Ended June 30,			
	2025	2024	$ Change	% Change	2025	2024	$ Change	% Change
Operating Margin	$ 176	$ 258	$ (82)	-32%	$ 365	$ 652	$ (287)	-44%
Adjusted EBITDA [1]	254	303	(49)	-16%	508	659	(151)	-23%

(1) A non-GAAP financial measure. See *SBU Performance Analysis—Non-GAAP Measures* for definition.

Operating Margin for the three months ended June 30, 2025 decreased $82 million, driven by $64 million higher prior year revenues from the monetization of the Warrior Run coal plant PPA, $43 million due to prior year unrealized derivative gains as part of our commercial hedging strategy, and $22 million of lower generation due to dispatch; partially offset by an increase of $39 million driven by higher availability due to lower maintenance in 2025.

Adjusted EBITDA for the three months ended June 30, 2025 decreased $49 million, primarily due to the drivers above adjusted for NCI, unrealized derivatives, restructuring costs, and equity earnings due to Gatun starting commercial operations.

Operating Margin for the six months ended June 30, 2025 decreased $287 million, driven by $160 million higher prior year revenues from the monetization of the Warrior Run coal plant PPA, $114 million due to prior year unrealized derivative gains as part of our commercial hedging strategy, $22 million of prior year operating margin at AES Andes, which is reported in the Renewables SBU beginning in 2025, $19 million of one-time costs due to restructuring, and $17 million due to the prior year selldown of Amman East and IPP4 in Jordan; partially offset by an increase of $54 million driven by higher availability due to lower maintenance in 2025.

Adjusted EBITDA for the six months ended June 30, 2025 decreased $151 million, primarily due to the drivers above adjusted for NCI, unrealized derivatives, restructuring costs, and equity earnings due to Gatun starting commercial operations.

New Energy Technologies SBU

The following table summarizes Operating Margin and Adjusted EBITDA (in millions) for the periods indicated:

	Three Months Ended June 30,				Six Months Ended June 30,			
	2025	2024	$ Change	% Change	2025	2024	$ Change	% Change
Operating Margin	$ (4)	$ (2)	$ (2)	100%	$ (4)	$ (4)	$ —	—%
Adjusted EBITDA [1]	(17)	(14)	(3)	21%	(42)	(31)	(11)	-35%

[1] A non-GAAP financial measure. See *SBU Performance Analysis—Non-GAAP Measures* for definition.

Operating Margin for the three months ended June 30, 2025 decreased $2 million, with no material drivers.

Adjusted EBITDA for the three months ended June 30, 2025 decreased $3 million, primarily due to higher net losses at Fluence. The increased losses were mainly driven by a decline in sales, reflecting lower volumes fulfilled due to the timing of customer schedules.

Operating Margin for the six months ended June 30, 2025 was unchanged from the prior year.

Adjusted EBITDA for the six months ended June 30, 2025 decreased $11 million, primarily due to higher net losses at Fluence. The increased losses were mainly driven by a decline in sales, reflecting lower volumes fulfilled due to the timing of customer schedules.

Key Trends and Uncertainties

During 2025 and beyond, we expect to face the following challenges at certain of our businesses. Management expects that improved operating performance at certain businesses, growth from new businesses, and global cost reduction initiatives may lessen or offset their impact. If these favorable effects do not occur, or if the challenges described below and elsewhere in this section impact us more significantly than we currently anticipate, or if volatile foreign currencies and commodities move more unfavorably, then these adverse factors (or other adverse factors unknown to us) may have a material impact on our operating margin, net income attributable to The AES Corporation, and cash flows. We continue to monitor our operations and address challenges as they arise. For the risk factors related to our business, see Item 1.—*Business* and Item 1A.—*Risk Factors* of our 2024 Form 10-K.

Operational

Trade Restrictions and Supply Chain — In April 2022, the U.S. Department of Commerce ("Commerce") initiated an investigation into whether imports into the U.S. of solar cells and panels from Cambodia, Malaysia, Thailand, and Vietnam ("Southeast Asia") were circumventing antidumping and countervailing duty ("AD/CVD") orders on solar cells and panels from China. In August 2023, Commerce rendered final affirmative findings of circumvention with respect to all four countries, which resulted in the imposition of AD and CVD duties on certain imported cells and panels from Southeast Asia. Commerce's determination and related matters remain the subject of ongoing litigation before the U.S. Court of International Trade.

In 2024, Commerce and the U.S. International Trade Commission ("U.S. ITC") initiated new AD/CVD investigations on solar cells and panels imported from Southeast Asia. On April 18, 2025, Commerce rendered final affirmative determinations and AD/CVD rates with respect to all four countries. On June 13, 2025, the U.S. ITC issued its determination that imports from Malaysia and Vietnam have injured the U.S. industry and that imports from Cambodia and Thailand threaten injury ("U.S. ITC Decision"). Commerce then issued orders on June 24, 2025, implementing the AD/CVD rates, which will be subject to annual review by Congress. We do not expect the U.S. ITC Decision to have a negative impact on our business.

Separately, the U.S. maintains a global safeguard tariff (currently 14% ad valorem) on solar cells and modules pursuant to the Section 201 Safeguard Action on crystalline silicon photovoltaic products, which became effective in February 2018. On June 21, 2024, President Biden issued Proclamation 10779, revoking the exclusion of bifacial panels from safeguard relief previously proclaimed in Proclamation 10339, and reinstating the tariff on bifacial panels under the Section 201 Safeguard Action, subject to certain qualifications. These global tariffs are expected to expire in February 2026.

The U.S. also maintains Section 301 tariffs on certain Chinese made lithium-ion batteries and related components utilized for energy storage systems, with such tariff currently set at 7.5% and increasing to 25% effective January 1, 2026. There is also an ongoing AD/CVD investigation with respect to exports by China of natural and synthetic graphite used to make lithium-ion battery anode material. Any determinations or orders arising from such investigation could result in price increases.

Additionally, the Uyghur Forced Labor Prevention Act ("UFLPA") seeks to block the import of products made with forced labor in certain areas of China, at any point in the supply chain, and may lead to certain suppliers being blocked from importing solar cells and panels into the U.S. While this has impacted the U.S. market, AES has managed this issue without significant impact to our projects. Further forced labor designations of entities under the UFLPA may impact our suppliers' ability or willingness to meet their contractual agreements or to continue to supply cells or panels into the U.S. market on terms that we deem satisfactory.

The Trump Administration has threatened or imposed tariffs on a wide range of countries and products. On February 10, 2025, President Trump signed Executive Orders modifying existing Section 232 tariffs on steel and aluminum imports to expand their scope and impose 25% tariffs on both products. The President raised these rates to 50% effective June 4, 2025. At this time, we do not expect the modifications to tariffs on steel and aluminum to have a material impact on our business.

On February 1, 2025, President Trump issued an Executive Order declaring a national emergency under the International Emergency Economic Powers Act ("IEEPA") and imposing a 10% additional tariff on imports from China, effective February 4, 2025. Effective March 4, 2025, this tariff was increased to 20%.

On April 2, 2025, President Trump issued an Executive Order pursuant to IEEPA imposing an indefinite, baseline reciprocal 10% tariff on almost all goods imported into the U.S., effective April 5, 2025, and individualized higher IEEPA tariffs (11% to 50%) starting April 9, 2025 on goods originating from 57 countries with trade surpluses with the U.S. On April 9, 2025, the U.S. government issued a further Executive Order increasing the IEEPA reciprocal tariff on China to 125% effective April 10, 2025. Concurrently, the U.S. government announced a temporary suspension of the country-specific reciprocal tariff measures targeting most U.S. trading partners for a 90-day period, or until July 9, 2025, which was later extended until August 1, 2025. Effective May 14, 2025, the IEEPA rates applicable to China were lowered to 30%.

During the reciprocal-tariff suspension, many countries have been seeking to reach bilateral trade agreements with the U.S. and the ultimate outcome of any reciprocal or other tariffs with these countries is uncertain.

We expect the tariffs on imports from China will increase overall costs for materials and parts that are imported to build and maintain renewable energy plants for the U.S. industry. However, AES has already shifted its supply chain outside of China for the vast majority of final products used to build and maintain renewable energy plants in the U.S. We expect limited impact to projects scheduled to become operational in 2025 through 2027 due to the recently announced tariffs on China.

The impact of new tariffs, reciprocal tariffs, or Commerce investigations, the impact of any additional adverse Commerce determinations or other tariff disputes or litigation, the impact of the UFLPA, potential future disruptions to the renewable energy supply chain and their effect on AES' U.S. project development and construction activities remain uncertain. AES will continue to monitor developments and take prudent steps towards maintaining a robust supply chain for our renewable energy projects. To that end, we have accelerated imports into the U.S. and increased our contracting for U.S. domestically manufactured solar panels, batteries, wind turbines, trackers, and other equipment, significantly mitigating the potential impacts from reciprocal tariffs or other tariffs.

More specifically, we have contracted and imported into the U.S. all of the solar panels that are necessary to complete our U.S. backlog of solar projects scheduled to finish construction and become operational in 2025. For our U.S backlog of solar projects scheduled to finish construction and become operational in 2026 or 2027, we have contracted for all of our panel supply needs, with the majority of such panels being manufactured in the U.S. and most of the remaining panels have already been imported into the U.S.

Additionally, we have contracted and imported into the U.S. all the batteries needed for our U.S. energy storage projects scheduled to be completed in 2025.

For our U.S. backlog of storage projects scheduled to finish construction and become operational in 2026 or 2027, we have contracted all our battery needs, with almost all of such batteries coming from U.S. or Korean suppliers. We are also well advanced in contracting U.S. domestically manufactured battery modules to support the remainder of our U.S. energy storage growth through 2027.

For our U.S. backlog of wind projects scheduled to be completed in 2025 through 2026, we have contracted and received delivery of all turbines, and for our 2027 backlog of U.S. wind projects, we are fully contracted with U.S. suppliers and suppliers with primarily U.S. manufactured turbines.

Operational Sensitivity to Dry Hydrological Conditions — Our hydroelectric generation facilities are sensitive to changes in the weather, particularly the level of water inflows into generation facilities. Dry hydrological conditions in Panama, Colombia, and Chile can present challenges for our businesses in these markets. Low

inflows can result in low reservoir levels, reduced generation output, and subsequently possible increased prices for electricity. If our hydroelectric generation facilities cannot generate sufficient energy to meet contractual arrangements, we may need to purchase energy to fulfill our obligations, which could have an adverse impact on AES. As mitigation, AES has invested in thermal, wind, and solar generation assets, which have a complementary profile to hydroelectric plants. These plants are expected to have increased generation in low hydrology scenarios, offsetting possible impacts described from hydro assets.

As of mid-2025, the equatorial Pacific remains in an ENSO-neutral state, with no active El Niño or La Niña conditions. Forecasts from leading climate institutions, including the International Research Institute for Climate and Society ("IRI") suggest that these neutral conditions are likely to persist through the remainder of the year, although there is a probability of La Niña developing in the latter part of the fourth quarter of 2025.

Hydrological patterns during the first half of 2025 have varied across the region, reflecting the transition from weak La Niña conditions to ENSO-neutral, as well as localized atmospheric influences.

In Colombia, hydrological conditions have exceeded historical norms, resulting in elevated reservoir levels and increased hydroelectric output. This has reduced thermal dispatch requirements, lowered spot market prices, and mitigated drought-related risks.

System inflows in Panama have been near historical averages, with the exception of the Bayano reservoir which experienced above-average hydrology conditions. These favorable conditions may result in surplus hydroelectric generation beyond contracted volumes, enabling sales into the spot market.

AES' hydroelectric generation in Chile is primarily influenced by snowpack and winter precipitation in central regions. During the first half of 2025, both precipitation and snowpack levels were broadly in line with historical averages.

The exact behavior pattern and strength of weather transitions (from/to La Niña or El Niño) is unknown and therefore the impacts could vary from those described above, and may include impacts to our businesses beyond hydrology, including with respect to power generation from other renewable sources of energy and demand. Even if rainfall and water inflows remain in line with historical averages, in some cases, market prices and generation above or below the average could present due to a variety of factors related to demand, market dynamics, or regulatory impacts. Impacts may be material to our results of operations.

Macroeconomic and Political

During the past few years, some countries where our subsidiaries conduct business have experienced macroeconomic and political changes. In the event these trends continue, there could be an adverse impact on our businesses.

U.S. Tax Law Reform & Renewable Energy Tax Credits — On July 4, 2025, the U.S. enacted H.R. 1 (the "2025 Act"). The legislation significantly revised the laws governing U.S. renewable energy tax credits and the U.S. taxation of certain foreign earnings, which may impact our effective tax rate in future periods and could be material. In addition, the 2025 Act included amendments to, and extensions of, various other U.S. corporate income tax provisions including the determination of limitation on interest expense deductions. Any impact may change as U.S. Treasury and Internal Revenue Service ("IRS") issue additional guidance, which may be material.

The U.S. Inflation Reduction Act of 2022 (the "IRA") included provisions that benefited the U.S. clean energy industry, including increases, extensions, direct transfers, and/or new tax credits for onshore and offshore wind, solar, storage, and hydrogen projects. We account for U.S. renewables projects according to U.S. GAAP, which, when partnering with tax-equity investors to monetize tax benefits, utilizes the HLBV method. This method recognizes the value of the tax credit that benefits the tax equity investors at the time of its creation, which for projects utilizing the investment tax credit, begins in the quarter the renewables project is placed in service. For projects utilizing the production tax credit, this value is recognized over 10 years as the facility produces energy.

The 2025 Act amends the phase out of wind and solar ITC and PTC tax credits. Wind and solar renewables projects that begin construction within 12 months of the enactment of the 2025 Act remain eligible for 100% of the credit without the 2027 placed-in-service deadline, provided that, under current Treasury guidance, the projects are placed in service no more than four calendar years after the calendar year when construction began. Renewables projects that begin construction after 12 months of the enactment must be placed in service no later than 2027. Renewables projects that began construction by the end of 2024 are not impacted by the 2025 Act. The 2025 Act does not impose tighter timelines for energy storage projects to qualify for the ITC and PTC, and it allows energy storage projects to receive the full ITC or PTC credit if they begin construction by 2033.

The 2025 Act also imposes a foreign entity of concern restriction for renewables projects, including storage, claiming the ITC or PTC credit that start construction after December 31, 2025. This restriction precludes credits for projects which receive material assistance from a prohibited foreign entity and it effectively limits the percentage of total project costs that may be derived from products that are mined, produced or manufactured in China, with varying permissible percentages depending on the calendar year and applicable renewable technology for the project.

Further, President Trump issued an Executive Order on July 7, 2025 that directed the Secretary of the Treasury to take action to enforce the provisions of the 2025 Act (the "Treasury Action"). The Treasury Action would include enforcing the termination of the ITC and PTC for wind and solar projects and issuing guidance with respect to the determination of the beginning of construction and taking actions to implement and enhance the Foreign Entity of Concern ("FEOC") restrictions, in each case within 45 days of the enactment of the 2025 Act. The Executive Order also directed the Secretary of the Interior to take action to review its regulations, guidance, policies, and practices for any preferential treatment of wind and solar projects and eliminate those preferences within 45 days (the "Interior Action").

We expect the vast majority of our renewables project backlog to continue to qualify for the ITC and PTC. However, the Treasury Action may impose additional burdens in qualifying for the ITC and PTC.

In response to the Executive Order, the Department of Interior issued a memorandum requiring any "decisions, actions, consultations, and other undertakings" for wind or solar projects under Department of Interior jurisdiction to go through an additional three-phase approval process ending with approval from the Secretary of the Interior.

Our U.S. wind and solar projects are developed on private land and are designed in a manner that minimizes the potential of a federal nexus. However, due to the broad language of the memorandum, there may be some impact to projects developed on private land.

In 2024, we realized $1,313 million of earnings from Tax Attributes, comprised of $1,293 million from the Renewables SBU and $20 million from the Utilities SBU. In 2025, we expect an increase in earnings from Tax Attributes, mainly from our U.S. renewables business that is in line with the growth in that business. For the six months ended June 30, 2025, we recognized $562 million in Tax Attributes.

The enactment of the 2025 Act requires that substantial guidance be published by the U.S. Department of Treasury and other government agencies. While we have taken significant measures to protect against the impact of changes under the 2025 Act to the IRA, including by implementing a program designed to ensure our backlog of U.S. renewables projects satisfy IRS safe harbor requirements for qualifying for the ITCs and PTCs, the impacts of the 2025 Act, the Treasury Action, the Interior Action or future actions that have the effect of modifying or repealing the ITCs and PTCs or adversely impacting renewable energy projects may be material to our results of operations.

Net CFC Tested Income ("NCTI") — The 2025 Act amended the Global Intangible Low Taxed Income ("GILTI") provision by eliminating the reduction to foreign earnings subject to GILTI by an allowable economic return on investment beginning January 1, 2026. The GILTI provision was also renamed to the NCTI provision. Additionally, the 2025 Act modified the U.S. foreign tax credit provisions beginning January 1, 2026. Although the new NCTI rules provide for a reduced 14 percent effective tax rate on captured foreign income, by way of a 40 percent deduction, companies with a U.S. net operating loss or otherwise insufficient taxable income will not benefit from the lower effective tax rate and may not be able to utilize foreign tax credits. The new NCTI rules may subject a portion of our foreign earnings to current U.S. taxation in the future and could be material.

Limitation on Interest Expense Deductions — The 2025 Act retroactively amended the existing limitation on the deductibility of net interest expense beginning January 1, 2025. As amended, the deduction will be limited to interest income, plus 30% of tax basis EBITDA. Previously, the limitation was based on 30% of tax basis Earnings Before Interest and Taxes (EBIT). We expect the amendment to increase the current period permitted interest deductions and reduce the amount of disallowed interest expense subject to an indefinite carryforward. The limitation continues to be inapplicable to interest expense attributable to regulated utility property.

Global Tax — The macroeconomic and political environments in the U.S. and in some countries where our subsidiaries conduct business have changed in recent years. This could result in significant impacts to future tax law. In the U.S., the IRA included a 15% corporate alternative minimum tax ("CAMT") based on adjusted financial statement income. In June 2025, the IRS released interim guidance for CAMT and announced its intention to revise regulations that were proposed in September 2024. The impact to the Company in 2025 is not expected to be material. We will continue to monitor the issuance of CAMT revised guidance.

The Netherlands, Bulgaria, and Vietnam adopted legislation to implement Pillar 2 effective as of January 1, 2024. In June 2025, the Group of Seven ("G7") nations issued a statement that they will work together to modify the

Pillar 2 system in a manner that will fully exclude domestic and foreign profits of US-parented groups from Pillar 2's Undertaxed Profits Rule and Income Inclusion Rule. We will continue to monitor the issuance of draft legislation in other non-EU countries where the Company operates that are considering Pillar 2 amendments and new interpretive guidance.

Inflation — In the markets in which we operate, there have been higher rates of inflation recently. While most of our contracts in our international businesses that are denominated in a currency other than the U.S. dollar are indexed to inflation, in general, our U.S.-based generation contracts are not indexed to inflation. If inflation continues to increase in our markets, it may increase our expenses that we may not be able to pass through to customers. It may also increase the costs of some of our development projects that could negatively impact their competitiveness. Our utility businesses do allow for recovering of operations and maintenance costs through the regulatory process, which may have timing impacts on recovery.

Interest Rates — In the U.S. and other markets in which we operate, there has been a rise in interest rates since 2021, and interest rates are expected to remain volatile in the near term.

As discussed in Item 3.—*Quantitative and Qualitative Disclosures about Market Risk,* although most of our existing corporate and subsidiary debt is at fixed rates, an increase in interest rates can have several impacts on our business. For any existing debt under floating rate structures and any future debt refinancings, rising interest rates will increase future financing costs. In most cases in which we have floating rate debt, it is short term in nature or indexed to inflation, which helps mitigate the impact of rising rates. For future debt refinancings, AES actively manages a hedging program to reduce uncertainty and exposure to future interest rates. For new business, higher interest rates increase the financing costs for new projects under development and which have not yet secured financing.

AES typically seeks to incorporate expected financing costs into our new PPA pricing such that we maintain our target investment returns, but higher financing costs may negatively impact our returns or the competitiveness of some of our development projects. Additionally, we typically seek to enter into interest rate hedges shortly after signing PPAs to mitigate the risk of rising interest rates prior to securing long-term financing.

Argentina — In July 2024, the Argentine government enacted Law 27,742, known as Ley Bases, declaring a one-year public emergency in administrative, economic, financial, and energy matters. It grants the President delegated powers and initiates broad state reforms to deregulate the economy, including labor reform, the Incentive Regime for Large Investments, modifications to non-income tax measures, and the privatization of state-owned energy companies. Additionally, the Ministry of Energy issued Resolution 150/2024, repealing certain regulations from previous years that involved excessive state and CAMMESA intervention in the Wholesale Electricity Market ("MEM").

On January 28, 2025, the Energy Secretariat issued Resolution 21/2025 to reform the MEM and is intended to ensure secure energy supply and stable consumer costs.

On April 11, 2025, the Central Bank of Argentina started a new economic program supported by a $20 billion agreement with the International Monetary Fund. Of this amount, $15 billion will be available in 2025. The key points of the program include (a) a removal of exchange restrictions for individuals and (b) foreign shareholders can distribute profits starting from 2025 and deadlines for foreign trade payments are relaxed.

On July 4, 2025, the Argentine government issued Decree 450/25, initiating a 24-month transition period to reform and deregulate the country's electricity market. The decree encourages free contracting between private entities and fosters competition in electricity generation and commercialization.

These changes may have a profound impact on the sector, influencing our operations and financial results. It is not yet possible to predict the impact of these regulations in our consolidated results of operations, cash flows, and financial condition.

Puerto Rico — As discussed in Item 7.—*Management's Discussion and Analysis of Financial Condition and Results of Operations—Key Trends and Uncertainties* of the 2024 Form 10-K, our subsidiaries in Puerto Rico have long-term PPAs with state-owned PREPA, which has been facing economic challenges that could result in a material adverse effect on our business in Puerto Rico. Despite the Title III protection, PREPA has been making substantially all of its payments to the generators in line with historical payment patterns.

The Puerto Rico Oversight, Management, and Economic Stability Act ("PROMESA") was enacted to create a structure for exercising federal oversight over the fiscal affairs of U.S. territories and created procedures for

adjusting debt accumulated by the Puerto Rico government and, potentially, other territories (“Title III”). PROMESA also expedites the approval of key energy projects and other critical projects in Puerto Rico.

PROMESA allowed for the establishment of an Oversight Board with broad powers of budgetary and financial control over Puerto Rico. The Oversight Board filed for bankruptcy on behalf of PREPA under Title III in July 2017. As a result of the bankruptcy filing, AES Ilumina’s non-recourse debt of $21 million continues to be in technical default and is classified as current as of June 30, 2025.

In 2022, a mediation commenced to resolve the PREPA Title III case. On March 19, 2025, the judge presiding over the case entered an order to permit the filing of an amended plan of adjustment and litigation of specific issues, including administrative expense claim by non-settling bondholders. The stay of plan confirmation and bondholder rights-related litigation was extended without a termination date, and the non-settling bondholders' motion to lift the stay was denied. The PROMESA oversight board filed an amended plan of adjustment and disclosure statement for PREPA on March 28, 2025. The mediation period was extended through October 31, 2025.

Considering the information available as of the date hereof, management believes the carrying amount of our long-lived assets in Puerto Rico of $809 million is recoverable as of June 30, 2025.

Decarbonization Initiatives

Our strategy involves shifting towards clean energy platforms, including renewable energy, energy storage, LNG, and modernized grids. It is designed to position us for continued growth while reducing our carbon intensity and to be in support of our mission of accelerating the future of energy, together. We have made significant progress on our exit of coal generation, and by year-end 2025, we intend to have exited the substantial majority of our coal facilities that we owned in 2022. Due to a number of factors, including grid and market dynamics, we will continue to work towards exiting coal in the limited markets where we have coal generation. We currently anticipate these efforts will continue beyond 2027. We expect to further reduce the carbon intensity of our operations as we add more long-term contracted renewables to the grid each year.

In addition, initiatives have been announced by regulators, including in Chile, Puerto Rico, Bulgaria, and offtakers in recent years, with the intention of reducing GHG emissions generated by the energy industry. In parallel, the shift towards renewables has caused certain customers to migrate to other low-carbon energy solutions and this trend may continue.

Although we cannot currently estimate the financial impact of these decarbonization initiatives, new legislative or regulatory programs further restricting carbon emissions or other initiatives to voluntarily exit coal generation could require material capital expenditures, result in a reduction of the estimated useful life of certain coal facilities, or have other material adverse effects on our financial results.

For further information about the risks associated with decarbonization initiatives, see Item 1A.—*Risk Factors —Concerns about GHG emissions and the potential risks associated with climate change have led to increased regulation and other actions that could impact our businesses* included in the 2024 Form 10-K.

Regulatory

FERC, RTOs, and Interconnection Prioritization — On February 11, 2025, FERC approved PJM's request for a one-time change in its interconnection process to expedite the interconnection of a limited number of high-capacity resources to support near-term resource adequacy and grid reliability. This change to PJM's interconnection process is not expected to impact the PJM projects already in our backlog since they have received interconnection approvals. However, it will likely create uncertainty and delays in the time for interconnection approvals for our development pipeline of renewables projects in PJM. Other RTOs are considering similar proposals to expedite interconnection approvals for certain high-capacity resources or have received FERC approval for such expediting of interconnection approvals. See Item 1A.—*Risk Factors - Our development projects are subject to substantial uncertainties* included in the 2024 Form 10-K for further details.

AES Maritza PPA Review — DG Comp is conducting a preliminary review of whether AES Maritza’s PPA with NEK is compliant with the European Union's State Aid rules. No formal investigation has been launched by DG Comp to date. AES Maritza has previously engaged in discussions with the DG Comp case team and the Government of Bulgaria (“GoB”) to attempt to reach a negotiated resolution of the DG Comp’s review (“PPA Discussions”). There are no active PPA Discussions at present but those discussions could resume at any time. The PPA continues to remain in place. However, there can be no assurance that, in the context of DG Comp’s preliminary review or any future PPA Discussions, the other parties will not seek a prompt termination of the PPA.

We do not believe termination of the PPA is justified. Nevertheless, the PPA Discussions involved a range of potential outcomes, including but not limited to the termination of the PPA and payment of some level of compensation to AES Maritza. Any negotiated resolution would be subject to mutually acceptable terms, lender consent, and DG Comp approval. At this time, we cannot predict whether and when the PPA Discussions might resume or the outcome of any such discussions. Nor can we predict how DG Comp might resolve its review if the PPA Discussions do not resume or if any such discussions fail to result in an agreement concerning the agency's review. AES Maritza believes that its PPA is legal and in compliance with all applicable laws, and it will take all actions necessary to protect its interests, whether through negotiated agreement or otherwise. However, there can be no assurance that this matter will be resolved favorably; if it is not, there could be a material adverse effect on the Company's financial condition, results of operations, and cash flows. As of June 30, 2025, the carrying value of our long-lived assets at Maritza is $341 million.

AES Ohio Smart Grid Phase 2 Filing — In February 2024, AES Ohio filed a Smart Grid Phase 2 with the PUCO proposing a ten-year investment plan to begin after Smart Grid Phase 1 ends. On September 13, 2024, AES Ohio reached a settlement with the PUCO Staff and other parties on the pending Smart Grid Phase 2 Application and an evidentiary hearing was held on October 29, 2024. A fundamental premise of the application was the continued availability of rider recovery of Smart Grid investments through the plan period. However, with the recent enactment of Sub. H.B. 15 described below, which prohibits AES Ohio from applying for a new electric security plan which includes certain rider recovery mechanisms, as well as the near-term financial uncertainty created by the statute, AES Ohio withdrew its Smart Grid Phase 2 Application on May 23, 2025. This withdrawal will provide AES Ohio flexibility as to the timing and scope of Smart Grid investments to continue to deliver their benefits to customers.

AES Ohio Distribution Rate Case — On November 29, 2024, AES Ohio filed a new distribution rate case with the PUCO. The investments reflected in the distribution rate case include investments to enhance the safety, reliability, and resilience of the distribution system. Among other matters, the application requests: (i) an increase to its annual distribution revenue requirement of $235 million, which incorporates certain investments that are currently recovered through the Distribution Investment Rider; (ii) a return on equity of 10.95% and a cost of long-term debt of 4.49% on a distribution rate base of $1.3 billion and based on a capital structure of 53.87% equity and 46.13% long-term debt; and (iii) a date certain of September 30, 2024 and a test period of June 1, 2024 – May 31, 2025. The rate case application also includes a proposal for increased tree-trimming expenses. On June 27, 2025, the PUCO Staff submitted their Report and Recommendations; the PUCO has set the evidentiary hearing to begin September 9, 2025.

AES Ohio Legislation — On April 30, 2025, the Ohio legislature passed a new energy legislation (H.B. 15) that was signed by the Governor and will be effective on August 14, 2025. The legislation allows Ohio's electric utilities to file three-year forecasted base distribution rate cases, which would replace electric security plans and associated recovery riders. Among other provisions, the legislation eliminates the Legacy Generation Resource (LGR) Rider, which allows for recovery of net OVEC costs and revenues. Changes to the regulatory framework from this legislation, including not recovering any remaining regulatory asset balance amount or future net OVEC costs and revenue, could be material to our results of operations, financial condition, and cash flows. As of June 30, 2025, AES Ohio established a reserve of $3.2 million for the LGR regulatory asset.

AES Indiana Rate Case Filing — On June 3, 2025, AES Indiana filed a petition with the IURC for authority to increase its basic rates and charges. If approved, AES Indiana's proposed revenue increase will be implemented in two phases: $85.4 million, or 4.5%, in 2026, and $107.5 million, or 5.6%, in 2027. A hearing on this petition is expected to be held in November 2025. We expect to receive an order from the IURC and place new rates into effect by the end of the second quarter of 2026.

Foreign Exchange Rates

We operate in multiple countries and as such are subject to volatility in exchange rates at varying degrees at the subsidiary level and between our functional currency, the USD, and currencies of the countries in which we operate.

The overall economic climate in Argentina has been volatile, resulting in increased risk that a further significant devaluation of the Argentine peso against the USD, similar to the devaluations experienced by the country in 2018, 2019, and 2023, may occur. A continued trend of peso devaluation could result in increased inflation, a deterioration of the country's risk profile, and other adverse macroeconomic effects that could significantly impact our results of operations. For additional information, refer to Item 3.—*Quantitative and Qualitative Disclosures About Market Risk*.

Impairments and Realizability

Long-lived Assets and Current Assets Held-for-Sale — During the six months ended June 30, 2025, the Company recognized asset impairment expense of $121 million. See Note 16—*Asset Impairment Expense* included in Item 1.—*Financial Statements* of this Form 10-Q for further information. After recognizing this impairment expense, the carrying value of long-lived assets and current assets held-for-sale that were assessed for impairment totaled $31 million at June 30, 2025.

Events or changes in circumstances that may necessitate recoverability tests and potential impairments of long-lived assets may include, but are not limited to, adverse changes in the regulatory environment, unfavorable changes in power prices or fuel costs, increased competition due to additional capacity in the grid, technological advancements, declining trends in demand, evolving industry expectations to transition away from fossil fuel sources for generation, or an expectation it is more likely than not the asset will be disposed of before the end of its estimated useful life.

Tax Asset Realizability — Certain AES Chilean businesses have recorded net deferred tax assets ("DTA") of $245 million relating primarily to net operating loss carryforwards, which are not subject to expiration. Their realization is dependent on generating sufficient taxable income. At this time, management believes it is more likely than not that all of the DTA will be realized; however, it could be reduced by way of valuation allowance in the near term if estimates of future taxable income are reduced.

Environmental

The Company is subject to numerous environmental laws and regulations in the jurisdictions in which it operates. The Company faces certain risks and uncertainties related to these environmental laws and regulations, including existing and potential GHG legislation or regulations, and actual or potential laws and regulations pertaining to water discharges, waste management (including disposal of coal combustion residuals) and certain air emissions, such as SO_2, NO_x, particulate matter, mercury, and other hazardous air pollutants, and species and habitat protections. Such risks and uncertainties could result in increased capital expenditures or other compliance costs which could have a material adverse effect on certain of our U.S. or international subsidiaries and our consolidated results of operations. For further information about these risks, see Item 1A.—*Risk Factors—Our operations are subject to significant government regulation and could be adversely affected by changes in the law or regulatory schemes; Several of our businesses are subject to potentially significant remediation expenses, enforcement initiatives, private party lawsuits and reputational risk associated with CCR; Our businesses are subject to stringent environmental laws, rules and regulations;* and *Concerns about GHG emissions and the potential risks associated with climate change have led to increased regulation and other actions that could impact our businesses* included in the 2024 Form 10-K.

CSAPR — CSAPR addresses the “good neighbor” provision of the CAA, which prohibits sources within each state from emitting any air pollutant in an amount which will contribute significantly to any other state’s nonattainment, or interference with maintenance of, any NAAQS. The CSAPR required significant reductions in SO_2 and NO_x emissions from power plants in many states in which subsidiaries of the Company operate. The Company is required to comply with the CSAPR in certain states, including Indiana and Maryland. The CSAPR is implemented, in part, through a market-based program under which compliance may be achievable through the acquisition and use of emissions allowances created by the EPA. The Company complies with CSAPR through operation of existing controls and purchases of allowances on the open market, as needed.

In October 2016, the EPA published a final rule to update the CSAPR to address the 2008 ozone NAAQS (“CSAPR Update Rule”). The CSAPR Update Rule found that NO_x ozone season emissions in 22 states (including Indiana and Maryland) affected the ability of downwind states to attain and maintain the 2008 ozone NAAQS, and, accordingly, the EPA issued federal implementation plans that both updated existing CSAPR NO_x ozone season emission budgets for electric generating units (“EGUs”) within these states and implemented these budgets through modifications to the CSAPR NO_x ozone season allowance trading program. Implementation started in the 2017 ozone season (May-September 2017). Affected facilities receive fewer ozone season NO_x allowances in 2017 and later, possibly resulting in the need to purchase additional allowances. Following legal challenges to the CSAPR Update Rule, on April 30, 2021, the EPA issued the Revised CSAPR Update Rule. The Revised CSAPR Update Rule required affected EGUs within certain states (including Indiana and Maryland) to participate in a new trading program, the CSAPR NO_x Ozone Season Group 3 trading program. These affected EGUs received fewer NO_x Ozone Season allowances beginning in 2021.

On June 5, 2023, the EPA published a final Federal Implementation Plan ("FIP") to address air quality impacts

with respect to the 2015 Ozone NAAQS. The rule establishes a revised CSAPR NO_x Ozone Season Group 3 trading program for 22 states, including Indiana and Maryland, and became effective during 2023. The FIP also includes enhancements to the revised Group 3 trading program, which include a dynamic budget setting process beginning in 2026, annual recalibration of the allowance bank to reflect changes to affected sources, a daily backstop emissions rate limit for certain coal-fired EGUs beginning in 2024, and a secondary emissions limit prohibiting certain emissions associated with state assurance levels. It is too early to determine the impact of the final FIP, but it may result in the need to purchase additional allowances or make operational adjustments. On June 27, 2024, the U.S. Supreme Court issued an order granting a stay of the EPA's 2023 FIP pending resolution of legal challenges to the FIP.

While the Company's additional CSAPR compliance costs to date have been immaterial, the future availability of and cost to purchase allowances to meet the emission reduction requirements is uncertain at this time, but it could be material.

Mercury and Air Toxics Standard — In April 2012, the EPA's rule to establish maximum achievable control technology standards for hazardous air pollutants regulated under the CAA emitted from coal and oil-fired electric utilities, known as "MATS", became effective and AES facilities implemented measures to comply, as applicable. On May 7, 2024, the EPA published a final rule to revise MATS for coal and oil-fired EGUs. The final rule became effective on July 8, 2024. The final rule lowers certain emissions limits and revises certain other aspects of MATS. The MATS RTR Rule is subject to legal challenges. On October 4, 2024, the U.S. Supreme Court denied emergency stay applications. On June 17, 2025, the EPA published a proposed rule to repeal the majority of the May 7, 2024 final rule revising MATS.

Further rulemakings and/or proceedings are possible; however, in the meantime, MATS remains in effect. We currently cannot predict the outcome of the regulatory or judicial process, or its impact, if any, on our MATS compliance planning or ultimate costs.

Climate Change Regulation — The final NSPS for CO_2 emissions from new, modified, and reconstructed fossil-fuel-fired power plants were published in the *Federal Register* on October 23, 2015. Several states and industry groups challenged the NSPS for CO_2 in the D.C. Circuit Court. On December 20, 2018, the EPA published proposed revisions to the final NSPS for new, modified, and reconstructed coal-fired electric utility steam generating units. The EPA proposed that the Best System of Emissions Reduction ("BSER") for these units is highly efficient generation that would be equivalent to supercritical steam conditions for larger units and sub-critical steam conditions for smaller units, and not partial carbon capture and sequestration ("CCS"), which had been the BSER for these units in the 2015 final NSPS. The EPA did not include revisions for natural-gas combined cycle or simple cycle units in the December 20, 2018 proposal. Challenges to the GHG NSPS remain held in abeyance at this time. On May 9, 2024, the EPA published the final NSPS requiring carbon capture and sequestration for new and reconstructed baseload stationary combustion turbines, among other requirements. The EPA did not finalize revisions to the NSPS for newly constructed or reconstructed coal-fired electric utility steam generating units as proposed in 2018.

On July 8, 2019, the EPA published the final Affordable Clean Energy ("ACE") Rule which would have established CO_2 emission rules for existing power plants under CAA Section 111(d) and would have replaced the EPA's 2015 Clean Power Plan Rule ("CPP"). However, on January 19, 2021, the D.C. Circuit vacated and remanded the ACE Rule. Subsequently, on June 30, 2022, the Supreme Court reversed the judgment of the D.C. Circuit Court and remanded for further proceedings consistent with its opinion holding that the "generation shifting" approach in the CPP exceeded the authority granted to the EPA by Congress under Section 111(d) of the CAA. As a result of the June 30, 2022 Supreme Court decision, on October 27, 2022, the D.C. Circuit issued a partial mandate, holding pending challenges to the ACE Rule in abeyance while the EPA developed a replacement rule. On May 23, 2023, the EPA published a proposed rule that would vacate the ACE Rule and proposed New Source Performance Standards ("NSPSs") that would establish emissions guidelines in the form of CO_2 emissions limitations for certain existing EGUs and would require states to develop State Plans that establish standards of performance for such EGUs that are at least as stringent as the EPA's emissions guidelines. Depending on various EGU-specific factors, the bases of proposed emissions guidelines range from routine methods of operation to carbon capture and sequestration or co-firing low-GHG hydrogen starting in the 2030s. On May 9, 2024, the EPA published the final rule regulating GHGs from existing EGUs pursuant to Section 111(d) of the Clean Air Act and effective on July 8, 2024. Existing EGUs are those that were constructed prior to January 8, 2014. Depending on various EGU-specific factors, the bases of emissions guidelines for natural gas-fired units include the use of uniform fuels and routine methods of operation and maintenance and the bases of emissions guidelines for coal-fired units include 40% natural gas co-firing or carbon capture and sequestration with 90% capture of CO_2 depending on the date that coal operations cease. Specific standards for performance for EGUs will be established through a State Plan (or a

Federal Plan if a state were to not submit an approvable plan). The May 2024 rule is subject to legal challenges. On October 16, 2024, the U.S. Supreme Court denied emergency stay applications.

On June 17, 2025, the EPA published a proposed rule to repeal the May 9, 2024 final rules for new and existing EGUs in addition to 2015 greenhouse gas NSPSs for certain new EGUs. In this proposed rule, the EPA also offered an alternative proposal to repeal a narrower set of greenhouse gas requirements which would include the repeal of requirements for existing EGUs and requirements based on carbon capture and sequestration for new EGUs.

The impact of the rules, the results of further proceedings, and potential future greenhouse gas emissions regulations remain uncertain but could be material.

Waste Management — On October 19, 2015, an EPA rule regulating CCR under the Resource Conservation and Recovery Act as nonhazardous solid waste became effective. The rule established nationally applicable minimum criteria for the disposal of CCR in new and currently operating landfills and surface impoundments, including location restrictions, design and operating criteria, groundwater monitoring, corrective action and closure requirements, and post-closure care. The primary enforcement mechanisms under this regulation would be actions commenced by the states and private lawsuits. On December 16, 2016, the Water Infrastructure Improvements for the Nation Act ("WIIN Act") was signed into law. This includes provisions to implement the CCR rule through a state permitting program, or if the state chooses not to participate, a possible federal permit program. If this rule is finalized before Indiana or Puerto Rico establishes a state-level CCR permit program, AES CCR units in those locations could eventually be required to apply for a federal CCR permit from the EPA. The EPA has indicated that it will implement a phased approach to amending the CCR Rule, which is ongoing. On August 28, 2020, the EPA published final amendments to the CCR Rule titled "A Holistic Approach to Closure Part A: Deadline to Initiate Closure," that, among other amendments, required certain CCR units to cease waste receipt and initiate closure by April 11, 2021. The CCR Part A Rule also allowed for extensions of the April 11, 2021 deadline if the EPA determines certain criteria are met. Facilities seeking such an extension were required to submit a demonstration to the EPA by November 30, 2020. On January 11, 2022, the EPA released the first in a series of proposed determinations regarding CCR Part A Rule demonstrations and compliance-related letters notifying certain other facilities of their compliance obligations under the federal CCR regulations. The determinations and letters include interpretations regarding implementation of the CCR Rule. On April 8, 2022, petitions for review were filed challenging these EPA actions. The petitions are consolidated in *Electric Energy, Inc. v. EPA*. On June 28, 2024, the D.C. Circuit dismissed the challenges. It is too early to determine the direct or indirect impact of these letters or any determinations that may be made.

On May 18, 2023, the EPA published a proposed rule that would expand the scope of CCR units regulated by the CCR Rule to include inactive surface impoundments at inactive generating facilities as well as additional inactive and closed landfills and certain other accumulations of CCR. On May 8, 2024, the EPA published final revisions to the CCR rule which are effective on November 8, 2024. The final revisions expand the scope of CCR units regulated by the CCR rule to include legacy surface impoundments, inactive surface impoundments, and CCR management units. On July 22, 2025, the EPA published both a direct final rule and a proposed rule that, if finalized, would extend certain deadlines for CCR management units associated with its May 8, 2024 revisions to the CCR Rule. It is too early to determine the potential impact.

On February 20, 2020, the EPA published a proposed rule to establish a federal CCR permit program that would operate in states without approved CCR permit programs. If this rule is finalized before Indiana establishes a final state-level CCR permit program, AES Indiana could eventually be required to apply for a federal CCR permit from the EPA. On December 21, 2022, the Indiana Department of Environmental Management (“IDEM”) published in the Indiana Register a Second Notice of Comment Period for its proposed CCR rulemaking which would include regulation of CCR through a state permitting program. On August 7, 2024, in response to changes to Indiana statute, as well as comments received during the Second Notice of Comment Period, IDEM published a Continuation of the Second Notice of Comment Period for proposed amendments to the draft rule language for a State CCR Permitting Program.

The CCR rule, current or proposed amendments to or interpretations of the CCR rule, the results of groundwater monitoring data, or the outcome of CCR-related litigation could have a material impact on our business, financial condition, and results of operations. AES Indiana would seek recovery of any resulting expenditures; however, there is no guarantee we would be successful in this regard.

Cooling Water Intake — The Company's facilities are subject to a variety of rules governing water use and discharge. In particular, the Company's U.S. facilities are subject to the CWA Section 316(b) rule issued by the EPA effective in 2014 that seeks to protect fish and other aquatic organisms drawn into cooling water systems at power

plants and other facilities. These standards require affected facilities to choose among seven BTA options to reduce fish impingement. In addition, certain facilities must conduct studies to assist permitting authorities to determine whether and what site-specific controls, if any, would be required to reduce entrainment of aquatic organisms. It is possible that this process, which includes permitting and public input, could result in the need to install closed-cycle cooling systems (closed-cycle cooling towers) or other technology. Finally, the standards require that new units added to an existing facility to increase generation capacity are required to reduce both impingement and entrainment. It is not yet possible to predict the total impacts of this final rule at this time, including any challenges to such final rule and the outcome of any such challenges. However, if additional capital expenditures are necessary, they could be material.

Certain AES Southland OTC units were required to be retired to provide interconnection capacity and/or emissions credits prior to startup of new (air cooled) generating units, and the remaining AES OTC generating units in California have been or will be shut down and permanently retired by the applicable OTC Policy compliance dates for the respective units. The SWRCB OTC Policy currently requires the shutdown and permanent retirement of the remaining OTC generating units at AES Huntington Beach, LLC and AES Alamitos, LLC by December 31, 2026, as extended in support of grid reliability. This extension compliance date is contingent upon the facilities participating in the Strategic Reserve established by AB 205.

Power plants are required to comply with the more stringent of state or federal requirements. At present, the California state requirements are more stringent and have earlier compliance dates than the federal EPA requirements, and are therefore applicable to the Company's California assets. The Company anticipates that compliance with CWA Section 316(b) regulations and associated costs could have a material impact on our consolidated financial condition or results of operations.

Water Discharges — In June 2015, the EPA and the U.S. Army Corps of Engineers ("the Agencies") published a rule defining federal jurisdiction over waters of the U.S., known as the "Waters of the U.S." (“WOTUS”) rule. WOTUS defines the geographic reach and authority of the Agencies to regulate streams, wetlands, and other water bodies under the CWA. There have been multiple Supreme Court decisions and dueling regulatory definitions over the past several years concerning the proper standard for how to properly determine whether a wetland or stream that is not navigable is considered a WOTUS. On May 25, 2023, the U.S. Supreme Court rendered a decision (“Decision”) in the case of *Sackett v. Environmental Protection Agency*, addressing the definition of WOTUS with regards to the CWA. This decision provides a clear standard that substantially restricts the Agencies' ability to regulate certain types of wetlands and streams. Specifically, under this decision, wetlands that do not have a continuous surface connection with traditional interstate navigable water are not federally jurisdictional.

On September 8, 2023, the Agencies published final rule amendments in the Federal Register to amend the final “Revised Definition of ‘Waters of the United States’” rule. This final rule conforms the definition to the definition adopted in the Decision. The Agencies have amended key aspects of the regulatory text to conform the rule to the Decision. On March 12, 2025, the Agencies issued a joint guidance memorandum for implementing “continuous surface connection” consistent with the Decision and related issues. The Federal Register notice was published on March 24, 2025 outlining a process to gather recommendations for implementation of WOTUS. It is too early to determine whether the outcome of litigation or current or future revisions to rules interpreting federal jurisdiction over WOTUS may have a material impact on our business, financial condition, or results of operations.

In November 2015, the EPA published its final ELG rule to reduce toxic pollutants discharged into waters of the U.S. by steam-electric power plants through technology applications. These effluent limitations for existing and new sources include dry handling of fly ash, closed-loop or dry handling of bottom ash, and more stringent effluent limitations for flue gas desulfurization wastewater. AES Indiana Petersburg has installed a dry bottom ash handling system in response to the CCR rule and wastewater treatment systems in response to the NPDES permits in advance of the ELG compliance date. Other U.S. businesses already include dry handling of fly ash and bottom ash and do not generate flue gas desulfurization wastewater. Following the 2019 U.S. Court of Appeals vacatur and remand of portions of the 2015 ELG rule related to leachate and legacy water, on March 29, 2023, the EPA published a proposed rule revising the 2020 Reconsideration Rule. On May 9, 2024, the EPA published a final rule which became effective on July 8, 2024. The final rule established more stringent best available technology limits for flue gas desulfurization wastewater, bottom ash transport water, and combustion residual leachate and established a new set of definitions and new limits for combustion residual leachate and legacy wastewater. The May 2024 rule is subject to legal challenges. On October 10, 2024, the Eighth Circuit Court denied stay applications. It is too early to determine whether any outcome of litigation or current or future revisions to the ELG rule might have a material impact on our business, financial condition, and results of operations.

U.S. Executive Actions Affecting Environmental Regulations — On January 20, 2025, President Trump issued an Executive Order directing Agencies to, among other tasks, review regulations issued under the prior administration to determine whether they should be suspended, revised, or rescinded. President Trump also issued a Memorandum directing agencies to refrain from proposing or issuing any rules until the current administration has reviewed and approved those rules. In accordance with these and other Executive Orders, on March 12, 2025, the EPA released a list of environmental regulations that will be targeted for reconsideration and other deregulatory action. These and other actions, including other Executive Orders and directives from the administration, may have an impact on regulations and permitting processes that may affect our business, financial condition, or results of operations.

Capital Resources and Liquidity

Overview

As of June 30, 2025, the Company had unrestricted cash and cash equivalents of $1.4 billion, of which $9 million was held at the Parent Company and qualified holding companies. The Company had restricted cash and debt service reserves of $851 million. The Company also had non-recourse and recourse aggregate principal amounts of debt outstanding of $23.9 billion and $5.8 billion, respectively. Of the $2.7 billion of our current non-recourse debt, $2.6 billion was presented as such because it is due in the next twelve months and $175 million relates to debt considered in default. AES Puerto Rico is in payment default. All other defaults are not payment defaults but are instead technical defaults triggered by failure to comply with covenants or other requirements contained in the non-recourse debt documents. See Note 8—*Obligations* in Item 1.—*Financial Statements* of this Form 10-Q for additional detail. As of June 30, 2025, the Company also had $621 million outstanding related to supplier financing arrangements.

We expect current maturities of non-recourse debt, recourse debt, and amounts due under supplier financing arrangements to be repaid from net cash provided by operating activities of the subsidiary to which the liability relates, through opportunistic refinancing activity, or some combination thereof. We have $990 million in recourse debt which matures within the next twelve months, including $67 million in outstanding borrowings under the commercial paper program. Furthermore, we have $393 million due under supplier financing arrangements that have a guarantee, $216 million guaranteed by the Parent Company and $177 million guaranteed by subsidiaries. From time to time, we may elect to repurchase our outstanding debt through cash purchases, privately negotiated transactions, or otherwise when management believes that such securities are attractively priced. Such repurchases, if any, will depend on prevailing market conditions, our liquidity requirements, and other factors. The amounts involved in any such repurchases may be material.

We rely mainly on long-term debt obligations to fund our construction activities. We have, to the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and investments required to construct and acquire our electric power plants, distribution companies, and related assets. Our non-recourse financing is designed to limit cross-default risk to the Parent Company or other subsidiaries and affiliates. Our non-recourse long-term debt is a combination of fixed and variable interest rate instruments. Debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. In certain cases, the currency is matched through the use of derivative instruments. The majority of our non-recourse debt is funded by international commercial banks, with debt capacity supplemented by multilaterals and local regional banks.

Given our long-term debt obligations, the Company is subject to interest rate risk on debt balances that accrue interest at variable rates. When possible, the Company will borrow funds at fixed interest rates or hedge its variable rate debt to fix its interest costs on such obligations. In addition, the Company has historically tried to maintain at least 70% of its consolidated long-term obligations at fixed interest rates, including fixing the interest rate through the use of interest rate swaps. These efforts apply to the notional amount of the swaps compared to the amount of related underlying debt. Additionally, commercial paper issuances are short-term in nature and subject the Parent Company to interest rate risk at the time of refinancing the paper. On a consolidated basis, of the Company's $30 billion of total gross debt outstanding as of June 30, 2025, approximately $9.2 billion accrues interest at variable rates. The Company actively hedges its current and expected variable rate exposure through a combination of currently effective and forward starting interest rate swaps. As of June 30, 2025, the total maximum outstanding amount of hedges protecting the company against current and expected variable rate exposure was $9.4 billion. These hedges generally provide economic protection through the entire expected life of the projects, regardless of the type of debt issued to finance construction or refinance the projects in the future.

In addition to utilizing non-recourse debt at a subsidiary level when available, the Parent Company provides a portion, or in certain instances all, of the remaining long-term financing or credit required to fund development, construction, or acquisition of a particular project. These investments have generally taken the form of equity investments or intercompany loans, which are subordinated to the project's non-recourse loans. We generally obtain the funds for these investments from our cash flows from operations, proceeds from the sales of assets and/or the proceeds from our issuances of debt, common stock, and other securities. Similarly, in certain of our businesses, the Parent Company may provide financial guarantees or other credit support for the benefit of counterparties who have entered into contracts for the purchase or sale of electricity, equipment, or other services with our subsidiaries or lenders. In such circumstances, if a business defaults on its payment or supply obligation, the Parent Company will be responsible for the business' obligations up to the amount provided for in the relevant guarantee or other credit support. As of June 30, 2025, the Parent Company had provided outstanding financial and performance-related guarantees or other credit support commitments to or for the benefit of our businesses, which were limited by the terms of the agreements, of approximately $4.7 billion in aggregate (excluding those collateralized by letters of credit and other obligations discussed below).

Some counterparties may be unwilling to accept our general unsecured commitments to provide credit support. Accordingly, with respect to both new and existing commitments, the Parent Company may be required to provide some other form of assurance, such as a letter of credit, to backstop or replace our credit support. The Parent Company may not be able to provide adequate assurances to such counterparties. To the extent we are required and able to provide letters of credit or other collateral to such counterparties, this will reduce the amount of credit available to us to meet our other liquidity needs. As of June 30, 2025, we had $310 million in letters of credit under bilateral agreements, $163 million in letters of credit outstanding provided under our unsecured credit facilities, and $48 million in letters of credit outstanding provided under our revolving credit facilities. These letters of credit operate to guarantee performance relating to certain project development and construction activities and business operations. During the quarter ended June 30, 2025, the Company paid letter of credit fees ranging from 1% to 3% per annum on the outstanding amounts.

Additionally, in connection with certain project financings, some of the Company's subsidiaries have expressly undertaken limited obligations and commitments. These contingent contractual obligations are issued at the subsidiary level and are non-recourse to the Parent Company. As of June 30, 2025, the maximum undiscounted potential exposure to guarantees and letters of credit issued by our subsidiaries was $5.6 billion, including $1.9 billion of customary payment guarantees under EPC contracts and other agreements, $1.6 billion of letters of credit outstanding, $1.3 billion of surety bonds and other guarantees issued by insurance companies, and $816 million of tax equity financing related guarantees.

We expect to continue to seek, where possible, non-recourse debt financing in connection with the assets or businesses that we or our affiliates may develop, construct, or acquire. However, depending on local and global market conditions and the unique characteristics of individual businesses, non-recourse debt may not be available on economically attractive terms or at all. If we decide not to provide any additional funding or credit support to a subsidiary project that is under construction or has near-term debt payment obligations and that subsidiary is unable to obtain additional non-recourse debt, such subsidiary may become insolvent, and we may lose our investment in that subsidiary. Additionally, if any of our subsidiaries lose a significant customer, the subsidiary may need to withdraw from a project or restructure the non-recourse debt financing. If we or the subsidiary choose not to proceed with a project or are unable to successfully complete a restructuring of the non-recourse debt, we may lose our investment in that subsidiary.

Many of our subsidiaries depend on timely and continued access to capital markets to manage their liquidity needs. The inability to raise capital on favorable terms, to refinance existing indebtedness, or to fund operations and other commitments during times of political or economic uncertainty may have material adverse effects on the financial condition and results of operations of those subsidiaries. In addition, changes in the timing of tariff increases or delays in the regulatory determinations under the relevant concessions could affect the cash flows and results of operations of our businesses.

Long-Term Receivables

As of June 30, 2025, the Company had approximately $110 million of gross accounts receivable classified as *Other noncurrent assets*. These noncurrent receivables mostly consist of accounts receivable in the U.S. and Chile that, pursuant to amended agreements or government resolutions, have collection periods that extend beyond June 30, 2026, or one year from the latest balance sheet date. Noncurrent receivables in the U.S. pertain primarily to the sale of the Redondo Beach land. Noncurrent receivables in Chile pertain primarily to payment deferrals granted to mining customers as part of our green blend agreements. See Note 5—*Financing Receivables* in Item 1.—*Financial Statements* of this Form 10-Q for further information.

As of June 30, 2025, the Company had a $905 million loan receivable related to the Mong Duong facility in Vietnam, which was constructed under a build, operate, and transfer contract. This loan receivable represents contract consideration related to the construction of the facility, which was substantially completed in 2015, and will be collected over the 25-year term of the plant's PPA. Of the loan receivable balance, $105 million was classified in *Other current assets* and $800 million was classified in *Loan receivable* on the Condensed Consolidated Balance Sheets. See Note 5—*Financing Receivables* and Note 14—*Revenue* in Item 1.—*Financial Statements* of this Form 10-Q for further information.

Cash Sources and Uses

The primary sources of cash for the Company in the six months ended June 30, 2025 were debt financings, cash flows from operating activities, sales to noncontrolling interests, purchases under supplier financing arrangements, and issuance of preferred shares in subsidiaries. The primary uses of cash in the six months ended June 30, 2025 were repayments of debt, capital expenditures, and repayments of obligations under supplier financing arrangements.

The primary sources of cash for the Company in the six months ended June 30, 2024 were debt financings, purchases under supplier financing arrangements, and cash flows from operating activities. The primary uses of cash in the six months ended June 30, 2024 were capital expenditures, repayments of debt, and repayments of obligations under supplier financing arrangements.

A summary of cash-based activities is as follows (in millions):

	Six Months Ended June 30,	
Cash Sources:	**2025**	**2024**
Issuance of non-recourse debt	$ 2,332	$ 3,798
Borrowings under the revolving credit facilities	2,128	4,003
Net cash provided by operating activities	1,521	679
Sales to noncontrolling interests	1,138	323
Issuance of recourse debt	800	950
Purchases under supplier financing arrangements	567	708
Issuance of preferred shares in subsidiaries	452	—
Commercial paper borrowings (repayments), net	67	690
Sale of short-term investments	52	534
Other	375	121
Total Cash Sources	$ 9,432	$ 11,806
Cash Uses:		
Capital expenditures [1]	$ (2,586)	$ (3,833)
Repayments under revolving credit facilities	(2,398)	(2,582)
Repayments of non-recourse debt	(1,490)	(2,726)
Repayments of obligations under supplier financing arrangements	(862)	(1,055)
Repayments of recourse debt	(774)	—
Distributions to noncontrolling interests	(338)	(128)
Dividends paid on AES common stock	(250)	(238)
Purchase of emissions allowances	(234)	(91)
Purchase of short-term investments	(36)	(604)
Other	(302)	(391)
Total Cash Uses	$ (9,270)	$ (11,648)
Net increase in Cash, Cash Equivalents, and Restricted Cash	$ 162	$ 158

[1] Includes interest capitalized on development and construction of $242 million and $327 million for the six months ended June 30, 2025 and 2024, respectively. Of the total capitalized, $232 million and $293 million, respectively, are related to recourse and non-recourse debt interest payments. The remaining capitalized interest is primarily related to supplier financing arrangements. Interest capitalized during development and construction decreased primarily due to fewer projects in development at the Renewables SBU.

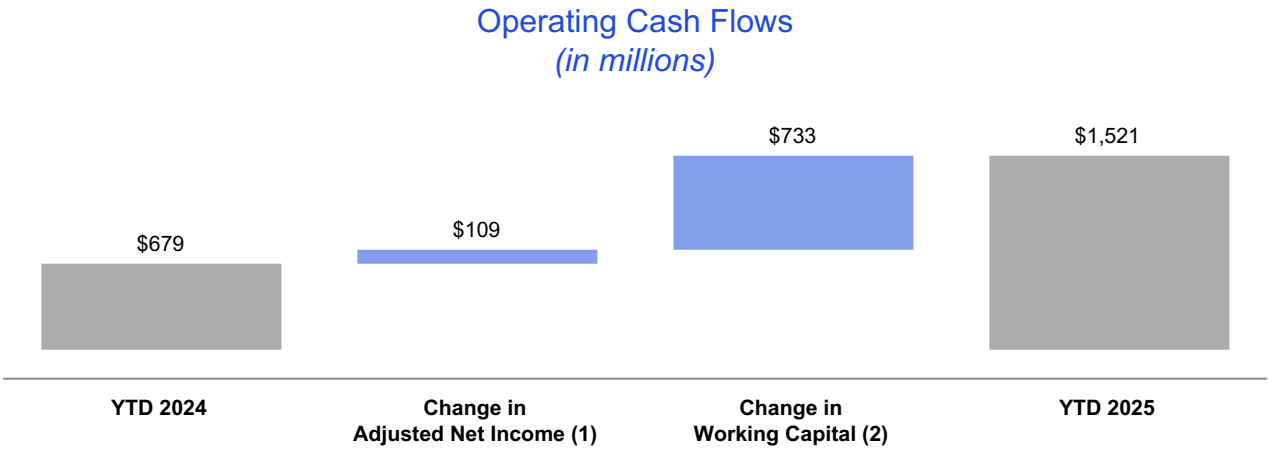
Consolidated Cash Flows

The following table reflects the changes in operating, investing, and financing cash flows for the comparative six-month period (in millions):

	Six Months Ended June 30,		
Cash flows provided by (used in):	**2025**	**2024**	**$ Change**
Operating activities	$ 1,521	$ 679	$ 842
Investing activities	(2,882)	(4,224)	1,342
Financing activities	1,462	3,759	(2,297)

Operating Activities

Net cash provided by operating activities increased $842 million for the six months ended June 30, 2025, compared to the six months ended June 30, 2024.



(1) The change in adjusted net income is defined as the variance in *net income*, net of the total *adjustments to net income* as shown on the Condensed Consolidated Statements of Cash Flows in Item 1.—*Financial Statements* of this Form 10-Q.

(2) The change in working capital is defined as the variance in total *changes in operating assets and liabilities* as shown on the Condensed Consolidated Statements of Cash Flows in Item 1.—*Financial Statements* of this Form 10-Q.

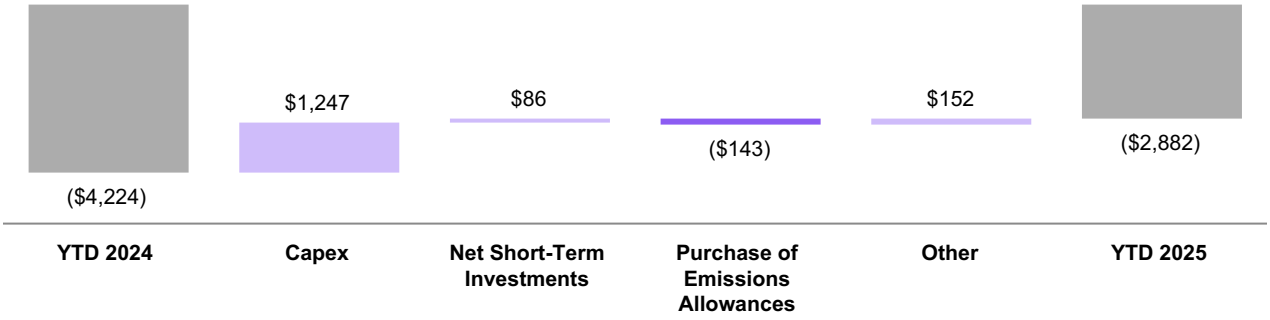
- Adjusted net income increased $109 million, primarily due to increased proceeds from the transfer of U.S. investment tax credits, and a decrease in cash paid for interest and income taxes, partially offset by lower margin at our Energy Infrastructure SBU.
- Change in working capital increased $733 million, primarily due to a decrease in accounts receivable due to the timing of collections and billings, a decrease in prepaid expense and other assets due to the timing of collection of tax credit transfer proceeds and proceeds from interest rate swap settlements, an increase in accounts payable due to the timing of payments, an increase in accrued interest due to higher debt balances and interest rates, and an impact from changes in income tax payable mainly due to lower taxable income in 2024 and timing of advanced tax payments in Colombia, as well as higher VAT at Maritza. These increases were partially offset by the prior year sale of financing receivables under the Warrior Run PPA termination agreement.

Cause No. 46258
Attachment ALB-7
Page 7243 of 7300

Investing Activities

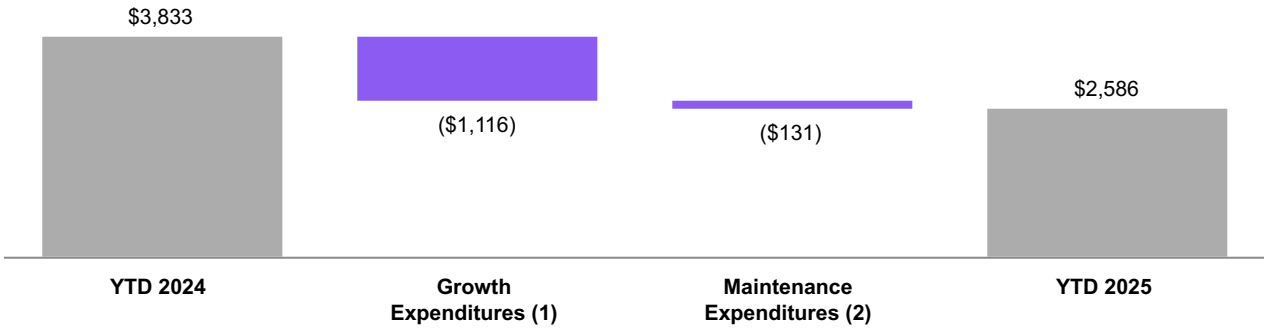
Net cash used in investing activities decreased $1.3 billion for the six months ended June 30, 2025, compared to the six months ended June 30, 2024.

Investing Cash Flows
(in millions)



- Cash from short-term investing activities increased $86 million, primarily due to the sale of AES Brasil in October 2024 and the timing of deposits at AES Global Insurance.
- Purchase of emissions allowances increased $143 million primarily due to higher CO_2 purchases at Maritza.
- Capital expenditures decreased $1.2 billion, discussed further below.

Capital Expenditures
(in millions)



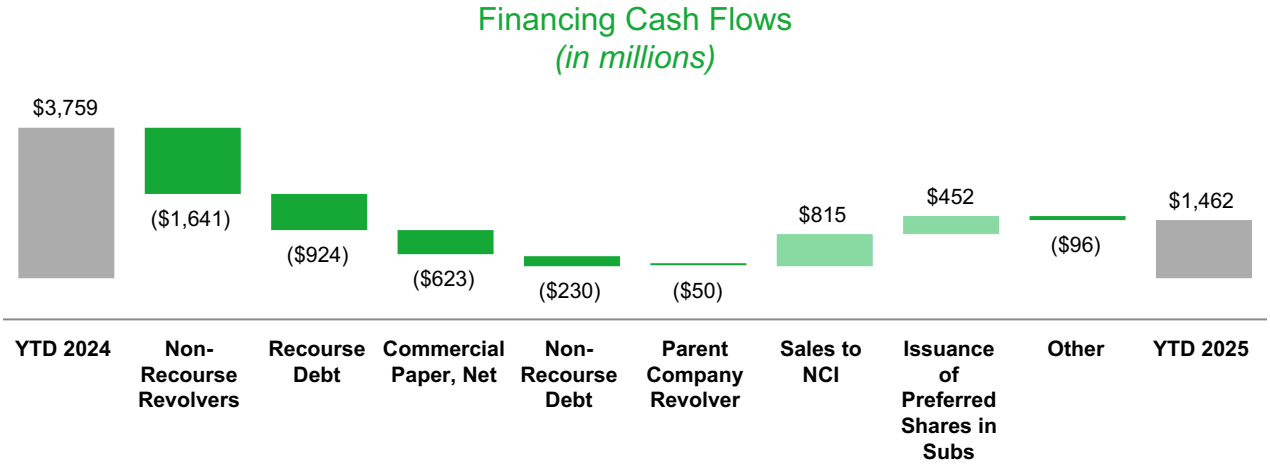
(1) Growth expenditures generally include expenditures related to development projects in construction, expenditures that increase capacity of a facility beyond the original design, and investments in general load growth or system modernization.

(2) Maintenance expenditures generally include expenditures that are necessary to maintain regular operations or net maximum capacity of a facility.

- Growth expenditures decreased $1.1 billion, primarily driven by a decrease in expenditures for U.S. renewables projects compared to the prior year.
- Maintenance expenditures decreased $131 million, primarily driven by a $56 million decrease at AES Indiana and Southland due to the timing of maintenance, and a $39 million decrease due to the sale of AES Brasil in October 2024.

Financing Activities

Net cash provided by financing activities decreased $2.3 billion for the six months ended June 30, 2025, compared to the six months ended June 30, 2024.



See Notes 1—*Financial Statement Presentation*, 8—*Obligations*, and 12—*Equity* in Item 1.—*Financial Statements* of this Form 10-Q for more information regarding significant transactions.

- The $1.6 billion impact from non-recourse revolvers is primarily due to $1.4 billion and $279 million of higher net repayments in the current year at the Renewables and Utilities SBUs, respectively; partially offset by $75 million of higher net repayments at the Infrastructure SBU in the prior year.
- The $924 million impact from recourse debt is primarily due to the issuance of $950 million subordinated notes at the Parent Company in the prior year, partially offset by the issuance of $800 million of senior notes and repayments of $774 million at the Parent Company in the current year.
- The $623 million impact from commercial paper and $50 million impact from the Parent Company revolver are due to higher net borrowings in the prior year.
- The $230 million impact from non-recourse debt transactions is primarily due to $1.3 billion of higher net borrowings at the Energy Infrastructure and Utilities SBUs in the prior year, which included $273 million related to the sale of future revenue at Warrior Run which was recorded as non-recourse debt; partially offset by $1.1 billion of higher net borrowings at the Renewables SBU in the current year.
- The $815 million impact from sales to noncontrolling interests is primarily due to $541 million from the sale of ownership interest in AES Ohio in the current year, a $233 million increase in proceeds at AES Clean Energy Development and AES Renewable Holdings from the sales of ownership in project companies to tax equity investors, and $150 million at AES Indiana from the sale of ownership in the Pike County BESS project to a tax equity investor in the current year; partially offset by $47 million related to the prior year sale of ownership interest in Hardy Hills to a tax equity investor, a $40 million decrease in sales under the Chile Renovables partnership with GIP, and $35 million related to the prior year sale of ownership interest in the Marahu project.
- The $452 million impact from issuance of preferred shares in subsidiaries is primarily due to the proceeds received from the issuance of preferred shares in AES Global Insurance.

Parent Company Liquidity

The following discussion is included as a useful measure of the liquidity available to The AES Corporation, or the Parent Company, given the non-recourse nature of most of our indebtedness. Parent Company Liquidity, as outlined below, is a non-GAAP measure and should not be construed as an alternative to *Cash and cash equivalents,* which is determined in accordance with GAAP. Parent Company Liquidity may differ from similarly titled measures used by other companies. The principal sources of liquidity at the Parent Company level are dividends and other distributions from our subsidiaries, including refinancing proceeds; proceeds from debt and equity financings at the Parent Company level, including availability under our revolving credit facilities and commercial paper program; and proceeds from asset sales. The Parent Company credit facilities and commercial paper program are generally used for short-term cash needs to bridge the timing of distributions from subsidiaries. Cash

requirements at the Parent Company level are primarily to fund interest and principal repayments of debt, construction commitments, other equity commitments, acquisitions, taxes, Parent Company overhead and development costs, and dividends on common stock.

The Company defines Parent Company Liquidity as cash available to the Parent Company, including cash at qualified holding companies, plus available borrowings under our existing credit facilities and commercial paper program. The cash held at qualified holding companies represents cash sent to subsidiaries of the Company domiciled outside of the U.S. Such subsidiaries have no contractual restrictions on their ability to send cash to the Parent Company. Parent Company Liquidity is reconciled to its most directly comparable GAAP financial measure, *Cash and cash equivalents*, at the periods indicated as follows (in millions):

	June 30, 2025	December 31, 2024
Consolidated cash and cash equivalents	$ 1,350	$ 1,524
Less: Cash and cash equivalents at subsidiaries	(1,341)	(1,259)
Parent Company and qualified holding companies' cash and cash equivalents	9	265
Commitments under the Parent Company credit facilities	2,300	1,800
Less: Letters of credit under the credit facilities	(48)	(18)
Less: Borrowings under the commercial paper program	(67)	—
Borrowings available under the Parent Company credit facilities	2,185	1,782
Total Parent Company Liquidity	$ 2,194	$ 2,047

The Parent Company paid dividends of $0.17595 per outstanding share to its common stockholders during the first and second quarters of 2025 for dividends declared in December 2024 and February 2025. While we intend to continue payment of dividends and believe we will have sufficient liquidity to do so, we can provide no assurance that we will continue to pay dividends, or if continued, the amount of such dividends.

Recourse Debt

Our total recourse debt was $5.8 billion and $5.7 billion as of June 30, 2025 and December 31, 2024, respectively. See Note 8—*Obligations* in Item 1.—*Financial Statements* of this Form 10-Q and Note 12—*Obligations* in Item 8.—*Financial Statements and Supplementary Data* of our 2024 Form 10-K for additional detail.

We believe that our sources of liquidity will be adequate to meet our needs for the foreseeable future. This belief is based on a number of material assumptions, including, without limitation, assumptions about our ability to access the capital markets, the operating and financial performance of our subsidiaries, currency exchange rates, power market pool prices, and the ability of our subsidiaries to pay dividends. In addition, our subsidiaries' ability to declare and pay cash dividends to us (at the Parent Company level) is subject to certain limitations contained in loans, governmental provisions, and other agreements. We can provide no assurance that these sources will be available when needed or that the actual cash requirements will not be greater than anticipated. We have met our interim needs for shorter-term and working capital financing at the Parent Company level with our revolving credit facility and commercial paper program. See Item 1A.—*Risk Factors—The AES Corporation's ability to make payments on its outstanding indebtedness is dependent upon the receipt of funds from our subsidiaries* of the Company's 2024 Form 10-K for additional information.

Various debt instruments at the Parent Company level, including our revolving credit facilities and commercial paper program, contain certain restrictive covenants. The covenants provide for, among other items, limitations on other indebtedness, liens, investments and guarantees; limitations on dividends, stock repurchases and other equity transactions; restrictions and limitations on mergers and acquisitions, sales of assets, leases, transactions with affiliates and off-balance sheet and derivative arrangements; maintenance of certain financial ratios; and financial and other reporting requirements. As of June 30, 2025, we were in compliance with these covenants at the Parent Company level.

Non-Recourse Debt

While the lenders under our non-recourse debt financings generally do not have direct recourse to the Parent Company, defaults thereunder can still have important consequences for our results of operations and liquidity, including, without limitation:

- reducing our cash flows as the subsidiary will typically be prohibited from distributing cash to the Parent Company during the time period of any default;
- triggering our obligation to make payments under any financial guarantee, letter of credit, or other credit support we have provided to or on behalf of such subsidiary;
- causing us to record a loss in the event the lender forecloses on the assets; and

- triggering defaults in our outstanding debt at the Parent Company.

For example, our revolving credit facilities and outstanding debt securities at the Parent Company include events of default for certain bankruptcy-related events involving material subsidiaries. In addition, our revolving credit agreement at the Parent Company includes events of default related to payment defaults and accelerations of outstanding debt of material subsidiaries.

Some of our subsidiaries are currently in default with respect to all or a portion of their outstanding indebtedness. The total non-recourse debt classified as current in the accompanying Condensed Consolidated Balance Sheets amounts to $2.7 billion. The portion of current debt related to such defaults was $175 million at June 30, 2025, all of which was non-recourse debt related to three subsidiaries: AES Puerto Rico, AES Ilumina, and AES Jordan Solar. AES Puerto Rico is in payment default. All other defaults are not payment defaults, but are instead technical defaults triggered by failure to comply with other covenants or other conditions contained in the non-recourse debt documents. See Note 8—*Obligations* in Item 1.—*Financial Statements* of this Form 10-Q for additional detail.

None of the subsidiaries that are currently in default are subsidiaries that met the applicable definition of materiality under the Parent Company's debt agreements as of June 30, 2025, in order for such defaults to trigger an event of default or permit acceleration under the Parent Company's indebtedness. However, as a result of additional dispositions of assets, other significant reductions in asset carrying values or other matters in the future that may impact our financial position and results of operations or the financial position of the individual subsidiary, it is possible that one or more of these subsidiaries could fall within the definition of a "material subsidiary" and thereby trigger an event of default and possible acceleration of the indebtedness under the Parent Company's outstanding debt securities. A material subsidiary is defined in the Parent Company's revolving credit agreement as any business that contributed 20% or more of the Parent Company's total cash distributions from businesses for the four most recently ended fiscal quarters. As of June 30, 2025, none of the defaults listed above resulted in a cross-default under the recourse debt of the Parent Company. Furthermore, none of the non-recourse debt in default listed above is guaranteed by the Parent Company.

Critical Accounting Policies and Estimates

The condensed consolidated financial statements of AES are prepared in conformity with U.S. GAAP, which requires the use of estimates, judgments, and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the periods presented.

The Company's significant accounting policies are described in Note 1—*General and Summary of Significant Accounting Policies* of our 2024 Form 10-K. The Company's critical accounting estimates are described in Item 7.—*Management's Discussion and Analysis of Financial Condition and Results of Operations* in the 2024 Form 10-K. An accounting estimate is considered critical if the estimate requires management to make an assumption about matters that were highly uncertain at the time the estimate was made, if different estimates reasonably could have been used, or if changes in the estimate that would have a material impact on the Company's financial condition or results of operations are reasonably likely to occur from period to period. Management believes that the accounting estimates employed are appropriate and resulting balances are reasonable; however, actual results could differ from the original estimates, requiring adjustments to these balances in future periods. The Company has reviewed and determined that these remain as critical accounting policies as of and for the six months ended June 30, 2025.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Overview Regarding Market Risks

Our businesses are exposed to, and proactively manage, market risk. Market risk is the potential loss that may result from market changes associated with AES power generation or with existing or forecasted financial or commodity transactions. Our primary market risk exposure is to the price of commodities, particularly electricity, natural gas, coal, and environmental credits. AES is also exposed to fluctuations in interest rates and foreign currency exchange rates associated primarily with outstanding and expected future issuances and borrowing, and from investments in foreign subsidiaries and affiliates. We enter into various transactions, including derivatives, in order to hedge our exposure to these market risks.

The disclosures presented in this Item 3 are based upon a number of assumptions; actual effects may differ. The safe harbor provided in Section 27A of the Securities Act of 1933 and Section 21E of the Exchange Act shall apply to the disclosures contained in this Item 3. For further information regarding market risk, see Item 1A.—*Risk*

Factors, *Fluctuations in currency exchange rates may impact our financial results and position; Wholesale power prices may experience significant volatility in our markets which could impact our operations and opportunities for future growth; We may not be adequately hedged against our exposure to changes in commodity prices or interest rates;* and *Certain of our businesses are sensitive to variations in weather and hydrology* of the 2024 Form 10-K.

Commodity Price Risk

Although we prefer to hedge our exposure to the impact of market fluctuations in the price of commodities, some of our generation businesses operate under short-term sales, have contracted electricity obligations greater than supply, or operate under contract sales that leave an unhedged exposure on some of our capacity or through imperfect fuel pass-throughs. These businesses subject our operational results to the volatility of prices for electricity, fuels, and environmental credits in competitive markets. In addition, our businesses are exposed to lower electricity prices due to increased competition, including from renewable sources such as wind and solar, because of lower costs of entry and lower variable costs. We employ risk management strategies to hedge our financial performance against these effects. The implementation of these strategies can involve the use of physical and financial commodity contracts, futures, swaps, and options. We have some natural offsets across our businesses such that low commodity prices may benefit certain businesses and be a cost to others. Exposures are not perfectly linear or symmetric. The sensitivities are affected by a number of local or indirect market factors. Examples of these factors include hydrology, local energy market supply/demand balances, regional fuel supply issues, regional competition, bidding strategies, and regulatory interventions such as price caps. Volume variation also affects our commodity exposure. The volume sold under contracts or retail concessions can vary based on weather and economic conditions, resulting in a higher or lower volume of sales in spot markets. Thermal unit availability and hydrology can affect the generation output available for sale and can affect the marginal unit setting power prices.

As of June 30, 2025, we project pre-tax earnings exposure on a 10% increase in commodity prices to be less than a $5 million gain for power, less than a $5 million gain for gas, and less than a $5 million loss for coal. The sensitivities are calculated using industry-standard valuation techniques to revalue all transactions (physical and financial commodity transactions) in the portfolio for a change in the underlying prices the transactions are exposed to and excludes correlation effects, including those due to renewable resource availability. The models reference market prices of commodities across future periods and associated volatility of these market prices. Prices and volatilities are predominantly based on observable market prices.

Exposures at individual businesses will change as new contracts or financial hedges are executed, and our sensitivity to changes in commodity prices generally increases in later years with reduced hedge levels at some of our businesses.

In the Energy Infrastructure SBU, the generation businesses are largely contracted, but may have residual risk to the extent contracts are not perfectly indexed to the business drivers. In California, our Southland once-through cooling generation units (“Legacy Assets”) in Long Beach and Huntington Beach have been extended to operate through 2026 under capacity contracts with the State as part of the Strategic Reserve program. Our facility in Redondo Beach has been retired effective January 1, 2024. Our ability to operate the Long Beach facility at full capacity through 2025 was approved under Tentative Time Schedule Order coverage in November 2023. Approval to operate Long Beach through 2026 will be subject to review with State Agencies. Our Southland combined cycle gas turbine (Southland Energy) units benefit from higher power and lower gas and carbon prices, depending on the contracted or hedge position. The AES Andes business in Chile owns assets in the central and northern regions of the country and has a portfolio of contract sales in both. A significant portion of our PPAs through 2025 include mechanisms of indexation that adjust the price of energy based on fluctuations in the price of coal, with an index defined by the National Energy Commission based on the physical coal imports for the energy system. This mechanism mitigates exposures to changes in the price of fuel. The increasing share of renewable energy in Chile's power market may reduce reliance on thermal units and impact power price volatility, which could impact our cost to serve certain unregulated PPAs. In the Dominican Republic, we own natural gas plants contracted under a portfolio of contract sales, and both contract and spot prices may move with commodity prices. Our thermal asset in Panama has PPAs with distribution companies which matches the term of the LNG supply agreement of such thermal assets. New entrants into the Panama thermal generation market could impact the dispatch of existing generation, requiring purchases in the spot market to satisfy the PPA obligations. Contract levels do not always match our generation availability or needs, and our assets may be sellers of spot prices in excess of contract levels or a net buyer in the spot market to satisfy contract obligations, which could impact existing fuel supply commitments. Our assets operating in Vietnam and Bulgaria have minimal exposure to commodity price risk as they have no or minor merchant exposure and fuel is subject to a pass-through mechanism.

In the Renewables SBU, our businesses have commodity exposure on unhedged volumes and resource volatility and benefit from higher power prices, where generation exceeds contracted levels. In Colombia, we operate under a shorter-term sales strategy with spot market exposure for uncontracted volumes. Because we own hydroelectric assets there, contracts are not indexed to fuel. Our Renewables businesses in Panama are highly contracted under financial and load-following PPA-type structures, exposing the business to hydrology-based variance. To the extent hydrological inflows are greater than or less than the contract volumes, the business will be sensitive to changes in spot power prices which may be driven by oil and natural gas prices in some time periods.

Foreign Exchange Rate Risk

We operate in multiple countries and as such are subject to volatility in exchange rates at varying degrees at the subsidiary level and between our functional currency, the USD, and currencies of the countries in which we operate.

In the normal course of business, we are exposed to foreign currency risk and other foreign operations risks that arise from investments in foreign subsidiaries and affiliates. A key component of these risks stems from the fact that some of our foreign subsidiaries and affiliates utilize currencies other than our consolidated reporting currency, the USD. Additionally, certain of our foreign subsidiaries and affiliates have entered into monetary obligations in USD or currencies other than their own functional currencies. Certain of our foreign subsidiaries calculate and pay taxes in currencies other than their own functional currency. We have varying degrees of exposure to changes in the exchange rate between the USD and the following currencies: Argentine peso, Chilean peso, Colombian peso, Dominican peso, Euro, and Mexican peso. Our exposure to certain of these currencies may be material. These subsidiaries and affiliates attempt to limit potential foreign exchange exposure by entering into revenue contracts that adjust to changes in foreign exchange rates. We also use foreign currency forwards, swaps, and options where possible to manage our risk related to certain foreign currency fluctuations.

AES enters into foreign currency hedges to protect economic value of the business and minimize the impact of foreign exchange rate fluctuations to AES' portfolio. While protecting cash flows, the hedging strategy is also designed to reduce forward-looking earnings foreign exchange volatility. Due to variation of timing and amount between cash distributions and earnings exposure, the hedge impact may not fully cover the earnings exposure on a realized basis, which could result in greater volatility in earnings.

AES has unhedged forward-looking earnings which are exposed to foreign exchange deterioration risk from the Argentine peso that could be material. As of June 30, 2025, assuming a 10% USD appreciation, cash distributions attributable to foreign subsidiaries in the Colombian peso, Euro, and Argentine peso may be exposed to exchange rate movements, with a total potential loss of less than $5 million.

These numbers have been produced by applying a one-time 10% USD appreciation to forecasted exposed cash distributions for 2025 coming from the respective subsidiaries exposed to the currencies listed above, net of the impact of outstanding hedges and holding all other variables constant. The numbers presented above are net of any transactional gains or losses. These sensitivities may change in the future as new hedges are executed or existing hedges are unwound. Additionally, updates to the forecasted cash distributions exposed to foreign exchange risk may result in further modification. The sensitivities presented do not capture the impacts of any administrative market restrictions or currency inconvertibility.

Interest Rate Risks

We are exposed to risk resulting from changes in interest rates primarily because of our current and expected future issuance of debt and borrowing.

Decisions on the fixed-floating debt mix are made to be consistent with the risk factors faced by individual businesses or plants. Depending on whether a plant’s capacity payments or revenue stream is fixed or varies with inflation, we partially hedge against interest rate fluctuations by arranging fixed-rate or variable-rate financing. In certain cases, particularly for non-recourse financing, we execute interest rate swap, cap, and floor agreements to effectively fix or limit the interest rate exposure on the underlying financing. Most of our interest rate risk is related to non-recourse financings at our businesses.

As of June 30, 2025, the portfolio’s 2025 pre-tax earnings exposure to a one-time 100-basis-point increase in interest rates for our Argentine peso, Chilean peso, Colombian peso, Euro, and USD denominated debt would be less than $5 million on interest expense for the debt denominated in these currencies. These amounts do not take into account the historical correlation between these interest rates.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports that the Company files or submits under the Exchange Act, is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), as appropriate, to allow timely decisions regarding required disclosures.

The Company, under the supervision and with the participation of its management, including the Company’s CEO and CFO, evaluated the effectiveness of its “disclosure controls and procedures,” as such term is defined in Rule 13a-15(e) under the Exchange Act, as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on that evaluation, our CEO and CFO concluded that, as of June 30, 2025, our disclosure controls and procedures were not effective due to the material weakness in our internal control over financial reporting described below.

As previously reported in our Annual Report on Form 10-K for the year ended December 31, 2024, management identified that we did not design effective controls over the review of the disposition of AES Brasil, a complex non-routine transaction; specifically due to the use of incomplete data in the estimation of the fair value of the net assets of AES Brasil, which was used in calculation of the impairment expense after AES Brasil was classified as held-for-sale in Q2 2024.

Notwithstanding the identified material weakness, our CEO and CFO have concluded that our unaudited condensed consolidated financial statements contained in this Quarterly Report on Form 10-Q fairly present, in all material respects, our financial position, results of operations, and cash flows for the periods presented and such financial statements are presented in conformity with GAAP.

Remediation Efforts and Status

As of the date of the filing of this Quarterly Report on Form 10-Q, our management has taken significant measures towards remediation of this material weakness. While we have implemented the remediation measures described below, our conclusion on remediation will take place during our annual SOX testing which will conclude with the filing of our annual financial statements.

The remediation actions implemented to date include: (i) policy updates detailing steps to perform in an impairment analysis of complex ownership structures, (ii) detailed instructions on considerations to be included in the fair value estimations, (iii) updates to held-for-sale and discontinued operations policies, and (iv) training to impacted personnel.

Following a thorough review, Management determined that the revised controls have been designed effectively. However, the material weakness will not be considered fully remediated until the applicable controls operate for a sufficient period of time and management has concluded, through the testing mentioned above, that the controls are operating effectively. Management will continue to monitor the operating effectiveness of these and other processes, procedures and controls and make any further changes management deems appropriate.

Changes in Internal Controls over Financial Reporting

Other than the remediation efforts described above, there were no changes that occurred during the fiscal quarter covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II: OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is involved in certain claims, suits and legal proceedings in the normal course of business. The Company has accrued for litigation and claims when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. The Company believes, based upon information it currently possesses and taking into account established reserves for estimated liabilities and its insurance coverage, that the ultimate outcome of these proceedings and actions is unlikely to have a material adverse effect on the Company's condensed consolidated financial statements. It is reasonably possible, however, that some matters could be decided unfavorably to the Company and could require the Company to pay damages or make expenditures in amounts that could be material, but cannot be estimated as of June 30, 2025. Pursuant to SEC amendments Item 103 of SEC Regulation S-K, AES' policy is to disclose environmental legal proceedings to which a governmental authority is a party if such proceedings are reasonably expected to result in monetary sanctions of greater than or equal to $1 million.

In December 2001, Grid Corporation of Odisha ("GRIDCO") served a notice to arbitrate pursuant to the Indian Arbitration and Conciliation Act of 1996 on the Company, AES Orissa Distribution Private Limited ("AES ODPL"), and Jyoti Structures ("Jyoti") pursuant to the terms of the shareholders agreement between GRIDCO, the Company, AES ODPL, Jyoti and the Central Electricity Supply Company of Orissa Ltd. ("CESCO"), an affiliate of the Company. In the arbitration, GRIDCO asserted that a comfort letter issued by the Company in connection with the Company's indirect investment in CESCO obligates the Company to provide additional financial support to cover all of CESCO's financial obligations to GRIDCO. GRIDCO appeared to be seeking approximately $189 million in damages, plus undisclosed penalties and interest, but a detailed alleged damage analysis was not filed by GRIDCO. The Company counterclaimed against GRIDCO for damages. In June 2007, a 2-to-1 majority of the arbitral tribunal rendered its award rejecting GRIDCO's claims and holding that none of the respondents, the Company, AES ODPL, or Jyoti, had any liability to GRIDCO. The respondents' counterclaims were also rejected. A majority of the tribunal later awarded the respondents, including the Company, some of their costs relating to the arbitration. GRIDCO filed challenges of the tribunal's awards with the local Indian court. GRIDCO's challenge of the costs award has been dismissed by the court, but its challenge of the liability award remains pending. A hearing on the liability award has not taken place to date. The Company believes that it has meritorious defenses to the claims asserted against it and will defend itself vigorously in these proceedings; however, there can be no assurances that it will be successful in its efforts.

Pursuant to their environmental audit, AES Sul and AES Florestal discovered 200 barrels of solid creosote waste and other contaminants at a pole factory that AES Florestal had been operating. The conclusion of the audit was that a prior operator of the pole factory, Companhia Estadual de Energia ("CEEE"), had been using those contaminants to treat the poles that were manufactured at the factory. On their initiative, AES Sul and AES Florestal communicated with Brazilian authorities and CEEE about the adoption of containment and remediation measures. In March 2008, the State Attorney of the state of Rio Grande do Sul, Brazil filed a public civil action against AES Sul, AES Florestal and CEEE seeking an order requiring the companies to mitigate the contaminated area located on the grounds of the pole factory and an indemnity payment of approximately R$6 million ($1 million). In October 2011, the State Attorney filed a request for an injunction ordering the defendant companies to contain and remove the contamination immediately. The court granted injunctive relief on October 18, 2011, but determined that only CEEE was required to perform the removal work. In May 2012, CEEE began the removal work in compliance with the injunction. The case is now awaiting judgment. The removal and remediation costs are estimated to be approximately R$15 million to R$60 million ($3 million to $11 million), and there could be additional costs which cannot be estimated at this time. In June 2016, the Company sold AES Sul to CPFL Energia S.A. and as part of the sale, AES Guaiba, a holding company of AES Sul, retained the potential liability relating to this matter. The Company believes that there are meritorious defenses to the claims asserted against it and will defend itself vigorously in these proceedings; however, there can be no assurances that it will be successful in its efforts.

In September 2015, AES Southland Development, LLC and AES Redondo Beach, LLC filed a lawsuit against the California Coastal Commission (the "CCC") over the CCC's determination that the site of AES Redondo Beach included approximately 5.93 acres of CCC-jurisdictional wetlands. The CCC has asserted that AES Redondo Beach has improperly installed and operated water pumps affecting the alleged wetlands in violation of the California Coastal Act and Redondo Beach Local Coastal Program ("LCP"). Potential outcomes of the CCC determination could include an order requiring AES Redondo Beach to perform a restoration and/or pay fines or penalties. AES Redondo Beach believes that it has meritorious arguments concerning the underlying CCC determination, but there can be no assurances that it will be successful. On March 27, 2020, AES Redondo Beach, LLC sold the site to an unaffiliated third-party purchaser that assumed the obligations contained within these proceedings. On May 26, 2020, CCC staff sent AES an NOV directing AES to discontinue any operation of the water pumps in the alleged

wetlands and to submit a Coastal Development Permit ("CDP") application for the removal of the water pumps within the alleged wetlands. The NOV also directed AES to submit technical analysis regarding additional water pumps located within onsite electrical vaults and, if necessary, a CDP application for their continued operation. With respect to the vault pumps, AES provided the CCC with the requested analysis and the CCC has not required further action. With respect to the pumps in the alleged wetlands, AES locked out those pumps to prevent further operation and submitted the CDP to the permitting authority, the City of Redondo Beach (the "City"), with respect to AES' plans to disable or remove the pumps. On October 14, 2020, the City deemed the CDP application to be complete and indicated a public hearing will be required. AES submitted all required information and waited for the City to continue processing the application. In December 2023, the City indicated it would continue processing the CDP application; AES has since followed up with the City and awaits the next phase of the permitting process. AES will vigorously defend its interests with regard to the NOV, but we cannot predict the outcome of the matter at this time. However, settlements and litigated outcomes of Coastal Act and LCP claims alleged against other companies have required them to pay significant civil penalties and undertake remedial measures.

On March 23, 2021, the U.S. District Court for the Southern District of Indiana approved and entered a judicial consent decree among AES Indiana, the United States on behalf of the Environmental Protection Agency (EPA), and the Indiana Department of Environmental Management ("IDEM"). The decree resolved allegations by EPA and IDEM that AES Indiana had violated the federal Clean Air Act ("CAA") at its Petersburg Station, which AES denies. Under the decree, AES Indiana agreed to certain emission limits and annual caps on NOx, SO_2 and PM emissions at the four Units at the station; paid a civil penalty of $1.525 million; retired Units 1 and 2, spent $325,000 on an environmentally beneficial project to preserve local, ecologically-significant lands (notice of completion of which was provided May 8, 2025); and will spend a total of $5 million on a further environmental mitigation project to build and operate a new, non-emitting source of generation at the site.

In December 2018, a lawsuit was filed in Dominican Republic civil court against the Company, AES Puerto Rico, and three other AES affiliates. The lawsuit purports to be brought on behalf of over 100 Dominican claimants, living and deceased, and appears to seek relief relating to CCRs that were delivered to the Dominican Republic in 2004. The lawsuit generally alleges that the CCRs caused personal injuries and deaths and demands $476 million in alleged damages. The lawsuit does not identify, or provide any supporting information concerning, the alleged injuries of the claimants individually. Nor does the lawsuit provide any information supporting the demand for damages or explaining how the quantum was derived. The AES companies have moved to dismiss the lawsuit. That motion is under consideration by the relevant court of first instance. The AES companies believe that they have meritorious defenses to the claims asserted against them and will defend themselves vigorously in this proceeding; however, there can be no assurances that they will be successful in their efforts.

In February 2019, a separate lawsuit was filed in Dominican Republic civil court against the Company, AES Puerto Rico, two other AES affiliates, and an unaffiliated company and its principal. Subsequently, the claimants withdrew the lawsuit with respect to AES Puerto Rico. The lawsuit remains pending against the other AES defendants ("AES Defendants") and the unaffiliated defendants. The lawsuit purports to be brought on behalf of over 200 Dominican claimants, living and deceased, and appears to seek relief relating to CCRs that were delivered to the Dominican Republic in 2003 and 2004. The lawsuit generally alleges that the CCRs caused personal injuries and deaths and demands over $900 million in alleged damages. The lawsuit does not identify, or provide any supporting information concerning, the alleged injuries of the claimants individually, nor does the lawsuit provide any information supporting the demand for damages or explaining how the quantum was derived. In August 2020, at the request of the relevant AES companies, the case was transferred to a different civil court, namely, the Civil Court of La Vega ("CFI"). In May 2024, the CFI dismissed the entire case due to the expiry of the statute of limitations. Later in 2024, the claimants appealed the dismissal to the relevant intermediate appellate court, where proceedings are ongoing. The AES Defendants believe that they have meritorious defenses to the claims asserted against them and will defend themselves vigorously in this proceeding; however, there can be no assurances that they will be successful in their efforts.

In October 2019, the Superintendency of the Environment (the "SMA") notified AES Andes of certain alleged breaches associated with the environmental permit of the Ventanas Complex, initiating a sanctioning process through Exempt Resolution N° 1 / ROL D-129-2019. The alleged charges include exceeding generation limits, failing to reduce emissions during episodes of poor air quality, exceeding limits on discharges to the sea, and exceeding noise limits. AES Andes has submitted a proposed "Compliance Program" to the SMA for the Ventanas Complex. The latest version of this Compliance Program was submitted on May 26, 2021. On December 30, 2021, the Compliance Program was approved by the SMA. AES Andes has completed the Compliance Program and is planning to file its final report in Q3-2025. The SMA will review the final report. If the SMA approves the final report, the Compliance Program will be considered fully completed, and thus any alleged charges associated with the same will be considered permanently waived. Separately, an ex officio action was brought by the SMA due to

alleged exceedances of generation limits, which would require the Company to reduce SO_2, NO_X and PM emissions in order to achieve the emissions offset established in the Compliance Program. On January 6, 2022, AES Andes filed a request with the SMA seeking modification of the means for compliance with the ex officio action. On January 17, 2023, the SMA approved street paving measures, or alternatively a program providing heaters for community members, as the means to satisfy the air emissions offsets in the approved Compliance Plan. The cost of the proposed Compliance Program is approximately $10.8 million and is in the execution stage. Fines are possible if the SMA determines there is an unsatisfactory execution of the Compliance Program. On April 21, 2023, the SMA notified AES Andes of a resolution alleging an additional "serious" non-compliance of the Ventanas Complex failing to reduce emissions during episodes of poor air quality. On May 24, 2023, AES Andes submitted disclaimers to the SMA in response to this resolution. On May 10, 2024, the Company was notified of a fine for $180,515. On June 3, 2024, the Company appealed this fine to the Environmental Court. The appellate hearing occurred on April 3, 2025; the Environmental Court's decision on the appeal is pending. The Company believes that it has meritorious defenses and will continue to assert them vigorously in this dispute; however, there can be no assurances that it will be successful.

On May 12, 2021, the Mexican Federal Attorney for Environmental Protection (the "Agency") initiated an environmental audit at the Termoeléctrica Peñoles thermal generation facility ("TEP"). On January 20, 2023, TEP was notified of the resolution issued by the Agency, which alleges breaches of air emission regulations, including the failure to submit reports. The resolution imposes a fine of $27,615,140 pesos (approximately $1.5 million), as well as a series of corrective measures. On March 3, 2023, TEP filed a lawsuit in an administrative court—The Specialized Chamber of the Federal Administrative Justice Tribunal ("Chamber")—challenging the legality of the Agency's resolution and fine. On May 30, 2025, the Chamber issued a final administrative ruling denying TEP's lawsuit. On July 1, 2025, TEP appealed to the Federal District Court. TEP's appeal challenges the constitutionality of the Agency's regulations (*demanda de amparo*) and requests a stay of enforcement of the Chamber's final administrative ruling. The appeal has been duly admitted and the Federal District Court's decision on the injunction request is pending. The Company believes that it has meritorious defenses to the claims asserted against it and will defend itself vigorously in these proceedings; however, there can be no assurances that it will be successful in its efforts.

In February 2022, a lawsuit was filed in Dominican Republic civil court against the Company. The lawsuit purports to be brought on behalf of over 425 Dominican claimants, living and deceased, and appears to seek relief relating to CCRs that were delivered to the Dominican Republic in 2003 and 2004. The lawsuit generally alleges that the CCRs caused personal injuries and deaths and demands over $600 million in alleged damages. The lawsuit does not identify or provide any supporting information concerning the alleged injuries of the claimants individually. Nor does the lawsuit provide any information supporting the demand for damages or explaining how the quantum was derived. In February 2024, at the request of the Company, the Dominican Supreme Court of Justice transferred the case to a different civil court, namely, the Civil Court of La Vega. The claimants' attempt to recuse the presiding judge has been rejected by the relevant Dominican appellate court. The parties have completed briefing on the Company's motion to dismiss the lawsuit. That motion is under consideration by the relevant court of first instance. The Company believes that it has meritorious defenses to the claims asserted against it and will defend itself vigorously in this proceeding; however, there can be no assurances that it will be successful in its efforts.

On January 26, 2023, the SMA notified Alto Maipo SpA of four alleged charges relating to the Alto Maipo facility, all of which are categorized by the SMA as "serious." The alleged charges include untimely completion of intake works and insufficient capture by the provisional works, irrigation water outlet, and canal contemplated by an agreement with local communities; non-compliance with the details of the forest management plans and intervention in unauthorized areas; construction of a road in a restricted paleontological area; and unlawful moving of fauna. On February 16, 2023, the Alto Maipo project submitted an initial compliance program to the SMA, which has undergone observations by the SMA and interested third parties and has been resubmitted by the project. On December 9, 2024 the SMA rejected the latest version of the Compliance Program. On December 16, 2024, Alto Maipo submitted a petition for reconsideration. If appeals are unsuccessful, the imposition of fines are possible.

In May 2024, the Chilean competition agency (the Fiscalía Nacional Económica or "FNE") opened an investigation regarding AES Andes's declarations with respect to coal prices and coal blends used to generate electricity in Chile. The investigation was prompted by a confidential complaint filed in December 2023, which has not been disclosed to AES Andes. In general terms, the investigation seeks to determine whether the facts alleged in the complaint could be considered as an abuse of a dominant position by AES Andes. The investigation is at a very early stage; AES Andes has responded to all of the FNE's information requests received to date. The FNE will independently conduct the investigation and will ultimately decide whether to dismiss the matter or initiate a judicial proceeding on the allegations in the confidential complaint. These types of investigations in Chile commonly last for years. AES Andes does not believe that it has violated any competition laws. Further, if the FNE ever initiates a

judicial proceeding on this matter, AES Andes will defend itself vigorously. Given the early nature of this investigation, we are unable to estimate any potential impact of the investigation or its eventual outcome on our business, financial condition or results of operations.

In April 2025, an alleged shareholder of Fluence Energy, Inc. (“Fluence”) filed a putative securities class action in the U.S. District Court for the Eastern District of Virginia (“Court”) against Fluence and certain of Fluence’s officers and directors. The complaint in the case also named the Company and AES Grid Stability, LLC as defendants (together, the “AES Defendants”). In May 2025, the Court consolidated the lawsuit with another putative securities class action against Fluence and certain of its officers and directors. The Court also appointed a lead plaintiff (the “Plaintiff”) and lead plaintiffs’ counsel for the consolidated lawsuit. In June 2025, the Plaintiff filed a consolidated amended complaint against Fluence, certain of its officers and directors (the “Individual Fluence Defendants” and, together with Fluence, the “Fluence Defendants”), and the AES Defendants. The Plaintiff seeks to pursue claims on behalf of a putative class of all purchasers of Fluence Class A common stock between October 28, 2021 and February 10, 2025. The Plaintiff alleges that the Fluence Defendants made allegedly false or misleading statements in violation of Section 10(b) of the Securities Exchange Act of 1934 (the “Exchange Act”), as well as Rule 10b-5 promulgated thereunder. In addition, the Plaintiff asserts claims against the Individual Fluence Defendants and the AES Defendants as alleged “control persons” under Section 20(a) of the Exchange Act. In July 2025, the Fluence Defendants and the AES Defendants filed separate motions to dismiss the consolidated lawsuit. After further briefing and a hearing in September 2025 the Court will decide the motions. The AES Defendants believe that they have meritorious defenses to the claims asserted against them and will defend themselves vigorously in this lawsuit; however, there can be no assurances that they will be successful in their efforts.

In May 2025, a special session of the Federal Regional Court of the 1st Region of Brazil ("TRF1”) issued a decision dismissing the claims of Sul, which was sold to a third party in 2016 (“Buyer”), to annul ANEEL’s Order 288. Order 288 was issued in May 2002 and retroactively changed the effects of the Wholesale Energy Market (“MAE”) for the year 2001. The aggregate impact of Order 288 for AES Sul was to reverse a gain on certain purchases and sales into an approximately R$75 million ($14 million) loss, estimated as of May 2002. The TRF1’s May 2025 decision reversed its April 2013 decision in Sul’s favor that annulled Order 288. Sul intends to challenge the May 2025 decision through clarification and/or appeal. In the event of an unsuccessful outcome for Sul, the Buyer may attempt to seek recovery of losses relating to the R$75 million ($14 million) loss above, an additional amount of approximately R$27 million ($5 million) that was collected by Sul in 2008 and may need to be reimbursed, plus interest on these amounts, from the AES seller and The AES Corporation under the sale agreement. In that event, AES would defend itself vigorously; however, there can be no assurances that it would be successful in its efforts.

On May 30, 2025, an arbitral tribunal (the “Tribunal”) of the International Centre for the Settlement of Investment Disputes (“ICSID”) issued an arbitration award in the Company’s favor (“Award”) in connection with a treaty arbitration initiated by the Company against the Argentine Republic (“Argentina”) under the US-Argentina bilateral investment treaty (“BIT”). In the Award, the Tribunal found that certain measures taken by Argentina in relation to its power sector, beginning in late 2001, breached the BIT. The Tribunal ordered Argentina to pay to the Company approximately $733 million in damages, including an award of costs, as well as accrued interest. Argentina has 120 days from the issuance of the Award to seek annulment of the Award before a new panel of three arbitrators appointed by ICSID (“Annulment Panel”). If Argentina makes an annulment application it would likely result in a stay of execution of the Award pending constitution of the Annulment Panel, after which the Annulment Panel would rule on whether to continue such stay and, if so, on what terms. The Company can provide no assurance as to whether Argentina will make an annulment application, or how an Annulment Panel would rule on any request to stay execution of the Award or the merits of any annulment application. Relatedly, measures to enforce the Award through judicial means entail a process that is inherently unpredictable; as a result, the Company cannot provide any assurance as to the timing or success of such enforcement measures. The Company may attempt to settle this dispute with Argentina. However, the Company can provide no assurances regarding the likelihood, substance, or timing of any such settlement.

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors disclosed in Item 1A.—*Risk Factors* of our 2024 Form 10-K. Additional risks and uncertainties also may adversely affect our business and operations, including those discussed in Item 2.—*Management's Discussion and Analysis of Financial Condition and Results of Operations* in this Form 10-Q.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Issuer Purchases of Equity Securities

The following table provides information relating to our purchases of AES Common Stock during the second quarter of fiscal year 2025:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares That May Yet Be Purchased Under the Plans or Programs [1]
April 1 — April 30	—	$ —	—	$ 264,000,000
May 1 — May 31	—	—	—	264,000,000
June 1 — June 30	—	—	—	264,000,000
Total	—	—	—	$ 264,000,000

(1) On July 7, 2010, The AES Corporation announced that its Board of Directors approved a common stock repurchase program under which the Company may purchase up to $500 million of shares of its outstanding common stock, depending on cash availability, market conditions, and other factors. The original authorization was set to expire on December 31, 2010, however, in December 2010, the Board authorized an extension of the stock repurchase program. The current program does not have a predetermined expiration date. Repurchases under this program may be made using a variety of methods, which may include open market repurchases, purchases by contract (including, without limitation, accelerated stock repurchase programs or 10b5-1 plans), and/or privately negotiated transactions. No repurchases were made under this program during the second quarter of 2025. As of June 30, 2025, $264 million remained available for purchase under this authorization.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

Trading Arrangements

None of the Company's directors or "officers," as defined in Rule 16a-1(f) of the Exchange Act, adopted, modified, or terminated a "Rule 10b5-1 trading arrangement" or a "non-Rule 10b5-1 trading arrangement," as each term is defined in Item 408 of Regulation S-K, during the Company's fiscal quarter ended June 30, 2025.

ITEM 6. EXHIBITS

10.1	The AES Corporation 2025 Equity and Incentive Compensation Plan (incorporated by reference to Exhibit 99.1 to the Company's Registration Statement on Form S-8 filed on May 9, 2025).
10.2	The AES Corporation Amended and Restated Deferred Compensation Program for Directors dated May 9, 2025 (filed herewith).
10.3	Loan Agreement dated as of June 13, 2025 among The AES Corporation as Borrower, the banks named therein as Banks, and JPMorgan Chase, N.A. as Administrative Agent (filed herewith).
10.4	The AES Corporation Restoration Supplemental Retirement Plan, as Amended and Restated effective June 25, 2025 (filed herewith).
31.1	Rule 13a-14(a)/15d-14(a) Certification of Andrés Gluski (filed herewith).
31.2	Rule 13a-14(a)/15d-14(a) Certification of Stephen Coughlin (filed herewith).
32.1	Section 1350 Certification of Andrés Gluski (filed herewith).
32.2	Section 1350 Certification of Stephen Coughlin (filed herewith).
101	The AES Corporation Quarterly Report on Form 10-Q for the quarter ended June 30, 2025, formatted in Inline XBRL (Inline Extensible Business Reporting Language): (i) the Cover Page, (ii) Condensed Consolidated Balance Sheets, (iii) Condensed Consolidated Statements of Operations, (iv) Condensed Consolidated Statements of Comprehensive Income (Loss), (v) Condensed Consolidated Statements of Changes in Equity, (vi) Condensed Consolidated Statements of Cash Flows, and (vii) Notes to Condensed Consolidated Financial Statements. The instance document does not appear in the Interactive Data File because its XBRL tags are embedded within the Inline XBRL document.
104	Cover Page Interactive Data File (formatted as Inline XBRL and contained in Exhibit 101).

INDIANA UTILITY
REGULATORY COMMISSION

STATE OF INDIANA

INDIANA UTILITY REGULATORY COMMISSION

PETITION OF INDIANAPOLIS POWER & LIGHT COMPANY D/B/A AES INDIANA ("AES INDIANA") FOR AUTHORITY TO INCREASE RATES AND CHARGES FOR ELECTRIC UTILITY SERVICE THROUGH A PHASE-IN RATE ADJUSTMENT; AND FOR APPROVAL OF RELATED RELIEF, INCLUDING (1) REVISED DEPRECIATION RATES, INCLUDING COST OF REMOVAL LESS SALVAGE AND UPDATED DEPRECIATION EXPENSE; (2) ACCOUNTING RELIEF, INCLUDING DEFERRALS AND AMORTIZATIONS, (3) INCLUSION OF CAPITAL INVESTMENT, (4) RATE ADJUSTMENT MECHANISM PROPOSALS, INCLUDING A NEW PROPERTY TAX RIDER, AND (5) NEW SCHEDULES OF RATES, RULES AND REGULATIONS FOR SERVICE.	)	**CAUSE NO. 46258**

VERIFIED PETITION FOR GENERAL RATE INCREASE AND ASSOCIATED RELIEF UNDER IND. CODE § 8-1-2-42.7 AND NOTICE OF PROVISION OF INFORMATION REQUIRED BY THE MINIMUM STANDARD FILING REQUIREMENTS

Indianapolis Power & Light Company d/b/a AES Indiana ("Petitioner", "AES Indiana", "IPL", or "Company") respectfully requests the Indiana Utility Regulatory Commission ("Commission") to issue an order authorizing AES Indiana to increase its rates and charges for electric utility service through a phase-in rate adjustment; and for approval of related relief, including: (1) revised depreciation rates, including cost of removal less salvage, and updated depreciation expense; (2) accounting relief, including deferrals and amortizations; (3) inclusion of capital investment; (4) rate adjustment mechanism proposals, including a new Property Tax Rider; and (5) new schedules of rates, rules and regulations for service. This filing is made pursuant to Ind. Code § 8-1-2-42.7 ("Section 42.7"). In support of this Petition, AES Indiana represents the following:

Petitioner's Corporate and Regulated Status and Service Area.

1. AES Indiana is a public utility corporation organized and existing under the laws of the State of Indiana with its principal office at One Monument Circle, Indianapolis, Indiana 46204. Petitioner is engaged in rendering electric utility service in the State of Indiana.

2. AES Indiana renders retail electric utility service to approximately 532,000 retail customers located principally in and near the City of Indianapolis, Indiana, and in portions of the following Indiana counties: Boone, Hamilton, Hancock, Hendricks, Johnson, Marion, Morgan, Owen, Putnam and Shelby Counties.

3. AES Indiana is part of The AES Corporation, a US-based energy company with global operations. AES US Services, LLC is the service company that supports AES Indiana and other AES affiliates.

4. In addition to AES' ownership, CDP Infrastructure Fund L.P., a wholly owned subsidiary of La Caisse de depot et placement du Quebec ("CDPQ"), also owns a minority equity interest in IPALCO, AES Indiana's immediate parent company.

Petitioner's "Public Utility" Status.

5. AES Indiana is a "public utility" under Ind. Code § 8-1-2-1 and a "utility" under Section 42.7. AES Indiana is subject to the jurisdiction of this Commission in the manner and to the extent provided by the Public Service Commission Act, as amended, and other pertinent laws of the State of Indiana.

6. AES Indiana is also subject to the jurisdiction of the Federal Energy Regulatory Commission ("FERC").

7. As authorized by the Commission's Order in Cause No. 42027 dated December 17, 2001, AES Indiana's transmission system is under the functional control of the Midcontinent Independent Transmission System Operator, Inc. ("MISO"), a FERC-approved regional transmission organization ("RTO"), and is used for the provision of open access nondiscriminatory transmission service pursuant to MISO's Open Access Transmission Tariff ("OATT") on file with the FERC. As a member of MISO, charges and credits are billed to AES Indiana for functional operation of the transmission system, management of the MISO markets, and general administration of the RTO. As a MISO member, AES Indiana must also adhere to the federal reliability standards developed and enforced by the North American Electric Reliability Corporation ("NERC"), which is the electric reliability organization certified by the FERC to establish and enforce reliability standards for the bulk power system. ReliabilityFirst ("RF") is one of eight NERC Regional Entities and is responsible for overseeing regional reliability standard development and enforcing compliance. AES Indiana's transmission facilities are wholly located with the RF region.

AES Indiana's Electric Utility System.

8. AES Indiana renders electric service by means of electric production, transmission and distribution plant, as well as general property, equipment and related facilities, including office buildings, service buildings, and other property, all of which is used and useful for the convenience of the public in the production, transmission, delivery and furnishing of electric energy, heat, light and power. AES Indiana has maintained and continues to maintain its properties in good condition as reasonably necessary for the provision of electric service to customers in accordance with Indiana law.

9. AES Indiana's property is classified in accordance with the Uniform System of Accounts ("USOA") as prescribed by the FERC and approved and adopted by this Commission.

10. In order to continue to properly serve the public located in its service area and to discharge its duties as public utility, AES Indiana has made and continues to make numerous additions, replacements and improvements to its electric utility systems.

11. AES Indiana also engages in power purchase transactions through MISO and bilateral purchases as necessary to meet the demands of its customers.

Statutory Authority for Requested Relief.

12. This Petition is filed pursuant to Section 42.7. Other provisions of the Public Service Commission Act, as amended, Ind. Code § 8-1-2-1, *et seq*., that may be applicable to the subject matter of this proceeding, include, but are not limited to: Ind. Code §§ 8-1-2-0.5, 0.6, 4, 6, 10, 12, 14, 19, 20, 21, 23, 42, 61, 68 and 71 and Ind. Code § 8-1-8.8-11.

GAO 2013-5.

13. In accordance with the guidance provided by the Commission's General Administrative Order 2013-5 (Rate Case Standard Procedural Schedule and Recommended Best Practices for Rate Cases Submitted under Ind. Code § 8-1-2-42.7) ("GAO 2013-5"), AES Indiana provided its Notice of Intent to File Rate Case to the Commission on April 30, 2025. This Notice was provided at least 30 days prior the date of filing this Petition. A copy thereof was provided to the Indiana Office of Utility Consumer Counselor ("OUCC") and other stakeholders.

Test Year, Rate Base Cutoff Dates.

14. Pursuant to Section 42.7(d), AES Indiana is utilizing a forward-looking test period determined on the basis of projected data for the twelve (12) months ending December 31, 2026

(Test Year). In accordance with Section 42.7, this Test Year (which commences January 1, 2026), begins not later than 24 months after the date on which this Petition is filed.

15. AES Indiana is utilizing the Test Year end, December 31, 2026, as the general rate base cutoff date. AES Indiana proposes the Commission establish AES Indiana's authorized net operating income by applying the overall weighted average cost of capital to the Test Year end original cost rate base. The Company also proposes the Test Year end original cost rate base be used as the fair value of the Company's utility property.

Submission of Case-in-Chief and Other Supporting Documentation.

16. AES Indiana is filing its written case-in-chief, including the information required by Section 42.7(b), in written form contemporaneous with this Petition. In accordance with the Commission's GAO 2020-05 (Improving Procedural Efficiencies Guidelines and Recommendations), and to facilitate review of the filing, AES Indiana has attached to this Petition, as Petition Exhibit A, an index of issues, requests, and supporting witnesses. A summary of the witness testimony is attached hereto as Petition Exhibit B.[1]

17. AES Indiana has also prepared its filing in accordance with the Commission's Minimum Standard Filing Requirements ("MSFRs") (170 IAC 1-5-1 et seq.). As recognized in GAO 2013-5 (SB 560 Rate Case Standard Schedule), a future test year does not align with all of the Commission's pre-existing MSFRs. AES Indiana has provided supporting documentation in accordance with the MSFRs, GAO 2013-5, and GAO 2020-05, modified where appropriate to be compatible with the forward-looking test year authorized by Section 42.7. The Company's filing

[1] The overview of the Company's proposals herein and in the Exhibits to the Petition is intended to highlight issues and is not an exhaustive list of AES Indiana's requests in this proceeding. A complete account of AES Indiana's requested relief can be found in AES Indiana's case-in-chief.

also includes the load forecast, the cost-of-service study, the proposed return on equity and fair rate of return analysis, the depreciation study, and demolition studies. The supporting revenue requirement workpapers are also being provided in Excel format on electronic media with formulas intact pursuant to the best practices set forth in GAO 2013-5 and GAO 2020-05.

18. AES Indiana's supporting documentation also includes historical data for the calendar year 2024, the most recent audited set of financial statements at the time AES Indiana began preparing this filing.

19. The Company's prefiled case-in-chief includes the AES Indiana Exhibit 1 - Financial Exhibit which consolidates the data supporting AES Indiana's projected costs and revenues for the Test Year. Each Test Year adjustment is sponsored and described by an AES Indiana witness, as shown in the index included with AES Indiana Exhibit 1 - Financial Exhibit. AES Indiana Exhibit 1 presents AES Indiana's overall requested rate relief for the Test Year. The Financial Exhibit is organized by subject (e.g. financial schedules, cost of capital, rate base, revenue, operations and maintenance, tax, etc.) as shown in the exhibit index.

AES Indiana's Existing Rates and Rate Structure.

20. AES Indiana's current basic rates and charges were approved by the Commission in its Order in Cause No. 45911 based upon test year operating results for the twelve months ended December 31, 2022, adjusted for fixed, known and measurable changes and appropriate normalizations and annualizations.[2] Those basic rates and charges were effective May 9, 2024 and

[2] The Commission's Order in Cause No. 45911 was issued April 17, 2024 ("45911 Order"). Nunc Pro Tunc Orders were issued April 24 and 30, 2024.

remain in effect today, as modified by various riders approved by the Commission from time to time.[3]

21. AES Indiana files a quarterly Fuel Adjustment Clause ("FAC") proceeding (docketed as Cause No. 38703 FAC [X]) in accordance with Ind. Code § 8-1-2-42(d) and the Company's Standard Contract Rider No. 6 to adjust its rates to account for fluctuations in its fuel costs. AES Indiana also files adjustments to other riders set forth in its Commission-approved tariff. These riders adjust AES Indiana's rates for service to timely recover changes in certain costs associated with the provision of service.

22. The petition initiating Cause No. 45911 was filed with the Commission on June 28, 2023. Therefore, in accordance with Ind. Code § 8-1-2-42(a), more than fifteen months have passed since the filing date of AES Indiana's most recent request for a general increase in its basic rates and charges.

23. AES Indiana's current depreciation accrual rates were approved by the Commission's 45911 Order.

Petitioner's Operating Results Under Existing Rates.

24. Notwithstanding diligent efforts to continue to control costs, AES Indiana's underlying revenue requirements have changed and continue to change. Since its basic rates and charges were last established, AES Indiana has continued to make significant capital expenditures for additions, replacements and improvements to its electric utility system and operating expenses have increased.

[3] In this filing, the Company uses "basic rates" and 'base rates" interchangeably.

25. AES Indiana must continue to make significant capital expenditures to maintain the system at a current state of efficiency and otherwise meet the ongoing need for service in its service territory.

26. As a result of the capital additions and regulatory assets to be reflected in rate base in this filing and other changes in the ongoing cost of providing service, AES Indiana's Test Year return on its electric utility property is below the level required to provide revenues adequate to cover its necessary and reasonable operating expenses, to provide revenues which will enable AES Indiana to continue to attract capital required for additions, replacements and improvements to its electric utility property and to comply with regulatory mandates at a reasonable cost, to maintain and support AES Indiana's credit, to assure confidence in AES Indiana's financial soundness, and to earn a fair return on its electric utility property comparable to that available on other investments of comparable risk. AES Indiana's existing rates and charges will be insufficient to provide revenues adequate to cover its necessary and reasonable operating expenses and to provide the opportunity to earn the fair return to which AES Indiana is lawfully entitled. Therefore, AES Indiana' existing rates are unjust, unreasonable, insufficient and confiscatory and should be increased.

Petitioner's Proposed Rates and Charges.

27. Adequate rates are essential to allow AES Indiana to achieve the financial results that will be necessary to attract needed debt and equity capital on reasonable terms, to comply with environmental and other mandates and to otherwise invest to meet the continued need for electricity within AES Indiana's service area. AES Indiana requests new rates and charges and associated accounting relief be authorized to enable AES Indiana to realize a reasonable and adequate net operating income to render adequate and reliable service and facilities to the public.

28. As proposed in the case-in-chief, AES Indiana requests the Commission to approve an overall annual incremental increase in revenues from basic rates and charges, including rate adjustment mechanisms, in the total amount of approximately $192.9 million. AES Indiana proposes to implement the requested revenue increase in two steps through a Phase-in-Rate Adjustment ("PRA") process. As explained by Company witnesses Baker and Aliff, in Phase I (the initial step), revenue would increase by approximately $85.4 million. As also explained by Company witnesses Baker and Aliff, the second step will reflect an increase of $107.5 million. As discussed by witnesses Baker and Davis-Handy, there is also a revenue increase of approximately 17% already authorized by the Commission for Transmission Distribution System Improvement Charge ("TDSIC") Plan and other capital investment projects. This additional revenue increase is included in this filing.

29. Implementation of the requested rate increase in phases reasonably reflects the utility property that is used and useful at the time rates are placed into effect. It also captures the Test Year changes in the cost of labor following the Repowering of Petersburg Units 3 and 4. AES Indiana's proposed PRA process balances customer and Company interests and is detailed in AES Indiana's case-in-chief filed contemporaneous herewith.

30. The Company works to provide service at a price that is affordable and competitive across the residential, commercial and industrial customer classes. The impact of the proposed revenue increase on customers is detailed in the testimony of AES Indiana witnesses Rimal and Baker included with the Company's written case-in-chief filing made contemporaneous with this Petition.

31. The operating costs and investment reflected in the proposed revenue requirement are reasonable and necessary to fulfill the Company's obligation to provide service to customers and to provide a fair return on the Company's rate base. The capital investments reflected in the Company's filing support the electric system's reliability, resiliency, stability and environmental sustainability as well as affordability. Much of the capital investment has been previously approved by the Commission.

32. AES Indiana's proposed revenue requirement includes the regulatory assets for the Company's investment in certain joint ventures, certain environmental compliance and other costs AES Indiana has deferred in accordance with the Commission's Orders as identified in AES Indiana's case-in-chief.

33. This rate review also reflects the cost of operational needs, such as vegetation management, storm restoration and property taxes. This filing also updates depreciation rates to better align depreciation expense with the period in which the generation plants provide service to customers. The Test Year level of operating expense is accurate, reasonable and representative of AES Indiana's going forward cost of providing service.

34. AES Indiana proposes to implement a new Property Tax Adjustment Rider ("PTA"). The proposed PTA is designed to recover the excess (or deficit) of an estimate of the property tax amounts compared to the amount of such costs approved to be included in the determination of basic rates in this proceeding. AES Indiana also proposes to maintain its existing rate adjustment mechanisms with some modifications as further detailed in AES Indiana's case-in-chief and summarized in the Index attached to this Petition as Exhibit A. These proposals include a proposal to continue deferring and subsequently track and recover in the ECCRA the costs

incurred for the Petersburg Repowering Project that may not be included in base rates in this Cause. This proposal will provide timely cost recovery and reduce carrying charges that would otherwise be deferred for future recovery through rates.

35. AES Indiana proposes to adjust the then-current factors for the FAC, DSM, ECCRA, CAP, OSS Margin, and RTO rate adjustment riders for costs that will be reflected in the new basic rates and charges resulting from this proceeding. AES Indiana is proposing to continue to recover all expenses for DSM and Green Power Initiative in their respective rate adjustment riders.

36. The Company's other accounting and ratemaking proposals are reflected in AES Indiana's case-in-chief, including proposals to (a) defer for subsequent recovery or credit in rates (b) changes in federal or state statutory income tax rates or changes in the calculation of taxable income, and (c) defer for subsequent recovery or credit in rates through the proposed PTA Adjustment changes in Indiana property tax rates and expense.

37. AES Indiana's various rate design proposals are detailed in its pre-filed case-in-chief. An overview is reflected in the index to the filing included with this Petition as Exhibit A and summary of testimony of AES Indiana witness Rimal is included with Exhibit B to this Petition. The Company's filing also includes the Company's proposed firm load customer class revenue allocation factors that would be used should the Company elect to file a future Transmission, Distribution, Storage System Improvement Charge ("TDSIC") proceeding following this basic rate case. See Company witness Rimal. The Company requests Commission approval of these allocation factors. See Ind. Code § 8-1-39-9.

38. AES Indiana proposes to replace its existing rate schedules governing the electric utility service rendered by it with new schedules of rates and charges and terms and conditions applicable thereto. These changes are summarized in AES Indiana's prefiled testimony and shown in the redlined version of the Tariff included with AES Indiana's case-in-chief. The proposed rate schedules and revised Tariff are included in the Company's case-in-chief.

Five Pillars

39. The proposed filing reasonably considers reliability, affordability, resiliency, stability and environmental sustainability in accordance with Indiana Code § 8-1-2-0.6. In accordance with GAO 2023-04 ("Guidelines Regarding the Five Pillars"), the filing index included with this Petition as Exhibit A includes the location of information, discussions, and/or evidence regarding of each of the Five Pillars enumerated in Ind. Code § 8-1-2-0.6.

Confidential Information.

40. Pursuant to 170 IAC 1-5-15(e)(2), the electronic copy of the cost-of-service study is to be treated as confidential and protected from disclosure to the public under Ind. Code § 5-14-3-4 and Ind. Code § 8-1-2-29.

41. Contemporaneous with the filing of this Petition, AES Indiana is also filing a motion for protective order in accordance with 170 IAC 1-1.1-4 and to otherwise comply with 170 IAC 1-5-3. The filing of this motion is necessary and appropriate to protect other confidential information included in AES Indiana's filing. AES Indiana has entered into a nondisclosure agreement with the OUCC and will work together with any intervenors to negotiate an acceptable confidentiality agreement to facilitate the production of the confidential information as appropriate.

Procedural Schedule.

42. In accordance with 170 IAC 1-1.1-9(a)(8), Petitioner is working with the OUCC and potential intervenors to develop an agreed procedural schedule and associated terms. The Company's proposed schedule is attached hereto as Petition Exhibit C. This proposed schedule is based on the Commission's GAO-2013-05. To the extent necessary or appropriate and pursuant to 170 IAC 1-1.1-15, AES Indiana requests that a date for a prehearing conference and preliminary hearing be promptly set by the Commission to address procedural matters so as to allow completion of the case within 300 days in accordance with GAO-2013-05 and Section 42.7.

Customer Notification.

43. In accordance with Ind. Code § 8-1-2-61(a), AES Indiana will publish notice of the filing of this Petition in a newspaper of general circulation published in each Indiana county in which AES Indiana renders service. The proofs of publication of notice will be late filed as an exhibit.

44. In accordance with 170 IAC 4-1-18(c), AES Indiana will furnish to each residential customer within forty-five (45) days of this Petition, a notice which fairly summarizes the nature and extent of the proposed changes.

Attorneys For Petitioner.

45. The names and addresses of AES Indiana's duly authorized representatives, to whom all correspondence and communications concerning this Petition should be sent, are as follows:

Teresa Morton Nyhart (Atty. No. 14044-49)

WHEREFORE, Petitioner, AES Indiana, respectfully requests that the Commission promptly establish a procedural schedule and associated terms, make such investigation and hold such hearings as are necessary or advisable, and, thereafter, make and enter an order in this Cause in accordance with the 300-day time frame provided in GAO-2013-5 and Section 42.7:

a. finding that AES Indiana's existing rates and charges for electric utility service are insufficient to provide revenues to cover the reasonable and necessary Test Year operating expenses and fair return and are therefore unjust, unreasonable, insufficient, and confiscatory;

b. establishing and by order fixing increased rates and charges to be imposed, observed and followed in the future by AES Indiana in lieu of those found to be unjust, unreasonable, insufficient and confiscatory;

c. authorizing AES Indiana to revise and place into effect for accrual accounting purposes its depreciation rates as proposed in its evidence herein;

d. recognizing the Company's net prepaid pension asset in its capital structure;

e. including all of AES Indiana's utility plant in service, including plant to be in service by end of 2026, in the revenue requirement to be established in this Cause;

f. approving the new Property Tax Adjustment Rider;

g. approving the new Phase-in Rate Adjustment Rider;

h. authorizing AES Indiana to implement modifications to its rate adjustment mechanisms as proposed in AES Indiana's evidence;

i. approving AES Indiana's proposal to include in the ECCRA the costs incurred for the Petersburg Repowering Project that are not included in base rates in this Cause.

j. approving and granting accounting authority to AES Indiana to implement its accounting and rate proposals, including the Company's cost deferrals, authority to maintain the Major Storm Damage Restoration Reserve Account and the Vegetation Management Reserve Account, and approval to amortize rate case expense and to amortize the regulatory asset created pursuant to the Commission's Order in Cause No. 43580;

k. approving the accounting relief and other requests identified in AES Indiana's evidence herein;

l. approving AES Indiana's proposed rate design including the changes to the customer charges for the residential and small commercial rate classes;

m. approving various changes in AES Indiana's Rules and Regulations of Service and AES Indiana's Electric Service Tariff as proposed in AES Indiana's evidence herein;

n. authorizing and approving the filing by AES Indiana of new schedules of increased rates and charges for electric service so as to provide just, reasonable, sufficient and non-confiscatory rates; and

o. granting to AES Indiana such other and further relief as may be appropriate and proper.

Respectfully submitted this 3rd day of June 2025,

INDIANAPOLIS POWER & LIGHT COMPANY
d/b/a AES INDIANA

By: Brandi L. Davis-Handy
Brandi Davis-Handy, President

Verification

I, Brandi Davis-Handy, President of AES Indiana, affirm under the penalties for perjury that the foregoing factual representations are true to the best of my knowledge, information, and belief.

Dated: June 3, 2025.

Brandi Davis-Handy

Indianapolis Power & Light Company d/b/a AES Indiana
2025 Rate Case
Index of Issues, Requests, and Supporting Witnesses[1]

Subject	Description	Supporting Witness
Test Year (TY)	Twelve Months Ended December 31, 2026.	• Petition ¶14. • Peters.
Historical Base Period	Twelve Months Ended December 31, 2024.	• Petition ¶18. • Peters.
Financial Information and Revenue Requirement Details	AES Indiana Exhibit 1 - Financial Exhibit presents the overall requested rate relief and consolidates data supporting the Company's projected TY costs and revenues.	• Various, as reflected in the AES Indiana Exhibit 1 - Financial Exhibit index and supporting workpapers.
Five Pillars	Consideration of Five Attributes enumerated in Ind. Code § 8-1-2-0.6.	• Davis-Handy (five pillars). • Peters (forecast and cost management). • Holtsclaw (T&D). • Ellis (generation). • Rimal (COS & rate design). • Baker (bill comparison).

[1] This Index of the Company's case-in-chief is intended to highlight issues and is not an exhaustive list of AES Indiana's requests in this proceeding. A complete account of AES Indiana's requested relief can be found in AES Indiana's case-in-chief, including but not limited to AES Indiana's petition, testimony, exhibits. Additional information is provided in the workpapers, and the Company's MSFR responses. AES Indiana Exhibit 1 - Financial Exhibit provides an additional index.

Revenue Requirement			
Subject	**AES Indiana Proposal**	**Supporting AES Indiana Witness**	**Workpaper or Exhibit Reference**
Overall Revenue Increase	• Total annual incremental increase in revenue of approximately $192.9 million. • Filing also reflects an approximately 17% revenue increase to reflect cost recovery previously approved by the Commission. • The Company proposes to implement the increase in two phases via a Phase-In Rate Adjustment (PRA)	• Davis-Handy (overview). • Rimal (cost of service/rate design). • Aliff (PRA). • Baker (bill comparison).	• AESI-OPER, Schedule OPINC.
Financial Forecast	• Set rates based on AES Indiana's TY financial forecast. • Reflect forecasted revenues, O&M, capital investments and cost of capital in rates.	• Peters (forecast). • Russo (load forecast). • Aliff (rate schedules). • Baillie (property and casualty insurance expense). • Dalton (compensation). • Dickerson (fuel inventory) • Ellis (generation O&M and capital investment). • Holtsclaw (T&D O&M and capital investment). • See also entries below.	• AES Indiana Exhibit 1 – Financial Exhibit (which is indexed) and supporting workpapers.
Return on Equity (ROE)	• Authorize 10.7% ROE.	• McKenzie.	• AESI-CC, Schedules CC2 (P1) and CC2 (WACC).

Revenue Requirement (Cont'd)			
Subject	**Request**	**Supporting Witness**	**Workpaper or Exhibit Reference**
Weighted Average Cost of Capital (WACC)	• Authorize WACC applied to forecasted original cost rate base. • AES Indiana's forecasted overall WACC: 7.36% at December 31, 2025 and 7.52% at end of TY (December 31, 2026). • Adjusted TY ratemaking capital structure reflects 47.33%/46.48% ratio of long term debt to equity.	• McKenzie (ROE; reasonableness of capital structure). • Illyes (capital structure, overall WACC calculation, financing activity).	• AESI-CC, Schedules CC2 (P1) and CC2 (WACC).
Depreciation	• Set new depreciation rates and reflect the resulting depreciation expense in base rates based on depreciation study.	• Spanos (depreciation). • Guletsky (decommissioning study (Eagle Valley, Georgetown, Harding Street, Petersburg). • Wood (decommissioning study Hoosier Wind). • Peters (depreciation and amortization expense).	• Attach. JJS-1 (2024 Depreciation Study). • Attach. JJS-2 (2026 Depreciation Study). • Attach. JJS-3 depreciation calculation using ALG). • Attach. PMG-1 (2024 Decommissioning Study). • Attachment DB-1 (Decommissioning Study-Hoosier Wind). • AESI-OPER, Schedule DEPR.
Prepaid Pension Asset	• Include AES Indiana's Prepaid Pension Asset net of the OPEB liability as component in the capital structure.	• Roach.	• Attach. HMR-4. • AESI-CC, Sch. CC2.

Revenue Requirement (Cont'd)			
Subject	**Request**	**Supporting Witness**	**Workpaper or Exhibit Reference**
Taxes	• Reflect TY tax expense in base rates. • Apply gross revenue conversion factor (GRCF). • Update excess accumulated deferred income tax (ADIT). • Present effective tax rate. • See also new Property Taxes Adjustment (PTA) in Rider section below.	• Miller. • Dalton (payroll tax).	• AESI-REVREQ, Sch. REVREQ2 (GRCF). • AESI-OPER, Sch. TX1 through TX-3 (tax expenses). • AESI-OPER, Sch. TX4 (ADIT). • AESI-OPER, Sch. TX5 through TX 8 (adjustments and calculations; effective tax rate). AESI-OPER, Sch. OTX1 through OTX3 (other taxes).
Forecasted Rate Base	• Reflect forecasted capital projects in rate base using PRA.	• Peters (capital forecast and description of forecast methodology). • Ellis (generation forecast and projects; inventory). • Holtsclaw (T&D forecast and projects; inventory). • Dickerson (fuel inventory). • Aliff (PRA, TDSIC roll-in and regulatory assets).	• Petition ¶¶28-29. • AESI-RB, Schedules RB1 through RB8.

Revenue Requirement (Cont'd)			
Subject	**Request**	**Supporting Witness**	**Workpaper or Exhibit Reference**
Major Storm Damage Restoration Reserve and Storm Expense	• Continue mechanism previously approved by Commission with updated level of embedded expense.	• Aliff (Reserve). • Holtsclaw (storm expense support).	AESI-OPER, Sch. OM11.
Vegetation Management & Reserve Account	• Set rates using forecasted Vegetation Management cost for distribution and transmission systems including use of extended trim specification for distribution system over five-year cycle. • Continue to utilize the methodology agreed to in Cause No. 45911 whereby Company defers any shortfalls in annual vegetation management costs relative to the amount embedded in base rates.	• Flint (vegetation management cost forecast). • Aliff (Reserve Account).	• AESI-OPER, Sch. OM12.
Regulatory Assets And Deferrals.	• Reflect regulatory assets includable in rate base, including Company investment in Joint Ventures and other projects previously approved by the Commission.	• Aliff.	• AES Indiana Attachment KA-1. • AESI-RB, Sch. RB8.
General Accounting and Other Matters.	• Accounting standards and internal controls, affiliate services and AROs.	• Faller.	• AES Indiana Attachments DF-1 through DF-3 (services agreement and CAAM). • AESI-RB, Schedule RB5 (remove forecasted asset retirement costs).

Cost of Service and Rate Design			
Subject	**Request**	**Supporting Witness**	**Workpaper or Exhibit Reference**
Allocated Cost of Service Study ("ACOSS")	• Same ACOSS model as used in AES Indiana's most recent rate cases, Cause Nos. 45911, 45029 and 44576.	• Rimal.	• Confidential WP BR-1.0C (ACOSS Model); also, Confidential WP BR 3.0C (Rate Design and Revenue Proof).

Overall Rate Design	• Allocation of revenue based on two criteria: 1) eliminate 50% of the current subsidy subject to an increase cap of 1.3 times the overall system increase to any rate schedule; and 2) no rate schedule receives a rate reduction. Approach reduces inter-class subsidies and moves classes closer to their cost of service, while moderating impacts on any one particular class.
	• Move toward cost of service while recognizing gradualism through approval of:
	  • $15.00 monthly service charge for small customers (< 325 kWh/month).
	  • $20.00 monthly service charge for larger customers (> 325 kWh/month).
	  • Continue to use declining block rate structure to recover fixed costs not recovered via customer charge.
		• Rimal (rate design and rates).	• Attach. BR-2 through -9 (rate design).
			• See also supporting Rimal workpapers.
			• Attach. AJB-1 and AJB-2 (clean and redline tariff).

Cost of Service and Rate Design (Cont'd)			
Subject	**Request**	**Supporting Witness**	**Workpaper or Exhibit Reference**
Rate Design - Other	• Updated TDSIC allocation factors presented for approval.	• Rimal.	• Attach. BR-13 (TDSIC allocation factors).
Rider Proposals – General	• Maintain existing rate adjustment riders and add two new riders.	• Aliff.	• Attach. AJB-1 & 2 (clean and redline tariff).
New Rider Proposals	• New Property Tax (PTA) Rider 18 - the annual PTA is designed to recover the excess (or deficit) of an estimate of the property tax amounts compared to the amount of such costs embedded in the determination of basic rates in this proceeding. • Phase-In Rate Adjustment (PRA) Rider 28 - the PRA credit is the mechanism that will be used to implement the new rates in two distinct steps.	• Miller (PTA support). • Aliff (PTA and PRA rider mechanics).	• Attach. AJB 1 & 2 (clean and redline tariff).
Rider Proposals TDSIC (Rider 3)	• No change in Rider. • TDSIC investment rolls into base rates.	• Aliff.	Attach. AJB 1 & 2 (clean and redline tariff).
Rider Proposals FAC (Rider 6)	• Update base cost of fuel.	• Dickerson (updated base cost of fuel). • Aliff (presentation of riders).	• Attach. AJB 1 & 2 (clean and redline tariff). • AESI-OPER, Sch. OM2 (base cost of fuel).

Cost of Service and Rate Design (Cont'd)			
Subject	**Request**	**Supporting Witness**	**Workpaper or Exhibit Reference**
Rider Proposals ECCRA (Rider 20)	• Updated benchmark for consumables, continued tracking of emission allowances. • Use ECCRA to track Petersburg Repowering costs not included in base rates.	• Steiner (consumables & allowances). • Aliff (rider).	• Attach. AJB 1 & 2 (clean and redline tariff). • AESI-OPER, Sch. OM5 (consumables). • AESI-OPER, Sch. OM8 (allowances).
Rider Proposals DSM (Rider 22)	• No change to Rider • Filing updates lost revenue margin rates.	• Aliff (rider, lost revenue margin rates).	• Attach. KA-2 – lost revenue margin rates.
Rider Proposals – CAP (Rider 24)	• Update benchmark.	• Steiner (forecasted capacity sales and costs). • Aliff (rider).	• Attach. AJB 1 & 2 (clean and redline tariff). • AESI-OPER, Sch. REV9 (capacity sales).
Rider Proposals – OSS (Rider 25)	• Update OSS margins embedded in basic rates and continue to flow 100% of margins through OSS Rider for benefit of customers.	• Steiner (forecasted OSS margins). • Aliff (rider).	• Attach. AJB 1 & 2 (clean and redline tariff). • AESI-OPER, Sch. REV6 (OSS margins).
Rider Proposals – RTO (Rider 26)	• Update MISO Non-fuel costs and revenues embedded in basic rates.	• Aliff.	• Attach. AJB 1 & 2 (clean and redline tariff). • AESI-OPER, Sch. REV8 and OM13.
Tariff	• Update tariff to reflect new rates and implement minor clarifications of the Tariff language.	• Rimal (rates). • Baker. • Aliff.	• Attach. AJB 1 & 2 (clean and redline tariff). • Attach. AJB 3 (index of tariff revisions).

Witness Summaries

1. Brandi Davis-Handy – President of AES Indiana.

AES Indiana (also referred to as "the Company") provides retail electric service in ten counties in Central Indiana, including Marion County and parts of nine adjoining counties. AES Indiana is guided by three core values. First, we put safety first for our people, contractors and communities. Second, we act with the highest standards, which is at the core of all we do and how we conduct ourselves and interact with stakeholders. Third, we work all together, as one team moving with vision, speed, and flexibility to adapt to our dynamic and rapidly changing world. As of December 31, 2024, AES Indiana supplies retail electric service to approximately 532,000 residential, commercial, and industrial customers.

While the Company works to responsibly manage the cost of providing service, in this case, AES Indiana also seeks to better align the rate review process with the cost incurred to provide service. The Company proposes to use the forward-looking calendar year 2026 as the test period for this proceeding. The Company moved to the future test year approach utilized by many other investor-owned utilities here in Indiana and nationally to mitigate the impact of regulatory lag and to establish a closer nexus between the cost incurred to provide service and the reflection of that cost in the price for service.

The Commission has previously improved investments in facilities needed to provide service to AES Indiana. This includes the Company's investment in the renewable joint ventures, TDSIC, and the Petersburg Unit 3 and 4 Repowering.

To level set, if this rate case was not filed, cost recovery previously authorized by the Commission will increase revenue by approximately 17% over the base rates approved in the Company's last rate case. This revenue increase relates to the TDSIC Plan cost recovery and ECR cost recovery for previously approved projects (Hardy Hills, Petersburg Energy Center, Pike County Battery and Hoosier Wind). This cost recovery is rolled into rates in this filing.,

In this proceeding, AES Indiana also requests Commission approval of an annual incremental increase in revenues of approximately $192.9 million. The amount is based on a test year ended December 31, 2026. The overall revenue increase calculated in the Company's filing is expected to be placed into effect January 1, 2027, as part the second step of a two-step phase-in plan.

The rate relief sought in this case is driven by the increasing cost of providing service, including the cost of storm restoration, vegetation management, property taxes, and depreciation. The Company rate filing reasonably considers each of the Five Pillars of electric utility service, namely: Reliability; Affordability; Resiliency; Stability; and Environmental Sustainability. The rate request proposed by the Company in this proceeding is balanced and necessary to support the Company's ongoing effort to provide reliable electric service and facilities to customers.

AES Indiana commits to continue its efforts to engage in a respectful dialogue with all stakeholders about the costs that drive the price for electric service.

2. David C. Peters – Senior Director of Financial Planning and Analysis ("FP&A") and Transactions, AES US Services.

The Company proposes rates based on the forward-looking calendar year, January 1, 2026, through December 31, 2026 ("Test Year"). This includes both base (also referred to as "basic") rates and rider rates. AES Indiana Exhibit 1 – Financial Exhibit consolidates the data supporting AES Indiana's projected costs and revenues for the Test Year. This Financial Exhibit is organized by subject (e.g., financial schedules, cost of capital, rate base, revenue, etc.) as shown in the Exhibit Index. The Test Year is based on the forecast that was prepared during the Company's last annual forecast development process. The adjustments are described by the Company's witnesses, and, where applicable, supported by the workpapers as shown on the index to AES Indiana Exhibit 1 – Financial Exhibit.

The major components of the forecast reflected in the Test Year are: Operating revenue; Load; Generation; Operation and Maintenance ("O&M"); Depreciation and amortization expense; Taxes; and Capital expenditures. The load forecast is presented by AES Indiana witness Russo.

The projected revenue increase mainly reflects the return of and on new assets that are projected to be placed in service, higher operating costs (O&M and property taxes), and higher debt financing costs.

As shown on Table DCP-1, non-fuel, non-labor O&M is $0.2 million (0.1%) higher in the Adjusted Test Year compared to the Historical Base Period. The relatively flat O&M demonstrates reasonable and sound management of costs that are under the Company's control despite inflationary pressures and growth in rate base during that period. The two areas with material cost increases in the Adjusted Test Year are vegetation management and storms. AES Indiana witness Flint discusses the vegetation management cost in detail. Higher storm expense is reflective of recent actuals as discussed by AES Indiana witnesses Holtsclaw and Aliff.

The increase in depreciation and amortization expense is attributable to four factors – 1) depreciation expense on capital investment additions; 2) amortization expense on renewable projects listed as regulatory assets (*e.g.*, Hardy Hills, Pike Battery, and Petersburg Energy Center); 3) updated decommissioning cost studies; and 4) using the Equal Life Group ("ELG") procedure for depreciation, which AES Indiana witness Spanos recommends, instead of the continued use of the Average Life Group ("ALG") procedure agreed to in settlement in last rate case.

The increase in income taxes included in the Adjusted Test Year is primarily driven by a higher taxable income at AES Indiana's proposed rates. The increase in Taxes Other than Income Taxes included in the Adjusted Test Year is primarily driven by higher real estate and personal property taxes due to higher utility plant balances.

AES Indiana's forecasted capital additions are $952.9 million and $957.3 million in 2025 and 2026, respectively. AES Indiana Confidential Workpaper DCP-2 contains a list of in service capital projects during the Linking Period and Adjusted Test Year. All information is broken down by function (generation, transmission, distribution, etc.). AES Indiana witnesses Ellis and Holtsclaw discuss additional details for generation, transmission, and distribution capital

investments. AES Indiana witness Peters provides additional details for digital and other capital investments.

The forecasted test period data is reasonable and representative of AES Indiana's operations during the period rates will be in effect. Mr. Peters' testimony provides the relevant assumptions in the forecast and reflects a comprehensive effort of work across many functional teams at AES Indiana to establish a forecast that is reasonable and accurate. Therefore, the Adjusted Test Year results reflected in AES Indiana Financial Exhibit AESI-OPER, Schedule OPINC provide a sound basis for setting new rates.

3. Michael E. Russo – Senior Forecast Consultant, Itron, Inc.

Mr. Russo testifies the load forecast approach is based on a set of linear regression models estimated for the tariff classes. Models are estimated using historical monthly billed sales and customer data for the period January 2011 to September 2024 for the residential, small commercial, and secondary service large tariffs. Models for the primary service large and primary distribution tariff are estimated using data for the period January 2018 to September 2024. The model derived forecasts capture the expected impact of customer growth, economic activity, regional end-use saturation and efficiency trends, and AES Indiana's energy efficiency ("EE") program savings. The forecast is then adjusted for customer-owned photovoltaic ("PV") generation, and electric vehicles ("EV"). The primary service large and primary distribution tariff models use a simple regression model approach which relates historical sales to weather conditions and monthly binaries. The lighting and water heating tariff models use a simple regression model approach which relates historical sales to monthly binaries, designed to capture the seasonal variation.

Mr. Russo describes the sales forecast outlook from the end of model estimation period through the 2026 test-year period. He testifies that the test-year sales do not include adjustments for future large loads such as data centers. Mr. Russo explains how weather inputs are calculated, discusses the economic variables used in the forecast, identifies the sources for the end-use saturation and efficiency data used in the SAE model inputs, and explains how AES Indiana sponsored energy efficiency savings are incorporated into the forecast. Mr. Russo explains how forecasted billing month sales are converted to calendar month sales. He also explains how the load shapes are developed and how the tariff class coincident and non-coincident peaks were calculated.

4. Kimberly Aliff – Revenue Requirements Manager, Regulatory Affairs, AES Indiana.

AES Indiana Financial Exhibit AESI-REVREQ, Schedule REVREQ1 fairly represents the Company's revenue requirement request in this proceeding after taking into account adjustments to reflect certain Commission Orders, changes to rate base, regulatory assets, expenses, and revenues.

AES Indiana witness Holtsclaw discusses the recent history of the number of storms by level that have occurred and supports the forecasted storm expense. As can be seen at the bottom of AES Indiana Financial Exhibit AESI–OPER, Schedule OM11, due to the recent qualifying storm activity, AES Indiana projects that as of December 31, 2026, there would be a balance of $14.1 million in the Major Storm Regulatory Asset. This balance includes an additional forecasted reserve for the April 2, 2025 storm that impacted AES Indiana service territory discussed by AES

Indiana witness Holtsclaw. AES Indiana proposes to amortize this balance over three years, resulting in a forecasted annual true up of the storm reserve balance of $4.7 million, which will be recorded against the Major Storm Regulatory Asset. The total major storm reserve benchmark and true up for the Adjusted Test Year is $12.0 million.

AES Indiana proposes to continue to utilize the same Vegetation Management Reserve methodology as accepted in Cause Nos. 45029 and 45911.

AES Indiana is not proposing substantive changes to the current rate adjustment riders.

As discussed by AES Indiana witness Ellis, the Petersburg Repowering Project is currently underway. In its Order in Cause No. 46022, the Commission issued a CPCN under Ind. Code § 8-1-8.5-2 and approved the Petersburg Repowering Project as a clean energy project under Ind. Code § 8-1-8.8-11. The Company expects to complete this project in December 2026, however, if the repowering of Petersburg is not completed by the end of the Adjusted Test Year, the Company proposes to include the deferred balances approved for recovery in a subsequent ECCRA filing after an Order in this proceeding is issued. Similar to approvals for other clean energy projects, the use of the ECCRA will reduce the overall balance of the regulatory asset and resulting revenue requirement as of the time it will be included in a subsequent base rate case.

AES Indiana is proposing to add one new rate adjustment rider – Property Tax Adjustment ("PTA"). AES Indiana witness Miller discusses how the annual property tax expense is material and experiences volatility. He further explains why an adjustment rider provides an efficient means to allow property tax changes to flow through to customers in a timely manner. The PTA factor is intended to recover the excess (or deficit) of an estimate of the property tax amounts compared to the amount of such costs approved to be included in the determination of basic rates in this proceeding.

The Company proposes to implement the new base rate order in two phases to reasonably reflect rate base and revenue requirement updates at the time rates are placed into effect. The Phase-In Rate Adjustment ("PRA") credit described by AES Indiana witness Rimal is the mechanism that will be used to implement rates in two distinct steps and will be applied to Phase 2 rates in order to calculate Phase 1 rates. The PRA will be eliminated at the end of the Test Year to reflect the second step of the phase-in. The Phase 2 rates will reflect the rate base and revenue requirement as of December 31, 2026 and adjust the Petersburg cost of labor to reflect the completion of the Repowering project. The Company has also aligned the timing of its capital structure with net plant in service for purposes of developing the PRA rates. The PRA process will reasonably capture changes in utility investment as of the beginning and end of the Test Year, as well as Test Year changes in operating costs at Petersburg.

5. Adrien M. McKenzie – CFA, President, Financial Concepts and Applications, Inc. (d/b/a FINCAP, Inc.).

Mr. McKenzie applies the DCF, CAPM, ECAPM, risk premium, and expected earnings analyses to a proxy group of electric utilities, with the results being summarized on AES Indiana Attachment AMM-2. As shown there, based on the results of his analysis, a cost of equity range for the Company's electric operations of 10.2% to 11.2% is recommended. Mr. McKenzie concludes that

the 10.7% midpoint of this range represents a just and reasonable cost of equity that is adequate to compensate the Company's investors, while maintaining the Company's financial integrity and ability to attract capital on reasonable terms.

As this testimony documents, the electric utilities in the proxy group operate under a wide variety of regulatory mechanisms, including decoupling and infrastructure cost trackers. Similarly, the vast majority of these proxy firms operate in regulatory jurisdictions that allow for future test years, formula rates, and multi-year rate plans. As a result, there is no basis to distinguish AES Indiana's investment risks from the proxy group used as the basis of his analyses.

The ROE recommendation does not consider the very recent dislocations in capital markets attributable to the potential impact of an ongoing trade war on global commerce and economic growth. While investors are clearly demanding significantly higher returns to compensate for the unprecedented risks associated with the global threat to economic growth and financial stability posed by the Trump administration's tariff policies, the high degree of uncertainty and extreme short-term volatility greatly complicates any ability to account for this heightened risk in evaluating the cost of equity for the Company at this time. Thus, Mr. McKenzie may revise his analyses and ROE recommendations for AES Indiana as additional information becomes available and there is greater clarity over the implications of the trade conflict on investors' long-term risk perceptions and required returns.

6. Dustin J. Illyes – Treasurer, US Utilities, including AES Indiana, AES US Services.

The Company's Adjusted Test Year weighted average cost of capital ("WACC") is forecasted to be 7.52% with a regulatory capital structure of 47.33% long-term debt and 46.48% common equity as of December 31, 2026, which is consistent with the Company's long-term targeted capital structure. This, and the investor-supplied capital structure are shown on AES Indiana Financial Exhibit AESI-CC, Schedule CC2.

AES Indiana targets a capital structure that allows it to maintain the financial strength of an investment grade utility so that the Company can deliver service at a reasonable cost to customers. Maintaining an investment grade profile is important to ensure the Company has reliable access to the credit markets at attractive interest rates during all types of economic cycles, ultimately benefiting customers. This in turn provides the ability to meet its financial obligations during periods of heavy capital expenditures.

The WACC reflects the ROE developed and recommended by AES Indiana witness McKenzie. The forecasted rates for long-term debt at the end of the Linking Period (December 31, 2025) and the end of the Adjusted Test Year (December 31, 2026) shown on AES Indiana Financial Exhibit AESI CC, Schedules CC1 (P1) and CC1, are 5.26% and 5.38%, respectively.

In 2025, AES Indiana plans to issue $340 million of first mortgage bonds. This will include the refinancing of two series of first mortgage bonds that have or will mature, totaling $80 million, with the remainder of the proceeds being used as part of the financing plans for the Company's ongoing capital investment program. Additionally, in 2026, AES Indiana plans to refinance its $30 million and $60 million tax-exempt first mortgage bonds that come due. The 2025 long-term debt issuance was authorized by the Commission in Cause No. 45954, on February 29, 2024. The

Company expects to file a separate financing petition later this year for Commission approval of the 2026 refinancing.

Predictability, full and timely cost recovery, and a regulatory environment supportive of a utility's financial integrity are key credit considerations at all three credit rating agencies. While the credit rating agencies currently view the Indiana regulatory environment as supportive, they also point to any future deterioration or weakening in the supportiveness of the regulatory environment as one of the key factors that could lead to a downgrade for AES Indiana. Any negative change in the ratings of AES Indiana would have a negative impact on both the Company and its customers.

The credit ratings of AES Indiana have not changed since the Company's last rate case. However, some of the outlooks did change. In January 2024, S&P lowered their outlook from Positive to Stable, and in June 2024, Moody's outlook was lowered from Stable to Negative. Both agencies referenced temporary strain on financial metrics from elevated capital expenditure investments as their rationale for the downgrades.

The Company's WACC and capital structure underpin its financial integrity and are key considerations given by the credit rating agencies, along with the regulatory environment, in determining the Company's credit ratings. Maintaining investment grade ratings is vital to both AES Indiana and its customers as it allows for the necessary flexibility to determine when and how to access the capital markets in order to achieve reasonable terms. A constructive outcome in this case that approves the Company's capital structure and WACC as filed will support the continued financial integrity of AES Indiana, allowing it to earn a reasonable rate of return, meet its financial obligations, and provide safe and reliable service to its customers.

7. Nicholas M. Miller – Director, Tax for AES US Utilities, AES Services.

The Company has accurately reflected income taxes and taxes other than income taxes in the revenue requirement in this proceeding. The calculations made to derive these expenses are reasonable and consistent with the methodology used in prior Commission proceedings. The Gross Revenue Conversion Factor calculation is consistent with House Enrolled Act 1001 (the state budget bill), which increased the amount of the public utility fee to 0.175%.

The Company has included excess accumulated deferred income taxes ("ADIT") amortization in the Unadjusted Test Year and Adjusted Test Year totaling $3.4 million, which is consistent with the amount established in Cause No. 45911. To the extent that the actual annual amortization determined by the average rate assumption method ("ARAM") differs from the estimated amount, the balance of the non-normalized deficient ADIT shown on Workpaper TX4-WP1, line 23, will be increased or decreased to ensure that the total amortization of normalized and non-normalized excess ADIT is equal to $3.4 million, and the normalized amortization is equal to ARAM. This approach may result in a residual balance of non-normalized excess or deficient ADIT that will remain once the normalized balance is fully amortized, which is dependent on the result of the annual ARAM calculation and cannot be estimated at this time. The treatment of the residual non-normalized balance will be addressed in a future proceeding. This accounting treatment is necessary to ensure the Company remains in compliance with tax normalization rules and is consistent with the methodology used and accepted in the Company's last base rate case in Cause No. 45911.

In the event of changes to federal or state income tax law, the Company proposes to defer as a regulatory asset or liability all differences in calculated income tax expense resulting from the change in law until those changes can be included in the calculation of the Company's rates. This could include changes to the federal or state statutory income tax rate or changes in the calculation of taxable income. If tax law changes are enacted while this proceeding is still pending, the Company will adjust the income tax expense included in the calculation of the revenue requirement in this case. However, if this proceeding has been concluded, the Company will initiate a sub-docket or other proceeding to adjust rates to reflect the income tax expense that would have been included if the tax law changes were enacted at the time of filing. These adjustments will also reflect any necessary changes to excess or deficient ADIT resulting from any changes in statutory income tax rates. This proceeding will be limited to the applicable tax law changes.

While the starting point of any property tax expense is based on capital spend and property placed in service, the ultimate methodologies used to assign an assessed value on that property are determined by the Indiana Department of Local Government Finance ("DLGF"). This methodology includes adjustments that are outside the Company's control, such as the deduction for abnormal obsolescence.

There has been an increased focus on property taxes in the Indiana legislative sessions in recent years which provides uncertainty regarding the ability to accurately forecast property tax expense. In 2025, legislation was passed that could dramatically change the calculation of distributable personal property tax assessed value. Specifically, Senate Enrolled Act No. 1, signed into law on April 15, 2025, eliminates the 30% floor rule for certain assets placed in service after January 1, 2025, which would have the potential to significantly reduce assessed values over time. The passage of this bill is not expected to have any immediate impact on the Company's property tax expense, but it does have the potential to become impactful over time.

The proposed New Standard Contract Rider No. 18 PTA provides an efficient means to flow cost increases or decreases resulting from a change in property taxes through rates in a timely manner.

8. John J. Spanos – President, Gannett Fleming.

Mr. Spanos calculates depreciation rates for AES Indiana's electric plant as of June 30, 2024. He also recommends depreciation rates for AES Indiana's forecasted electric plant in service as of December 31, 2026. Mr. Spanos recommends the annual depreciation accrual rates for each depreciable group be calculated based on the straight-line remaining life method, using remaining lives weighted consistent with the ELG procedure. The straight-line remaining life method of depreciation allocates the original cost of the property, less accumulated depreciation, less future net salvage, in equal amounts to each year of remaining service life. The ELG procedure is a method for determining the remaining life annual accrual for each vintage property group. Under this procedure, the future book accruals (original cost less book reserve) for each vintage are divided by the composite remaining life for the surviving original cost of that vintage. The vintage composite remaining life is derived by summing the original cost less the calculated reserve for each ELG and dividing by the sum of the whole life annual accruals. Mr. Spanos testifies that the ELG procedure is the most accurate procedure for matching asset utilization with asset recovery. Depreciation rates as of June 30, 2024 and December 31, 2026 using the ALG procedure are also

provided. Mr. Spanos testifies the depreciation and amortization rates set forth in Attachment JJS-2 appropriately reflect the rates at which the costs of AES Indiana's assets are being consumed over their useful lives. These rates are an appropriate basis for setting electric rates in this matter and for the Company to use for booking depreciation and amortization expense going forward.

9. Alexander J. Dickerson – Senior Manager, Wholesale Energy, AES Indiana.

The Adjusted Test Year fuel inventory forecast removes the Company's existing coal inventory from rate base as well as the fuel oil inventory at Petersburg as these will no longer be necessary following the Petersburg gas conversion. Harding Street will continue to maintain 1,000,000 gallons of fuel oil inventory during the Test Year as required by the Company's black start protocol requirements. AES Indiana Financial Exhibit AESI-OPER, Schedule OM2 shows the derivation of the Adjusted Test Year base cost of fuel, which reflects the Company's forecasted dispatch of system resources for 2026. More specifically, the base cost of fuel includes several different components that together make up a portion of a customer's bill. These components include the cost of generation from AES Indiana assets, power purchase agreements, and market purchases from MISO, and are offset by Off System sales back to MISO. The base cost of fuel also includes firm gas transportation costs. The proposed Adjusted Test Year base cost of fuel is $0.044940 per kwh. By comparison, the Company's current base cost of fuel, established in Cause No. 45029, is $0.039027.

10. Caleb Steiner – Director, Regulated Operations and Term Management, US Utilities, AES Services.

This testimony discusses the EnCompass model inputs and outputs and provides background detail and explanation for the forecasted generation cost and quantity estimates.

As proposed by the Company, OSS Rider 25 should continue to flow 100% of the Company's OSS margins through rates to the benefit of retail customers to allow retail service rates to be reduced by AES Indiana's efforts in the wholesale market. The level of OSS margins embedded in the retail revenue requirement should be decreased from the $28.6 million benchmark in current rates to $24.9 million.

Incremental changes in the charges and credits for the net cost and benefit of AES Indiana's participation in MISO's Resource Adequacy Process and the cost and benefit of bilateral capacity transactions should continue to be recognized via the Company's existing CAP Rider. The retail revenue requirement should include an embedded $6.1 million credit to reflect a net capacity sale varying by season.

The structure of the MISO capacity construct and accreditation methodology discussed above are expected to vary annually and impact the Company's capacity position in the Test Year and going forward. That said, the Company's benchmark proposal reasonably considers the structure of the PRA, the uncertainty of auction clearing prices for each season, and the liquidity of the capacity market. Updating the benchmark as proposed by AES Indiana allows basic rates to reflect a representative level of revenues and costs the Company expects during the period rates are projected to be in effect.

Consumable costs are variable, largely outside AES Indiana's control, and potentially significant. The level of consumable expense embedded in the retail rate, $4.0 million, reflects the best estimate of costs in the Adjusted Test Year. Tracking these costs through the ECCRA mechanism aligns the Company and the customers' interest as it allows the Company to timely recover increases in volatile and variable consumable costs as well as return the benefit of lower total consumable costs to customers.

Seasonal NOx allowance costs are also variable, largely outside AES Indiana's control, and potentially significant. NOx emissions, and in conjunction allowance consumption, are a function of generation quantity. The quantity of generation in the Seasonal NOx period is largely driven by weather. Demand for allowances is highly dependent on weather and therefore continues to be variable before and during each NOx season. In addition, the EPA program that establishes NOx emission limits is currently proceeding under a legal challenge with the future of the rule unknown. Because of these conditions, it is difficult to determine a sustainable baseline for purchases or sales. Therefore, the Company's proposal to flow all NOx allowance purchases and sales through the ECR with no benchmark reasonably reflects the actual expense or sales in the ECCRA and aligns the Company's interest with the customer.

11. Andrew Baillie – Program Director, Global Insurance, AES Services, LLC.

The Adjusted Test Year cost for Property and Casualty insurance was developed by using actual costs incurred in the Historical Base Period and projecting forward for expected changes in the premium levels for each line of coverage based on the insurance market conditions, in discussion with the Company's Brokers, and also reviewing expected industry trends in areas such as market loss levels, occurrence of major natural catastrophe losses and also legal trends for claim payments and oversized or nuclear verdicts on injury and third party claims.

Only moderate inflationary increases are expected on Property Insurance after a high period of growth in premiums over the last five years. For the casualty insurances, higher increases are expected largely driven by concerns over high jury awards and costs in the areas of legal liability (third party, auto and workers compensation). The outlook for the financial lines cover is also relatively stable.

The adjustment set forth in AES Indiana Financial Exhibit AESI-OPER, Schedule-OM24 (property and other casualty insurance expense) is appropriate for setting new basic rates and charges as this adjustment reflects actual costs incurred in the Historical Base Period and projecting forward for expected changes in the premium levels for each line of coverage based on the insurance market conditions. Consequently, it is necessary to make this adjustment to properly determine the appropriate level of ongoing electric operating expenses.

12. Hampton Matthew Roach – Senior Director, Global Benefits, AES Services.

AES Indiana requests $7.3 million of pension and OPEB expense to be reflected in the Adjusted Test Year revenue requirement. This amount represents the most current projection of GAAP pension and OPEB expense for the year 2026 and reasonably incorporates 2024 actual performance as well as the most recent actuarial assumptions.

Additionally, AES Indiana requests the net prepaid pension asset be included in the Company's authorized cost of capital. The prepaid pension asset represents cumulative pension contributions in excess of cumulative pension expense under GAAP (which is the amount included in the revenue requirement) and unamortized pension costs. The prepaid pension asset is recorded on the Company's books and preserves the integrity of the pension fund. This additional funding is investor sourced. The additional funding is used to purchase additional assets in the pension trust and earns additional returns and thus provides a benefit to customers in reduced annual pension expense that is included in the revenue requirement. AES Indiana has provided several references to other rate cases where inclusion of the full prepaid pension asset was allowed to earn a return in either cost of capital or rate base. Therefore, it is reasonable to include the projected full prepaid pension asset net of the OPEB liability as of the end of the Test Year, totaling $133.5 million, in the cost of capital calculation as shown on AES Indiana Attachment HMR-4.

13. Cody A. Flint – Manager, Vegetation Management, AES Services.

Vegetation management is necessary to maintain proper clearance between AES Indiana's facilities and the surrounding vegetation to minimize electrical hazards and prevent outages caused by vegetation interference. Consistent with state policy, effective vegetation management helps provide customers with reliable service and a stable source of electricity in which frequency and voltage are maintained consistently with industry standards.

As shown in Table CAF-1, tree failure is a leading cause of distribution power outages and is responsible for the highest percentage of Customer Minutes Interrupted ("CMI"). AES Indiana requests recovery of the costs incurred to reduce tree-related outages as part of AES Indiana's ongoing efforts to deliver safe and reliable electric service to customers.

AES Indiana's service territory is located principally in and around the City of Indianapolis. The urban tree canopy within AES Indiana's assigned service area is significant. This tree canopy provides benefits to the city but also poses challenges for AES Indiana to maintain adequate clearances. In addition, more than half of AES Indiana's distribution lines are located more than 15 feet from the road, leading to higher costs per mile. Many of these lines are situated in the backyards of customers' homes, which contribute to increased vegetation management costs due to the need for manual access to these areas rather than using an aerial lift.

In addition, AES Indiana continues to encounter escalating labor costs for its vegetation management operations. In 2024, the Company conducted a bidding process for a long-term contract for vegetation management on its distribution system, ultimately entering two new contracts. This process revealed a significant increase in costs across all contractors who submitted bids.

The settlement agreement in Cause No. 45911 supported the Company's effort to gain experience with the extended trimming specification. The Company trimmed 906 miles of line under the extended trimming specification since starting the program in 2022. The amount of technical work required to remove overhanging limbs from many of these circuits has resulted in a significant increase in trimming costs, above the estimates used in the last rate case. However, while costs have risen with the extended specification compared to the previous Box Cut method, the reliability of those circuits has also improved.

To evaluate the reliability associated with extended trimming, AES Indiana performed an analysis based on data from 12 circuits trimmed under the extended trimming specification and 20 circuits trimmed under the historical Box Cut specification. The data clearly demonstrates that the extended specification delivers superior performance compared to the Box Cut method. The extended trimming specification is more effective in reducing customer interruptions and customer minutes interrupted versus the Box Cut specification. This reliability benefit continues to be seen even two years after the trimming was performed.

AES Indiana believes that the extended trimming specification is the optimal approach for line clearing on the distribution system. This specification strikes a balance between the Box Cut trimming specification and a full storm-proofing specification. Although the change to the extended trimming specification has proven to be more costly than was estimated in the previous rate case, this method is producing good results. Therefore, to mitigate costs, the Company proposes implementing a new five-year distribution vegetation management cycle (instead of continuing the current four-year cycle), starting in 2026. This change will result in cost savings due to the reduced annual average mileage requirements, which are 918 miles for a four-year plan compared to 735 miles for a five-year plan. This change, with the updated cost per mile rate, translates to an average annual savings of $9.8 million.

AES Indiana ran an Interruption Cost Estimate ("ICE") Calculator to evaluate the benefits to its customers with the extended trimming. The ICE calculator is funded by the Department of Energy and is an industry-standard electric reliability planning tool designed for electric reliability planners at utilities, government organizations or other entities that are interested in estimating interruption costs and/or the benefits associated with reliability improvements in the U.S. This analysis shows the total benefit to all customers from the extended trimming specification is estimated to be $94.1 million to $140.0 million between 2026 and 2030 (*i.e.*, the first full cycle using the extended trimming specification). The ICE Calculator estimates that residential customers would each receive a benefit of roughly $3.39 to $5.04 and nonresidential customers would each receive a benefit of roughly $1,514 to $2,245. In other words, the reliability benefits to all customers are expected to exceed the incremental cost of continuing with the extended trimming specification over the full five-year cycle.

For the Adjusted Test Year, AES Indiana averaged the projected costs for the first three years of the five-year cycle, resulting in a proposed Adjusted Test Year expense of $42.6 million. This approach is reasonable as it aligns with the expected duration that the rates in this case will be in effect. Additionally, it reduces the Adjusted Test Year amount compared to what it would be if the Company had annualized the projected cost for the entire five-year cycle.

The Adjusted Test Year transmission vegetation management expense is $1.8 million, as shown on AES Indiana Financial Exhibit AESI-OPER, Schedule OM12. The Adjusted Test Year amount reflects updated contract pricing obtained through a competitive bidding process and incorporates the additional costs associated with the application of herbicide to reestablish the transmission corridor sidewalls. The Adjusted Test Year level of expense is reasonable and representative of the transmission vegetation management expense necessary to allow AES Indiana to continue to

perform transmission vegetation management under the existing five-year cycle while also addressing the sidewalls on all its 345kV transmission circuits.

AES Indiana is dedicated to providing its customers with safe and reliable electric service. To better achieve this goal, the Company recommends the Commission approve the full implementation of the Transmission and Distribution Vegetation Plans and associated expenses as outlined in this testimony.

14. Matthew J. Dalton – Director of Human Resources, AES Services.

Mr. Dalton supports the reasonableness of AES Indiana's forecasted compensation expenses included in the Adjusted Test Year. The Company's Total Direct Compensation is designed to be market competitive and is necessary to attract and retain the talent required to provide safe, reliable, and affordable electric service. The Company uses multiple reputable market data sources to benchmark compensation levels. The Adjusted Test Year Total Direct Compensation package is aligned with the median of the market and is comparable to what other utilities and non-utility employers offer for similar roles.

The Company's incentive programs are structured to reward operational performance and customer-focused outcomes, supporting the delivery of high-quality utility service. Incentive compensation included in the Adjusted Test Year complies with the Commission's three-prong test for ratemaking recognition.

Mr. Dalton's testimony also supports the reasonableness of the forecasted benefits and payroll tax expenses. Benefits expenses are reasonably forecasted and support employee retention and well-being. Payroll tax expenses are calculated using applicable federal and state tax rates applied to the forecasted payroll.

15. Michael L. Holtsclaw – Director, Power Delivery Operations, AES Indiana.

Mr. Holtsclaw describes AES Indiana's Transmission and Distribution ("T&D") system and its operation. Mr. Holtsclaw supports the forecasted T&D investment expected to be in service at the end of the Adjusted Test Year and the forecasted O&M expense. He shows the Company reasonably considers the Five Pillars in its T&D operations.

The Adjusted Test Year level of T&D system capital and O&M reflected in the Company's filing is reasonable and necessary to the ongoing provision of service. The forecasted Adjusted Test Year O&M budget was developed by taking the historical O&M expenses and projecting them forward, with an adjustment to the O&M expenses for any anticipated material changes or removal of one-time expenses that are not representative of on-going expenses. A major driver for the difference between O&M expense for the Historical Base Period and the Adjusted Test Year is vegetation management and storm expenses.

The Adjusted Test Year T&D capital investment is based on the forecast presented by AES Indiana witness Peters, adjusted for emergent work on the 345 kV line due to an EF-2 tornado that touched down in Bartholomew County, Indiana on March 19, 2025. The Company's projected T&D investment includes two forecasted periods – the Linking Period (2025) and the Adjusted Test Year (2026).

Mr. Holtsclaw's testimony focuses on investment that is forecasted to be in service by the end of the Adjusted Test Year and that is not part of the Company's ongoing TDSIC Plan approved by the Commission in Cause No. 45264. The ongoing TDSIC investment is the subject of separate proceedings, docketed as Cause No. 45264 TDSIC-X. AES Indiana witness Aliff explains how the TDSIC investment is being rolled into basic rates. As shown on AES Indiana Attachment MH-3, the Company forecasts approximately $423.5 million in non-TDSIC T&D investment to be placed in service by the end of the Adjusted Test Year. Approximately $214 million of this capital investment is forecasted to be in service by the end of the Linking Period. Approximately $209 million of this capital investment is forecasted to be in service by the end of the Adjusted Test Year. Mr. Holtsclaw discusses the capital forecast he supports by FERC account and provides additional project details in his public and confidential attachments. The testimony shows the forecasted level of capital expenditures is reasonable and necessary for the ongoing provision of retail electric service to AES Indiana's customers.

Mr. Holtsclaw also testifies that the 13-month average for T&D inventory reasonably represents the going forward inventory levels. The T&D materials and supplies inventory shows an overall decrease of $2.0 million from December 31, 2024, to the 13-month average ending December 31, 2026. This is driven by the anticipated inventory needed for projects over the period and reducing inventory levels back down as material lead times return to more reasonable historical levels.

The MTEP Project has been reasonably removed from the Test Year as non-jurisdictional. Non-fuel MISO costs should continue to be recovered through the RTO Rider.

A three-year average is representative of Levels 1 and 2 storm events and is reasonably reflected in the Adjusted Test Year. The Major Storm Damage Restoration Reserve should be continued.

16. Gregory Ellis – Director of Generation for AES Indiana AES Indiana's Harding Street Station, Georgetown Station and Eagle Valley Station.

Mr. Ellis provides an overview of the Company's five generating stations: Eagle Valley Station (Martinsville, IN), Georgetown Stations (Indianapolis, IN), Harding Street Station (Indianapolis, IN), Hoosier Wind (Benton County, IN), and Petersburg Station (Petersburg, IN). He testifies that all of these generating assets have and will continue to provide capacity and energy for the benefit of the Company's retail customers and are used and useful in serving customers. He shows the Harding Street Solar Array is used and useful in the provision of retail electric service. He also describes how the Company's owned units are managed and operated, and identifies the other resources the Company uses to meet its customers' requirements for electricity, including joint venture investments in generation and storage. The Company reasonably considers the Five Pillars in the planning and operation of its generation.

AES Indiana's capital expenditures are reasonable and important to maintain the Company's facilities in safe and reliable conditions. Mr. Ellis elaborates on how capital investment is determined and presents the forecasted generation investment expected to be placed in service by the end of the Adjusted Test Year in summary and in detail. He shows the generation-related capital expenditures he supports are both reasonable and necessary to continue the safe, reliable, and environmentally compliant operation of the generation fleet.

AES Indiana Financial Exhibit AESI-RB, Schedule RB6 reasonably adjusts the forecasted generation materials and supplies inventory to reflect the 13-month average. AES Indiana Financial Exhibit AESI-OPER, Schedule OM6 reasonably adjusts forecasted outage spend for the fleet and utilizes a three-year average to account for the cyclical nature of outages at the facilities. AES Indiana Financial Exhibit AESI-OPER, Schedule OM7 reasonably adjusts forecasted O&M to reflect the expected spend following the repower of Petersburg Units 3 & 4 to natural gas.

17. David Faller – Assistant Controller, AES US Utilities, AES Services.

Mr. Faller provides an overview of AES Indiana's financial operations and explains the steps taken by the Company to maintain the integrity of its books and records in accordance with the FERC, USOA, GAAP, FASB, Sarbanes-Oxley, and other control procedures. The Company's independent auditor's report from Ernst & Young stated that the financial statements in their opinion were presented fairly in all material respects. Transactions between AES Indiana and AES Services or other Affiliate Companies are governed by the various affiliate agreements and the CAAM. These and other affiliate transactions allow for the sharing of technical expertise and for cost-sharing opportunities related to operational goods and services. Finally, Mr. Faller explains the amount of asset retirement costs included in the Adjusted Test Year are also reasonable.

18. Paula M. Guletsky – Vice President and S&L Project Director, Sargent & Lundy, L.L.C. ("S&L").

Ms. Guletsky presents the S&L Decommissioning Study that developed the decommissioning cost estimates for AES Indiana's Eagle Valley, Harding Street, Petersburg, and Georgetown Generating Stations. The Decommissioning Study provides the estimated cost associated with the total decommissioning and demolition of site structures and facilities to allow alternate use of plant areas afterward. Complete and prompt demolition is recommended because it relieves AES Indiana of the liabilities associated with leaving behind unmaintained, potentially unsafe structures.

19. David Barrie – Director of Advisory Services, Wood Canada Limited.

This testimony provides the estimated cost associated with the total decommissioning and demolition of the Hoosier Wind Farm to allow alternate use of site areas afterward. Decommissioning plans and cost estimates are recommended to ensure appropriate budgeting is considered to mitigate the risk of an unmaintained asset after the end of the life of the project.

20. Austin J. Baker – Manager, Regulatory Affairs, AES Indiana.

Mr. Baker addresses the electric operating revenue adjustments from AES Indiana Financial Exhibit AESI-OPER, Schedule REV3 and REV4 to account for test year rider revenues and to reasonably normalize and annualize revenue. AES Indiana Financial Exhibit AESI-OPER, Schedule REV10 incorporates the increased revenues from proposed rates that are presented by AES Indiana witness Rimal. The proposed rates in this case result in residential bills that remain competitive. The proposed changes and modifications to update AES Indiana's Tariff are reasonable and support the proposals presented by other AES Indiana witnesses.

21. Bickey Rimal – Vice President, Concentric Energy Advisors, Inc.

Using the Concentric Cost of Service Model, AES Indiana's overall revenue requirements have been allocated to the various classes of service in a manner that reflects the relative costs of providing service to each class. This is accomplished through analyzing costs and assigning each

customer or rate class its proportionate share of the utility's total revenues and costs within the test year. The Allocated Cost of Service Study ("ACOSS") followed the industry standard three step approach of cost functionalization, cost classification, and cost allocation to establish cost responsibility of each rate class.

The results of the ACOSS show that at present rates there is a wide variation in the rates of return by rate schedule. Even though the goal is to move all rate classes to their cost of service, consistent with the policy of the state, the Company considered affordability for each of the customer classes and determined that the percentage rate increases experienced by individual rate schedules should be mitigated to moderate the impacts on individual rate schedules. Using the results of the ACOSS as a guide and in collaboration with the Company, the revenue requirement was allocated to classes such that the current subsidy associated with each class was reduced. Rates were then designed to increase the alignment of rate structures and cost structures by reducing the proportion of the fixed costs recovered through variable energy charges. Even though the proposed increases to customer charges for residential and small commercial customers move in the direction of recovering more of the fixed costs in the customer charge, a substantial portion of fixed costs will still be recovered in the variable energy charge component of the rates for these customers. The proposed rates and rate structures for large industrial customers are very closely aligned with the unit costs resulting from the ACOSS. As a result, the proposed rate structure and rates are just, reasonable, and not unreasonably preferential or discriminatory. Further, the proposed rate structure and rates are expected to provide AES Indiana with a reasonable opportunity to earn the required return on its invested capital and recover its necessary and reasonable operating expenses.

Using the results of the ACOSS, Mr. Rimal developed the updated TDSIC revenue allocation factors by rate code based on firm load. AES Indiana Attachment BR-13 shows the TDSIC revenue allocation factors.

Mr. Rimal conducted a comparison of LED street lighting versus other street lighting required by the Settlement Agreement in Cause No. 45911. He explains the comparison of LED street lighting to other street lighting is not very relevant currently because the Company is unable to provide non-LED street lighting services to customers for majority of light types. The Company is unable to procure non-LED lights in any meaningful quantity at this time and for certain light types the Company is unable to procure non-LED lights at all.

Mr. Rimal conducted the low load factor analysis required by the Settlement Agreement in Cause No. 45911 and shared the result of the analysis with the relevant stakeholders.

Mr. Rimal conducted cost allocation and designed illustrative rates to evaluate the difference between residential multi-family and non-multi-family customers. Based on his analysis, Mr. Rimal concludes that the cost to serve a multi-family customer is very similar to the cost of serving a non-multi-family customer and as result a distinct and separate multi-family rate is not necessary at this time.

PROPOSED
300 Day Rate Case Schedule Under
IURC GAO 2013-5 and Ind. Code § 8-1-2-42.7

Other terms:

Technical Conference: Nothing in this schedule precludes a party from proposing a technical conference.

Service: The parties will provide same day service of filings via email, hand delivery or large file transfer.

Discovery: Discovery is available to all parties and shall be conducted on an informal basis. Any response or objection to a discovery request shall be made within ten (10) calendar days of the receipt of such request until October 7, 2025. Thereafter, any response or objection to a discovery request shall be made within five (5) business days of the receipt of such request. Any discovery communication received after noon on a Friday or after 5:00 p.m. on any other business day shall be deemed to have been received the following business day. There will be blackout dates for discovery from August 30, 2025 through September 1, 2025. Dates designated as "blackout dates" shall not be included in determining the number of days provided for responding to a discovery request. The last date on which a discovery response or objection will be due is two days prior to the first day of the evidentiary hearing. The Parties may conduct discovery through electronic means. Subject to the protection of confidential information, all parties will be served with discovery requests and responses.

Workpapers: When prefiling technical evidence with the Commission, each party shall file copies of the work papers used to produce that evidence within two (2) business days after the prefiling of such technical evidence. Copies of the same shall also be served on the other parties to this Cause.

Number of Copies/Corrections: Filings with the Commission shall comply with General Administrative Order 2016-2. Any corrections to prefiled testimony shall be made in writing as soon as possible after discovery of the need to make such corrections.

Objections to Prefiled Testimony and Attachments: Any objections to the admissibility of prefiled testimony or attachments shall be filed with the Commission and served on all parties of record not less than five (5) business days prior to the date scheduled for commencement of the hearing at which the testimony or exhibit will be offered into the record.

Temporary Rates: This schedule does not address temporary rates.

173168274v2
