As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Anna Domangue

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3NjAyZGRlMjIyOGQ2ODc2NTQzMTEzNGU5ODdlOTY4Yjo3OjdkNWI6ZmE3NGRhNmQ3ZDIwNGNmNzhkNjc4Y2RhZGM4OWU2ZDI4Mzc5ZWM3NDVkNWVhNGYxMzVhZDNhNjc0MzE3N2YxZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Calvin Dailey

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258. I would like to know what the management is being paid. Let's be transparent and so what the management is making. Show the people what they want and they won't complain all the time. Thanks.

Respectfully,
Christopher Lucas

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3ZDJkMDhmYzY3MTJhZDQyYmZhYzQxODNiNGYzYzUzMTo3OjA1ZGE6MDdhY2ViNTY5ZDcxYzliMmQ0NGE2ZWE2Y2ViNjU4YmIwNWE1YjA3M2EwZWQ3ZGMxYTNlYjcxYzk0YWJlODU5ODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
coral mediger

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
DANIEL MICKEY

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Dennis Wade

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Donna Dazey

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjZWU1ZmI2MmY0ZGJjM2VhZTdjNDA0YzIzZjNjYWNkYjo3OjNjOTM6OTE0MjVmOWE3MGVjODYwNzBhNTRmYTgyMjk5MWYxODM5MjNkZWRhYzBkMjk4OWM5OGY0ZjA2NmQ3YzkwOGY4Mjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiZTlkZDg4MTVkZjk0M2VlMjlkODk4ZTE2OGY2ZjEyNzo3OjBmYTQ6ZjQyOGUwMjMzMjgxNjc2MjhiYzZlOGZiYTRlZjIzZmFkMDEwMTI1YzkwZDI2Mjc4MmQ4ODg0ZDZlMjljZTVlMDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Grace Dale

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Gregory Broz

Dear Counselor Bill Fine,

I am writing to share my more than firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children (4 in my case), and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits. As a monopoly they think they can do what they want unopposed and the rest of us just have to deal. We already need to pay extra for energy created by sustainable sources like solar and wind and after the initial installation there should be no cost to produce that electricity, yet we need to pay extra for it? If I were to put solar on my own house and connect it back to AES they would only pay me half of what they charge to use the same energy. Their 'sustainable' solutions should be benefiting their customers and instead they just keep using them as ways to line their own pockets. With no competition to keep them producing a better product they can do whatever they want because they know we all need electricity.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
John Prieshoff

Dear Counselor Bill Fine,

Trump said he was going to lower energy costs.

So.

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
John Snethen

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkODU2ZmE2NmJiNTk4NmRmMjJjNDA2YWU0YTJlYTBhZjo3OjZkZTE6YzM2MTUyNmJmMmRlZmMwYThmZTA3ODdjNjc0NWZmMzY3ZWU4YzQ1YjQ4MTgyNDA0MGY0MzgwNGI1ODYwZTU0Zjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
John Spivey

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Kevin Shelton

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiZWNjYzdkMzk5NzBjNzdjYTExMTg3ODBjMDE4ZmNkOTo3OjY2ZTk6MTIyYjFjMGE5NWRkNmFiMTMwNDQ2NzA0OGQ1MTdiOGFiNmFkZTU5ZDk3ZWE2Njc5ZTMxODU5NmE1YTBjMDgwMDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Li Montalvo

It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyY2M3ZWUzOThhMWMyNmVjY2M3MDJjODc4YmRkZDMzZjo3OmU1NzQ6ZTcxZmZiMGVlODExZmIwZGFlMjQ4ZjNmOGYzYjQyYmEwNTdhZTQ2YTBmMTM5NmQ4OTM4YTkxZWE3YzI0Yjg3Nzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Lucinda Hollandsworth

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Luisa McMichael

Dear Counselor Bill Fine,

Just No! I live on SSI. Act like you care!

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiYmVmZTdiMzY5MGQ0NmM3NzQzMDU5YWVhMDlhYTJiMzo3OjM5MzY6MzJjMzJlZGNiNGFkNTMwYzUxYjJjYmI0ZTZhMGEzOTQyZDgwMWFiZTEwMmQwZWUzYjBmMzU0ODA3YzA4NTM2Njp0OlQ6Tg).

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

Please consider that the big beautiful bill recently passed gives huge tax breaks for corporations- the windfall this year will be 100percent tax break for corporations who are building and renovating to off set tariffs. This AES raise is completely unnecessary at this time. AES needs to reduce rates if anything due to the tax breaks they will be receiving for years to come from the bill passed. I fear for those living paycheck to paycheck or on credit- 30$ can be the tipping scale for many in need.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Nancy Deubelbeiss

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Nicole Maddox

Subject: NIYIARA EVANS - We can't afford another AES rate hike
Date: Wednesday, August 13, 2025 1:57:03 PM

This is the first time you received an email from this sender (npevans7777@grsdelivery.com). Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am reaching out to express my strong disapproval of AES's proposal to increase our electric rates once more. If this request is approved as submitted by AES, customers will face an alarming increase of $51 in their bills from July 2023 to January 2027. This is something we simply cannot manage. I urge you to deny AES's request to raise our rates in Cause Number 46258. It is disappointing that AES is seeking to boost their rates. While this may benefit AES financially, it is detrimental to us as customers and will make it more challenging for us to manage our electric expenses, especially impacting our most vulnerable neighbors, including seniors, individuals with disabilities, families with children, and other at-risk communities.
In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities. Furthermore, the federal Energy Assistance Program (LIHEAP) faces threats from suggested funding reductions and the recent elimination of its administrators, raising concerns that AES is not introducing any new initiatives to support our most at-risk households. LIHEAP serves as the main source of substantial electric bill aid for Indiana households. In its absence, many members of our community could find themselves in perilous situations. Every Hoosier should have consistent access to essential services. No one ought to have to decide between paying for food, housing, healthcare, or utilities.
As an increasing number of community members struggle to afford essential needs, I strongly encourage you to deny AES's proposal to raise our electric rates. We are unable to bear any additional costs on our electric bills, particularly in light of a 60% increase in AES's profits. I advocate for the residents of Indiana and oppose this request for a rate increase!

Thank you,
NIYIARA EVANS

Dear

I'm writing to oppose AES Indiana's proposed rate hike. While the company says it's facing rising costs, so are everyday customers. Groceries, rent, and medical bills are all going up, and adding another $30 a month to our electric bills makes it even harder to keep up. This increase hits residential customers the hardest, and many of us simply can't afford it.

I urge the IURC to look very closely at the proposal from AES Indiana in Cause No. 46258, and please protect residential customers from already too-high electricity rates.

Thank you.

Dear

I'm writing to oppose AES Indiana's proposed rate hike. While the company says it's facing rising costs, so are everyday customers. Groceries, rent, and medical bills are all going up, and adding another $30 a month to our electric bills makes it even harder to keep up. This increase hits residential customers the hardest, and many of us simply can't afford it.

I urge the IURC to look very closely at the proposal from AES Indiana in Cause No. 46258, and please protect residential customers from already too-high electricity rates.

Thank you.

Dear

I’m writing to oppose AES Indiana’s proposed rate hike. While the company says it’s facing rising costs, so are everyday customers. Groceries, rent, and medical bills are all going up, and adding another $30 a month to our electric bills makes it even harder to keep up. This increase hits residential customers the hardest, and many of us simply can’t afford it.

I urge the IURC to look very closely at the proposal from AES Indiana in Cause No. 46258, and please protect residential customers from already too-high electricity rates. ALSO THERE HASN'T BEEN A MINIMUM WAGE IN DECADES. INDIANA'S MINIMUM WAGE IS STILL $7.50 RENT AND MORTGAGE IS GOING UP BUT NOT COST OF LIVING! AND YALL WONDER WHY HOMELESSNESS IS RISING!!! BY THE WAY EVERYONE COMING TO INDIANAPOLIS ASKING FOR MORE MONEY DOESN'T EVEN LIVE IN INDIANA I.E. AES, SOME LANDLORD COMPANIES. THIS IS INSANE! SOMEBODY IS EMBEZZLING!

Dear

I'm writing to oppose AES Indiana's proposed rate hike. While the company says it's facing rising costs, so are everyday customers. Groceries, rent, and medical bills are all going up, and adding another $30 a month to our electric bills makes it even harder to keep up. This increase hits residential customers the hardest, and many of us simply can't afford it.

I urge the IURC to look very closely at the proposal from AES Indiana in Cause No. 46258, and please protect residential customers from already too-high electricity rates.

Thank you.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiM2I3NDAyNmU0MTYwOTcyNGZiN2Q4YjkyNzkxZTViYzo3OmQ3YWY6NGZmMTBjOGY3OWYyMThmMDUwYzNlMTM0Nzk1YThkZTE1YzU4M2RhYjMzNGUyNzdhNzc1NTkzYTM3YmIwNWRkMDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Rahman fann

If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Ray Westmoreland

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1ZTg5YTRjOGI0NWE4NTU1Y2I1OGYyZGMzYjc4YzdhNjo3OjdlNGU6NzhkYjVlNGJmMzMzZTRkZDlkNzQ3NTllMmQ4NmU5ZThiNWU4Yjc1OTdjMmM4ODQ0YjhlMDVkMjBmZjkyMzUyNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Sharon Coleman

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Shawn Ervin

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmNDFiMjRmOGNhMmMyNDBiMzNhMDFkMzRkYWU1YTdhNzo3OmExZjg6ZmIwZDE5ZTFjYjc2Mzg4ZjQ4YzFkNzRiODhiMmM5NDAyMDljZWM1ZDVhZjg4YzAyZjQyNjVlOWI5YmY3YTg2ZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
William Dugger

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Alexis Jones

Dear Counselor Bill Fine,

I strongly urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiNGE1NGEzNWJmNWQ3ZWNjOTgyY2JlNmE2MTlmYjQ1YTo3OmQzNWY6NjNmMTMyYzEyOTVhYTFkMDkzZTg5MmVmZThkOTEwMjk0YzE1MDYxMWEwZmRiMzk3MTZhZmE0M2M3NDA5N2NiNzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Benjamin Sanborn

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Betsy Fowler

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3MjE0NDl0ZjC3NTY4YmFlZWQyY2M2Yjc2Zjg4OTNiYzo3OmU1M2E6ZDllM2I2YTEwZml2MThlZTkzYTUxODI3ZWY4MjllMmRhNDk0NjM2NGZiYTRlZmExMzg3NDJiNmRkZTA5YTQ5ZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Chris Russell

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowOGI4OWQ3ZmUzODQzZGM2NTAyNGZiODk4MDllZGM4ZTo3OmZiNjQ6MTE4ODNmNjMwZDdhMTFhN2I3M2RmY2QyMjQwYWFhMmEyZmE4ZWNhZTdhNzQyYzgzZDNiMTY2NjdjZjIyNWU1Mzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1YzdjNmUzZGZmMDI3MTAyNDhiOGFlYTJkZDZjMGYzNjo3OjhhOTk6NDY4MjVlMDYwYWEyMDRiMDY0N2Q4NjZlNWIyY2EwZjJjODJiNmVjNDNmZjhkMGZjMzg5MWFlOGJkZDRhM2MyNjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Dennis Flynn

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Dylan Allison

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxNTc0YjkyOWQ0YzAzYzcwMjg3M2VkMmU0MzQ4N2IxOTo3Ojk4OTI6YzA5YjEyZDM1ODQzNmRjYjNjZGZiODRiMzYzMjc3NjMxYzk3OTc3YmU1ODM5MDI1YzVjMWVmY2Y0NmRlMDM5Njp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Erica Garrett

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Ernie Myers

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Harold Dudley

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Jeffrey Richmond

Dear Counselor Bill Fine,

PLEASE!! Reject the rate hike proposal from AES. My electricity bill already increased 15% from last year. To add another $20-$30/month would almost double that increase. PLEASE reject AES's rate hike proposal. Make DATA centers pay for their own electricity use. DO NOT pass the costs of this onto the customer.

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. The proposed rate increase by AES is purely unethical and a money grab. I've lived at my address for going on 8 years and during that time i have been without power for multiple hours multiple times. AES has failed to provide a sustainable grid to operate in moderate storms to keep my power going, yet claimed 104 million in operating income. Their CEO earns 13.3 million per year. This rate increase will only go into the pockets of execs in the form of bonuses and compensation.

Regards,

Jeremy Bross

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Jerry Grant

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4ODJlZDM5YjQyYmYwZDg0YWRlY2l4YzQ5ZjRkMjJlMDo3OjAwNGM6NjIxZTIxMTMyZDZkYmZkMWZhYjczYmFkNzhlYzBmYjE2YWI1YThjYTAwZDFmYmZiNWIzOTVmNjA5ZjhkODhlOTp0OlQ6Tg).

Dear Office of Utility Consumer Counselor,

As an AES Indiana customer, I know that my neighbors are already struggling with rising electric bills. The last thing we need is yet another bill increase from our electric utility. Please hear me and all the other AES Indiana customers asking you to put our needs over more profits for AES. I urge you to reject this new rate hike.

AES Indiana's request to collect an additional $192.9 million every year is unconscionable, especially after having another rate increase approved just last year. Combined with other already approved rate hikes, the total increase to customers will be $468 million by January of 2027. Indianapolis families can't foot that bill. We shouldn't be paying for AES to increase their profit by 60%. We shouldn't be subsidizing large commercial and industrial customers who can afford to pay more for electricity. We shouldn't be penalized with higher rates for using less electricity.

Indiana's Five Pillars for energy policy, established by HEA 1007 from 2023, requires that Indiana electric ratemaking decisions must consider affordability. If approved, this rate hike would push the average monthly residential customers bill to nearly $180 per month by 2027. That's nearly $70 more per month than the average bill in 2020, and more than $30 more per month than today. That doesn't sound affordable—especially not when families are already making impossible choices about how to make ends meet. Electricity service is a basic need for living safely and securely. Families shouldn't have to choose between paying the electric bill and putting food on the table.

Instead of prioritizing their profits over their customers, AES should be working to meet our needs. That would mean empowering customers to control our bills and provide benefits to the local electric grid with energy efficiency, rooftop solar, or other distributed energy resources. It would mean helping customers at high risk of power outages benefit from resilient solar and storage systems that can also benefit the local grid. It would mean allowing for customers to save with community-owned community solar projects and allowing tenants in multifamily properties to benefit directly from on-site solar. And it would mean optimizing the local distribution grid to benefit from customer-sited energy resources—and fairly compensating customers for the value they add to the grid.

Please stand up for customers like me and reject the latest rate hike request from AES in Cause Number 46258.

Sincerely,
Joseph Hoover

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Kathleen Hilderbrand

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiODdhNGI5Y2ZhNDY4OWQ3MzVmNDhhZTdhMGI4OWYxZTo3OjgxZjY6NWIyYzkyMzlmMmY3ZjgzNzY0MjI2YTczYTIwNzhiOGZlMjk1YjdmZTk3YWZjMjNmY2VlZDJiODc0NTg5NDFmNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES. I already see $50-$100 increases in my monthly bill in the same apartment over the past 2-3 years!

AES has not answered my emails and calls in months for an overcharge. I cannot even cancel my budget billing on their portal they needed to "update" in other price increases before. AES already has the highest profit margin out of all large electric utilities in Indiana. indiana used to have some of the most affordable utility rates in the country, now we are topping charts. The prices don't need to go up, they need to DROP.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system. I have experienced billing problems in the past month!

Please reject AES's request for higher ROE and please reduce their profit dramatically! Hoosiers will suffer if you don't stand up to AES and do your job. You did not protect us in 2023, it's time to stand up NOW!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years. Give me 1 good reason for this practice.

If AES's request is approved as filed by AES, our monthly electric bills will increase by higher margins than any estimates you think are accurate would say. It was wrong last time, it's wrong this time.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up again, and we should have to do this ever two years!! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258. Ask yourself, what has the regulatory commission done to protect consumers against AES, and be honest. It's nothing, at least not when I've been paying bills here. I was born and raised in indiana and I

want to live here, I will be forced to leave if you don't protect me and others.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Linda Mcnally

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4YWU0NDEwYmRlMGM3NTljZjA5NDZhMGQxOTU2YjBlMjo3OjUwYjI6ZmNhZmU1OTcwNWFlZjJlNzg0MzNmNmUxMmNiMjMzODMwYzY2YmNiOGU1YTM0YmFlNDIwZTMwMGNkOTk5YmZmMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Linda Oldham

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Maddie Bradford

In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Mary Arnold

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Mary Moree

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5N2Q0OGQ5NjE0MDU0ZTE0MDliODI4YTk1OGY2ZWEzYzo3Ojg2MDg6ZjFjYmRmMGJhNjM0ZjA4ZjMxMGU0YTdlNjY3MTNlZmNiYmI0NzVkMmYyMzcxODBkM2IxOTQ0ZjY4ZjQxYWEzZjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

Good evening. I am a single female living in an apartment on my own. My bill has already went from $80-$90 dollars to $165-$175. This has been hard to afford. I could only imagine others who are struggling right now as is. I've tried calling and seeing what's going on and even they were puzzled. I was supposed to have someone check a meter but haven't heard back. This call was placed on June 22nd. I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

Dear

I'm writing to oppose AES Indiana's proposed rate hike. While the company says it's facing rising costs, so are everyday customers. Groceries, rent, and medical bills are all going up, and adding another $30 a month to our electric bills makes it even harder to keep up. This increase hits residential customers the hardest, and many of us simply can't afford it.

I urge the IURC to look very closely at the proposal from AES Indiana in Cause No. 46258, and please protect residential customers from already too-high electricity rates.

Thank you.

Dear

I'm writing to oppose AES Indiana's proposed rate hike. While the company says it's facing rising costs, so are everyday customers. Groceries, rent, and medical bills are all going up, and adding another $30 a month to our electric bills makes it even harder to keep up. This increase hits residential customers the hardest, and many of us simply can't afford it.
I have also witnessed several AES cherry picker trucks across the street from me at an old substation over the past year or so on numerous occasions with engines running, two men in each truck, parked there for two to four hours at a time. Not only is this wasting A LOT of MY money, but it also is spewing a ton of pollutants into the air, exacerbating my reactive airways disease.
I urge the IURC to look very closely at the proposal from AES Indiana in Cause No. 46258, and please protect residential customers from already too-high electricity rates.

Thank you.

To: UCC Consumer Info
Subject: On-behalf of David Hall by AARP - Please Stand with Customers on Cause No. 46258
Date: Tuesday, August 12, 2025 6:21:32 PM

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear

I'm writing in reference to AES Indiana's latest proposed rate hike.

AES Indiana says it's facing rising costs including labor, inflation, and grid upgrades. While I recognize the Utility faces concerns over inflation and labor, so are all of their customers, both residential and commercial. The primary difference however is that residential customers do not have a downstream customer to pass on the cost increases like a business does.

AES Indiana has struggled in rebounding from outages caused by weather. I suspect this is likely due to poor or deferred maintenance. Past rate increases for labor and grid improvements have not reduced or fixed this response time issue. I question, and ask you to do the same, whether or not another increase will help.

This increase will definitely impose hardships on many residential customers; especially so close to the last rate increase taking effect soon.

I urge the IURC to look closely at the proposal from AES Indiana in Cause No. 46258. Permitting another rate increase, without holding AES Indiana accountable for their poor performance and simultaneously further burdening struggling customers, is at the very core of what the IURC was charged with preventing.

Thank you.

Dear

I'm writing to oppose AES Indiana's proposed rate hike. While the company says it's facing rising costs, so are everyday customers. Groceries, rent, and medical bills are all going up, and adding another $30 a month to our electric bills makes it even harder to keep up. This increase hits residential customers the hardest, and many of us simply can't afford it.

I urge the IURC to look very closely at the proposal from AES Indiana in Cause No. 46258, and please protect residential customers from already too-high electricity rates.

Thank you.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1YzBhYWY0ZDg3MWMyYTc2YWYzMmNmOTdiODllNTdhYzo3OjVhZWM6ZWZmMmYyOTNmNDAyOTFjY2Y2NzUwZWVmOWMxN2FmZjAzODE0ZDgzNmUzOGQxZDU4NWU3ODk4ZjFiYjU2ZmY0NTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Ossie Henderson

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Patrick Edwards

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjYzY1MWQzZTNmYjk1NjhjZWY0NTQ1MWNkNjI4ZDc4ZDo3OmVjOTY6Yjg5MDViOGYzMzc1N2UzMzllYmY2OTI3Y2FhMWU3MzE3Zjc3ZjM5NWM2ZGJjZWFjMDZlNzJkNGFjNWNkZjBlZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Office of Utility Consumer Counselor,

I've been an AES Indiana customer for over 10 years now. In that time, I have attended at least 3 rate case hearings. Every time I ask how we are thinking ahead to ensure affordable and responsible power and urging greater and faster transition to clean, cheaper wind and solar. I can see how my neighbors are struggling with expensive electric bills. We cannot afford yet another bill increase from our AES. I ask you to reject this new rate increase in total. No settlements.

$192.9 million every year in additional rates on top of ONGOING rate increases is unbearable. That adds up to a $468 million increase by January of 2027. No more rates to increase shareholder profits and to subsidizing large commercial and industrial customers. Captive ratepayers are not a bank.

I know this commission is obligated by statute to consider affordability in their ratemaking decisions. This increase would drive up average bills $70 more per month since 2020, and more than $30 more per month than today. That's a whole grocery trip for some. And to do this when so many other costs are rising is going to crush some families in heartbreaking ways.

It's time to put profits below the needs of struggling customers. We need ways to lower bills through energy efficiency, rooftop solar, or other community solar. We need to develop technologies to keep neighborhoods' power on when it rains. We need creative solutions like percent of income billing that our neighbor Illinois uses. We desperately need wind and solar and storage to control escalating future costs from Fuel adjustments, infrastructure, and notably climate impacts.

Please reject the latest rate hike request from AES in Cause Number 46258.

Sincerely,
Shannon Anderson

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.unci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0YzkwNzRjZGFmMzAxM2YwNWEyM2UzNGY5NDRiNGYxMzo3OjdiMWI6ZDU4YzY4MDFmZjI3ZWYzZTI3MTMyYTQzMDA2ZjYyZTRmMjc5NjU5OTY1ZTA4MjJjNzQxYjIzZDIyODNkODJlZjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Sharon Fultz

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Sharon Profeta

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Stacey McArthur

In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Vicki Mannweiler

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiN2ZmYzdmZWI3YTM5OTc1NzJkNDQyMzZhM2JmNGM3NDo3OjQ2ZTQ6MjIxOWMzZjZiMzlkMzQ2M2YwNDRjY2ViNDE5OWFkYTM1NjFlZjNlZGEwZTk4NTEwMDA5NzZiYjc2MzY0NDQ5Mzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Vicki Roberts

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Zalinda Williams

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjM2UzZDI2YmI5ZWJiZGIxMmU1YTU5MzU4ODBhNWJmNjo3OmNiNzk6NzVkNzNkNzAxMGJiNzM5MjQyNDJkNTQ5ZWYyNmE5MWIyMDZhM2JiZTA4ZjZiMDEwMDE4ODM0MTljMTU4NjFiNzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Andrea Pierce

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Andrea Thomas

Subject: Ann Holden - We can't afford another AES rate hike
Date: Monday, August 11, 2025 10:05:22 AM

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Ann Holden

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Brandy Lee

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Brian Anderson

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5MzdjNmRkYjg1Y2IzZTIzZmVjNTIjNTg2NTQ5M2Q1ODo3OmY5YzY6NTJmMTA3OWJhZDExNDkyODJmZDgxMGY1NTU5MmIxNDVkMjk4MzM0YmM1NDE3NmYzNDE2M2RmNzFlZTMxODY2ZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Furthermore, anyone who approves this I will not support in re-election

Respectfully,
Chandler Henson

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4ODcyY2I2ZjIjOTQ2Y2JmMWQ4MzNhZGM3MGU2ZDk4OTo3OmM1YzI6ODdhMTc5YjJiNTA5OGRmMGZkNDk5ZTFkMWRiMjdhZWQ0MjJhZjc5NjBjNTMyMWE3YTEyMGY5NTNmYTBiN2ZjMzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2YzI3NDdlYmU3MDc4NGNjMGFjODhlY2Y2MjA1MDg1YTo3OjNlMmI6ZDA4OWI3NjgzZGY0MmU4ODBlZmViZjU2YzI5MGQxM2IwMDc4MTJmZmFkY2YxZDNlOTZlNDlmMWEzNWY4M2Q5Nzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
David Holik

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
David Hudson

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5OGJjNGFlMDU3YjQyNzI2NGU3Nzg3ZTY5NGJiMGRjNjo3OmFhNDU6Y2M4MjRkZWZjOTYyMGRmOGUzMTJkY2Q4ZmJkNzg0ZjkxN2FkNjYxYWRhNzMyMDk2YmQwZDU5MjAxMzc0YWNjNzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Earl Denning

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjMDUxOTdkOTgxMzJiODI0MTlkNGI1MGI4YWJhMjU1Zjo3OmVkNWY6OWM0MDU5YjJmNTk5MDg5ZDU1NzUzNWJlNDI4MzU1ODE5MjRlNjA5ODViZmEwZWFmYmFlMjE5YjVjZjg4MTRiZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana. Perhaps you should also consider eliminating the "customer charge" because it clearly has no purpose except to add to the already sky-high amount we pay every month.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations. I wonder what their "customer charge" amounts to?

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Elizabeth Nelson

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Yes I am following this campaign!!!!

Thank you,
Emmaleah Frodge

LEADING THE AGENDA OF LATINOS IN INDIANA

2025 INDIANA EDUCATION SUMMIT AND COLLEGE & CAREER FAIR

We're hitting the road to bring college and career resources directly to students:

- South Bend – November 3
- Indianapolis/Fishers – November 11
- Evansville – November 19

SPONSORSHIPS

If you are interested in sponsoring this event, please contact Andrew Peñalva.

Why sponsor?

Your sponsorship makes this event possible and completely **FREE** for thousands of students across Indiana. Without community partners like you, we can't deliver this life-changing experience to the students who need it most.

- Connect directly with motivated, college-bound students and future workforce talent
- Gain visibility and brand recognition across three major Indiana markets (South Bend, Indianapolis, Evansville)
- Show your commitment to education and supporting students across Indiana
- Network with universities, businesses, and community leaders

Sponsor deadline: October 15th
Contact **Andrew Peñalva** at **apenalva@indianalatinoinstitute.org** or call at 317.472.1055 to secure your partnership today.

Meet Our Keynote Speaker: Ovi Vásquez

We're honored to welcome the extraordinary Ovi Vásquez—National Leadership Keynote Speaker, TEDx Speaker, and author of six books, including a #1 Amazon bestseller.

Born a child farmworker in Guatemala, Ovi defied the odds—learning English in just two years, graduating high school in three, and completing college in two while working night shifts. He's since worked with global innovators like Apple, Tesla, Salesforce, and Uber, and developed a mobile app that's helped unlock over $5 million in scholarships for underserved students.

Named a Changemaker by Real-Leaders Magazine, Ovi's powerful story of grit and transformation inspires students and Fortune 500 teams alike. His message is one of hope, drive, and limitless potential—and we can't wait for you to hear it.

At the **Indiana Latino Institute**, we believe that every student deserves access to the tools, inspiration, and support they need to succeed. This summit is more

than an event and we invite you to be part of it.

Let's come together to ignite passion, spark opportunity, and transform lives, one student at a time!

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1MTJlNzFhMWIxMzc1NzljNDgwOTQ2MmU5MmY1NTEyMTo3OmE3MGQ6ZjZlODU3MGNmZmZlNzAyOTlhNjM3NGI0ZWQ1MDkyMjhhZWE3NGI0MjFmZmE5MjgzNWIwZDYyZDBlMWQ3MWUxZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Jane Smith

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Janet Springer

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
John Thompson

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplZjU1ODg2NGVjYzVkN2MzMDEzN2UzNjE1MTZlYjJkNjo3OjllNGY6ODZjZTNlZTU1YzUxY2NjZGU2YzhjZGM0YWQyMTMzY2E5MDliMzk1Njc4NDNmMmFhMGNlOWNlNTRiMmIyZjQwYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Katie Healy

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4MWFiNGE1ZGQ5MmM1YjBhMTE1YjM5NTEzZTllZDVmZjo3OmY0MTc6OWZjNjZiNTQ0Yzc4NmE0NjQzYTY3ODNkZmNhMzI3YmJiODkzZjM0Njg4MzdiMzlkOTA5MDUzYjk3NzAzN2VlNjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Kelly Durm

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Kent Carpenter

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Linda Miller

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkNWY3ZTFiZGE3NTc1ZTQ4OThlMjA1NTRhZmU2ZWVlMDo3OmYxY2U6NGZiMTkyZjgzMjI4YjZlZWQ2YjMyNzA2OGU3MjhlNjVkZWNiYTgyOGU2OWIyMTNkYTc3YWExMmNjMWU0ODcxMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Marycatherine Barton

Dear Counselor Bill Fine,

I'm deeply worried that another AES rate hike will be unaffordable for many people in our community.

United Way reports that the number of households living at or near the poverty line in Central Indiana is rising. In Marion County alone, more than one-third of households are in that category. With so many of our neighbors struggling to keep up with basic expenses, it's frustrating to see AES push for an even bigger profit—especially when they already hold the highest profit margin among Indiana's major electric utilities.

AES hasn't earned the right to increase profits. Since their last base rate case filing in June 2023, thousands of customers have suffered through extreme heat without power for days, and 60,000 have been impacted by major billing errors caused by the failed rollout of their new billing system.

I strongly urge you to reject AES's request for a higher return on equity and instead reduce their profit margin significantly.

It's also troubling that AES's proposal would shift a larger share of the increase onto residential customers, effectively forcing households to subsidize big corporate utility bills—at a time when we know more rate hikes are coming. If AES's plan is approved as filed, the average household bill would climb by $30.32 a month by January 2027.

Families are already stretched to the limit. An extra $30 every month for electricity is simply not sustainable. Please stand with residential customers and deny AES Indiana's request to raise our electric rates in Cause Number 46258.

Respectfully,
Melinda Hires

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0ZWY0NTFhYWY0Y2I1ZTE5MzMzMmE0OThmODViNTA4NDo3OjE1ZDg6NTM5MzUyMDFjZTRlZDg5OTM2MTg0MTBjNTI1NDgzMGM1YjMwZDQzMmVkZjlhN2IwNDk0NTQ1ZDcxYWIxYTMzMDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Patty Holt

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I cannot afford another electric rate hike. My Social Security check has not increased enough to cover the cost. I reject this new request to collect another $192.9 million every year. This new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxY2ViN2VjMzAyMGYwZjIyYTUyODgyMDgwY2MzNDJkZDo3OjYxNjc6NzU1NTVmNDIzNTRiM2VkY2VhNzE5MDdhMGQ3MzhmZWVkZjMyZDkwOTUxYjcwOTJlNmE0NGQyOTViNjNiMjNkYzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Rachael Goldstein

In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Robin Marsh

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Robin McCarty

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.unwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4NDYyZDlmOTZlZWYyMTE5NTg5NGI1YzMwMmQ0ODY3Zjo3OjcxNzE6YTZiNWU2MDdmY2VjNjg1ZjUzOTBiYjIyNDcxYjRmZTQyOGRkYzBlYzVmZDgzZmFkNWNmOGVkZWUzZTI2ZTM4Zjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Steve Passehl

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Susan Ament

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjZDJhNGIxNDQ5OWQyOTFhYmY1NDZmNzBjY2U2NWI2Nzo3OmNiYmU6MjVmODBjZmI4NjlkMGJiZjAzM2Q1YmIwYjUwMTAyOWQ2NzAxYjRiYTc1YTNhODU1MTAzNjc5ZDgyM2IxNTQ1OTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Tena Meek

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3NzFjODFiODIyMjNkMmM4MTc3MzAzNjgyODAyYWRhOTo3OmRlMGQ6YjY2YzFkNmE2NjlmMmZmOTA2NmZmNjliMjFhZTM2YWQwOWQ2ZDliOTljMDg2YWI1YTk5YTA3ZjgwMTgwMTRmMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Terri Reed

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Timothy Mellott

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Abony Wilkins

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjMDg4OGY5Y2M1YjUxNTYwMWQ2ZDRhZjkyMmM2OWQzZTo3OjQ5OGQ6OWIzYzc4OGY1NjYxN2Q4ZTM2YzUxNTkxNmE3NzE4ZDFiMTllOGUyODNhNmIzNTQzZGI4NjhhOWUwZDllNzBiMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Adam Piper

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Ashley Barocas

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiMTRkNzg5ZmNjOWIwMmEwNmRmYjlkOGMxZTJhNTFiMzo3OmQ3MzI6NWViYmY1YzIyOTU4MzliOTJlYjllMjI1ODNiNTkwY2I1NDZhOWRlZGE2M2YwNGExYjI5OThiNzMyNDAyZTI4Zjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Asia Marie

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Briana Webb

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Bridget Lake

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.unwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzphODkzZTU5ZDJlMDUwZjQ4OTcyYTIyZDhiYzVmMmFlNDo3OjNhZjU6MmYxNzcxOGUzNjAwMWNmMTU1MjA2OTk0ZDczM2ZkNzUyNzA4N2l2OGVlOWFkZDdjNTgxNmVjZmQ0YTk4NWI4Mjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Cora Smith

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozOGI3YTk3ODJhMGExNDY5MzE5NDgwZDZhMDY1N2MwNzo3OjFhOGM6ZGQ0MWQ0NGMzOTZhYWY1MjczMTk2NWFkZTg0YTZjZWI0ZjE3MWZlOWY0NzljYmQxYjkzOTEyNjExMTk2N2JmYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Cynthia Collins

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Deann Waltz

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowMDNmZDc3YmE5MTgzZWExZDkxOTAyZjM1MjY2ZGMzMzo3Ojk0NDE6ZDA1NWY3YTViMDQxYjk2MjYxYTBlMDFmM2ZjYjhjYzAxMzFkMjk0ZTc2MDdhYjlhYTRlOTAyNDg3N2Y5YjAyMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Dona Taylor

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Donna Mitchell

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Georgia Bolton

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozNmVmOWIzNjE4M2U0ODQwNjdiZDY0ZDdhZjU0ODQ3Yjo3OmQxNjA6ZjRhMzc4NWMzMjk2ZmU0NDYxZjBmMmRjZjViMDEzNmIxMDU4NDdmY2MzYzIzMDRhYTgxODM4ZGZlOWE5M2IwODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Gina Osborne

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Gregory Daupert

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Jane Wignall

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0ZjAwNzY5MmU5MDk1MGJhYzU5Y2E5Yjl0MTc4NDI2YTo3OjIzYTE6NjJiMDA3MDYwNmFiMDczOWI5OWYyYzAxYWRjMGU0OTgzMjUzZGNjYmUzMGVkZTliNDRlMzc5NDc0NjkxOGQ3NDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Jeanne Greer

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
jeff hunsucker

Also, when we lost power for 4 days due to a power outage, we were charged for those 4 days. Our bill was higher that month than it was any other month than it has since we have been living here. Explain that??? Do not let them increase this any more. They are getting enough!!!

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxMWViNjk4NmIzZGEyZjBlZDY3NTIzMGM5YTAwZTVkNDo3OjdjMGE6YTMzMGM0ODBmOWIwN2NlNDljNzcyZGRmMGRhMzdmZmQyOTEyYzc4NGZmMjYzZjRlNzk5Mzk4MGNmODY0OGUzNjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Kailey Zarate

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Karen Yde

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Kevin Kaiser

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Kimberly Carter

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjYmE3ODQ1NWYzOTBjNDYyMDUzODg2MzUxNjJjNGE3Njo3OjBmMDA6OWYxMzVlZGI4MDhkYjE5NzBlZGQzMmQ2MThmMzg0MWFiMzM3NDM3ZjU3OGNkYjhmNmFlZTE2MTk2MmM5M2E2Yjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Luke Kessler

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Mahogany Williams

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5YWYwMzlmMzBjZWRmYTA4Y2RkOTBkNTk4NGJjOWNmYjo3OmU1MDc6ZWNlMmZmMWQ3YWE4ODc5MzU2NmIwYzFlMGMwNzc1MjE5ZDI1MzlmNjQ3MTIxMDMwOTBkOTE3ZTg0YzczMGZmYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Melvin Moody

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplZWJkNmMxZDQwMTU3NGY5NDRhNGZjNDg0NzkxMDBjMTo3OjIzNzc6N2Y5ZjNlYjZiM2E5ZDkwOTdjODE0MTZhMjRhNDY0ODg2MWI4NTRlMGZiMDczZGE0MjRjMDQ2YzlhYjY4YjQyYjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Molly Brady

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
nathan erdel

Dear Counselor Bill Fine,

While I'm am fortunate enough to be able to afford these increases, I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxYjFjOWNjMDBjNDFhN2VmYWQxYTE4NjE4MmM5YWQxYTo3OjE3Yjc6NDQzZjkxNDYzZDI1MzZjZjNkYzczYTQ2OWY4ZmE5OWFiNjRjMTU4NjJmZjcwMWFiNWI4ZGQwNDYzZTM2NzYyNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Rachel Engelmann

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Rachel Lewis

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3M2M4Y2FhMmRmMDljNWJkOTI5NmJhOGUyNDFmMzAzNzo3OmQ0MjE6MTJkNThiOTQyNzc4MTBiZjczY2ZhNDUyN2JkZGViNjRmYTk1OTI2MTFhZmJjZGU5OGEyNTU5NTJmOWIwOGQxZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking bill increase again in January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our economy as citizens must choose between electric or food.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

I work in HOA property management and those associations are also having to raise their homeowner dues to cover this AES increase constantly. So owners are even more strapped between utilities and HOA dues to cover the common area utilities. This has to stop - its a monopoly in Indianapolis as we dont have any other electric vendor we can choose...absolutely we all are getting monopolized and taken advantage of by AES and not for any increase in service. Heck, they "upgraded their billing system" and it took them a year to get that straight while still unable to produce bills but said we owed the money. How can a comapny demand money and be allowed to say "we dont have to give you a bill but we'll shut services off it what we say is due isn't paid" AND THEN STILL RAISE RATES!! Please stand up for the citizens of Indianapolis (individuals, businesses, HOAs and the like) and stop AES from the constant dictatorship monopoly robbery!

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2NmIzNGZkYTYyMjc4Y2RkMWI1ZjM0ODBmYTg5OTVmZDo3OjZmYmE6YjAzNzczNzQ2NzU1OTk4NzliYmNjM2I4ZGI1ZjM3ZjFkOWJjNTMyMjg3YjVmMmExOWQ1MmRmNWRhODNjYmUwMzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Romona Smith

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Ronald Branham

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Sheila Battle

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyNmMzNTlhNTU2MmI4NDcyM2JhZWM3YjMxN2Q5M2I2ZTo3OmM3Yzg6NDY4OWI2NTRhZjA3MzEyYTQ4ZWE2MzkxYTBlYjc5NmRlZTk3NTlkYTc1ZDM3N2IzYmM4YTM2MTRlNWM4Mjc2Yzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Sheila Simon

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Shelby Mckinnon

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Val Long

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0OGQ0NTdhYjM2NTY1MTc2MTgxYTJmNzIzY2ZlYjEyYzo3OjVmNzI6YjYwYjVhZTA0ZjQ1ODNhMjEwZTY3NDc2ZTdlY2M2MWQ2ZmY0YTYyNTQzNGMwZWE5ODkxOTY5NGNmNDMwYWU4ODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3MGNkYmM1YzFjYjFmYTZmNGJhYjgwZTc5OWMwYTYzNjo3OmFiNGM6MGFjYjFmM2l4M2JhM2E2YzUwMzE3MTc3YjQyODkwZTI0MjgxZWI1MWQ4Y2MyOTE1MzNmYjlmNGU3NTA3OTdkNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Andrew Filler

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowZmRjYTcwNzk2Y2NlMThiM2RjZjllNDA3ZjZmZTFlYTo3Ojg5OTI6YTkzOTJhZGRjZGI4NTRiNjA2MTFiY2EzMTk0OWMxNDcwMGY1YmZmY2ExYjNkMjA0OTE4ODliZjhhNTY3OGU4ODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Bradley Matthews

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Brandon Davenport

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Bret Petermann

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Charlene Sweeney

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Cherry Nichols

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://www.uwci.org/blog/updated-alice-report-2024).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
David Adamson

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2025 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
David Naugle

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjOGVmNzZjYjU4OTU0NTEyNzI0ZWE1NmJkNDJiZmE0Yzo3OjFkNDY6NWE4YzQ0NjhjZGNlNWY2ZDdiZGU3YzExMDM0MTFmMjQwMWNmN2QyMGEzNjY3ZGMwYjU3Mjl4NjVjMDcyYjIyMDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
DENNIS SCOTT

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2ZWQ0ZWY3NWQzMGNhYTk4OWM3NDM2YjVhMThlY2Q3ODo3OjY4Njk6NjdjNDRlOWU1ZTFiYjdjMjBmNmYzNThhYzZjZTE4MmY4MWU3ZDk4ZTJkYjUyZTFjYTEwYmJiOWQ0NGUwODExMzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyNThhOWU4M2YzMzE3OWIwYjllYzQ0N2I4MmUwZmUyNjo3OjFkNGE6YjllMWUyNDNlZDIxODA4MWIwNzZmZWFjMWFiNzU2MTJlOTM3NTUyYmY5NDMwOWU4ZjBjY2FhOTcxYWE1MjA3Mjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Fr Walker

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Frances Johnson
