If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjZDZmNDMyMWY4ZjkwOTQzNTM4YTFmZWQwZmVlNjA2ODo3OjY2YmU6ZDcwY2VmYjE0NWZkODM2ZjU0MjNlMTJhYjQxZWYwYmE4MTc5YjUzZjIyOTM4ODBiNTg1ZjgyNTA3NDVjZDQxZjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Mary Mouradian

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxNWUwNjcyN2ViODE0NThmNjg0MTBhZjhkNjRhZTMyYzo3OjA3YWY6NGZhZDYzMTFiN2Q1MmUxNjQ4YzZlN2NiNzAzODMwZDhiMDA1MzhhNTU2ZDYyNzg3OWRkNTFkMGY5ODMwMDExZjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Nicole Rust

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Pamela Howard

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Peggy Smith

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Robert Doran

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Robert Swarm

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmNGFlNzFiNGYzZjE5YzY3ZDM0ODBlMzQ4MDkwYzlyMzo3OjExNjQ6YjBmZjU5YmUyYWFiN2I5YjQ0MTJkYTJlYzUwNjUwNDE5ZTg5NzhmMzU3NTk0OGRhODIzYWEzNTkyNjNlMDI4Yjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Sharon Hoheimer

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Sharon Lane

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1MmQ0Yjl5YjZjZmM2N2Q2ODhkOTRkYjAwMzM1ZmNhNjo3OjNhMDM6YjAxODFiNmJiY2UyYTdhZWI1OWJjODM0ODFkNGRlNTM4ZDVlZDkyMjgyOTRjYjEwNTA0NTJhNjNiYjU4NTkxMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiYzNmMzk1ZDM0MzY4NDFhN2IzODY2YzM0ZjJlNzA1Yzo3OmJmNGQ6MDAzYTYwYzRjZWViMWU4YjMxZGI2YzdkZjcwNzAxMWUzNWFlOTY4MGFiMjYzNzE2YTc5MDc1MTk2MDc1NDdiOTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

You must reject AES's new immoral and reckless request to collect another $192.9 million every year hitting residential harder than industrial customers!

A third of Central Indiana households are living in or near poverty and $30 is a week of groceries to many. Not that you have any compassion left for your fellow beings.

AES already has the
(ROE) of all the investor-owned electric utilities in Indiana. If this new rate hike is approved the overall increase hitting customer bills is $468 million by January 2027. Nobody out here is getting higher wages and raises to offset this and many federal supports have been CUT!

It's infuriating that AES is being allowed to use their Indiana customers as cash cows INCREASING THEIR PROFIT BY 60%!

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Terri Clauss

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. My last bill when from $167 to $301. That is absolutely ridiculous!!

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Terri Killilea

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Terry Smith

Dear Counselor Bill Fine,

WHEN ENOUGH IS ENOUGH? STOP ALREADY!
I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5ODZjMGY0YmZjZDFkODQ1NDcyOTZiNGNjOWJjNDJhNDo3OjUyMWI6YjQ1NDNkNThiNmY2MzM2M2UyNzYwNDNkMjdlOGRhYjU2MzcyZTdlYTI0YWMzMDI3NGQ2NmVhZTVmMzM0M2IzYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowZDM0Yjg5ZDM4NDgyYjZjNjZjNjc4NTU2MDZkODlkMzo3OmQ4NDE6MjU4NTQwZDlkYWU2ODBhOGVjYWZiOWI2MWRkYzE5ZTBmZjM0NDBlMzRkMGRkMzI0YTlkOTE3MzFkNWQxMGUxNzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Aaron Riley

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Amber Meal

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowZDA5ZGU4OGMxYTJkMjNkNTU3YjdkNmYxMDE0MWMwYjo3OjE1YzM6ZGVjN2Q2Mjg3N2QwOTdlZTFhN2ZjOTZlZDY1N2ZhZDY1NzhkNDBiYzdhODE2MjM4M2I3Y2MwOTA2YWU1Mzc0NTp0OlQ6Tg).

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Billy Campbell

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Carleen jones

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzphNjRjOWI2YWMwYzJiMmYxM2E0NDRlZTg0YjRjZjg3ZDo3Oml5MmM6ZWEyNDhmMmIwNTBmNDQzM2NmYTE4YzllNGMyMjRlNmMyYTU1ZmE0ZjIwYjNhOTA5Y2RjMzY2OWNlMmQzZTA1ZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Christopher Smith

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Danny Allen

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxNjM5MTM2ZGFiNmU4MmFmMDRmZThhYWI0NGU5ZjI1Zjo3OjQ2NWM6ZWYxYWYyMmVlMWQ1YTMzMzkxZmUzZTJkODBlZmQ0YTc5ZDljNGQ4MWVlMmFiNjlOTIzYzdhN2MyN2JlNzAxYjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Dawn Pierce

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Deborah Magee

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Denise Doyle

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkNTAzNjhiNDI5MzQ3ZTQ2NzI5MDk3MmY1YjFmZjg5ODo3OjgwNzc6ZTYyNjBkMDQwNTFiZDYxZDU1MjU2YjNhMDMxM2NkMzViOTcwODY3ODk3NWMzMDU3OTVlYTc5ZDZmZGQ0NTk1OTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Eric Stuckey

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Gretchen Szostak

In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Janet Helms

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiMjg2MTQyYTNmM2NjYTliNDNlYzIxYjdiZTg3ZGFjYjo3OjZlYmM6ZDBhYjUyNDhkZDEzZTk3MTdlYmVkODBlZDIzNjM2MGViZWRjZTk3MzM4MTQyMjYwZWExNjViMzQwZmY1NjBlYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Jeff Schroeder

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Jessica Sorrels

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Jg Coleman

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzphOWEwYmVjNGJmOWQzYmIzM2Y2NjM0ZGY4OGYzZDY2ZDo3OjJiMWI6OTIyNGRhNzZiNTU5ZTU5MTBiOTAzZDUwOTRiZjBhNzQ5MTkxYjdiMDA4MWU2YjNkZTRjZGQ4ZTE5NmYwMWMwOTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
June Laorange

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmZmUzYjQyM2VkZTA1ZmU3MDFjNTI2NTM4NWJmNTk5ODo3OmFkZmE6MjMxMTliYWNkZDllNDc2ZWI3ZjY5ZWExMWNkY2YzNzMwMzQ3ZWE1NWU4ZTllMjRkOTFiZTZjMzU5MmE0NjQ1OTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that A

While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
L Brown

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Laura Dailey

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4MjFkMjc4NDY0NGZkNzdhZGM3YzEzMzc3MGJiOTU1Mjo3OjFiMDk6YWYzNGY0MzQxYmVjMDU2NDZlM2UyNGYwNWQ3MDQ1YzkyNzYyZWJlYTk3MDM3YWM1NDZhOTc5MWJiYzMwY2Y5Yjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Marie Mccloud

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Marilyn Cummings

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwcl.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjZmMwNjQzY2UzYjlhNGU2ZDk4MWQwOWIzNjkzZTIwNDo3OmRlM2U6MDNiYjQzMmEzZjUwYjg2NGNiMWIzMTc0NTViYzljN2UwZmUxZjI3OTNjMmY1MTc3NzQ5ZDM1MDYyYjkyOGMzMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiMjE5MjJjMjViOGE5ZDBlNDUyN2FiOGYxNjU5OTdiYjo3OjczNDc6YjIwZmJmMWE2NmVlMzIzODcyZGY0YzdmYTMyZmNlMjNlYTlkZjNjMGUxMTk1OGZmNGZiOTUzNDgzNTkxNmRhNjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Michelle Jackman

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Ms. Homeowner

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiYzliNDY1OTZmM2FjYTFlODIyMzk0ZGI1NmI0OWEwODo3OjEzNTA6MDMyZDA0NzNlZDMwODE3MWZiYzY4NWFjOTYxYmYxMTQ3Mml1MzNkNDA2OWRiOTA4YTliYzk1NzcyMmU2YzUyOTp0OlQ6Tg).

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Neil Clayton

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Peggy Dean-Shaw

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Peggy Shelton

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3ZGViYWU4NWExNzU1MmQ0YmQ1NmFhNWI3NzM0Njc0OmNlZjE6OTNiNTFkN2NmMWM4MTEyZDY5YjJmZTRmNzg4OTc2MWIxMzEyNGRmZDgzMjRmZDRjODAxODc2MDg2YzFkZmNkNTp0OlQ6Tg).

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
ROBERT DENNY

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3MDQzOTM0NzMxY2U0MTBlZmJiNGY5OTc2YjlhYjBjNTo3OjkyNGI6MjkxYjZkNjVmY2ZiNTA0ZjhjMjdkODc0NDgxNGM4ZTc2YTcwMmUyOGFjMDY5MmMyYzg3ZjdhNjJhNjI1OWVlZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Sara Burrell

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Shannon Bahler

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Sheila Alexander

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3MDI5YmNkZjc5ODBjNGE1ZTg5NjM0ODdjOTY5ZDRiYTo3OmE3ZGI6OTZhMmM5ZmYzMTJiZTY4MTViODNhN2QyMGY5YWE3MTY1ZmJkOTAzYzIzZDBhZDMzNzRkYmQzNjJkMmFjM2EwZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Tasha Hubbard

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Terri La Fara

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3ZGUyZDhkNTEyNWFjMGYwOTM3OTFjNjBlNzk3Y2YxMjo3OjJkM2Y6NTMxZDFiYTc3NThhYjQ1YjU3M2IzNWZmMjAxMzdkMjE4ZGYwYzllZTBiNzkwYTBiNGRlZThlZDliNTNiNjRiMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Virginia Rabbitt-Jenkins

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkMmU5M2Q2YWFmYzc4N2UwM2JiZTg3OWE5YmE0NDZiMTo3OmUzNmU6N2Y4YzNmODMxYWEyNGEyNjg3MDBjMDkzMjRlNjkwYTUxMzFiYjk1NmEyZjc4MDk3ZTYxM2JhNWRkMWY5MWZkNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Amy Hemphill

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjYWRiYjJhOTRiY2l2MGFiOTVjZjY1MzNlN2ZmNWQ5Yzo3Ojk1N2E6Y2U1OGVkNzllNWQ1YWVmNzdkMWVjOTEwMzRlNTEwYzM0ZGIyMTE0ZTUxYTc0YzA1MDUzODg1YzA1Mjg3OTg2NTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Andrea Price

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Arthur Rund

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Carol Barker

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Carol Lisak

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiYjRiYjQ3NjBmMjYzMTE4OGIzN2E2MzkyZmFmMTcxODo3OjYzNWU6ODY3NmVkYjE5ZDFjMTU4ZDcyOTE5YmY2MGZkMDdkMzQ1NjIyNTdmMDhlMWZlZTMwZmEzZWNmNDMxNjRlMjYzNjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.unwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5YTBiNzExZmE3YjVmNjM1MTNkMmQ3MTczYmRlYTdlYjo3OmY1NDI6OTEwNWQyYjkwYjAwNjZkODNiZDAwYmIyZTkwNmY0NjYwOTcwOWIyNzBjOWFjZmU2Yjc1MmEyMWEyZjFiZjJkYzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
David Walda

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.
I totally agree!!

Respectfully,
Deborah Browning

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Deborah McIntosh

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3MTQzNGM1YzYwYjkwZTZkZWVjMjFhNWEwOGQ3Y2Q0NDo3OmI2MjM6YzQ5M2NiNDYyYTM1MjZjYjc1OWIxY2YzZDcyMGQ1NGZkNTVhYjA0NTAyODg0YWY5MWYzZjZhYzc4YmQ5MzhlMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Denise Schwarzkopf

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Doug Pauling

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Jackie Jameson

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1ZGVkNGMzYmQ2Y2M3YzgxMWI5ZDNmYjY5Mzg4NTU2NDo3OmYyNGY6MGVjOGMwZDNkMDUxZDk2MTAzNjNjMDdmNDE1NmU5NTZiZGU5MGQ2YzUxZTkzZmY5ZDhiMTkyZmZmZjY5ZGUwOTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
James Martin

If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Jessica McGuire

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2NDM4ZmFiZDdkZTc4ZmFiMWQxMWQ4ZDQ3MDM3ZGE2NDo3OjA2NmU6YmYwM2ExNTk5Mzk5MDNmZjU3ZTIwODBhMDE4MmY3NzkxOTcyZGExYTNlMGI3MGY2ZDcyOTkwYzgyNzgwNzIxODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxN2QzZjA4NDljMDk0MDJmN2RjZGQxOGIzODQzM2NmODo3OjQ2MDk6MWJjNWFmM2Q5MmQ1NTYzNjY4ZDgyNGVjNzEyNTk0NWI4MWQ3NjVlNzgzMTVjMWVmMWUwNDY1ZmM5NzFhZWM2NDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
LAWRENCE MILLERF

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Leanna Whyde

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzphN2Q0MTc2ZDg1OTkxZDAzYzQ0YjM4MWM1ZTc2YWM2Yzo3OjFiOWY6MjQyMzk1YWNmMWYzYTg1MGU3MTNlZDg4YWU5MDZlOGE1Nzc3MWE4OGIzYmM1YTIzZWY0OGY4MmQzNmZhZDliYjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Mark Tuttle

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiODg5NjgzOGYxNWY0MGZlODFmYjc0NzliZGIxZDcyYzo3Ojl5NDE6YmY3MDUwZTAzNDk2Y2YyMjRhMTdkMjcyNGEzNzUxOGZiODhhZjYxNzhkNDFkMGMyNzU1NjQwMTRkYzkwM2ZmYzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Dear Counselor Bill Fine,

I am on disability and barely able now to pay the crazy higher than normal utility charges. I am very concerned that my community will not be able to afford another rate hike from AES also.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin than the billionaire profis made now by the company, especially because they already have the highest profit margin out of all large electric utilities in Indiana and upper staff making way too much money lining their pockets.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system. It's went way down hill since aes bought out the utility.

Please reject AES’s request for higher ROE and please reduce their profit dramatically and go after them and actually make them lower utility rates.

In addition, it’s disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES’s request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana’s request to raise our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Mike Stuhler

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1Mjk2OWQzZGI5ZmE5YzllOTkwNmFkNWI3ZjU5MTUwZDo3OjMwNzA6N2Q2M2Y1ODllYTEzMDZjNjc1MWRiYjdlMjBiNDU1ZWYwY2Q5ZTIwOTRhNjUzNGIzZGRlNGVhOThlMjYzOWMzNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

Please do everything in your power to help resolve the billing issues impacting over 60,000 AES customers. While I am happy that the Indiana Utility Regulatory Commission is holding a hearing about this issue, they really need to open a full-blown investigation to shed light on the extent of the problem and the steps AES is taking to resolve all ongoing issues.

It feels like the cost of everything is going through the roof these days. The thought of being overcharged for my AES bill - by hundreds of dollars - and then having to wait weeks to get it refunded is a nightmare. A recent IndyStar article mentioned that AES may even be trying to charge customers for getting their money refunded. That is outrageous to me. It’s not our fault AES overcharged people! Furthermore, AES is a financially healthy multi-national corporation while many of us are pinching pennies to get by.

I'm especially concerned for my neighbors with low and fixed incomes. Being overcharged by AES may force people to incur late charges for other bills or overdraft fees. Those extra fees can really add up!

We need a thorough evaluation the extent of billing issues faced by AES customers and all the steps AES is taking to bring about resolution for everyone who has been impacted. We need to be able to trust that customers are getting the refunds they deserve in a timely fashion.

Customers have been bearing the brunt of AES's billing issues for long enough. Please do everything you can to ensure customers get the solutions they deserve through an IURC investigation into this matter.

In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Patti Yarman

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Pete Reck

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkOTQ1MzA2ODA0ZGE5YzhhNjQyNGU2MmRhODZhMTVhOTo3OjkxMWI6ZGY4MGE2Njk5ZWQyMjBiMzIxMzc3MjE3ZjA2MTdlODdmNzA0MTlmMjNkZDBkMjAxMGZhNWRkZjkzNjAzOThhZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Robert Guthrie

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Roberta Hopkins

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3NDE0YTljOGUxZWYyZTVlYjY3MjNiN2EyNTRmZWMzYzo3OjY2M2M6NzA4NGNiMzA3YTY3NGUzMzE0YmY1MDVlYjdlYzU2NWJmYWM2MzMwZjQzZjczN2Q0ZGY3MjE2ZDE4OTE2NzZkMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Sharon Lynam

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4NjVlOWU4NmQ1ZDk2OWRmYTBhYjhjNWQxN2JhMTI2YTo3OmY5MDc6NDczOWZmMzQ0MmNhMDc2NDA5YzZkMmI4NTc1YjcxMWRmMzg0N2QzYzhjMWIwNzM0ODFiZjdiMzg5YTNhOTE5Njp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Sharon Sherer

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Teresa Moore

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozZDBjZWMxMTNmOWNjYWViMTc5NGYyOGY5NDFmNmU2Mzo3OjYyMWY6ODJiMDdiMmNiNjY0NDk2YTY5YWFiYzg1MmMzYjFiN2E1N2YyMTcwMDQ0NjIyYWUwNGNkNTAwNDNmZGRjYTBmMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Terry Smith

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Tina Cain

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0ZDFiYjc5Y2Y3OTZhMzEwNGQ3MzNiOTZhMDMyOTQ1ODo3OjQ2YWQ6MTQ0ZGM3ZjZiOTYzZDgyYzFkYmM0MzQ2Zjg3NzUzMDkyYmQ1M2UxYTllNzk3MDlhYjFjMjMwMzI2YWE3YzEyMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
WILLIAM MATHEWS

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Abigail Thompson

LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
barbara ferrill

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0MzY2YzliMjQwOGRlNmQ4NzE2ZmE3YzIxZGVhNDk5Nzo3Ojg3YjA6OTkzMDIwODA5MjczNWJiMmY4M2UyYzQxNmI2MGQxODAwMDE2NTdjY2Q5NzQ5ZmYxNTkzZmU1NTFmODljZTNhODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Barry Stradtner

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Beverly Reece

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

We need all natural monopolies to be held by the government and not privatized.

Thank you,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzphMDhhOTdmMTE0ODQ3MjJlY2ZjZjc0NThkZDFkOTIzYjo3OjJhMmM6Y2ViOTQ0ZjNjMjhkY2M5MjUyNzkwNWQ0MmNjYTk0NzZmNTI4NjM1OTkyYjAzNjJmY2E0ZGI4ZjFmYmE1Yjc1Yjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Cheri West

Dear Counselor Bill Fine,

After a rate hike of $9+ per month in April 2024 this proposed rate hike is ridiclously greedy. Their profit margin will be on the backs of the citizens of Indianapolis which have put up with their bad billing system, the long outage times and a rate pay system that penalizes the ones that try to conserve energy! This is not acceptable!! Why should the people of Indianapolis contribute to the profit margin or a company that doesn't care about it's customers.
Please stand up for residential customers and reject AES Indiana’s request to raise our electric bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Dana Roth

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmMTFjZDk5MWVhZWJhZGUxMDFjNmZkYmRiMTg1NTg2Yjo3OjUyYjM6NDVkNTA1YTNjMDcxMmM1ZDc1MTFjZjVjZTY2ZDdjMjI4ZWE4YzVjNmY1NDk5NWYwZmYxM2EzY2UyMDRjZDM3Mzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Dawn Robertson

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/__https://www.uwcl.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxMzU2ZWFlZWVkMGI0NmFmMjliMGJiNTZhM2VlZjEwOTo3OjBiODU6OGUwNDAwNjNhM2I1ZDJjZDYxM2VlOTI0OTA0ZDlmYTNiOWI3NGVmNjI4YjI0M2FmNWIxOTYzYTIyODA3OWM0Mjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Earl Muse

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Eileen Serletic

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Emily Sizemore

I am opposed to AES's proposed rate increase (again).

We have had ongoing issues with prolonged outages, which seem to be getting more frequent as well as longer durations. Unless they indicate in writing that the rate increases will result in both the burying of power lines, and a promise to increase use of green energy options, I am opposed.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplMTMwM2JmOWVjMjY5YmQ0M2Q2ZDg2MTRmMjUwZmZlNzo3OjEzZTg6NDRiZDMxMjBhOTJhODNhMGExOTUwNmU4NTJhZTc2ZjYwMTM2YzBjYjI3ZmIyZGQ1YTIwYzZkYWNlMDIzNWRlYjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
James Mührer

Dear Counselor Bill Fine,

I am shocked that it has come to this. Why am I, the consumer, effectively paying for AES to have the resources direct to pay for additions etc? THEY want this so they can make more money, and they want ME to pay for it?!?! This is so corrupt, and I am certain this effort sending a letter is falling on deaf ears. Below is the template letter, and it all holds, but I wanted to take the time to write this bit up front.

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Jason Damm

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Jason Green

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozNzMzY2I1M2YxYmQwYTM0ZDgxOWViNDFiYWM1NmYwMjo3OmU5ZWM6NzYyZDc1NWRmYjhiZTg5M2RmNjgzYTU5NzE1YmNhZGMyYjRmODYzNDYxMGM0NDhjYTgyMDlhYTViNmUwN2Y4MDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Jessica Goodwin

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Jesus Gonzalez

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiZThjOTQwZTZkZmE3NTA1MWJhYTA5ZTJjZDAwZmUyOTo3OmRhOTY6OGJmOTZhYzE3ZmVmZDRmMTA5M2U2MDY2Mjc5MWQ3Y2Q4NzgxMzU5YjkxNjk1NzBmMzA3MDRkN2JiYTFmMTc4Yjp0OlQ6Tg).

Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Karen Gonzalez-Noyola

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3YTM5MTVhZmE4NzQyNjViOGJhYTdlZjA5YzQyMTQyZjo3OmQ4MzE6ZWNlYjMwZTUwNzExNWMwMmUxMDgwZDZhOGNhY2ZhMDkxZTg3YTZlNDcyYWUxMjFlNDE1MGRlNmU2NTMxMjFiMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Karen Kennedy

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Kathleen Schonsheck

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Leslie Dolin

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowY2Y4MDVlNDA3MGU1NTEzYmU3NjQ0Y2FmN2MyZDIyMDo3OjdmNjg6MmY5MzI2YTJhZWM4MzE4ZjBlOWE4ODM3N2ZiYWZkMjViNzBlZWM4ZDBkODE0MDNjMWExMDBhNTdjN2YzNzZmNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwcl.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmNDA1MmM0MzFlZGJjNGIyMGMzYjRlNTI4MWQyY2RhOTo3OjZmZDY6NzE5NjM1NDczOGQ4MmFkODIxYTY5NzJiYzY0YjhkNDc2Yjc4MjMwYjk0MTI2ZDRjZDkwMTYzMDZmMjFiNTZkODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Mary Merlau

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Melissa Butler

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Michelle Mazzocchetti

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Nancy TEMPLE

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozMjYzZjk3YTU3MDkyZDI0ZDg4NmRlYmQ3NmYzMmU4MDo3OmZiM2M6ZWY3NDMwN2U0NzlkY2Y4NDgwMTM0MWM4ZjBmNTI2NWRmMWM5M2ZhMDBlMDI0YjlhMGZhNzM5M2Y4MjQzZDEwODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Parker Andresen

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4YzBkNzlkZjUwYjYyOTZkZThlYTk0YTgyNDkxMmQ4Zjo3OjdkODA6NzA0YWExYTI2MDY3ZTlhMWEzMGQ1OTc4Y2U2NzA5ZWY5MWE1ZTM0MWYzMGM5NmQ5OTQ4ZTIxN2Q1OWUwNTYwMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Patrick Cangany

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Rosemary StClair

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258. My own bill nearly doubled over the last year—and I budget my energy use carefully during the summer.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Roxanne Hilton

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozMDM5OTUxMDgwMDRjZTQyOTI0YTMyOTM3YjA1YjU0Njo3OjUzOWY6YmQ4ZTU0Y2YzMzgzN2Q2Mzg0ODhhYmY1ZWMyNWQ2MTEwMDgwOTI1MTU4OWNhZGQyZTU1MDcxM2EwOTEzYmQ4OTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjZGM1NTVlMzUyZjUxNmFhNzRmYzYwMDI0YjNjN2Y5ZDo3OmZhN2I6MWI4NmY1NGYwZTQyYzllODhhMWFmOGQ5MzAzNTNjNmU0MTdlNjQ4Njk2ZDkxODQ4M2FkOWNiOWM1YTkxOGQxNzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Sharon Leedy

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Sheila Battle

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Sheila Hendrickson

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Terry Smith

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxZTU3ZDlkZGU0MWQyNjc2YjlhMTIzZTE5Y2QzZDU4Yjo3OjBiNWI6MTE1N2Q0ZmY2NDc1MDY0MDFhNWIyOGU0MzQ1NGUyZmI4MTU4MmFmZjY1OGNlYTg2N2JkODUwZWE0ODVhNjFkZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am very concerned that I and my community will not be able to afford another rate hike from AES.

Just this month, my household and nearly everyone in my neighborhood had increases of $100-$150 compared to a year ago. What was supposed to be a $9/month rate hike seems to be much shadier than that - what exactly am I paying for? It seems like I am paying for poor customer service, days without electricity after storms, and minimal transparency.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. WE SHOULD NOT BE SUBSIDIZING PROFIT WHEN THERE IS A MONOPOLY.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

Folks are already stretched thin as it is. Costs are going up for food and health care. We can't afford to have our AES bills continue to go up each month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2OTdhMDQ4MzBjNWIxZTM4Zjg5ZDFlMTZhNWVjMDBlNzo3OjY0OGM6NGNlZjRkNjBlNjQ5NmY0ODRiMDhiNmQyZjIzM2NjODM2MTY3YzQzNDc3NzBhMzZhN2M4MDQwYTMyZmM5MTg2OTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Ashley Cox

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

And as a Senior on fixed income with declining spending power, I, along with many other older Hoosiers, will, once again, be dramatically effected by AES inability to work within their budget!

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Barbara George

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Bob Brault

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay that much more our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Cathy Caldie

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Charissa Wilson

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplODVmODQyNTg1ZjlkOTcwYjk2MmQ2YzE0YjRmMGUxMDo3OmY2Yjk6NzI2MWRmNjRiNjg2OGIyODhkYTE3OTA3NDM4N2EyYThiMTRiY2E1YzBiMTQ3ZTA3NGY5YTcxOTQ2Nzc5ZWQ5NDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stop your increasing of taxes also. We are so tired of our money being taken and we have little does show for it. I don't know what you're doing with we the taxpayers money but we're tired of your frivolous spending. I am a conservative Republican that vote Republican every time, but I'm real tempted to stop. You are hurting us more than helping us now and we're tired of it.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Cortney Hull

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4ZDc4YmYyYmNmZjQ4OWJlMjI3NjUyZjY3OWEwZDE1Yzo3OjBlNzQ6Nzc0YzYyY2ViZGM0MzZlMTI4YWYxODk1MjcxZjRkYmU1MWY3NDIxNzhjYWYyZjZjZWU1MTY5ZTk1YTEzOTcxMDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Debra showers

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Delana Bradbury

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3NWQ0ZTY4NjI3MmNjNmMzNTUwOTA0MGIzZWVjY2FhNzo3OjdiZTA6MzAxMzI2ZjA1Y2I3MzgyMDdhYThjOGE2OWEyOTc4ZGMyYjFjOTRlOWE3MGU0ZDg3OGM3YzJkNDhmNzcyMGVkYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxMDdjN2FkOTZmOTM4Yjg4MWEyMTc4MDBkODZlMTcwZDo3OmRmMzY6ZTFjMjRmZjZkZTViMGNmOTJiNjc1ZWYzMzYzMzRlN2RhM2RhOGRhOTdmZjA5MjMwNGI3ODk1ZjQwYzU3ZjM3Mjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Gayle Walters

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Gus Mascari

If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Haley Molchan

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Hannah Cora

Dear Counselor Bill Fine,

My husband I work full time for ourselves. He is a stained glass artist for churches. I am a sign language interpreter. My interprogram at IUPUI is being eliminated. My loans are in the SAVE program and that is going away. Our subsidies on our health insurance are going away. We haven't eaten out in over a year! I canceled our Verizon internet. We don't even celebrate birthdays anymore. I can't frickn afford any more rate hike. I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiZDc2M2NhNzA3ODliN2MzZjE5MGMyZWQxNTkwOGYyMDo3OjE5YWY6NjFlYjMzN2YxYTkyNWIyNmE4Mjk2YTMyZTkzY2U2ZDcwNzA0MGVmYzYyNjM5Y2UxOWVmZjI4NDcwYTlmYWNiMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Janice Westfall

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkNTQzYzc3ZjJjMzMyZmRjYjk0Zjk0YjE3Mjl4Njg2MTo3OmY3YTg6OTZjZjMwOTg2ZTAxMDYzM2MyNmViNGM2Njk0YWYxYTJjMzZkODY1MDc5N2JhOTE3ZTZjYzc3NWYxOWFhZGIwNjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Jeraldine Anderson

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Judy Cooper

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Julie Busboom

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5YzliNDdmNzQ5YmQ4ZGM2NDJhODFiYmYxODFlYmIwZjo3OmJjZTU6YjljZTU3MzhkYzkwYjhjYzcxMDRlMzcwMjI2YzU4NjI3ZGNkNzE3ZjU1NzEzMWI4Zjc5ODRlZDFkZTg1MzdiNTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Kennetha Hicks

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Larry Barnett

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.unwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1MmE1Njc1Y2UxNjMwZjQ5NzJjNjg1YTljMjA4MDhkMDo3OmI1Yzc6NDFmOWM4MzVjNmM2MDlhMjlmMmYzMmU1NjIxYzYyNGYxMmIyMzM1YmFiNzM4NmNiOTk5OTc3ZTgyYjQ2N2MwZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Margaret Colvin

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Maria Jackson

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozMmNiYmE1YWUzOTA2OWQxODVhZDkwYTI4ZDU3Yjc1ODo3OjZiZGE6YWQzODViMmRkMjFkMTVkNTFjYjIwMzE5ZGI1NmU1YWI1ZmRjOGQwM2NmMDc3NTcyYmVhMzg4ZTFiYjZkMGZjZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Mary B

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Mary Beuke

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5YTM1NDNjZWJkNTVjZmU3ZDNmMjhlMDQxZWU0YjYzMDo3OmY1ZDI6NGUyOTc1Zjg0NjczZDA3ZjRlNjA2MzM0MmFmZmIxNDg0YzFlZjQ2ZDcyZjQ0YTZkZGIwY2YxMTQ3N2YxMDg2Yjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Patience Gaydos
