AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Kevin Okey

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Kimberley Duff

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3MzY4MTdiYjRkM2ZmOWJhMjM4NGUzZTNjYjdhMzk1MDo3OmRkNzI6Njg2NmQ5MzNkNmVhYjU5NWQ2ZThhYWUwOTJhM2MzZTc0OWRjMDk2NGEwNzk1YzhkYjY1ZTU1MzhiZjU5OGNhODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Linda Riddle

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Lisa Fisher

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmNmVlMDg3ZTY5NWI3NWRjZDdmY2Q4NDViZTM3YWJlMzo3OmRiMzI6ODY1NGEyMTJmMjI1ZGQ3OTJjYjQ4NDQ5NDFkZDRmZDdjNTJjYjcyYmU3OWVlMmI4MDFhNjZmNWJiZTQzNWIxOTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Maureen Sanner

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. The Average increase on a job is 3%. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Melissa Smith

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiNzBhZjBmZjA5MGM2NjRkYjU1MWNiMjQxMDM4N2Q2Mzo3Oml4ZDA6ZWU0YzA5ZGQzMDZmZGJkMWQxZDNkMDhjNTViMDc0NDlkYWNhNzEzYzYwNjAzYmY1OTY4NzQ3Y2FmZDZhNDRjYjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Neal Sanders

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3ZDNkZGJhMmJjZjA5ZmQ0NTA3NDE2OWYwYzUwODZhZjo3OjJmNGE6YzA1YmY0MWJjNzcyYjEzZmI5YzdjZTNjNjIyZGMxODJjYzg3OTRiNWYwNGNmOGE3OGVkMGMwNDVhNmI5MTZlNzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Nevada Owens

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3Yjk4MzMyMzE0ZjliYTM4NDc5YWZiYTc4YzNlM2UyMjo3OjFlMGY6NWQ3ZTZkY2QwODhkMTE2MTFmODgxMDIwNTg4MGNhY2YyOGJlOTkyZGEwYTA4MWMxMTVkMmQyYmMzMmI3ZjkyYzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmYTBmYjM5NzdiMGJmNTE5YzQwODViZDk1NDcwN2M2Yjo3OjY3Zjk6OWQ5ZjgxZjY3YjhkYjAwYTNjZDgwNDc5NjRiODAzNWM1NDliNTNlMjk3NWJmMmFjYTI1NWQ2MGUwODg4NWNlNzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Robert Wampler

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Roberta Oakes

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3MGI4ZTAyNGRmZTQ3MGI2YTU0MjUzMWVjMDRjMGM3Zjo3OjE3NTc6NWIwMTY5NTBlNGFlOGYwMzFjYjM4Y2Y2N2MxMmIxNGM4MWEzYzgyNjMxMDYyYzQ5YWY3MmQzNjExMTEwMWY0Mzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
SHANNON KENNEDY

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Shauna Miller

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyMDAwOTQ0NTgyMDU2ZWY2YTZmODQyNDA4ODA5YTdjMzo3OmM3YmE6NjE1NjM0YzExNTAyODcxMzFlNTJlZDZmZjUzZTI5YWNjOTg5YTJlMTg2MTc5MTIxNjIzNzNkNjliY2UwMmQ1Mjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Tanya Arnold

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Tereasa Mosier

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Teresa Roberts

Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Wynonna M.Berry

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Alan Bjarnson

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2YmQwZTNjNzE1MzNjNDk3NjQ3ZTc1MjgyY2M1YTQxNTo3OjI0MzI6MGNkZTg2MmJkNjg4YmUyNTZhNDlhMjRkY2Q4NmFjMGM1MWJkMTcwMGY4NDE4NjNlM2U4MGI4MzAyYTI4MDNjNjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Betty Corbin

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Beverly Reese

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozOTI4MTg2YWVmNzEzZTJkZGMyNThhODM3ZTljZDlhMzo3OmRjZmY6MTMzZTBmMDg1NWY2MWU4MmJlMzgyY2FlOGNkOTI0OGE4MzU3OTE0OTZlZjYyMDAwZjhiNDNmNzQzNzFhNjVhZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Cheryl Floystrop-Borne

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Cheryl Light

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyYjkyNjJhZTJjNDZlZDljNmJkZjU0MWQyNDA1MjYwNzo3OmZhMmI6MTZjMDY4Y2IwNTZhOTQ0Y2Q4M2Y5YmE0MzU2ZmE4MmZiMTY3MDE0NTQ1Y2VjNzJkYmRjZTdmNzAzMWVlM2VjNjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
David Thompson

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
David Wyatt

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkOGQwZDc5YzY3MDJjZTJlMDk4NzVhYTNlZjVhNWU0ZDo3OmY3YmE6MjQzZmVkMWY2ODFhMDYwMmM5MzIzNmY1ZmFiZDVlMTNmNDNlOTU4MTVmNjU0N2Y1Y2ZmZmExMThkOWFiMGJkZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Donna Nahmias

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Edgar Crouch

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozNDc2MzRiNmIzZGRlYWJkZmYwZDhiMjQ0YTBiZjI0Yjo3OmY5NWM6NGIwNmMzYWM4YWMyNDczZDVkODg5OTkwZmZlZTA1OTgwN2EwZDY0MWFjMDM1NWEwODBlOTZiYTBlMWEwMmNiOTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1YjJmMzU1MDA2YTQwYTE2MDNhNWM1YmFjMTM2NTJjYjo3OmRiN2Q6MWZiNDA1NmJkMWY1MGJjYzkzMTFlMWUwNGNmYjJmMGZjOGE1MmY5YjVmZDY3ZTRkYjYxNDcwYjI2M2I5YzI2Njp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
James price

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyODgwOTEyOTg0ZjgxNDc2NDM5YTU0NTBkNzJiZjY3Mzo3OjdlODY6Nzc2MjI4ZDdhMTE1N2FkNTI3NDMxN2NjZTFkNDc2MTMzYThlMDc5ZjkzNjJlMTkwZDQ1ZTY1YTVmNGJiOTY5Yzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Janice Howard

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5NjIwYTg2YTI3OWQ0MmNlMTM4M2RkZTdmOTRhOWZkNDo3OmNmODQ6Mzc0MDU4NTQzNjg5YjBmZTlhMTU4OTY1NzhkMGYyMzgyZDc0ZDJlNWUyMDU2MDlkZTg2OTk5MmRlODZjZjdmYzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Janna Thomas

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowYzFiY2I4NjRkZmFkYWYzYjk3NGFlOWI5MGNiOWM0MDo3OjQ3Mzg6NGJkNTNjMTk5N2Q5MDFjNjM1YmRiNDM2NzM1MTU5Mjg5YWVmYzZlNDQ0ODJiNGYzMzAwOTA1MDcxMjNkYjU2Yjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Joe Pivato

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
John Erickson

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Joseph surko

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Katherine Sutterfield

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3NGU1NzI4ZDg2MjkzYTUzYzE4NmZhZmRjODMzYmI1YTo3Oml5MTM6NjNmNjBjNTQyZTZmZTAzMTg2OTQ1MmEzNmRjYTdkZTE0Y2E2ZDJhZDhhOTgyOTUwZDcxZjFiMDQ3MTE3YTNjYjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Kathy Mayfield

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Laura Wilkes

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzphMGVkOWM1Njl1Nzc2NmNjOGU4ZmJhNGM1NjhmZGFiMzo3OmI1MGE6NTUyMWQxY2U0NWQ3Yjl0ODAyOTk2MTlmOTc1YmNkYmRhODJiMWRjNzY1MmQ3MDllMjY4NGVlOWZkZDI2M2ViMTp0OlQ6Tg).

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Mary Ann

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyMGY2MjZmZjE3ZDc3ZTg0MThmNzMzNzAyY2Q2ODI3MDo3OjhhZDY6YmYzY2Y2OWM2M2EyOTlhMjMxNjdmZjQ5ZDY3ZDFmNDQ4ZmNiZjA4Y2FiZWVlNTM3OTdjZDMwODM2ZmNlNDNkNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Nan Ward

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmMjhmMTdkZGNjZjQ4ZTU2NmQxMWUxOTIzYmRjY2YxYjo3OjhiMGI6Y2I1ZGU3MGRlOWIxODFmZTI3MDE5Y2I4ZjVjMTE0Mzg0YjQyOTFhZjcxMzJkNzg3Y2Q4YTY3ODU4ZDFlNzE0ZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Pamela Doughty

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Patricia Beauregard

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Patricia Lashbrook

Dear Counselor Bill Fine,

The absurdity of charging a location MORE for using LESS electricity is the most predatory practice I have ever heard of. The monopoly energy companies have in any and all locales is gross; if they can flip a switch to disconnect power at will, then they can flip the same switches to compete with each other with competitive pricing like real businesses.

This is a sick economy. My electric bill MORE THAN DOUBLED this last month, and we are conservative in the amount of power we use. And now AES' changes want to make it more painful for people like us, we who care about bills and the environment and actually having food on the table.

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Robbin Neligh

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxZTRhNzNkNDBhZjMyOGRjMWVkMjdkN2M5ZGI2MmE5Mzo3OjdjOTQ6NTQ0ZmMwZjM3NDkxNWEwZTAzODgwOTc1MTI4ZmU0MGQ4YWQ2ODNiYzkyYWZkYzczMGQ4NzdmNjdjYTVmMDhiMDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Robert genung

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES, especially considering that the abysmal service you have in making prices equitable, if these rates are raised, the people will shut your power off.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve funding, let alone profit, especially not from the billionaires who stole power from the working class. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Reject AES's request for higher ROE and please reduce their profit dramatically!

Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Scott Curts

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozYWVjMDdmZWRmOTk1ZDcyOTAzNTQ1YWU3Y2JjZTc5OTo3OjljNmY6MGM2NDBhZjNiZjhmY2JmZDE4NDVmNGE2YzJjNWUwMjhlZGNjZjg1YWZiYzAwNDEzNWFmZGE0YTYwOWVkNmNkNzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Sharon Walker

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

My energy bill has gone from $220/mo to $361 with VERY LITTLE change in kw/h usage. My husband works and I go to school full time while taking care of a baby and a school age child. Even a $15/month increase is the difference between affording bills and having to cut back on medication or groceries. These increases are unsustainable and unaffordable for my family and most hard-working Hoosier families.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Timothy Clark

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3YjU5MTVmMWJkNDE5Yjk0MDA5ODE0MjJmMTA0ZWNhZTo3OjBmNzg6YTdlMTQyZjE0YzEwNzFkZjE4ZjEwMjRlNWYwM2RiNWY0MGFhNDg0YWQ0ZGY0ZjlhMml3MWQyZDVhMTYzNzcyNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Tom Miller

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Tyler Scanlan

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Abigail Johansson

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Adair Allen

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyOThhY2E3YjI5NDVkYmFiYTNkMGJlNjdhZWMxMWVhMzo3OjVhNWU6OGRlMjVhM2RkZWUxYWNiYzdkMWYyMzEwNjU2MWRiZTc0NDgzNDUxY2YzYWI4MjMyMmZlNTRmYmYyYWU3NzVmOTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Alec Hofeling

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Angie Kimbley

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Anne Bryant

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmOWU3OWNlOWFkODA2ZjIwZTg5NDlkY2ZiMTRlNjQ2Mzo3OjY5NDY6YzE5Njk1ODdjY2U1MWQzZWM4MmU5ZWZmMTY1Yjc5YzdkMjQ1ZmRkZDJjZmE5Y2IyMDNlYjRjYjgzNGNhMTczNzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
C. Mc

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Carol Wickliff

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozYWJkZmZmOGQ4ZmJlZWRhZDgxNGZhMmIwZWVhN2RmMjo3OjZiMzI6ZWFlNzU4NDgzYjNkNjk4ZWZhYTg3OGVkYzEzY2VmMTMzZWFhZjQzYTc1NzllZTI3NDdkZTNhMDM1NTg4YTczYjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Caroline Flott

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
David Starzyk

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Dawn Foy

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkZDYxZjU1NDI5YTcwYWNmZTJhMzg3MzUzMjY3M2NmODo3OmM3OWY6N2U4ODVmMDUwZTQzMTk1MTAzMjZhOGIyODY0YjE2YzJmOTlhMml0YzZiOTUzODM2NGZlODY3ZWI1OWM5NThjNzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Elva Sarver

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmNWE5YWFhNDJlNjkzNjRhNWE0MTYyZGI4MGZlOGI4ODo3OmUzYTQ6M2EzZGU5NDZjNDdhMDNlYTcxOTU1ZGRhYzc4YjZjYjQ3YTQ3MWY5NWQwOGZlZTljMTY3ZTM2YTAzM2UwNjAxOTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Emma Ryan

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Emmett Husmann

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Hunter Gross

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Ivy Coovert

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxZGNlOGZmMDE2M2Y0MTdmNzk0NDhiOTc0MzFkZWJkZDo3Ojk3M2M6NzhjYTQ0MjMzYTk5N2RiMTNjMzNhYmVhN2NhZTM4YmZhZDJiZTcxM2Q1MjM2YjRjYmE5NjBlOWNkMTQ2ZDMyNjp0OlQ6Tg).

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Joseph Klemann

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiZGY3YTgwZTA1ZmJlMzIyOWQ2M2QzZTIyZDU3NGZkOTo3OjhjNjk6ZGQ4Mzg5YjVmNGY4MTRlZmM0NGMyNjI3Y2UwMjFmNzllMTJjZWM2YTZmNTdmNGE4NWJiMDhkNjczN2U1NjNjNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Julie Hurt

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmM2Y1OWUxNTRmYWM5MjdiMDQyYTFlNGIwZmE0YTY1Mjo3OjNiZjE6MDgyYzM2YzFmMWQ2YjU0NWJmMTQxOTg0NDJmNml0NmRiODA1NzE3YTk5ZmEzNTE2ZDQ3OWI0NzExODU5MDNhODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Kurtis Hankins

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Kyra Stroud

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
linda allen

While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Mackenzie Upton

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkNDI5MWQwMWNkMWYwNjIzM2FkMGI1NWRhOGU2Mjk4MTo3OmIyZjI6NTFkNjkzMGFlMWExY2I3MTU4ZDc1ODY1YTIzMjI3NjFjODc0N2IwZTU3ODA5ZjIyYThjODYyYTZiN2I1MTUzZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Madeline Cruz

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Mary Wilson

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5NDAyMTdkZTEyZjU4NjJiMmFmYWM0MTcxYjliOTJmZDo3OjZmNWQ6OTBlZWE5M2QwNzZjMWY4MDAzN2MyNGNkMzA5MmRmMWViNzlhNTBmZDZiMWQ1M2MxYzI3OGQ5YzUxODM5ODYzNjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Mindy Weaver-Flask

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Philip Hamilton

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
MistyBlue Paschall

Dear Counselor Bill Fine,

The verbage below from CAC certainly describes the specifics and history of rate changes. On a personal level as a senior on a fixed income, the bottom line is that continued rate increases are not sustainable by people in my position.

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmZTFjZTFmYzA0YWU5NGUwYjMxNGE4NGRkNzkyYzA5NDo3OjZlZGM6MWI0Zjk1MDZmOTAwOTY1NzdlODY5Mjk5OGRkNmFmNGY5NTY5Njg4N2FhN2M3NzYxZmE1YzkxZWI0MWI4NDI4YTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Thank you for attention to this important issue.

Regards,
Randall Dreiman

In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Ryan Holleman

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Sally Ellenberger-Knoop

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5ZjE4ZGNjYTVjNDMyOGQzYTRjMDMzMjJjM2NhNzI3Yzo3OmUwYTc6ODZlZjU3MjRmNDRlM2ZkYTFhNzg0NjY1ZTA2ZmQxZjU3ZGZjZmI5ODNiN2I4YzBkNTE4MWIzZTNkNzlkOWQ0Mzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Stephanie Tramelli

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.unwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyMGI0MjY1MDFjMTc2M2JhNzAyNGIxYjRmZDY1ZTI1ZDo3OjMyMzk6ODIwZmY5NmQyYWYwYjBiOWIwZmUxMTBmNDVlM2FiMGQ3NTU4NDY2NjFlZDE4ZjY1MmI1MzRjMjI3ZTg2MjY1Nzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Susan Harris

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Terry Smith

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. Dear Counselor Bill Fine,

As an AES user with no other energy options in my area, the news about the price hikes is very troubling to me, especially since many of my neighbors and myself are already living paycheck to paycheck. I am very concerned that my community will not be able to afford another rate hike from AES. I believe this rate hike is predatory and in bad faith.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES has the highest profit margins of all electrical companies, and is still failing to provide the service people are paying for, then why do they need MORE money? What AES really needs is an audit and heavy oversight.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Theo Rohan

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmMTMyODdlNzYxZDNjNjQ0MGRhOGYwZGU5MzAzN2QxNTo3OmM3MTY6YjhhMDMwMTlkZTY4Zjg4MDBjM2Q4YmNjMzgwZGIzM2Y5MmRjNWFlMDZiNDcxNWJkYTJjMTA4NDk5MjA5MGUyZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Therese Potter

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Virgil warrell

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5NjNlMDhjMDFkNWZmMmRlZDEyZmE3N2U3MTgzYjY5NTo3OmE3Nzk6ODkyMDRiOGM2M2E1YjIwZGRiNjI5YmFkYjY2N2E2ZjE5MTc2NDY2NWQ1ZTZhMzkyMmQ2YWEwMzc2NGEyN2RlYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
William Emerson

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1NGQ1OTI2MzgxYjA5YjE2ODBjNDAyZDIyZmZhMjI3ZDo3OjIzNDk6Nzc2MjgxMzEzYjQ2M2RiODdlZDhkZGM3NTJkYjg2ZDA2YjliMzhlYzg4NWUyYTg4MGRlNTQyMmUxMWZkOWNjYjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Anthony Schroeder

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Ashley Sanders

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Ben Ericsen

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.unwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxMGZmN2NmMzcyNTc0MTY4YjJiNmYyZjIyNGI5ODE0Nzo3OmQxZjY6YmU0MDVhYTdlNzU5N2MzNzNhYzc2MDIzYTA0Nzk1M2NiNjliMTFiOGVmNzJmMTM1MzBkNjUxMjVlM2NmMDgzYjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Cathy Eads

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Charles Fulkerson

As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0YjY5Y2Y1M2JjMTMxNDBhN2EzMTY3ODI5MTY2NDIyZTo3OjhmMjQ6MGNiMDNiN2Q0NWUzMzY5ZWQ0ZWQ4MGEzOTdmN2E1YjVkNWYxNDcwYTRhMGYyMjVhYjY5NDUzYmMzNzRiODU1Zjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Dear Counselor Bill Fine,

On behalf of Indianapolis and myself AES raising rates again is inhumane. A light bill each month as much as a car payment is ridiculous. The economy is horrendous and adding yet another rate hike increase is capitalism. You guys are trying to get rid of homelessness but contributing to the endless cycle of fraud which keeps minorities in a check to check household barley surviving. I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Daniel Stanley

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Deborah Grey

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowNTIyMWE3YmY0MDgzNTI2NDIwNmU4NDkzNmQ4NGE0ZDo3OmUyMDY6ZDA4ODdhYmYyYTZkNGZhYzY5NzcwOGRmOTliOTc0ZTA3NjQzYWYwODE5NTc5NWI2YzJkODJlYTNjMWUzNzJhYzp0OlQ6Tg).

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Douglas Gigowski

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am very concerned that Hoosiers are struggling to afford ever-increasing utility bills. Indiana now pays the 12th highest residential electric bills in the country!

Residential utility customers have an extremely limited role in controlling the cost of our utility service. With unaccountable utility regulators, an appointed Consumer Counselor, and legislation passed by the Indiana General Assembly that tips the regulatory process in favor of the utilities, it's no wonder that utility bills across Indiana have continually increased while our ability to pay those bills continues to diminish. Thousands of Hoosiers have had electric and gas service disconnected every month since September 2022, according to data reported to the Office of Utility Consumer Counselor.

Struggling to afford utility service puts Hoosiers in difficult and dangerous positions. We need policies that protect consumers and public health, like strong weatherization programs, affordable repayment plans to catch up on utility debt, and a summer disconnection moratorium to limit the number of Hoosiers enduring high temperatures without electricity. Please do everything you can to pursue affordable monthly utility bills for all Hoosier households!

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmNDE1NTE2MmIyMzAwYWQyMjhkYzFkZWVkZTgzMmFiZDo3OjIxNzE6NTIxZjVjZTM3ZTFkNTI5Yjl4YmVmNWM0NjZhODYyNDZkNTgxM2RhNDExNWUzZTNiN2VhOTYyMjNhZTA1NTc5ODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Eva Bailey

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Fatima Johnson

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
James DeCamp

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzphZGNiNTY3ZjAyYmFmZTNiYTBkNjc1NjAxYzNlYWY0Yjo3OjA5MTg6YThhZGM1NjIxYzRmYTM4NzA1NTM1MjI3MGQwNzVmYWM0MjNlOWVjODgxMDVhN2ZhMzNmNThkZTU0NjhiOGYzZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Joan Diamond

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1NWY4MzYxYzE4ZWMxODFmZDJhNDgzOWM4YzQ5MWQzMjo3OjFlZGI6YWMzMmE2OTYyZDMxNTYzNmI0ODhmMjRjMGU1YWU5YjNmMTJkYWEzNzc4OGUzN2Q2YjJhMzRiODE3YjU1OWY0Zjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Katherine Taylor

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiY2Y1NDIwMTYxODdiYmE1ZTBiMmVkZDg1MjE4M2ZhMzo3OjYwNTI6NGQ2YjNhMzhmOGQxZjdjM2U2MjMzMzY3ODNmN2FjMDhmZjYwNzA5ZDMxYTljMDA5NTVmMDNkOTFiNDgxMWI4Mzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Ken Driver

In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Leonard Dintenfass

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Les Mitchell

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozZDNjZGE0Nzk0ZjcyYjgxYmU3YzcxMmVjM2U5ZDE1MTo3OjA3NjA6NmYzNjk4MWRiYzk0MTRkMDFlNGQ0ODYxYTQ4YTAyODU1MTI1ZWZiYjI0MzNiMmIwYzZmNjYyZGI4MjQ5OGFjNTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4YTUzYjcxYTdkZjc3MWEyMjQ4MTRmNTBlYTZmZDA5OTo3OmJiMWE6MDZlM2RjMjhiOGNlZjhjMzM4ODQxMWFmOTc5ZmY2NjMzMmFkODg3ZGI4NDg4ODk3Njl0ZWQ5MDFlZjMwMTAyZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Mary Miller

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Mary Paugh

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Nikki Dayton

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyYTJmZDE2NjU5NzhkZmY3ZjdkOGU1ZDJlMTUzMzI2Mjo3OjExZTI6MGY4M2NjNWYzYzQxYTY0ZWNjNWE3MjlmMGVjZDVmZmIzNzkyY2UyMjQ4ZThiOGU1YmZlMGNjNmM3NjU1NTY3MDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.unwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiOTQ5OTM4NjA0MWI4ZTNjNDVhZTc2NWY2MmFhYjEyNDo3OmFlYTI6YTJjZWQ4ZGNiMzE1NGQ0MzMxMTg0ZTFiYWM1OTU4NGQ5ZTVjNjNhMjBiY2U5MzM5ZWE5YjY2Yjg1NzYxZjI4ODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Robert Burton

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

Please do everything in your power to help resolve the billing issues impacting over 60,000 AES customers. While I am happy that the Indiana Utility Regulatory Commission is holding a hearing about this issue, they really need to open a full-blown investigation to shed light on the extent of the problem and the steps AES is taking to resolve all ongoing issues.

It feels like the cost of everything is going through the roof these days. The thought of being overcharged for my AES bill - by hundreds of dollars - and then having to wait weeks to get it refunded is a nightmare. A recent IndyStar article mentioned that AES may even be trying to charge customers for getting their money refunded. That is outrageous to me. It’s not our fault AES overcharged people! Furthermore, AES is a financially healthy multi-national corporation while many of us are pinching pennies to get by.

I'm especially concerned for my neighbors with low and fixed incomes. Being overcharged by AES may force people to incur late charges for other bills or overdraft fees. Those extra fees can really add up!

We need a thorough evaluation the extent of billing issues faced by AES customers and all the steps AES is taking to bring about resolution for everyone who has been impacted. We need to be able to trust that customers are getting the refunds they deserve in a timely fashion.

Customers have been bearing the brunt of AES's billing issues for long enough. Please do everything you can to ensure customers get the solutions they deserve through an IURC investigation into this matter.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplN2FmMDE3N2VhMDdjMDg1ODI0OGY5NWI1NjY2YTI3MTo3Ojg0NGY6Y2M1MTc1NGE4OTBlOGViOWIxMzg1NjUyOWExMDZlOWFjNzNiMGEzZjQ1ODg0OTY1MTNlMWNlMTg5N2E2OGQ4ODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Shawn Spears

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Shellise Arnold

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Tammy Richards

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjNmEwYjFhODY4Yjc2MjhmODNhNzA2ZjQyZjFhYTg1Yjo3OjU3ZTE6MjI1MWI1OTFhYzRjMjM4MjIxOWRmZDZmYzA4ZDYzNzNjN2Y3Njk3NDBiOTlmNjhiM2MxZTBmODZiYjBlMjc1MDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
William Overton

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
William Stephens

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjN2IxNzY3MjFiNmIyMzNiMTI4YjAyZWEyZmU1MjQwZTo3OjAzYTA6ZDFjMGUzZDYwNjRmYTYyMGIwMjc0MTQ5YWQ1ODVjYTI0YWE4Nzg3ZTI5ZDNlOGFhYjY3OThhODQ0ZmVkOThjZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
April Knauber

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxYzM3ZDUyMzU1OGI5YmU3M2E0MGQ1ODdmZjhlZDQ1Yjo3OmQ4M2Q6OTRkNjY2YmYxNGQ2ZWRmMmMwN2RkNmM3YWFkYzJmMjcyYmM1NTIzMzllMjk4ZjFkNTAxZjg0YjQzNzU0NGI0YTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Brianna Craft

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Candace Backer

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjMmI2ODFkNDdkNjZlZGNmNTNmYjY4NWRkZDUxNmQ4Mzo3OjZkN2E6NTAxYjM2MjU2NWRkNDczYjYwMjA5ZmMwYzNiNTcxMTFlYzA5MjcyNjRhNzI0MjlkNzY5NThmZWQxZDhhNjIzMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0ZmNhYmRlMWFhYmUzYmM5NDQwYzk4YTE5OWRkYWRlNjo3OmQ4ZDA6ZjAzYWM4ZTIxYmE1NDNlNDA1NDUwZTEwNTEwMzI2ZmYyZTg5MzYwYmYwODJiNTgxZjhkMjExZGM2MWRiMWRlYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozNTNjMWE1Yzc4YTIxYzJhODBhNzk3ZDBkZTNlMzdlNjo3Ojg4ODc6YTVhZjk4NmM1MWJjMzQxZjMzNGIzZWI4Y2UwMzg4OTAwZTZiMjgyNTMxNjNlNDdhZDc0MjdmNDIwMzVkZjY2Zjp0OlQ6Tg).

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. WE CANNOT AFFORD THIS! Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. ALL Hoosiers deserve uninterrupted access to essential services. NO ONE should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
David Phelps

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Denise Morrow

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1ZGU4YWEzZTcwMmM2ZjJlZTEzNzg3Yjc0ZWUwYzk0Zjo3OmRjZGY6OTlmN2U5ODM5YzMyNzU5YjEzMGE4OGJmZjM2ZGJiNWM0ZTU0Y2Q1NmNmNGNjODlhZjNmNWU5ZDliZmE4OTA5ZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Dustin Cox

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2ZWRmYmVmNTU3YTU0NWYyOGE1Mjk5YmVkYWRiYmM4Zjo3Ojg0MmM6YmRhNzhiMzE4MGNmZGI5NGQ5ZjdiMGQ2MTg3MDNjOWI0NDJiMDM3NmNhYzRjY2U2MjcwYzQ3NzQ5ODI1MmFlZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Gary Connor

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Janet Engle

LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Janice Johnson

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1MjQyNTFhNTUzMWE5MjNmODEyNGY4MTc3MTFkMGZjYTo3OmIxNzc6Y2M1OTZkMmVjNDE5MjFmZmUyZTgwOWM5MDA3YmJhMzhhMjNhOTJkZjVjNDFmOWU5OTNhMTE1ZGJlYmY0MWM0Nzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Janice Westfall

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.
Ok

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowMmUwMjhiOTRiODkxYzE2MGI5MzQzOWMzZThiNmY1OTo3OmI1Y2E6ZGJkYjVkNjc2MDcwMWViMTlhZmQ5ODNkNzFlMWJiYWYzY2UwOWY1NDhjMmZjMDU5NWY2ZjNiMThjYTRmM2EzOTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Josie Eslinger

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Julie Shetler

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Kenneth Perkins

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxOGY4ZjQ1NjczNzNkNTMxMjgyZTYxN2I3MDg1YTJjMTo3OjQ0ODM6MTBkN2UyMTNkMGM2MjA3NWEzN2E4NTMyZDQ3ZmE5YzZjZTk0NTcxZjFkNGJmNGE0NWFkOTEyMWEzZDdiMDJmYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Kenny Harcourt

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Kimberley Snyder

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Loriann Nickmann

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Lorri Jeffery

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1ZWJhNWFjMmQ4NzY5OTg0MzVkYjAzYml4ZDkxNWM4ZDo3OmEyOTY6YTEzMTJjZWYyYmVjM2MwMWUyN2M2ODM3YTgzYTU4MjNmMDdlYmEzOGFlNTkzYWEyZjhiNzEzMjNjZTFlODJkMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Madison Daniels

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES. I can barely keep afloat right now. We are a 2 income family, both with college degerees, and only 2 kids. However, with all that it still isn't enough. $30 a month will have to come out of another budget, like our food or my required monthly medications.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.
