Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Sue Davis

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Susan Cox

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplNDMwMWFlYzBjOTA3YTFjNzUyOGI5NjJhNzZmOTM2YTo3Ojc1MGY6NjVmYzA0YWFmMWUwMTU3ZDE3ZjkzN2U0ZWY5NGRlZmFlMWI1MzRkZTM5YmE5M2MxMmMxNTAwOGVkNWZmNDYxNjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Virginia Younger

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzphMmZhZmZiZmZlMjVjOTg4NDNiYTY1MDk5Y2Y0YWU5Zjo3OjBmOTk6NmMyOTA0NDhmZGUyMjFhNmY3MWIwODg1ZmE1YjEzMjViODM2NTYxN2RhNDc5ZmY5ZDkxNmEzOWEzYWY2NjcyMzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Whitney Gash

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Xander Hall

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Amanda Sims

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyZTIxMjI5ZjhmN2E2MDhlZDEyZjI4MjYxMWRjMjkwMzo3OmYyODQ6OGNjNjIyNDgxZTI0MWEzM2M5OWZlOTE0ZDVlYTFjN2I5ZDEwMGZlMTgyNmZkMmU0NzJhODcwYzU5MmMwMWNiZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Angie Baker

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowMGM3M2NkNzdjMTBmN2MwMWJlN2QxMTk3MDcyZjdmNzo3OjNlMjc6NTlkN2FhN2ZkZWQ3NmVkOGY2Yzk2MGYyYzA0ZDEwNGVlMTk2MmVhNzUyNTRjNDZjNmY1NTc1MTg2ODk4NjFmMjp0OlQ6Tg).

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Bryggs Krater

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0Y2VkZGE1M2UwNTA3MDc5MTk4Y2ZhYjZmNjA0YTBmMjo3OjZhOWY6ZWIzY2QxOWU4YmJjODg4M2VjNTAwZGMxNmE4NGU4NDYxZmJkNDY3NmFmYjM4NmEyNTYzMmFlNjJjY2VmZjhhZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Candice Crawford

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Capurnicus Ortuno

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. Dear Counselor Bill Fine,

I cannot afford another rate hike. Stop giving discounts to corporations and making residents pay.

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Christine Wise

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Courtney Ellis

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjOTRiNWNhNWZiNTQ3MjRmNGE1YjBiNzM4NTVlNzQ4ODo3Ojg3NWE6M2RiNDI1M2MwZDNlZDAyYTUxZWJiNzA5ODU4ZWM1MDdiOGRhZjA0MDczOGFhOWRlMTc5MjkxNzkzM2U2OWFjZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5ZDMxMTEzNjIzZGY0MjFkY2QyYTIwN2JiMDlmNDczZTo3OjEwOGY6YjZiYWJmMmE1NDQ4ODM4ZWNkYjQ4MmRiZGYwMGE5NjFjZmU1Y2UyYjQ0MGNjMzA5NTU4ODA4ZDY2MDJhNTdjNTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Dolly Knox

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Donna Hines

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3ZmIzYjQ5NDBkZWMzNDNlODAyMzUxYzE0ODA4MGUwZjo3OjIxYmY6NzMyMWZlOTQ3OTBiOGEzYzAyY2ExOGJhNDcwM2QzMDk5MDA1ZWVlNGJlMTBhMzc2ZDYwYWYyNzA0YzllZjM0Yjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
George Roettger

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
George Roettger

Dear Counselor Bill Fine,

First and foremost, I have been nothing but unhappy since being forced into being an AES customer. The fact that utility institutions are monopolies on cities without giving us choice is very limiting and financially straining. AES advertises at Pacers games, Colts games, etc. using our money for large ad spots in a market where we don't even have a choice in our provider.

Two years ago, we were without electricity for a WEEK during the 4th of July. Temps were in the 100s the entire time, and we had no where to go. We lost our entire deep freezer of local meat and much more, costing us thousands. ON top of that, our dog was dying, and he had to suffer through his last week on earth in scorching heat. It's inhumane and cruel. We were given NOTHING in return for the lack of help from AES. I asked for reimbursement to no avail.

I live in an area where not everyone can afford a $30 increase per month in their electric bills, especially for no reason. I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Haley Miller

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Jared Lee

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Jason Rayl

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. Date: Tuesday, August 19, 2025 12:02:56 PM

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxOTQxMzVkYTQ4MzNmN2E3NDA3MDlhZDgxZjAyYzFmMjo3OmZjZmQ6YzA4MmJiNTMzZDVlY2VhMWEwODNkYjQ1YzcyMDAyZmVjNjRkOTdmYWNiYzJiY2FiNmEzNmVlZWY5OWNjN2U5Nzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Please stand up for Hoosiers and reject this rate hike request!

*****Personal note:
Please take the time to actually listen, to understand, the voices of the public. People are struggling all over right now, and the literal last thing Americans need is a higher rate to pay on basic human necessities. Citizens should not have to chose between eating and feeding their families or paying utility bills. Profit should not be chosen over basic needs of human life. Hard working American people depend on this service for themselves and for their families. Please reconsider these rate hikes. They are outrageous.

Thank you for your time.

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1ZTA5ZmUyZTBhYTgxMmY0YjNkMWNkYWEzZTZkZDIwNzo3OjQ0YjM6ZWZjZGEyODRiYjVkNDQ4NjlmNzg1OWQzZjk1YmQyZjJhNDFhNTllMDViZjZlMDJkZDY5ZTg3Zjc5YjI4MjU2ZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Karen Bushfield

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Karla Weidekamp

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3NTBmYWNmNTY1M2EwMTAxMmVmZjFmZTliOTUzYTFmNjo3OjgyMmM6ODRjODRkZGUwNDY3Yjk1YmIwMjc4ZmU5YTcyMDAzMzdiODRhMTI4M2FmMjAzYjU1NGUxODFlN2ZhNWQ0MDdhYzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Kathy Saunders

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

I work three jobs to be able to pay my bills already. In one of those jobs, I serve Indianapolis' mentally ill population. Most of those individuals are on disability and unable to work. $967 a month does not go far for someone who has no one to help. Charity programs are being cut everywhere. Food pantries are unable to provide as much due to budget cuts. The rich are getting richer and the poor are dying.

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows. What with leasing out our toll road, with Mitch Daniels pocketing $1.4 million before IPL was sold to AES and hundreds of ordinary hoosiers lost their pensions, Sh*tty road conditions, resistance to solar energy, previous rate increases, and sky-high executive salaries, AES needs to tighten executives' belts and prioritize quality of life for ordinary Indiana residents before it asks for ANOTHER pay raise, er. rate hike.

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Kimberly Hunt

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Kimberly Moran

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.unwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjNzY4YmFhN2E0Yzl0NWIwMjY2Njc2MzlhY2Q5ZmNhZTo3Ojc1NTk6YWVmNGZmMzQ2ZDIzNmUwODQ5OGI0NDhjMGZmNDJlOTNjMTFlM2YwNmI3NjE5NTU2NDU4NjEwNmEzNDE3Yzk1Yzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Public utilities should 1st have an obligation to the communities they serve, not the shareholders.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Larry Peffer

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES. I refuse to be extorted to pay more for corporate data centers and excessive greed for profit.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Mark Hemelgarn

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1MzA3MjkwYzZkM2FjZTgzM2JhMGJjOTVkMjI3MDlkMjo3OmFkNzQ6NGM5ZTg0NTY2MTIxMGVlZGQ2NDAzOTZmNzMxZTBlNzI3ZWI5M2M1ODEzNGI3YWM2MTA1Nzk0MjM5YjVlMjBlMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Dear Counselor Bill Fine,

To Whom It May Concern,

I am writing as a concerned resident and ratepayer in Indiana to express my strong opposition to the rate increase request submitted by AES Indiana.

Families, seniors, and working people across our state are already struggling with rising costs of living, including housing, groceries, and healthcare. Utility service is not a luxury—it is a necessity. Increasing rates at this time will place an even greater financial burden on Hoosiers who are doing their best to keep up with essential expenses.

Additionally, AES has a responsibility to operate efficiently and prioritize customer affordability before seeking higher profits. Many of us have experienced service concerns and reliability issues, which makes it difficult to justify paying more for the same—or in some cases, less—reliable service. Before any increase is even considered, AES should be required to demonstrate meaningful improvements in service quality, infrastructure modernization, and transparency in spending.

I urge the Commission to reject AES Indiana's current request for a rate hike. The people of Indiana deserve affordable, reliable power—not higher bills at a time when so many households are already stretched thin.

Thank you for your attention to this matter and for standing up for the interests of Indiana residents.

Respectfully,

Regards,
Mathew troutt

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Matthew Barker

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowYWFlM2RiYWUxYzc2NjNlNzZhMDNiZWQ4Y2M1MTMyOTo3OjNmYTY6NTZkYTRkNzM0MzQ0NmNmOTBiOGFiM2ZmNjU1YjM4YjY2ZjFhYzVjMDNiYWU4Y2Y0N2Q1YzkxM2E2OTNiMjM0Mjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Nancy Ellis

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Nancy Rowlands

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

As a paying American citizen AES has increased the rate merely every year in winter those trying to survive end up with $400 to $600 monthly bills this isn't about the lower class this is about those who constantly carry the burden of every community tell me I'm wrong on top of so said raising cost every year why do all the communities still have the same beat up electricity poles from the 1970's ? Once again only the new infrastructure and the new habitat for humanity homes or section 8 homes either have new built in free electricity or paid by American taxpayers free electricity. Furthermore in these yearly said raising electricity costs are your employees receiving better wages and benefits. Yep thought not so where is the money of the hard working American people being allocated are there NGOs loop holes maybe those in cozy offices making hundreds of thousands and above could elaborate or possibly DOGE our President of the United States came to dismantle this . I stand with the true American people who have the sweat off their backs to pay for 30% increases 60% increases enough is enough no matter what class or group we are in shivering in the winter because you refuse to be civil leaving us to floor heaters and increased household Fires knowing full well every year lives will be in possible jeopardy your yearly warnings of this are useless our children are cold it's a choice Christmas for our children, food , school supplies but wait AES takes it all away no guilt no reason

Dear

I'm writing to oppose AES Indiana's proposed rate hike. While the company says it's facing rising costs, so are everyday customers. Groceries, rent, and medical bills are all going up, and adding another $30 a month to our electric bills makes it even harder to keep up. This increase hits residential customers the hardest, and many of us simply can't afford it.

I urge the IURC to look very closely at the proposal from AES Indiana in Cause No. 46258, and please protect residential customers from already too-high electricity rates.

Thank you.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. I have fully insulated my 1497 sq. ft house on a slab, with replacement insulated doors and windows. I have blinds closed and window coverings closed also. I do not use my air conditioning at all. I have ceiling fans in 3 bedrooms, a great room and kitchen running. There's also 3 oscillating fans running to keep air moving.
My thermostat has been 82-85 this past month. The coolest my house has been is 80 degrees. It's hot in here. I live in an all electric house that is a ranch on a slab. My electric bill I just received was $88.05. I was flabbergasted at the cost.
Why do consumers have the bear such a big rate increase? Perhaps businesses could share in a bigger portion of the rate increase?

Thank you,
Patricia Waite

Dear Counselor Bill Fine,

I urge you to reject AES's new request to raise electric bills and collect another $192.9 million every year.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is $468 million by January 2027.

With a over a third of Central Indiana households living in or near poverty (per United Way https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplYWNiZWM1YjRlMTU5ZDBkNGNjODRmZDU1NDBkODNiZTo3OjQzNTQ6MWRiOGMyZDE5YzhhMTdmY2Y0NjlkZmViZjUyZTU5N2RkM2Q3ZTlkM2JjMDY3NjFmMDk1MDNjOTA2NzcxNTQxNzp0OlQ6Tg), it is unconscionable that this corporation should be allowed to exercise such greed, especially in view of its lackluster ability in providing an essential utility (as evidenced by multiple power outages and untimely power restoration).

AES already has the highest profit margin (return on equity, or ROE) out of all the investor-owned electric utilities in Indiana at 9.9%.

Though members of the community struggle to afford basic necessities, AES also wants us residential customers to pay a higher increase than large, industrial customers, such as data centers.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplNGE1MmNmYjg5NjlxNDY5ZTM5YWRiYjVjNjg5N2M5OTo3OjhiMGE6YmIzZTQ3YTdkZDg4NmZiZGQ3NmQzZTM4YzNhMDg0MTY0YzU1MzkxZDk0Zjg3YTA5MjQ1ODQzOTU2ODY0NjgwNTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

It's all about making the stockholders happy.

Regards,
Peter Wiser

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Rebecca Biggerstaff

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Sharon Ray

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3ZDhjNTk4ZTM4ZWY3OGZlZWU0MWMzNGE2ZjNkYmE0OTo3OmEwYzU6MWU2ZWZlNTZiZWIzN2MyZDRhMDMyNmU1YWQ3MGY2OTBiN2JkOGI2ZTY0MTliYWJlMDliNWM1MGIyZjA0MDY1Yzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, my family and other low income consumers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Susan Moody

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Tim Boston

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Timothy Cummings

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyZmEwNTU4NjhlNGRlYjk0YjRkZjkwYmE3NmNlZTQwOTo3OjdiMGM6OThlMWI1NDU1OTZiY2ZjNzYxMmEwNjI5ZmY5NDNhMjQyOTE1Y2Y4YThjOTExMGZlMjQzZTZhOTQ4ZjY5MmJmMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Andre Grissom

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Andrea Medard

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplZGRlOWI4MmU1Y2FlZGNlMTk2NGYxY2FhNTE1ZjYxNDo3OjU5YzQ6NTg0Y2E5OGI4NGM2ZWNiODgyMTUyOGM2NjAwYWJkZmQ0NGFiMTczMTVkZmZmNzJlZTA2YWY4N2UzYmVjODZhMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Anita Nutty

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Brenda Smith

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Bruce Hicks

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0NDE2MDQyZDMyNmY1YjRkNmUyMmJkZTQzZDAxNjQ4NDo3OjE5Mzc6Yjc4NzNjOWI4NWJlYjNiOWZiNzJhY2RlYTU2ZDc2NjNiZTc0YWRjZTRjYThhMjIxODc3OGZiYmYyNDIzMmViYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkYTIwNWNhMmIyYWNjYWJkNDczMWMyOWQ4MjE3OThhZDo3OjVmMzc6N2MwODI5MTE1YzYxNGJhZjIzOGYzN2RiZjI3MzE2YmU0ZmQ5NDI1MzNhMGQyNTkxN2U2OGIxODYzMTUwM2U4Mjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Christine Droste

To whom it may concern:

The AES rate hike will undoubtedly have a terrible impact on families. We are all struggling as it goes with do many things in this time with kids, food, clothing, and everything honestly. Last year they were talking about people lowering their energy consumption due to fear of grid failure, yet at the same time they are building new additions with 100's of houses that will have AES and they will profit from these new homes as well as the current ones. There has been no change at all in our infrastructure, we still have random power outages and flickering lights with less things plugged in. Granting AES a rate hike is going to cause homelessness and more families suffering. A parent should never have to choose whether to pay a bill or feed their family.

Thank you for listening,
Christopher Morey

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.unwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyNGFiY2MyZjcwNDNmZjRlOTM3N2YwYjFiM2IzZDJjNzo3OmNhNmQ6ZjRmM2FjMjAwNTczM2UyZjQ1MmViNTNkZGVkZjUwNTYzZDgwMDI4MjA0Y2Y1ZmU5ZjQ3NTkwZmQ2NWJjMGI1Yjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
David Isaacson

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplNmQzMDcyMGQwOGRhZDE1MGU5ZTQ2OWU4MmMzZjlkZTo3OjQ0Yjc6YTFlMzgyYWJmOGEwOWU5ZGExY2FmZDUxNTM5NmI0NmUxOGQxYWYyMzVlNWRjODdlZTliZmUzYzI5NTg0Y2ZkNzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
David Peck

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
David Wuest

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Diana Goddard

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3YTNkMzRmMjE1ODAxY2Q1YjliMjhhNThmM2NlMmNmOTo3OjYyOTM6OTU5MGQ2OTE1YjVhOTI5NTI4OWE5YWQ3YmNhZGRkNDY5MzhkY2Y5MzU4ZDI4M2QyN2M0MzAyNmYxYTZkZmY3Yjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Don Coffey

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4YjNiNmUyNmUxMTI1ZDI0ZmM0NzVmMzBkMGY0OThhYzo3Ojc1OTM6MDcxOWZlNjJmZGMxNzM1NTg5MmI3OGE5MDMyZGViZTgxNDYwNWFiOTg5MjczMTliYzQ0YjE0MTJlNGYyYWQ5MTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Gina Taylor

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Glori Sanders

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Harold Campbell

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES. Our community is what makes us great! I moved here and felt so welcomed to be able to call indiana my forever home and I want to make sure it stays that way for myself and my community. Why should we force people to leave and to struggle when it is strictly unnecessary. The profits AES has made hand over fist are more than enough for them to continue course. There is no need to punish regular residential consumers with this drastic hike. It is an extreme response to a lame excuse. With the billions of dollars in profits they can afford to continue to provide service through weather events as they have been.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. I have 2 little girls. 30 dollars would be better spent on shoes, school supplies, or food for my childrens bellies. This rate hike is unnecessary greed

that is stealing to food from our childrens mouths!!! We can't afford to have our AES bills go up by another $30 a month! I am appauled at the audacity of this corporate greed to steal from regular hard working americans to line their pockets when they have more than enough profit. Please stand up for residential customers and reject AES Indiana’s request to raise our electric bills in Cause Number 46258.

Respectfully,

While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Janet Scott

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Janis Robbins

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.unwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowODRjNzEzNzFkYzM3ZjFlYmIzOTEyNmE1ODQyNGIwODo3OmVhNDg6ZTdhNDkyNjlkMTY3YzE1MTg1MmIxMDllOTg0OTA4MWJlYmMwZDZkYjU0NTEzNjAwODNmNGFiNjM2MjMxZmJiMzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
John Jones

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
John Mullin

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjZGNjNTAyYjk2OGFhN2VkOTAzODBiZGU4OGMwNTUyNDo3OmY1YmU6YmI4NThmMjJiYmY4YjZiOGQ2ZmE2MzAyNzFmNGE3YjJjYzhhNDkzOTJlYzQ1ODA0NThmN2QwMjgwNmE4NGJkMjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
John Rivera

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES. We are already stretched because of the tariff impacts and other issues adding to inflation. My son had planned to move to Indianapolis, but is reconsidering given our expensive and rising utilities costs.

And to know the root causes of this increase are 1. increased returns to investors and 2. increased risk for ratepayers who are footing the bill for potential growth of businesses is just outrageous. Isn't that what the investors are supposed to do? Assume some of the risk of future gains?
The State of Indiana is dragging us all down the drain. Please put one stop to it!

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES’s request for higher ROE and please reduce their profit dramatically!

In addition, it’s disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Katrina Morton

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Kericka Massie

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5MDk1MWRkZGM0Y2QwZmJlNmZlOTdlNGYwMDM4YWNhMjo3OjQ4Mzc6MDVhMDViMjhlNWY0MWJmYmUyODViYWM3NGM5MDFjZTQ2YjE1YTQ3ZDg3MjE0Y2E0NjY4MTQ1MGY5ZGRiMjE3ZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Date: Monday, August 18, 2025 1:05:09 PM

This is the first time you received an email from this sender (lswillis2992@grassrootsmessages.com). Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

To whom it may concern, please read the entire message, SPECIFICALLY the final few paragraphs.

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

In addition to the note above, AES has a monopoly on electricity in Indianapolis. We have no other options to choose from. Since AES has taken over from IPL, I have had constant power outages. At lease once every two weeks my power flickers on and off a few times. As someone who works at home on video calls, this disrupts my meetings with potential clients.

We've also made multiple service request which haven't been addressed for years. My neighbors power line is less than 7 feet off the ground and AES still will not service this

dangerous issue.

We’re paying for more for less consistency, less service, and have zero other options. This is madness to increase prices again.

This benefits no one except the executives and board members of AES.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Landon Willis

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Lisa Alvey

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
lisa hornaday

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5MGI4ZTg5NDk3MGFiNmE2ZmZmZjk2MmNkOTk4NmM2Zjo3OjQ2YjY6NjdiYzVmODFiM2VkYmU5NzM2ZjY2MDVhODBlOTdiYzk1NmUwMzJlOGY3NWU3MWNhM2JmM2EzZjI2ZTMyZWJiODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Melonie Holland

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Missy cornejo

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Dear

I'm writing to oppose AES Indiana's proposed rate hike. While the company says it's facing rising costs, so are everyday customers. Groceries, rent, and medical bills are all going up, and adding another $30 a month to our electric bills makes it even harder to keep up. This increase hits residential customers the hardest, and many of us simply can't afford it.

I urge the IURC to look very closely at the proposal from AES Indiana in Cause No. 46258, and please protect residential customers from already too-high electricity rates.

Thank you.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzphYjgwNzUxOWE2NDdlZWZmMWU2NzY1N2MwMDk0Y2MwOTo3OjIyNzY6MzcwMWYyZGY0OWIwM2FhYTg5NjZjMWQ0MTk3NTQyOWRmZTU1OGYzZGJkY2ZlZDkwMTE4NjM4ZmY0ZWUxM2Q2Nzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Prudence Morrow

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Rebecca bilbrey

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjZTQ3N2QyZjk1YjAzZWNhMTk4ZDc3ODQxMjM3MGZmODo3Ojk5NmU6YTIzNmUwYTkxYTU4ODM3ODliZmEwZjI5OGE0MjQyMTI0NGI5ZjZiNzdiMDc0YmNkMDdkN2I2MTIyZGZjMDIxYjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Ryan Lippincott

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpiNTViODlhOTI0NWRkMTQzNmQ3ZDBhM2E2NDhlNzAyNjo3OmRhY2U6NzZkODRmNGM0OWZlNGQzYjE1OTA0OTY3YzNhOTYyNjUyMmUzYTAyZWVkZGZhYzRiZDUxNWVkNWJhOWRkM2ZiNjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzphZTNlMmExMGQzYmJmNDlhMWExNjIyNTY5NjMyMGNlNTo3OmYzNjY6M2MxOWY3ZjdjYzI2ZjM5MTc4ODM3MjhiMTExZGNhMTg1NDBmMTg0YjlmYmM5ZjBkOGNmZjAzYjJmYTNkMjhjMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Steven Kent

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Susan Harris

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2ZWY3MDkxYmE3MDc5MjlmZDA5NDAwYTQ4YTI4Y2RjMzo3OmYwMWY6ODgzOWU2OGY4MDhmZWQ2ZWI3YWYyOTg2NjlkYmExOGI3ZmY2ZGRmNTBkZjcxNjFjNTZiOTY1YjI4NGQxZGQwOTp0OlQ6Tg).

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyZmRjNGUxMTA0ZDIwOTRiOTM5ZDNhZDNjMjA3YjBjOTo3OmMwNDM6YzU1M2QxZjI5Njg2ZjA0MWRlYTgxMWE4MTE3Mjg1ZTM5YWM2YjM2NjZkZWNhOWMyMWIyOTljNzJkMjQ3MTY4ZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Vincent Gulliver

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplZDIxNDYxNTU5N2UwZmZhMGYyMTQyMTMzZGY2ODJlMDo3OjQyZmY6Mzc1OGJlZDI5OTk0NDk5ZGFhMDc5NzUwNzA5MWE0OTE4ZDkyYjhmMzcyMzFjNDY5NDI1MmE2YmMwOGU4YTFiYTp0OlQ6Tg).

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Alex mcvay

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Angela Thompson

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Angie rowekam

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxNTMzNGMxNDUyODMyZT1N2RjYmMwYTQ2NDlmZTAzYzo3OmMyNDE6MmIzZGY4ZDIxMDU0YzdlZTY1MzM5NTE4YzVlNjdmNjhhMjljY2FlMjdiOGE3ZTBhZGMyNWI2NDA5OTU2Njp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Aven Miller

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Brooke Vance

Dear Counselor Bill Fine,

I worry that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Bruce Hlodnicki

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzowMjk0MjI2NTczOTFiYmFjODEwMjkwODdjN2YzNWQ4ZDo3OjAxM2U6MDQ4YjY1ZTg2OTQ1OGNmNGZjNzMwMGE1ZDA3ZmNmMGZjYWQxYWJmNDU4ZWMzYjU1YjMwMmE0MTM5ZmRjMTc1Nzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

My husband and I try to conserve energy, and have taken steps to make our home more energy-efficient. Why should we pay more for our electricity than large corporate customers? And we were among the 60,000 who had to work to sort out our bills after AES' "updated" their online system. In this age of all things internet, it was an unbelievably inept "upgrade". We also have friends who have struggled to live in their homes while AES takes days to repair power outages during extreme weather events, including the high temps during the June 2025 outage. One had to move her pets to her basement and sleep there as well, it was so hot upstairs.

If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplZjkzY2Q1YmEyZTI1NGM4YmI3MGU5ODdiMjVmMTAyNzo3OjhiZjk6ODgyOWI1N2EwY2RkODY4MDI1NDhhZTQwMTczNGVkOTMzZjBhYTYzMWNkYjY0YTgwYWU4ZWVjN2VlOTg5NzJhMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Christina Mckinney

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. Date: Sunday, August 17, 2025 8:57:17 AM

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Christy Villas

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
David Hon

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozYTYxYzU1ZGQ3ODgyNzMwN2QzMzA3MTQ1NmMzZTM4MTo3OjBhMDA6NDVjNzBlODQxMDczMWI4ZWU0MWY5NGMxNWRkOThlYjU0YWM4MmE1YmZjZWI4NDI2OWViM2VhYWZmMTA4NDZmNTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Denise Snyder

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkZTk3NDM0NTZhMmRhMDA0ZmVkZTBhNzg2ZjgyMTRlNDo3OmY3MjM6ODZkM2FmMGUxMDA2NzYzMzc2MGI4NDE3NmRmY2ZkYzc3NTFiOTQxOGQwNWZjNzZlODY3OTczY2FjZDkwM2QyZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Ed Stryker

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
George Gill

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmYjk4YjZjMjFlY2YwN2JkMGI4N2MxOGZiMDZiM2U5ZDo3OmRlYWU6NjY3ZTczMjk3NzU0Yjg4NzlhMzcxNThkNTE2NDNiZGZiYjJmZWQ2NTg4ZTUyMmE0MWZiNGIxZjM0ZDM5YTJlZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I would love to be able to continue to buy groceries. I am a widow living on Social Security and it is becoming almost impossible to do so with all the rate hikes and price increases and benefit decreases everywhere.

I have worked hard since I was 13 years old. What do I have to show for it? I am 72 years old and I had to ask for grocery store gift certificates for my birthday. It really is coming down to being able to eat - or not - for so many of us.

If you are not going to intervene on our behalf, who is? It looks as though deregulation for these utilities is coming down the pike. So why do they need a rate hike at all?

We are not blind to the games that are being played here. They ask for an enormous increase knowing that you won't grant it, but you will give them a significant hike anyway and you all will tell us how lucky we are that it wasn't as high as it could've been. How long did you all have to discuss this public domain issue behind closed doors before you came up with this tidy little plan?

I am already keeping my thermostat set at 77 in summer, 67 in the winter, so I am either sweating or freezing. I have to wear gloves in my house. I only increase the thermostat if my grandchildren are coming over, and even then I have to worry about it. How much lower, or higher, do I have to go? The elderly cannot easily tolerate extremes of heat and cold, you know.

Are you bunch of lifelong Republican attorneys and other high-faluting Republican professionals, godly church-goers all, just going to tell us it's too fucking bad, you're going to approve a rate hike anyway? If history serves, then yes, of course. It has become downright dangerous to row against the tide, hasn't it? Trump/Braun could strike you down from your high-paying appointments…$160,000 per year!?…my God in heaven…if you don't Sieg Heil. No wonder you all have been on the commission for so long! You all scratch each others' backs and get richer and we get even poorer. That is the point, isn't it? How proud you must be. You all probably don't even know what your electric bill is. Your accountants probably pay it.

One commission salary alone would pay for my meager groceries for 33 years. Not sure about my electric bill, but it would be a lot.

It’s time to put your foot down and say NO. Period. Shame on you if you don’t.

My name is Janet Helms, and I approve this message. I live at 4715 Dorkin Court, Indianapolis. My phone number is 317-694-4422.

Respectfully,
Janet Helms

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpmOGRkNzEzMjIyZjQ4ODdmMGRhMTM0Mzg0ZTI3NjE0Njo3OjIiZWM6MTQ4N2IwZjgxNzFjYjNlOTE2YzhmMDcxODI0OTJhMmNiY2FhMzIyNTk1ZjBhOTUyNTc5YzhmZmNjZTRmNTM4NDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Jerry Grant

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Krista Horn

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Kristi Harris

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozNzM1MjZkMmJkOGU4MjkwY2FkZDZlOTFmZTM4ZmViZjo3OmUzNzc6MjQ0ZjE4ZDdlMzczOWE3N2VjMmNiNzQ4MGRjZWM3MjhhNTIxMjUzZDY2MGNlZGM1ZDlmMDcyNWZmZWZiYjMwYjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Laura Kelley

LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Linda Jones

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Linda Riddle

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2NWM5ZGUyMjkwYzM2MDU0MTY0MjUxODQ0NGUzNjE2ODo3OjlkYmY6MDk4NjkyZjAzYmU3N2FlNjE1MTlhNzEyYTY4ZTNlNTQxZDNjN2E2Y2RiZGY5MjVjNmUxZTlmYzA3NWRmYWYxNzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozYjM1NWNiZmJhMmRjZjZkMjdmYmYzZjIxYzhhNDVjMTo3OjAyNWY6NzI5NDMzMjJlNjQzN2E1N2M1YTJhOGFmYjg5N2E3MmQzODIxMWYzMTg4MmFmNmExODE3MmIzMjQ5ZTlkMjAwZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Mary Eaton

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Mary Egan

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Mary Johnson

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpkM2QyOGY5ZWRlZDNhMzkwMzY1YTU2MDIwNDE2ZmI2Zjo3OjhmYjM6ZTQzMjNiYjY0ZDc5N2I2MzkzZDNkMjZmY2I5OTU1NGU5ZTc3MjAwNzc0MTViYzY1MDdlYjUyNjlhOTdmMjhlZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplMGI4OWE0MGI5NzM1ZjE5OWFhMmVhNTU4YmMzNmVhMzo3Ojc4OGI6ZjYzNDRkYmFhNTVjNDMyZTkxNjc5YzUyOTJkMDQyYmY2Yjg3MDg4NGMxZTA4ZDY2YmNmNTFhZjFjMjNiYjZmZDp0OlQ6Tg).

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear

I'm writing to oppose AES Indiana's proposed rate hike. While the company says it's facing rising costs, so are everyday customers. Groceries, rent, and medical bills are all going up, and adding another $30 a month to our electric bills makes it even harder to keep up. This increase hits residential customers the hardest, and many of us simply can't afford it.

I urge the IURC to look very closely at the proposal from AES Indiana in Cause No. 46258, and please protect residential customers from already too-high electricity rates.

Thank you.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo1MmVlYWQyMzA4NjQ4ZGJiODc4NzU1OTVhZDY5YjRmZDo3OjkzNmM6NWQ0MTY1NjYyYWUzOWY3NjkxZmI1OWRiZDkyOTk0ZjkxZTAyNDMwNGQ3OTdlM2NlM2E2M2Q2ZTgwNGQzMTJlMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Robin Goodwin

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Robin Stroke

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Ronald Basey

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Shelly McKee

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Susan Cox

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplOTg0ZDFjMTk3Mjg0ZDBkYTQwNDE0NTc2MzA0NTg1Nzo3OmM4YmQ6NTdmY2RhYWVkNDZjYjkxOWJkZGI4NWE0M2RhODc4NzJjMDY4ZTFkNTJmODIxNGYzOWExODhkYjViNDVjNTJlZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3MWI4NzhiZTgzMTdkMmU0NGVlZWM0MDUwMjNjNTdiNTo3OmJmMjA6MTcxODE4M2ViZWY5YzljYWVmNzJkN2M2OTc0MzExYTU1MWUzM2EyYjUyZWFkMThjMWUzZDhmM2Q1YjNiZjc1Yzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Tiffany Morrison

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Tiffany Rose

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Tiffany Smith

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Yolanda Garrard

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2YmFhNDgxNGE0NjVmNTU1NzJjYjRhOTMyN2UzOTQ5ODo3OmViZGM6M2I0NmM2NjU5YTgxZGUzN2E0MDA2NGEzYTE2MTM4ZDJjMWI3NmE4MWI0NTRmY2EwMGNmOTc1Y2E5Nml2ZTc0Mzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo5YmVjMzM2ZDI0MTkwZTg1Njk3ZWZkYzc3NWFmODNiNTo3OjBkMTA6NjJmM2M4ZDRmOWQ4ZDEwZjYxZTczODQzYWUyMmNlZjg1ZmEzMWUxOWE1Mzg0ZDZjOTQ2NjJkMDk5MmJkMjQ5ZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3MjlkNjM0ZWQ0MTI1YmM3MzdmNWNhNzA3M2JkNDIyNzo3OjgwOTI6NmUzOGRmMzIwYmFhNGVlMjc1MWRkMjFhYzU3ZjIzYjdkZjQ0YmFhOTk2Mjk5ZTNmZTk2NTZjYTBkZjBhY2IyMDp0OlQ6Tg).

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Brandi Garland

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Carolyn Soellinger-Wright

In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Coral Mediger

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Courtney Peacock

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoxZmRlY2Y3MTJjNWZhZTcwMjVmZmRjOWEyOGZmZTk2NDo3OjUxMmE6YjYyNmJiOTQyOWNmOWVhMjhlYTk0MjBhOTBkMThlYTUxNzAxYTliOTQ0YzM2ZDRkYmM4Y2VmNmJhZTBiZGMwZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Debbie Dale

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyMzI4OTU0YjBmOWIxZjkzMGE0NGQxYWYxZmQ2YmQ4YTo3OjBjM2U6OTRjNmNkMzA0ZGU0Nzc1NWRmNDc4OGE5YmRkOWE4ZGJkMmM5NmFhZDY0MmQ3Mjk1YTc3MDIyMjA5Zjg1M2E2Mjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
DENNIS Scott

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Gabriela alvarez

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0ZDYxNWIxZWFkZWI3MDZiNzg5MzI5NjM5NTdmNDI2Yzo3OjEyMzU6Y2IxMjg1OGFjNDUxOTljYTc1M2NlMWI0MTZiNDBhOTg1MDdkYzg1MGUwMDE4ZTJlZTYxMjBjMDMyZTk4N2U3NDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Jane Endsley

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzoyMTI4YjVhZmUxMDZlZjY0MGM3YmIzMzcxMDNhOTUwMTo3OjNkZGQ6ZjMzM2FkZTJmNWY4NDM5MTU4ZDE2NDVhYTYwOWFmODFjNTE5NWI4ZDk2NjJjYmM2ZjUyNzNkOWM4MDQ0NWQ4Yzp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Janice McWhirter

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo0MDE2MTAzMzJmZmQ3YTMyNjY5YzNiZGNhMWYzNTkwNTo3OjFkNmU6ZTUxNzFlOTE1MWFmYTRlYmU5NDc0NDZhZGNlZjgzM2RhNjVhMmEyYjc2NGJhMmFhYmUzYjAwMDQ0ZTBjOWI4Yjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2YmFlMmI1N2M2ODU2YjRlOGRkNjZmZjAzODU3OTE5Yjo3OmZjMmY6ZDI5NzJkY2QzZWFjYzhmNGMyMGVjOTIyNzYyY2QxYWFjMzZjMmY2ZGUzMTRhNmU2ZDg5YzkzMTMxYzBjOTU5NTp0OlQ6Tg).

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Julia Hosek

To: UCC Consumer Info
Subject: Kelly Hamman - AES Indiana should put customers over profit
Date: Thursday, August 14, 2025 11:34:35 AM

EXTERNAL EMAIL: This email was sent from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Office of Utility Consumer Counselor,

As an AES Indiana customer, I know that my neighbors are already struggling with rising electric bills. The last thing we need is yet another bill increase from our electric utility. Please hear me and all the other AES Indiana customers asking you to put our needs over more profits for AES. I urge you to reject this new rate hike.

AES Indiana's request to collect an additional $192.9 million every year is unconscionable, especially after having another rate increase approved just last year. Combined with other already approved rate hikes, the total increase to customers will be $468 million by January of 2027. Indianapolis families can't foot that bill. We shouldn't be paying for AES to increase their profit by 60%. We shouldn't be subsidizing large commercial and industrial customers who can afford to pay more for electricity. We shouldn't be penalized with higher rates for using less electricity.

Indiana's Five Pillars for energy policy, established by HEA 1007 from 2023, requires that Indiana electric ratemaking decisions must consider affordability. If approved, this rate hike would push the average monthly residential customers bill to nearly $180 per month by 2027. That's nearly $70 more per month than the average bill in 2020, and more than $30 more per month than today. That doesn't sound affordable—especially not when families are already making impossible choices about how to make ends meet. Electricity service is a basic need for living safely and securely. Families shouldn't have to choose between paying the electric bill and putting food on the table.

Instead of prioritizing their profits over their customers, AES should be working to meet our needs. That would mean empowering customers to control our bills and provide benefits to the local electric grid with energy efficiency, rooftop solar, or other distributed energy resources. It would mean helping customers at high risk of power outages benefit from resilient solar and storage systems that can also benefit the local grid. It would mean allowing for customers to save with community-owned community solar projects and allowing tenants in multifamily properties to benefit directly from on-site solar. And it would mean optimizing the local distribution grid to benefit from customer-sited energy resources—and fairly compensating customers for the value they add to the grid.

Please stand up for customers like me and reject the latest rate hike request from AES in Cause Number 46258.

Sincerely,
Kelly Hamman

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Kelly Williams

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzpjMmU3MzczOTNjZjAzYmQxZjhlYjA1NTJiNmU1MDg1MTo3Ojc4OGQ6YTJlN2RlNzk4ZTgxZDYwNmM1MTM2ZWE4NzY2YTE4YWY4ZjcyNDQzMjRjODc0MTVhMjgyZjE3NGJjMDM1ZjFmZDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, to see AES ask for an even higher profit margin, they need to budget long term for the sewer upgrades and maybe the state should help especially because AES already have the highest profit margin out of all large electric utilities in Indiana.

AES in the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems I was one of them due to system upgrade integration rollout of their new billing system.

Please reject AES's request for higher ROE or reduce the increase profit amount!

AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - this is WRONG. Telecommunication businesses pay higher rates than residential and are on usage discounted rate plans.

Has IURC looked into more competition?

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027. This amount is too much.

Folks are already stretched thin as it is and we have a growing senior population on a budget who can't afford to have our AES bills go up by another $30 a month!

Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,

Linda White

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzozMzdiODVkZDM4ZWEzMTI5MDQyNzBjNGU5MmM4OGE0Zjo3OjA3YWE6MGUzNWQ4ZGRkNDk1NThiYThjMmMxN2I5NDMyYTRmZmQzMWE5YWQ4ZjgyNzkyZDE0OTBiNWVhNTQyZDcwMGIzYjp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Lindsey Cox

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Lorraine DiLoreto

In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027. I al a single person resident household and my AES bill is already over $300 a month on BUDGET BILLING!

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Mary Magee

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo3ZGU2OTU1MzYwYWI2MzNmYjY4ODBmYzQ2MmM2MzQ0YTo3OjUyMTM6ZWY2YjhkM2RmNzkyY2ZiNjdhNmRjNzUyOGJjYzYyZjlkZTk3NDI5YWU3MzBmMWMxMzZlNDEyMWFiMGJhNjdkNDp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Matthew Gordon

I am a senior citizen living on a fixed income. These rate increases mean I have to cut back on items that are needed, such as my air conditioning, maybe not being able to afford certain medications and or affecting what we are able to spend at the grocery store.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

Why are we paying more than we did when IPL had control of our electric? I know my usage isn't any more. If AES is making a profit, why do they need to raise our rates? We also shouldn't have to pay additional for a new data center. Let them pay the cost. We didn't ask them to possibly build where they want to.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Noa Davis

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Ollie Brown

Dear

I'm writing to oppose AES Indiana's proposed rate hike. While the company says it's facing rising costs, so are everyday customers. Groceries, rent, and medical bills are all going up, and adding another $30 a month to our electric bills makes it even harder to keep up. This increase hits residential customers the hardest, and many of us simply can't afford it.

I urge the IURC to look very closely at the proposal from AES Indiana in Cause No. 46258, and please protect residential customers from already too-high electricity rates.

Thank you.

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzplZGI1NjlkMDA0NDM0NmRmZWExY2NjZjU2MzJlMGUzODo3OmU4MTQ6ZDVjNjMyNjY3NzNhZjBmNjVmNjJjMThiYWIyY2JjNDFhMWU1OTFmZTAyZTVmNWI2ODMzNjgzYWM2YWU1NGRiODp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Patrick Cangany

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Rebecca Sparks

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Regina gemmel

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo4OGU2YmQwNTQ5ZDc0MmZmZDFmNjAwMjRjZGM0ZDVlZTo3OmU1ZjY6ZDkwZmJmMTg3M2ZlYml5ODIyZjg0YWQyM2JiNGZkZmU3YTRlNjE4NzM5NWEzYTQyZTVjYjA2ZGY5NWViYzViZTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

I live in a small condo community of 65+ old citizens. Many of us are widowed and only have one SS check. You are making it impossible for us to be somewhat cool in the summer and warm in the winter. I set my thermostat at 68 in the winter and 76 in the summer and STILL have a HUGE bill.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,
Ruby Butler

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Scott Crossen

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2MjQzZmVjYTM4YWVmYTA4ODQzNjg1YzNmZWU4M2U5NTo3OmNlN2I6NDI5NzRjZDQzYTkwNmNkY2JhZWUzZmUzMjhlMGQwOGEzZDJhMWI1NGM2ZGUyZTMxZjk1YTUxMWUyNDI0NzNiMTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

As an over 50 year hardworking citizen, now retired and on a fixed income, I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwci.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlbZZpbmRpYW5hOmM6bzo1MjY1MjY1NzkxZTVkMTRlNTE3YzJkYzg2OGQ2OWZjMzo3OjhmNjk6YjdmYmZiMTVmNWJkMmFkOWQyNjIzNzllN2JiZGVhOWMxZWY2ZjllMTQzNTVlYzRhYTg1NDk4M2ZmMTExYjg3NTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their extreme request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Susan Seibel

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I urge you to reject AES's new request to collect another $192.9 million every year. As you likely know, this new rate hike - which AES filed for barely a year after their last rate increase was approved - is not the only increase that will raise our bills in the next few years.

If this new rate hike is approved as filed by AES, the overall increase hitting customer bills is an astonishing $468 million by January 2027.

AES Indiana is doing just fine as a subsidiary of AES Corporation, a global energy company that serves customers on 4 continents. It's infuriating that AES is being allowed to use their Indiana customers as cash cows, especially as over a third of Central Indiana households are living in or near poverty, according to United Way (https://protect.checkpoint.com/v2/r01/___https://www.uwcl.org/blog/updated-alice-report-2024___.YzJ1OnN0YXRlb2ZpbmRpYW5hOmM6bzo2ZGEzYzkyN2IzMzEyZmQ3MzRiYjRhZDM0MmJiZDNmMzo3OmFiOWI6NTE0ZDE0NWFkZjkwODc4ZDMyMjlMTg5NmMxZjViOTg1NzBkOWM2YzZiMjk5ODU3MTZkNTcyOGI3NDQ0ODVhYTp0OlQ6Tg).

How can AES possibly justify asking us to pay for a staggering 60% increase in their profit? AES already has the highest profit margin (ROE) out of all the investor-owned electric utilities in Indiana.

If their obscene request for a 10.7% ROE is approved, AES's annual profit will increase from $260.0 million in 2024 to $417.2 million in 2026. As members of our community are forced to skip buying food and medicine to afford their AES bills, it's immoral and reckless for AES to demand such a substantial increase in their profits.

Adding insult to injury, AES also wants us residential customers to pay a higher increase than large, industrial customers, like data centers, are being asked to pay. I doubt very many industrial customers are skipping meals to afford their AES bills, and I certainly don't think we should have to subsidize the electric bills for these large corporations.

Please stand up for Hoosier households and reject AES's request to hike our electric bills in Cause Number 46258.

Regards,
Virginia Fletcher

Dear Counselor Bill Fine,

I am writing to share my firm opposition to AES's request to hike our electric bills yet again. If this request is approved as filed by AES, customers will experience a shocking $51 bill increase between July 2023 and January 2027. We can't afford this. Please reject AES's request to raise our bills in Cause Number 46258.

I am disappointed that AES wants to raise our fixed charge and continue using declining block rates. While these strategies may make sense for AES's bottom line, they don't make sense for us as customers. In fact, higher monthly fees and paying a higher rate per kilowatt hour for using less energy makes it harder for us to control our electric bills and disproportionately harms our most vulnerable low- and fixed-income neighbors: seniors, people with disabilities, households with children, and other vulnerable populations.

In addition, with the federal Energy Assistance Program (LIHEAP) under threat due to proposed funding cuts and recent administrator eliminations, it's concerning that AES is not proposing any new programs to assist our most vulnerable households. LIHEAP is the primary form of meaningful electric bill assistance available to Hoosier households. Without it, many of our neighbors will be put in dangerous positions. All Hoosiers deserve uninterrupted access to essential services. No one should have to choose between paying for food, shelter, healthcare or utilities.

As more and more members of our community have a harder time affording basic necessities, I urge you to reject AES's request to hike our electric bills. We cannot afford to pay any more on our electric bills, especially for a 60% increase in AES's profits.

Please stand up for Hoosiers and reject this rate hike request!

Thank you,

Dear Counselor Bill Fine,

I am very concerned that my community will not be able to afford another rate hike from AES.

The number of households living in or near poverty in Central Indiana continues to grow, according to United Way. In Marion County alone, over 1 in 3 households live in or near poverty.

As a growing number of our neighbors struggle to make ends meet, it is aggravating to see AES ask for an even higher profit margin, especially because they already have the highest profit margin out of all large electric utilities in Indiana.

AES does not deserve more profit. In the two years since AES filed their last base rate case in June 2023, thousands of AES customers have endured high temperatures without electricity for multiple days, and 60,000 customers experienced serious billing problems due to disastrous rollout of their new billing system.

Please reject AES's request for higher ROE and please reduce their profit dramatically!

In addition, it's disheartening that AES wants residential customers to subsidize large corporate utility bills by paying a higher portion of the increase than commercial and industrial customers are being asked to pay - especially considering all the other rate hikes that will hit customer bills in the next few years.

If AES's request is approved as filed by AES, our monthly electric bills will increase by a shocking $30.32 by January 2027.

Folks are already stretched thin as it is. We can't afford to have our AES bills go up by another $30 a month! Please stand up for residential customers and reject AES Indiana's request to raise our electric bills in Cause Number 46258.

Respectfully,
Wanda Johnson
