**SETTLEMENT TESTIMONY OF OUCC WITNESS CARLA F. SULLIVAN  
CAUSE NO. 45533  
CITY OF BLOOMINGTON**

**I. INTRODUCTION**

1 **Q: Please state your name and business address.**

2 A: My name is Carla F. Sullivan, and my business address is 115 West Washington  
3 Street, Suite 1500 South, Indianapolis, Indiana 46204.

4 **Q: Have you previously submitted testimony in this proceeding?**

5 A: Yes. My direct testimony was submitted as Public's Exhibit No. 1.

6 **Q: What is the purpose of your testimony?**

7 A: The purpose of my testimony is to summarize and support the accounting  
8 adjustments and overall revenue requirement set forth in the Joint Stipulation and  
9 Settlement Agreement ("Settlement"). I also present support for the agreed annual  
10 capital project status reporting, debt true-up reporting, and Bloomington's  
11 commitment to file a rate case on or before December 31, 2027. The Settlement is  
12 the result of an arm's length negotiation between Petitioner, the City of  
13 Bloomington ("Bloomington"), the Indiana Office of Utility Consumer Counselor  
14 ("OUCC"), the Trustees of Indiana University ("IU"), and the Washington  
15 Township Water Authority ("WTWA") (collectively, the "Settling Parties").

16 The Settling Parties have agreed to an annual revenue requirement of  
17 \$20,903,711. The Settlement provides Bloomington a 18.26% increase (\$3,100,542  
18 annually), implemented in two phases, which will ensure Bloomington the financial

1 means to provide safe, reliable water service. OUCC witness Jerome Mierzwa  
2 addresses the cost allocation and rate design aspects of the Settlement.

## II. REVENUE REQUIREMENT

3 **Q: Please describe the agreed revenue increase.**

4 A: The Settlement reflects an agreed compound increase to Bloomington's annual  
5 operating revenues of 18.26% or \$3,100,542. The increase will provide  
6 Bloomington an opportunity to fund its operating and maintenance expenses, taxes  
7 other than income taxes, payments in lieu of taxes, extensions and replacements,  
8 advance meter infrastructure and solar leases, and current and proposed debt  
9 service.

10 The increase will be implemented in two phases. Phase One will occur upon  
11 a Final Order in this Cause and will result in an 8.39% or \$1,424,754 annual  
12 increase to Bloomington's current operating revenue. The Phase One increase is  
13 designed to meet Bloomington's increased operating and maintenance cost,  
14 extensions and replacements revenue requirement, interest payments on additional  
15 debt service, and payments for the advance meter infrastructure and solar leases.  
16 The Phase Two increase will be implemented on January 1, 2024 and will increase  
17 annual operating revenue by 9.11% or \$1,675,788 over Phase One. The Phase Two  
18 increase is designed to provide Bloomington additional revenue to meet its  
19 extensions and replacements revenue requirement and to fund additional debt  
20 service. The Settling Parties agree the increase is reasonable and necessary for  
21 Bloomington's continued provision of safe, reliable water service.

1 **Q: How does the Settlement differ from Bloomington's petition to increase its**  
2 **rates?**

3 A: The Settlement reduced Bloomington's case-in-chief revenue requirement request  
4 by adding a revenue offset adjustment, adjusting test year operating revenue to  
5 account for growth, and decreasing Bloomington's operating expense adjustments.  
6 Additionally, the Settling Parties agreed to reduce Bloomington's proposed annual  
7 debt service and requested extensions and replacements allowance. The Settlement  
8 also eliminates over half the solar lease expense from rates. A short summary of  
9 each item follows:

**A. Revenue Offset**

10 **Q: What revenue offset was agreed upon?**

11 A: The Settling Parties agreed to offset the total revenue requirement by the amount  
12 Bloomington can reasonably expect to earn in interest and non-utility income in  
13 future years. The total revenue requirement was decreased by \$73,060 (\$65,310 in  
14 interest income and \$7,750 in non-utility income).

15 **Q: Is the adjustment in ratepayers' best interest?**

16 A: Yes. Decreasing the total revenue requirement by a utility's interest and non-utility  
17 income follows traditional ratemaking theory and produces lower rates.

**B. Operating Revenue Adjustment**

18 **Q: Please describe the adjustment to test year operating revenue.**

19 A: Bloomington's test year operating revenue was increased by \$98,153. The increase  
20 represents the additional operating revenue Bloomington can expect to earn in  
21 future years due to customers being added to the system during the test and post-

1 test years. The Settling Parties agreed to a conservative adjustment of \$98,153,  
2 increasing test year operating revenue from \$17,704,598 to *pro forma* present rates  
3 operating revenue of \$17,802,751.

#### C. Operating Expense Adjustment

4 **Q: Please explain how the Settlement adjusts Bloomington's operating and**  
5 **maintenance expense.**

6 A: Bloomington's petition requested an aggregate increase of \$212,591 in operating  
7 and maintenance expense. Operating and maintenance expense per the Settlement  
8 is \$76,779 lower. The resulting revenue requirement for operating and maintenance  
9 expense is \$9,791,599, an increase over test year of \$135,812 ( $\$212,591 - \$76,779$   
10  $= \$135,812$ ).

11 **Q: What is the primary cause of Bloomington's requested operations and**  
12 **maintenance expense increase?**

13 A: Bloomington's test year did not include a payment to the City of Bloomington for  
14 health insurance. The payment, \$428,220, was made just a few days after the test  
15 year ended.

#### D. Average Annual Debt Service

16 **Q: What is Bloomington's average annual debt service under the Settlement?**

17 A: Bloomington's average annual debt service consists of current debt service and  
18 future debt service. Current debt service is \$5,278,299. As agreed in the Settlement,  
19 Bloomington's future borrowing will not exceed \$17,200,000 with an interest rate  
20 not to exceed six percent (6%) per annum. The Settling Parties have agreed that

1           Bloomington's forthcoming financing will fund capital improvement projects that  
2           are necessary for Bloomington to continue to provide safe, reliable water service.

**E. Extensions and Replacements**

3   **Q:    Please explain the Settlement's adjustment to extensions and replacements.**

4   A:    Bloomington requested a Phase Two extensions and replacement budget of  
5           \$3,866,500. The Settling Parties agreed to fund a portion of its requested extensions  
6           and replacement budget through its proposed debt issuance, resulting in a  
7           Settlement extensions and replacement budget of \$3,700,000.

8   **Q:    Is the agreed allowance for extensions and replacements reasonable?**

9   A:    Yes. Extensions and replacements are required in order to maintain capital assets  
10           in their proper working condition. In my opinion, the settled extensions and  
11           replacements revenue requirement affords Bloomington enough cash funding to  
12           maintain its system without overburdening ratepayers. By decreasing  
13           Bloomington's extensions and replacements revenue requirement and increasing  
14           its debt financing to cover the difference, long-lived assets are funded using long  
15           term debt.

**F. Solar Lease Payment**

16   **Q:    Did the Settling Parties agree to an annual Solar Lease payment?**

17   A:    Yes. The Settling Parties agreed Bloomington's water utility is responsible for  
18           \$79,683 in solar lease expense annually, which is half of Bloomington's originally  
19           requested amount.

### **III. REPORTING REQUIREMENTS**

1 **Q: What reporting requirements does the Settlement stipulate?**

2 A: The Settlement contains detailed agreements on Bloomington's annual capital  
3 project status reports and a debt true-up report that will also show Bloomington's  
4 calculation of its Phase One and Phase Two rates. The Settlement also includes  
5 stipulations regarding when Bloomington will file a new rate case and agreed  
6 protocols regarding Bloomington's next cost of service study. OUCC witness  
7 Jerome Mierzwa addresses the cost of service study terms in his settlement  
8 testimony.

#### **A. Annual Capital Project Status Reports**

9 **Q: What is the purpose of the agreed capital project status reports?**

10 A: While Bloomington included its capital improvement plan in its rate case filing as  
11 Attachment JZW-1, the Settlement acknowledges that Bloomington has discretion  
12 as to which capital projects it completes each year. The agreed capital project status  
13 reports will provide information to the Settling Parties and Commission concerning  
14 which capital projects Bloomington completed and at what cost. The report will  
15 include the final cost of each project and a detailed breakdown of the costs,  
16 including soft costs.

17 However, Bloomington agrees to prioritize the projects identified in  
18 Attachment JZW-1 unless, in Petitioner's discretion, unanticipated and unforeseen  
19 events arise making an unidentified project necessary to complete in order to  
20 continue the provision of safe drinking water.

1 **Q: When will each capital project status report be filed?**

2 A: Bloomington will file an annual status report within sixty (60) days of the end of  
3 the calendar year. The status filing will continue until a new rate case is filed.

**B. Debt True-Up and Phase Two Rates**

4 **Q: According to the Settlement, when is Bloomington required to file a debt true-  
5 up report?**

6 A: Bloomington must file a debt true-up report within thirty (30) days of closing on  
7 the debt issuance.

8 **Q: What is included in the agreed debt true-up report?**

9 A: The true-up report will explain the terms of the new debt issuance. the interest rate,  
10 and total balance. Bloomington will also provide an itemized account of all issuance  
11 costs, an amortization schedule, a calculation of the rate impact, and a revised tariff.  
12 The rate impact calculation should be presented in the same manner as the agreed  
13 schedules.

14 **Q: Are the Settling Parties given the opportunity to object to the true up report?**

15 A: Yes. The OUCC and any interested intervenor has fourteen (14) days from the filing  
16 of the true up report to file an objection with the Commission. Bloomington will  
17 have fourteen (14) days to respond to any objections. Thereafter, the Commission  
18 will resolve issues through a process it deems appropriate.

19 **Q: Is action required if the effect on rates is immaterial?**

20 A: If the true-up results in an increase or decrease that is immaterial, the Settling  
21 Parties may agree, in writing, that the true-up need not be implemented.

1 **Q: When does the financing authority for the agreed debt issuance in the Cause**  
2 **expire?**

3 A: The financing authority agreed to by the Settling Parties expires twelve (12) months  
4 from the date of the Final Order of this Cause. Any remaining authority cannot be  
5 used after the expiration.

**C. New Rate Case**

6 **Q: When must Bloomington a file a new rate case?**

7 A: Bloomington must file a new rate case no later than December 31, 2027 so that new  
8 rates are available in 2029.

9 **Q: Why must Bloomington file a new rate case?**

10 A: Bloomington must file a new rate case to remove the 2020B Refunding bond and  
11 any other bonds which have been fully paid off and have no corresponding expense.  
12 The rate case will be accompanied by a cost of service study as summarized by Mr.  
13 Mierzwa.

14

**IV. CONCLUSION**

15 **Q: Is the Settlement fair, reasonable, and in the public interest?**

16 A: Yes. I believe the Settlement is an appropriate compromise between all Parties and  
17 balances Bloomington's financial needs with the interests of its customers.

18 **Q: Does this conclude your testimony?**

19 A: Yes.
